

PROJECT OVERVIEW

- The project limit is from Copper Street to Junction Creek along Kelly Lake Road
- The Project includes improvements to existing road, storm and sanitary sewer.
- Roads design uses a Complete Streets approach. A Sidewalk and Cycling Infrastructure will be added to the Road.
- Replacement or rehabilitation of sanitary sewer system as required based on condition.
- The proposed design will improve the illumination along the project corridor.

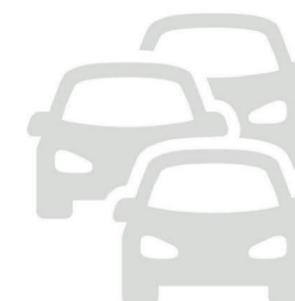

COMPLETE STREETS APPROACH

- In June 2018, City Council adopted a Complete Streets Policy. This means that wherever possible during road construction, the City is aiming to provide more safe and convenient transportation options for people who walk, ride a bicycle and use public transit.
- In 2016, City Council also adopted a sustainability-focused Transportation Master Plan which aims to find a balance between expanding our road network and ensuring that we are making the highest and best use of our existing network. The Transportation Master Plan is also guided by three main principles of building healthy communities and ensuring sustainability and economic vitality for Greater Sudbury.

What is a Complete Street?

A complete street is designed to consider the needs of all users, such as people who walk, bicycle, take transit or drive, and people of varying ages and abilities. While not every type of use or user may be accommodated on every street, the goal is to build a city with a well-functioning street network that supports and sustains our quality of life.

BLASTING

Before Construction:

If blasting is required as part of the construction, you will be contacted regarding a pre-blast survey of your home or business to be completed prior to blasting operations commencing.

The pre-blast survey is conducted by a third-party consultant and is a visual inspection of your home or business and other structures complete with photos and/or video. The consultant will be required to enter the home or business to complete the interior portion of the survey.

During Construction:

During blasting operations you can expect to feel some vibration and hear some noise. The sound following the blast is a shock wave or air concussion, which is harmless. Vibration levels are monitored during the blasting operations by the consultant to ensure levels are within allowable ranges.

After Construction:

Once the work is complete, upon request to the Contractor, the post-blast survey of your home or business can be made available to you.

HOW WILL YOU BE IMPACTED BY CONSTRUCTION?

Traffic Delays:

Residents and Businesses may experience temporary traffic delays or reductions in lanes of traffic to accommodate construction activities.

If construction works will affect driveway access, the Contractor will work with you to ensure that the disruption will be minimized.

Site Conditions:

Noise, dust and vibrations are common occurrences during construction operations. The Contractor will make efforts to keep dust levels to a minimum.

Pedestrian Access:

The Contractor will make every effort to maintain access for pedestrians; however in some situations this may not be possible due to the nature of the construction operation.

Landscaping:

You can preserve items or plantings within the municipal right-of-way fronting your property by relocating them prior to construction.

WILL THERE BE ANY IMPACT OF SERVICES?

Emergency Services:

The City of Greater Sudbury and its Contractors are committed to public safety. Municipal police, fire and emergency medical services will be aware of the scope of work and duration of construction.

Blue Box, Garbage, and Green Bin:

On the scheduled day, the Contractor will bring these items to the limits of the construction site and return them to ensure timely pick up.

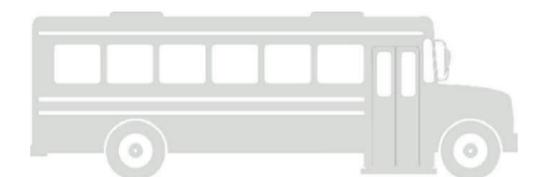

GOVA Transit:

Should transit need to be re-routed due to construction activities, route changes will be communicated on the City's website.

School Busses:

If construction takes place while school is in session and school buses need to be re-routed or pick-up/drop-off locations need to be moved, the School Bus Consortium will notify residents prior to any changes.

Health and Safety: COVID-19

- The City is committed to Health and Safety of residents and businesses.
- We can assure you that our contractors have the obligation to follow all provincial regulations relating to health and safety, as well as all directives coming from the Chief Medical Officer of Health regarding COVID-19.
- The Construction work is an essential service and City will be operating under a state of emergency during construction as precautionary measure.
- The City will be reviewing and updating procedures as required to meet the provincial guidelines.
