MESSAGE FROM THE CAO

Mayor Bigger and Members of Council,

I am pleased to provide the 2019 Budget for your review. This is the City's business plan, describing resource requirements to deliver the variety of daily services residents, visitors and businesses expect from the municipality. It shows a commitment to meeting resident expectations, especially regarding infrastructure renewal, affordable local government services, and investments that transform our community.

Opportunities for engagement, openness and accountability continue to be a focus of the budget process. This is important in strengthening community trust in the organization and building confidence in our ability to produce results. Staff believe this information illustrates how effectively property taxes are used to deliver services that provide not only personal benefits for individuals, but that also benefit the greater good of our whole community.

As an illustration of our commitment to accountability, Greater Sudbury continues to benefit from its Municipal Benchmarking Network Canada (MBNCan) membership. This network of progressive Canadian municipalities provides performance-based comparisons and offers important context for understanding Greater Sudbury's services and service levels. Key performance indicators for most of our services are included in the Operating Budget section of the document.

Last May, City Council provided a number of directions to staff regarding its expectations for the 2019 budget. Direction included requirements for staff to build a plan based on highest priority needs, maintaining service levels, changes in user fees for more sustainable services, and the inclusion of business cases for service level changes. All of this was done within the directed maximum property tax increase of 3.5 %. Also in line with Council direction, staff developed business cases that would provide options to reduce the tax increase to 3.0 % or 2.5 %. The changes that Council could consider for realizing these reductions will be published with the staff report containing the recommended resolutions needed to put this budget into effect.

The 2019 Operating Budget is \$588.9 million. The budget includes estimated operating expenditures and revenues required to allow the City to deliver the service levels approved by Council. For a typical home with an assessment value of \$230,000, the 3.5 % proposed tax increase is the equivalent to an increase of approximately \$103 for 2019 taxes, or \$9 a month.

The 2019 Capital Budget is \$116.6 million, compared to \$263.4 million in 2018. This change is largely attributable to reduced funding opportunities from senior levels of government and the prior year approval of the Kingsway Entertainment District project. This includes capital projects ranging from large road projects, to improvements to our recreational facilities. Fixing roadways continues to be a top priority. Staff is also recommending a 1.5 % special capital levy, which creates opportunities to make an additional \$3.9 million investment to further strengthen the City's infrastructure.

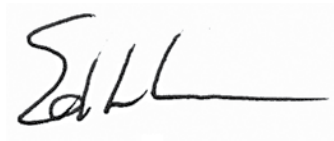

In 2019, the investment into the four Large Projects endorsed by City Council continues. Building on the approved financing plan included in the 2018 Budget for the Kingsway Entertainment District and Arena/Event Centre, the 2019 Capital Budget includes a financing plan for The Junction, which includes a new Art Gallery/Main Library and a new Conference Centre.

Also, Council directed staff to include a 7.4 % user rate increase for water and wastewater services, consistent with the utility's Long-Term Financial Plan and provincial legislation requiring a financially sustainable utility. These critical services are funded by user fees, not by property taxes, and the fees are set based on a requirement for projected revenues to equal projected costs. This is why it is so important that the funding needed to provide the services and maintain the capital assets is appropriately allocated.

As a next step in the budget process, our service partners will present their budgets to Council at the Finance and Administration Committee meeting of January 22. Following budget deliberations at the February 19, 20, and 21 meetings, Council will be asked to approve the budget at a Special Council meeting immediately following conclusion of deliberations.

This document represents significant effort from many staff who contributed their expertise and effort to produce a budget that illustrates the many and complex relationships between services, service levels and costs. I very much appreciate their dedication and commitment, and thank them for their work. I am, as always, thankful to have such a dedicated, talented group of individuals in this organization.

Sincerely,

A handwritten signature in black ink, appearing to read 'Ed Archer', written over a light blue rectangular background.

Ed Archer
Chief Administrative Officer
City of Greater Sudbury

MAYOR AND COUNCIL

Greater Sudbury City Council is the decision making body for the City of Greater Sudbury as an organization. Its decisions impact how municipal services are provided to citizens.

Our Council is composed of the Mayor, who represents the City as a whole, and 12 Councillors, each of whom represents a ward, or geographic area, of the community.

- Mayor – Brian Bigger
- Ward 1 – Mark Signoretti
- Ward 2 – Michael Vagnini
- Ward 3 – Gerry Montpellier
- Ward 4 – Geoff McCausland
- Ward 5 – Robert Kirwan
- Ward 6 – René Lapierre
- Ward 7 – Mike Jakubo
- Ward 8 – Al Sizer
- Ward 9 – Deb McIntosh
- Ward 10 – Fern Cormier
- Ward 11 – Bill Leduc
- Ward 12 – Joscelyne Landry-Altmann

CITY OF GREATER SUDBURY EXECUTIVE LEADERSHIP TEAM

Office of the Chief Administrative Officer

The Office of the CAO leads the City's Executive Leadership Team, provides corporate leadership and strategic support to all City departments and is responsible for supporting Mayor and Council, as well as the organization, in achieving priorities, strategic projects and initiatives to enhance citizens' quality of life.

The office of the CAO also includes the Communications and Community Engagement and Economic Development divisions.

The rest of the organization is divided into four departments, each of which is headed by a General Manager who reports directly to the CAO.

These departments work together to ensure all customer needs are met in a professional, timely manner – to achieve the goals of Council and provide delivery of programs and services to the community.

- Ed Archer, Chief Administrative Officer
- Tony Cecutti, General Manager of Growth and Infrastructure
- Kevin Fowke, General Manager of Corporate Services
- Joseph Nicholls, Interim General Manager of Community Safety
- Ian Wood, Interim General Manager of Community Development
- Ed Stankiewicz, Executive Director of Finance, Assets and Fleet
- Eliza Bennett, Director of Communications and Community Engagement
- Meredith Armstrong, Acting Director of Economic Development

2018 BUDGET RECOGNITION

The Government Finance Officers Association of the United States and Canada (GFOA) recognized the City of Greater Sudbury with a Distinguished Budget Presentation Award for its 2018 Annual Budget.

The award is considered the highest form of recognition in government budgeting. To qualify for this international award, the City's budget document met a number of guidelines for its effectiveness as a policy document, a financial plan, an operations guide and a communications tool. This award is valid for a period of one year. The 2019 Budget document continues to improve and conform to program requirements, and will again be submitted to GFOA's award program.

The GFOA is a professional association that recognizes government efforts to make information available to the public and encourages process improvements in the areas of financial reporting, accounting or budgeting. There are more than 1,600 participants in the GFOA's Budget awards program in the United States and Canada.

2019 BUDGET HIGHLIGHTS

The proposed 2019 Budget continues building on the progress made in previous years to reflect the service priorities of the community. It includes an array of services that make significant contributions to the community's quality of life.

Greater Sudbury is a Low Cost Service Provider

The City benchmarks its performance and shares the results with the community in an open, transparent manner. Comparisons with other communities consistently show Greater Sudbury is one of the lowest-cost cities in the province among cities with populations in excess of 100,000 residents. The City's services and service levels typically match those found in other similar cities.

Infrastructure Renewal is a Top 2019 Priority

City Council has identified infrastructure renewal as a top spending priority. The 2019 Budget invests \$75.4 million in infrastructure to renew and maintain roads, bridges and facilities. This encompasses a \$46.6 million investment in our road network, including a \$15.6 million investment to complete several bridge and culvert rehabilitation projects, and \$28.8 million in facility renewal work.

Keeping People Moving All Year, Any Way They Want

In 2019, there is an \$18.5 million budget for winter road maintenance, up from \$17 million in 2018. Additionally, \$1.1 million is budgeted for sidewalk snow clearing. The City's service standards for its roads in winter are among the highest in the province. Combined with plans for improving transit routes and service levels, residents will have a variety of good choices for moving around the city throughout the year.

Safe Neighbourhoods and Public Spaces

Greater Sudbury Police Services helps keep our community safe. Its 2019 Budget increases by \$2.2 million and includes a plan to hire four additional police officers to support downtown safety initiatives and increased traffic enforcement.

Making Progress on Transformational Projects

In 2016, City Council supported four Large Projects that promise to transform the cultural and economic profile of our community. A new Arena/Event Centre, a new main Library/Art Gallery, a new Convention and Performance Centre (The Junction) and Place des arts, a new Francophone arts centre, will all see significant progress in 2019.

Affordable Local Government

While City Council directed staff to develop a budget with no more than a 3.5 % property tax increase over the previous year's taxation level, it also directed staff to identify potential changes that could reduce the tax increase to 2.5 %. The recommended budget and service plans are presented in this document. Potential service changes that could reduce the tax increase will be published as an appendix to the staff report that will be considered by the Finance and Administration Committee on February 19, 2019.

Nonetheless, like most Canadian cities, Greater Sudbury has significant asset renewal needs that will not be fully addressed with the level of taxation recommended in this budget. The City's Long-Term Financial Plan calls for accelerated asset renewal by establishing a special tax levy. If approved, a 1.5 % special levy would also be incorporated into 2019 plans to further address long-standing asset renewal requirements.

WHAT A 3.5 % + 1.5 % INVESTMENT REPRESENTS FOR TAXPAYERS

Current Value of Your Home	\$230,000	\$350,000	\$450,000
Annual			
2019 Property Tax increase - 3.5 %	\$103	\$156	\$201
2019 Property Tax increase with special capital levy - 5.0 %	\$146	\$223	\$287
Monthly			
2019 Property Tax increase - 3.5 %	\$9	\$13	\$17
2019 Property Tax increase with special capital levy - 5.0 %	\$12	\$19	\$24

PROPERTY TAX ALLOCATION

Where do your property taxes go?

DID YOU KNOW?

Greater Sudbury is one of the most affordable cities in Canada. The cost of providing the numerous services residents rely on every day is over half a billion dollars. About 46 % of the funds to provide these services comes from property taxes.

Some of these services include:

- Collect waste from 60,000 homes weekly
- Respond to more than 45,000 calls to police, 27,000 calls to paramedic services and 4,500 calls to fire services annually
- Transport 21,000 patients annually through paramedic services
- Conduct 600 fire prevention inspections and 100 fire education visits annually
- Maintain about 3,560 lane kilometers of road
- Maintain and operate 255 sports fields and courts, 16 beaches, 14 arenas and five pools
- Provide long-term care to 433 residents at Pioneer Manor

KEY INVESTMENTS IN 2019

Roads

The 2019 Budget includes a \$46.6 million capital investment in road construction and repair to improve the city's transportation network.

An investment of \$15.6 million will result in the completion of several bridge and culvert rehabilitation projects throughout the community.

The budget provides funding previously approved by Council toward the Maley Drive Extension (\$2.3 million) and Municipal Road (MR) 35 (\$1.9 million) road projects. Construction of the Maley Drive Extension is in progress, and detailed design and construction for MR 35 is underway.

Winter road maintenance

This year, \$18.5 million has been allocated to winter road maintenance, up from \$17 million in 2018. In addition, the City will replace four snow plows to ensure current service levels in our community are maintained.

Community

Investments in recreation include funding for building upgrades at the Howard Armstrong Recreation Centre, Dowling Leisure Centre and Gerry McCrory Countryside Arena. Other work includes artificial turf installation and parking lot improvements at the Terry Fox Sports Complex.

Environment

Several investments in watermain and sanitary sewers will replace aging infrastructure and improve quality of service in relation to water distribution and wastewater collection, as well as protect our environment.

The City will initiate the McNaughton Terrace Treatment Facility project and complete various subwatershed planning studies and storm-related projects.

In addition, there are several investments relating to landfills and waste diversion at locations including the Sudbury, Azilda and Hanmer facilities, as well as the Recycling Centre.

Get involved in the process

The annual municipal budget process is the City's annual business plan. It is important that the budget reflects the priorities of the residents of this community.

The City is asking residents to share their ideas about the 2019 Budget spending through an online input tool and survey, which allow participants to indicate their spending priorities. Residents will also be able to learn more about City services and their costs at an information session following the budget's public release. For more information and to provide your input, visit greatersudbury.ca/budget.

A full report on public engagement will be made available in advance of deliberations to inform Council as they finalize the budget.

The proposed 2019 Budget document, public engagement information and budget videos can be found at greatersudbury.ca/budget.

The Finance and Administration Committee will meet on February 19, 20 and 21, 2019, to deliberate the capital and operating budgets, and water/wastewater rates. City Council will then consider the budget at a Special City Council meeting immediately following budget deliberations. These meetings are open to the public and are livestreamed at greatersudbury.ca/livestream and on the City's Facebook page at facebook.com/greatersudbury.

CAPITAL BUDGET HIGHLIGHTS

The City's capital budget has focused primarily on the renewal of infrastructure due to the size of the infrastructure renewal requirement, a pressure felt by municipalities across the province and the country. The 2017 and 2018 capital budgets were significantly higher than prior years, due to larger than usual senior government funding. In 2019, the City will see a return to more typical spending but still higher than historical norms.

Annual Investment in Capital (\$000's)

2019 WATER/WASTEWATER USER FEES

The service is funded entirely by user fees paid by customers based on the amount of water they use, with the exception of a small portion for fire protection. All water systems must be fully funded and supported by a sustainable long-range financial plan. Following a sustainable plan keeps the service in a state of good repair, reduces the risk of service interruptions and sustains water quality levels.

The water/wastewater long-range financial plan anticipates a 7.4 % increase in the rates charged to customers. A typical water/wastewater customer uses approximately 200 cubic metres of water each year. The chart below demonstrates how a 7.4 % increase in water/wastewater user rates affects the average homeowner, whose costs would increase by approximately \$7.35 per month.

2019 WATER/WASTEWATER RATE IMPACT

Monthly

		2018	2019	\$ Change
Water				
Monthly Usage Charge	1	26.70	28.80	2.10
Monthly Fixed Service Charge	2	19.89	21.46	1.57
Total Monthly Water Charges		\$ 46.59	\$ 50.26	\$ 3.67
Wastewater				
Monthly Usage Surcharge	3	30.09	32.20	2.11
Monthly Fixed Service Surcharge	3	22.42	23.99	1.57
Total Monthly Wastewater Charges		\$ 52.51	\$ 56.19	\$ 3.68
Total Monthly Water/Wastewater Charges		\$ 99.10	\$ 106.45	\$ 7.35

1. The water usage charge is equal to the water usage (in cubic metres) multiplied by the water rate of \$1.728 per cubic metre.
2. The fixed service charge is to provide water service to a property. This fee does not include any charges for water use and this amount varies depending upon your meter size.
3. The wastewater surcharge is applied to total water charges (usage and fixed service) as there are no meters to measure outflows of wastewater. For 2019 the surcharge is 111.8 % of water charges.

HOW GREATER SUDBURY'S PROPERTY TAXES COMPARE TO OTHER MUNICIPALITIES

Greater Sudbury's taxes are among the lowest for a typical bungalow compared to other cities with over 100,000 population and our northern neighbours.

2017 Tax Comparison for Detached Bungalow – Municipalities with Population Greater than 100,000

Source: 2017 BMA Study

2017 Tax Comparison for Detached Bungalow – Northern Ontario

Source: 2017 BMA Study

ABOUT GREATER SUDBURY

Far from its origins as a railroad outpost and small mining town, Greater Sudbury has grown into the metropolitan centre of northeastern Ontario.

The City of Greater Sudbury was formed on January 1, 2001, through the amalgamation of the towns and cities that comprised the former Regional Municipality of Sudbury and several unincorporated townships.

The city is centrally located in northeastern Ontario, at the convergence of three major highways. It is situated on the Canadian Shield in the Great Lakes Basin and is composed of a rich mix of urban, suburban, rural and wilderness environments, including 330 freshwater lakes, and the largest city-contained lake in the world, Lake Wanapitei.

Greater Sudbury is 3,228 square kilometres in area, making it geographically the largest municipality in Ontario.

In 2018, Greater Sudbury was home to approximately 166,000 people. It is a truly bilingual community with approximately 26 % of people reporting French as their mother tongue, and a further 38 % identifying as knowing both official languages. Italian, Finnish, German, Ukrainian and Polish are the top five non-official languages spoken in the city. More than 9 % of people living in the city identify as Indigenous.

LOCAL ECONOMY

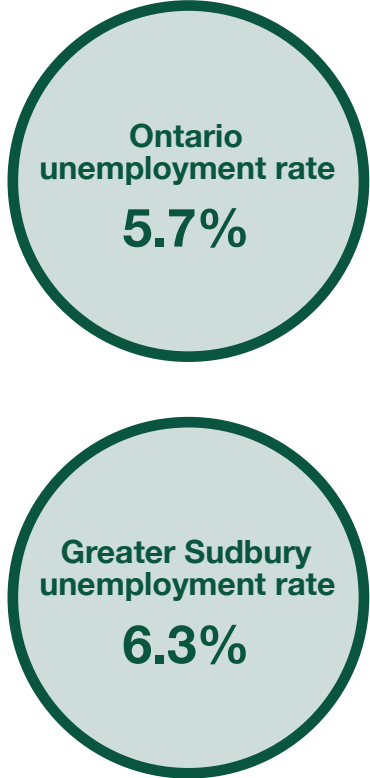

Greater Sudbury is a great place to live, work, shop and play. As northeastern Ontario's economic and service hub, the city is central to the region's economy. People from across the North come to Greater Sudbury to shop, study, and access medical, business and financial services.

The Bank of Canada predicts Canada's Gross Domestic Product (GDP) will grow by 2.2 % in 2019 and 1.9 % in 2020. Greater Sudbury is expected to grow by 1.2 % in 2019 and 1.1 % in 2020. New housing construction fell to 165 units in 2018, but is anticipated to rebound to 280 units in 2019.

Greater Sudbury's unemployment rate for November 2018 was 6.3 %, up from 6.2 % a year ago, whereas Ontario's unemployment rate was 5.7 % and Canada's was 5.8 %. This gap between Greater Sudbury's unemployment rate and Ontario's has rarely been so small.

As one of the top nickel producers in the world, and one of the few regions producing battery grade nickel, Greater Sudbury will no doubt benefit from the anticipated surge in demand for the metal as the global transition to electric vehicles (EV) begins to accelerate. Many of the key ingredients for EV, nickel, copper, lithium and cobalt, are either produced right here in Greater Sudbury or in neighbouring communities. According to industry analysts, the global nickel production industry will have to invest up to \$70 billion (USD) by 2030 to keep up with projected demand. It is expected that the copper industry will need to invest up to \$40 billion (USD) by 2030 in order to support electrification.

Locally, in the spring of 2018, Vale and Glencore announced investments of \$1.4 billion toward new mine development in the Sudbury region. These market trends bode well for the 300 businesses and 14,000 skilled workers that constitute Greater Sudbury's world-class mining supply and services cluster. This cluster supports not only local mining and mineral production, but increasingly exports its products, services and expertise around the world.

ORGANIZATIONAL PROFILE

The City of Greater Sudbury is a single-tier municipality, which means it is responsible for all municipal services and assumes all responsibilities set out under the Municipal Act and other provincial legislation. As such, the City is responsible for maintaining all infrastructure and assets, providing emergency services, library services, and more throughout its 3,228 square kilometres. The City is in approximately 60 different lines of business, each one important to members of our community.

OPERATING BUDGET

The operating budget provides the money needed for the City to perform routine operations and provide daily services. Approximately 46 % of the operating budget comes from property taxes while the remainder of the budget is funded by provincial and federal government grants and subsidies, user fees and other revenues.

SERVICES PROVIDED BY THE MUNICIPALITY INCLUDE:

Resident Safety:

- Animal Control
- Building Inspections
- By-law Enforcement
- Emergency Management
- Fire
- Paramedic Services
- Police

Public Health:

- Drainage and flood management
- Public Health Sudbury & Districts
- Wastewater collection and treatment
- Water treatment and distribution

Transportation:

- Roads and bridges
- Sidewalks and bike lanes
- Traffic control
- Transit
- Winter road maintenance

Quality of Life:

- Community grants
- Land use planning oversight
- Long-Term Care
- Parks and playgrounds
- Recreation programs and facilities
- Social Services

GREATER TOGETHER, THE 2015-2018 CORPORATE STRATEGIC PLAN

Greater Sudbury's Planning Framework

City of Greater Sudbury Council approved a Strategic Plan designed to create a fiscally responsible, innovative and responsive municipal government.

The plan outlines strategic priorities for the City of Greater Sudbury, and further develops these priorities with measurable actions in the Implementation Plan. An update of the Council Strategic Plan can be found in the Appendices section of this document.

City Council will be developing a new strategic plan in 2019 to guide decisions through the next term of Council.

The Strategic Plan is currently under review. It is anticipated that a new, or significantly updated Strategic Plan will be available by June, 2019.

VISION, MISSION AND VALUES

Employees are committed to producing results for the community that reflect Council's desired outcomes. The strategic plan's success depends on staff working collaboratively with Council, other levels of government, community partners, residents and businesses in Greater Sudbury. The performance metrics included help track and report progress to demonstrate accountability.

THE VISION:

- A growing community, recognized for innovation, leadership, resourcefulness and a great northern lifestyle.

THE MISSION:

- Providing quality municipal services and leadership in the social, environmental and economic development of the City of Greater Sudbury.

THE VALUES:

As stewards of the City of Greater Sudbury, we believe in recognizing the specific needs of all our citizens in urban, rural and suburban areas, and are guided by our belief in:

- Acting today in the interests of tomorrow
- Providing quality service with a citizen focus
- Embodying openness and transparency
- Communicating honestly and effectively
- Creating a climate of trust and a collegial working environment to manage our resources efficiently, responsibly and effectively
- Encouraging innovation, continuous improvement and creativity
- Fostering a culture of collaboration
- Ensuring an inclusive, accessible community for all
- Respecting our people and our places

Growth and Economic Development **Grow the economy and attract investment**

- A. Implement the Downtown Master Plan and development of downtowns, and increase densification by conversion from commercial to residential.
- B. Implement or assist in implementing economic development related plans approved by Council, with the necessary resources to support them.
- C. Provide a welcoming environment that is conducive to investment and reduction of red tape, by removing barriers and attracting new business.
- D. Invest in large projects to stimulate growth and increase conferences, sports and events tourism, and celebrate cultural diversity.
- E. Build on our existing reputation to become the global centre for mining research, environmental restoration and innovation.
- F. Contribute to an economically stronger northern Ontario.

Quality of Life and Place **Strengthen the high quality of life we already know and love**

- A. Create programs and services designed to improve the health and well-being of our youth, families and seniors.
- B. Maintain great public spaces and facilities to provide opportunities for everyone to enjoy.
- C. Promote a quality of life that attracts and retains youth and professionals, and encourages seniors to relocate to our community, taking into consideration all of Greater Sudbury.
- D. Focus on clean, green living and the environment, by investing in our future and celebrating how far we've come.

Responsive, Fiscally Prudent, Open Governance **Lead in public service excellence**

- A. Focus on openness, transparency and accountability in everything we do.
- B. Improve communications within city hall and between the City and the community at large, by taking steps to get to know the needs of the entire community, including the silent majority, and by meeting them.
- C. Work with management to ensure that all staff are working toward the same goals, with accountabilities for senior staff linked to Council's strategic plan.
- D. Emphasize the relationship between governance, community engagement and information, in support of better decision-making.

Sustainable Infrastructure **Prioritize, build and rebuild our community's foundation**

- A. Determine acceptable levels of infrastructure services.
- B. Improve the quality of our roads.
- C. Complete the Transportation Master Plan.
- D. Provide quality multimodal transportation alternatives for roads, transit, trails, paths and sidewalks, and connect neighbourhoods and communities within Greater Sudbury.
- E. Establish subwatershed studies and source water protection plans.
- F. Develop sustainable stormwater funding.

GUIDING DOCUMENTS

The Official Plan

The Official Plan (OP) is a blueprint to help guide Greater Sudbury's development. It establishes long-term goals, shapes policies and outlines social, economic, natural and built environment strategies for the city.

The OP guides municipal decision-making on important issues that affect the daily life of every Greater Sudbury resident. From the location of schools and other community facilities, to the development of residential, commercial and industrial areas, these decisions shape the future of our community.

Phase 2 of the OP review is currently underway. It will align the OP with the Transportation Master Plan and the Water/Wastewater Master Plan, once complete. At that time, staff will bring forward any recommended land use policy changes associated with the Greater Sudbury Development Corporation's Strategic Plan: From the Ground Up 2015-2025.

Communications Strategic Plan

The Communications Strategic Plan outlines a framework for the City's communication practices to ensure they meet the information and engagement needs and expectations of residents. The plan builds residents' understanding of their municipal government and employee confidence through ongoing, relevant, two-way engagement and communication.

Cultural Plan

The Cultural Plan is the framework for identifying and leveraging the community's cultural resources and integrating culture across all facets of planning and decision-making. The plan includes substantial goals under four interconnected strategic directions; Creative Identity, Creative People, Creative Places and Creative Economy.

Customer Service Strategy

The Customer Service Strategy describes how the City will transform customer service and build a consistently positive customer service culture. Outlining a framework for the City's customer service approach over the next three years, it is intended as a roadmap for employees and citizens to make a positive customer service environment part of the City of Greater Sudbury brand.

Downtown Master Plan

The Downtown Sudbury Master Plan is the blueprint to guide the revitalization of Downtown Sudbury, detailing a series of actions and initiatives necessary for this transformation, specifying their timing and allocating responsibilities. A healthy, active, successful downtown makes a positive statement about the prosperity of a city, sending a positive message to future residents, businesses and investors.

Economic Development Strategic Plan

The Economic Development Strategic Plan strengthens the community's direction and focus, while working toward a vision of employment growth and economic diversification. The plan outlines a number of goals including the development of an entrepreneurship ecosystem, a welcoming and open community, a highly skilled and creative workforce, one of Ontario's top tourism destinations, and more.

Emergency Services Strategic Plan

This document provides strategic direction for the Community Safety Department to achieve the vision of providing highly effective services that has the confidence of the community.

Enterprise Asset Management Policy

The Enterprise Asset Management Policy will achieve service sustainability through a consistent asset management approach that incorporates full lifecycle costs. It outlines best practices for long-term financial planning and the process for making informed decisions regarding the acquisition, operation, maintainance, renewal, replacement and disposal of physical City assets.

Corporate Information Technology Strategic Plan

The Information Technology Strategic Plan provides a direction to achieve a vision of great service experiences powered by technology and data, available anywhere, anytime. It emphasizes digitization with a focus on simple, easy to use technologies, improving service quality and efficiency in customer and staff interactions.

Planning Services Strategic Business Plan

The Planning Services Strategic Business Plan is structured around six key goals and involves over 60 initiatives that can be undertaken to improve land use planning in the community. It defines the Planning Services division's role in creating and managing positive change consistent with the Official Plan. It commits the division to proactively leading positive change, strengthening its evidence-based decision making frameworks, and furthering its reputation as innovators, collaborators, communicators and administrators.

Roads Financial Plan

The financial plan for roads addresses growing infrastructure and operational requirements of the City's road network, the City's largest single asset class. The plan considers a plan that progressively, but responsibly, increases funding to support roads asset renewal and construction requirements.

Water/Wastewater Master Plan

The Water/Wastewater Master Plan identifies long-term replacements and/or expansion to the water and wastewater servicing networks. The plan defines the water and wastewater infrastructure required to service existing and future development to 2041 through four main objectives: to plan for safe, robust servicing systems; to accommodate planned growth within the community; to ensure system performance and efficiency within the servicing systems is maintained; and to comply with existing legal and regulatory requirements.

Water/Wastewater Long-range Financial Plan

The City of Greater Sudbury is legislated to maintain a financial plan for its water/wastewater services. The 10-year plan is a strategy to help achieve the financial sustainability of the water and wastewater system. Benchmarks are used to measure progress and serve as a guide to Council when making budget decisions. An updated study will be presented to Council in spring 2019.

ANNUAL BUDGET

Services drive costs. Included in this budget document are business plans that describe planned services and service levels. The divisional budgets reflect these service plans and are supported by performance data to enable readers to assess performance.

Each division's business plan includes:

- Financial information
- An overview of the service area
- Key accomplishments for 2018
- Strategic issues and opportunities
- Key deliverables for 2019
- Key performance indicators

This budget document is the corporate-wide annual business plan, which includes details on the services the municipality provides. The financial information provided throughout reflects choices that are in line with resources available, levels of service planned, tax and user fee increases, and other funding sources to ensure the budget is balanced. That means budgeted revenues equal budgeted expenses.

DRIVERS FOR THE 2019 BUSINESS PLAN AND BUDGET

Strategic Context for 2019

The global economy is expected to slow moderately from 3.8 % growth in 2018 to 3.5 % over the next year. The main factor for the deceleration of growth is the softening of the Chinese economy, however, most developed economies will still experience growth in 2019.

After a year of impressive growth with a real GDP increase of 3.0 % in 2017, Canada's economy has experienced the cooling trend driven by underperforming non-energy merchandise exports and the competitively low Canadian dollar in 2018. Canada's current economy is on track to slow to a more sustainable pace in 2019 with expected GDP growth of 2.2 % according to Bank of Canada's predictions. The Canadian economy is also faced with businesses' reluctance to invest since the 2014 commodities price crash. While the federal government continues to spend on goods, services and infrastructure projects, the provincial governments are looking for ways to reduce spending and shrink deficits.

For Greater Sudbury, the economy is expected to continue to grow as reflected in the Conference Board of Canada forecasted GDP growth of 1.2 % in 2019. In 2018, the employment rate dropped 0.4 % but is expected to rise 1.1 % in 2019. The price of nickel, the mineral on which Greater Sudbury's economy was built, rose strongly in the first half of 2018 but subsequently fell and remained in and around the US \$5/lb mark as the year ended. The outlook for the price of nickel largely remains low for 2019, but strong demand is anticipated in the near future based on the forecasted growth in battery powered electric vehicles.

Mining giants Vale and Glencore are planning heavy investments in Greater Sudbury in the near future. Vale will proceed with a \$760 million Phase 1 development of its Copper Cliff Deep project, while Glencore will expend US \$700 million on its Onaping Depth endeavour. Both projects seek to replace declining production from established mines. Continued growth is expected in Greater Sudbury's construction sector as a result of the \$80 million Maley Drive Extension and the \$100 million Kingsway Entertainment District and Arena/Event Centre, which are currently underway.

PRIORITIES AND ISSUES

Growth Management and Economic Development

Within this economic context, Greater Sudbury's employment and population is expected to grow modestly over the next 20 years. This growth will be driven by labour force turnover and ongoing economic development efforts. At the same time, the population will continue to age. It is expected that this aging and trend toward smaller housing types will generate demand for new housing.

Given the city's relatively low growth, the City of Greater Sudbury must find ways to manage costs and improve revenue growth.

The City has undertaken an update of its population, household and employment growth projections to the year 2046 based on data from the 2016 Census. The City of Greater Sudbury Outlook for Growth to 2046 report will be used to inform capital, service level and policy planning. The major findings of these projections are:

- The city stands out as the only major urban area in northern Ontario with a growing population. By contrast, Thunder Bay, Sault Ste. Marie, Timmins and North Bay have either experienced no increase or a declining population since 2001.
- Greater Sudbury is expected to grow over the next 30 years by between 6,900 to 15,000 people, 6,000 to 8,400 households and 6,400 to 11,000 jobs under modest and high growth scenarios.
- Mining continues to be the most important economic factor affecting the growth outlook for Greater Sudbury. It creates variability with respect to the city's economic outlook, and over the longer term can be influenced by resources outside Greater Sudbury, such as the Ring of Fire west of the James Bay.
- Greater Sudbury acts as a regional service centre for nearby municipalities including North Bay and Sault Ste. Marie, and provides a draw with additional amenities. This regional service function provides some stability to the long-term growth outlook.
- The age structure of the population will have a wide range of influence on how Greater Sudbury grows, specifically regarding housing demand.

Asset Renewal and Financial Viability

With its historic focus on minimizing property taxes that prompted the deferral of a variety of needed asset renewal investments, the City has a significant level of capital asset and infrastructure renewal requirements. This includes the renewal and replacement of roads, water and wastewater mains, equipment and facilities.

The risk of service interruption can be managed with asset management plans and an investment strategy for asset replacement that, over time, reduces the likelihood of asset failure.

As identified in the Asset Management Plan, the City currently has an infrastructure renewal requirement of \$1.9 billion. These unmet needs increase the risk of service interruptions due to asset failure, or lower quality service provision due to poor quality assets. Annual maintenance costs are increasing as the infrastructure continues to age past its useful life. The Asset Management Plan provides strategies to manage these ongoing pressures and mitigate the risk of failure.

The City is responsible for the maintenance and operation of the cost of assets amounting to \$2.8 billion. These assets are critical for the delivery of service levels expected by the residents of Greater Sudbury.

The City, like most Canadian municipalities, must overcome multiple challenges in managing aging assets including:

- Aging infrastructure;
- Expectations of higher levels of service with minimal financial impact;
- Increasingly demanding and complicated legislation with environmental requirements; and
- Mitigation of the increased risk involved with the execution of service delivery.

As asset management planning has progressed, the City has identified an infrastructure need of \$3.1 billion over the next 10 years. Given this magnitude, it is clear that the City will not be able to fully fund the 10-year capital infrastructure renewal requirement.

Due to these increasing pressures, the City will establish and implement a detailed asset management plan and investment strategy.

On December 13, 2017, the province approved O. Reg. 588/17: Asset Management Planning for Municipal Infrastructure under the Infrastructure for Jobs and Prosperities Act, 2015.

TABLE 1: STEPS AND MILESTONES (LEGISLATED)

	Milestone	Date Required
1	Asset Management Policy	July 1, 2019
2	Asset Management Plan (Phase 1) for core infrastructure assets (roads, bridges and culverts, water, wastewater and stormwater management) that discusses current levels of service and the cost of maintaining those services.	July 1, 2021
3	Asset Management Plan (Phase 2) for all remaining municipal infrastructure assets that discusses current levels of service and the cost of maintaining those services.	July 1, 2023
4	Asset Management Plan (Phase 3) for all municipal infrastructure assets that builds upon the requirements achieved in 2023. Additional requirements include proposed levels of service, the activities required to achieve the proposed levels of service and a financial plan to fund the activities.	July 1, 2024
5	Annual review of asset management progress following implementation of the Phase 3 Asset Management Plan.	July 1 (annually)
6	Asset Management Policy and Plan updates.	Every 5 years
7	Internal and External Transparency: Policies and plans shall be provided to the Ministry of Infrastructure or any persons, as requested, and will be posted to the City's website.	Once completed

The steps and milestones to be implemented by all municipalities as described within the legislation are summarized in Table 1. Further detail for the primary steps and milestones follows.

1. The City's Enterprise Asset Management Policy meets the legislative requirements.

The purpose of the policy is to provide guidance applicable to the whole organization and all of its services to minimize the risk of service interruption or increased cost due to asset failure while supporting the consistent delivery of expected service levels. The policy provides a framework to achieve the City's goals and plans with the introduction of critical asset management guiding principles.

2. The primary milestone within O.Reg. 588/17 is the development, implementation and review of the Asset Management Plan. As a minimum the first iteration of the City's Asset Management Plan will include core infrastructure assets such as roads, bridges and culverts, water, wastewater, and stormwater management per the legislation.
3. Following the completion of the asset management plan for core infrastructure, the City continues to incorporate all municipal infrastructure assets such as fleet, buildings and facilities.
4. Phase 3 of the plan will include additional clarity on proposed levels of service, inventory/lifecycle management, as well as a financial strategy which incorporates solutions to address any funding shortfall, a financial strategy to service growth and a risk analysis.

The City of Greater Sudbury ensures its municipal infrastructure systems are supported by plans and financing decisions that demonstrate effective service support and appropriate regard for managing lifecycle costs.

Employee Engagement and Retention

A city is dependent on the skills and loyalty of its municipal workforce. A great employee experience drives a great citizen experience.

Twenty per cent of the City's workforce is eligible to retire in the next five years. Many of these are longer service employees filling key managerial and technical roles. Maintaining service levels in the coming years without proactive strategies to improve recruitment, retention, and development of employees with the necessary skills will be critical. To begin to address this risk, the City has implemented various initiatives across the organization aimed at talent management and development, including training to develop future leaders and succession management. In addition, the City is taking a proactive approach to preparing its workforce for the future. Staff began a Human Capital Management Plan in 2018, which will continue into 2019, to ensure the City has people in place to achieve future strategic priorities.

The intent of the Human Capital Management Plan is to:

- Incorporate more innovative tools to manage the City's recruitment process.
- Address policies to adopt a more employee-centric approach to increase retention and engagement.
- Continue the evolution of a professional development system for employees.
- Diversify the City's recruitment audience to attract a more culturally diverse population.

Public Engagement

The City provides a variety of opportunities for citizens to participate in the discussions, decision-making and implementation of projects or programs that affect our community. Connecting with residents and listening to their feedback is important in ensuring we are successful in managing the long-term needs of the city.

Over to You, the City's online engagement portal includes a variety of tools for engagement including, surveys, forums, updates, sign-ups, idea boards, map applications, and more. Online engagement is a convenient and quick way for residents to get involved and have their say in the things that are important to them. Through the portal, responses are gathered and easily shared and reported on to demonstrate community priorities.

The City works with 14 Community Action Networks (CAN) bringing residents together to work toward a healthy community. Any resident can become a member of their neighbourhood CAN to help identify community needs and participate in the collaboration needed to continually better the city.

Throughout 2018, the City requested input on a number of projects, including the Kingsway Entertainment District and Arena/Event Centre, The Junction, backyard hens, playgrounds, development charges and more. Input will continue to be requested as we work together to make Greater Sudbury a better place to live, work and play.

RISKS

There are a number of risks that, if realized, could affect the City's ability to sustain current service levels.

Asset Condition

Although the Asset Management Plan has been presented, the absence of thorough asset condition information on the majority of the City's assets still exists. There is a risk that one or more assets could deteriorate or even fail, resulting in a reduction of service to citizens. The development of good asset condition information and plans to address asset weaknesses is a priority for the next few years.

Base Metal Prices

Base metal prices overall fell in 2018 compared to 2017. The price of nickel, the mineral on which Greater Sudbury's economy was built, rallied in the first half of 2018, with World Bank data showing that its price hit a 38-month high in April 2018. Since then, however, the price of nickel started falling and traded around US \$5/lb mark for the remainder of 2018. The outlook for nickel largely remains unpredictable for 2019 but strong demand is anticipated in the near future for base metals based on the forecasted growth in battery powered electric vehicles.

Assessment Growth and Economic Development

The last four years have reflected somewhat muted assessment growth in the city, although Greater Sudbury remains the only large population centre in northern Ontario that is seeing any growth. The cost to provide services to residents continues to increase. With low assessment growth, economic development activities take on greater importance as new taxable assessment helps spread the cost of municipal services over a broader tax base. Due to some assessment adjustments in the industrial sector, the City is experiencing higher than anticipated assessment growth for 2019. This is not expected to continue in future years. Economic growth through new private sector investments is needed to help sustain the City's very affordable taxation levels.

Ontario Municipal Partnership Fund (OMPF)

In the last four years, the City of Greater Sudbury has seen a reduction in its OMPF annual funding of \$7 million. Based on the current formula, the City was anticipating that the 2019 allocation would remain the same as 2018. However, recent correspondence from the Ministry of Finance suggests that this funding envelope may be reduced commencing in 2019.

The City is at risk of receiving a reduced OMPF allocation, which may result in more pressure on rate payers. To offset this reduction, service adjustments or increased revenues from other sources may be needed.

Project Delivery

The scale of the capital plan is significant and continues to fluctuate. The available staffing resources to deliver the capital plan has seen minimal change year over year. Additional costs may be incurred if projects are not completed based on the timelines estimated in the capital plan.

Interest Rates

The City has approved significant projects to be funded through the use of debt, including the Kingsway Entertainment District and Arena/Event Centre and the commitment to Place des arts, among others. As interest rates fluctuate and are anticipated to increase, this creates uncertainty. Staff continue to monitor interest rates and are waiting for the appropriate time to secure debt to reduce the risk of market fluctuations.

Provincial Funding

Staff has monitored the changes in funding that have been announced by the new Ontario Government due to the concerns about the size of the forecasted provincial deficit. The 2019 Budget does include funding that is based on the best information at the time of the preparation of the budget document, however, the Provincial Government continues to review programs and any changes to funding may have an impact on the budget.

ENTERPRISE RISK MANAGEMENT

It is important to acknowledge that every activity carries some degree of risk and that municipalities are continuously exposed to a wide spectrum of them. To best support Council and staff in identifying, recognizing, evaluating and mitigating risks, the City has developed an Enterprise Risk Management (ERM) policy.

The policy, which includes the development of an ERM framework, ensures that managing risks is a routine part of decision-making. The framework will include the tools required for decision makers to proactively manage risks that could have adverse impacts on the City's strategic processes or goals, and will continue to evolve.

INVESTMENTS IN KEY COMMUNITY PROJECTS: LARGE PROJECTS

In 2016, Council endorsed in principle four Large Projects with the aim to set priorities for the City and shape the future of our community. They are:

- Kingsway Entertainment District and Arena/Event Centre
- Greater Sudbury Convention/Performance Centre (The Junction)
- Library/Art Gallery (The Junction)
- Place des arts

Each of the Large Projects aligns with Council's Strategic Plan, Greater Together, by:

- Growing the economy and attracting investment
- Strengthening the quality of life residents already know and love
- Leading in public service excellence
- Prioritizing, building and rebuilding our community's foundation

Work on the projects has been ongoing, primarily led through the Economic Development Division, with support from other departments, and each project is now in a different stage of exploration, analysis or development. Status updates are provided to Council regularly.

Kingsway Entertainment District and Arena/Events Centre

The Arena/Event Centre will replace the existing 66-year-old Sudbury Community Arena as a location for sporting events and concerts. It will have a capacity of 5,800 for sporting events and 6,500 for concerts and will be an integral part of the Kingsway Entertainment District.

The project is anticipated to cost \$100 million, however the facility is anticipated to generate \$142 million in direct and indirect spending, in addition to employment growth.

The Arena/Event Centre is currently in the planning stage.

The Junction

The Junction combines two of Council's Large Projects, the Library/Art Gallery and the Greater Sudbury Convention/Performance Centre. City Council selected the Sudbury Community Arena site as the preferred site for the shared gathering place.

During the summer of 2018, Council approved staff recommendations for next steps to move the project forward. This includes performing a site investigation, refining project design and capital costs, selecting key suppliers, and more.

A business case for a financial plan is included for consideration as part of the 2019 Budget.

Place des arts

Place des arts will be the first multidisciplinary arts centre in northeastern Ontario. The multipurpose cultural centre is a contemporary arts and culture facility for Francophones and for the entire community.

Located in downtown Sudbury, the cultural complex will feature a 299 fixed-seating theatre, a multifunctional studio, a contemporary art gallery, a youth zone, office spaces, meetings room and more.

The cost of the project is approximately \$30 million, of which \$5 million will come from the City of Greater Sudbury. The City has also contributed land on the block formed by Elgin and Larch streets and Medina Lane. The estimated economic effects of the project construction are \$18.7 million and the creation of 180 jobs.

A business case outlining a request for operational funding is being considered as part of the 2019 Budget.

Phase 1 of construction is complete with Phase 2 expected to begin in the Spring of 2019. The project is expected to be complete in 2020.

- Indigenous youth
- Resiliency
- Families
- Mental health
- Compassionate City designation
- Play opportunities
- Housing
- Holistic health
- Age friendly strategy
- Healthy streets

[illegible]

BUDGET OVERVIEW

BUDGET
OVERVIEW

Ramsey Lake

BUDGET OVERVIEW

The 2019 City of Greater Sudbury Budget is the City's business plan for the year. It describes the costs and revenues associated with delivering municipal services and enables residents to build an understanding about how taxes are used to acquire new infrastructure, repair existing assets and provide daily services that significantly impact the quality of life in Greater Sudbury.

The details in this document focus on the relationship between services, service levels and costs and depict the process required to achieve the organization's strategic goals. It incorporates benchmarks to facilitate understanding and provide context about Greater Sudbury's performance compared to other municipalities and, in doing so, emphasizes the value the City places on the delivery of quality, reliable and consistent services to residents.

The Budget has three objectives:

- To strengthen understanding of the relationship between services, service levels and cost.
- To engage City Council throughout the budget development process.
- To improve public engagement opportunities by sharing information with the public.

The budget document describes the municipality's operating environment and general financial condition. Standard business plans for each service area describe performance objectives, the services they provide, key issues and opportunities, and 2019 deliverables. Financial information that includes historical comparisons provides context.

The 2019 document also includes key performance indicators to demonstrate impact, and how the City of Greater Sudbury compares to other municipalities. This helps illustrate the effect that changing one element (cost or revenues) can have on the other (services and/or service levels).

The Capital Budget represents a \$117 million investment in municipal assets. The majority of these funds will be invested in roads, environmental services, leisure, facilities, fleet, information technology, and water/wastewater infrastructure. This is essential in addressing infrastructure renewal requirements and ensuring the long-term sustainability of our community.

This budget also focuses on applying tools and methods to identify productivity improvements, which will lead to ongoing affordability:

- Developing and using tools, such as inter-municipal performance benchmarks, to ensure we are

delivering services as efficiently and effectively as possible.

- Establishing processes, such as long-range financial planning, to ensure we understand the long-term implications of investment opportunities.
- Improving internal processes, policies and information management systems to work as productively as possible.

Defining Services and Understanding Service Alternatives

This budget uses cost allocation methods that help identify a service's full cost. This approach helps to:

- Identify improvements in operational processes, and program and service delivery.
- Understand service delivery implications of budget reductions or increases.
- Measure and compare service performance annually and in relation to other municipalities.
- Improve business planning processes, in particular to accurately identify capacity constraints and ensure the highest priority work receives sufficient attention.
- Provide clear, accurate information to residents about services.

Long-Term Financial Plan

The City completed a comprehensive Long-Term Financial Plan as identified in the Corporate Strategic Plan (2015-2018). The Long-Term Financial Plan was implemented to better understand the long-term impact of financial decisions made today. This work will help manage resources over the long-term and provide more flexibility to meet infrastructure renewal requirements while maintaining a manageable level of debt to support ongoing services and fiscal sustainability. The plan covers 10 years, 2018 to 2027, and incorporates projected funding requirements, tax levy increases, and reserve balances under the current financial model. Staff will be using this information as a benchmark for operating and capital budgeting and forecasting. The following additional financial strategies were highlighted:

1. Implementation of stormwater management fees.
 - Work will continue with the stormwater sustainable funding study in 2019 toward the implementation of fees targeted for 2021.
2. Use of alternative tax classes and adjusting property tax ratios.
 - The commercial and industrial subclass discounts were eliminated in 2018.

- The commercial and industrial vacancy rebate program will continue to be phased out over 2019 and 2020.
- 3. Capital financing: using debt to fund the infrastructure renewal/replacement requirement.
 - The use of debt was approved in 2018 for reconstruction on Lorne Street, improvements to Municipal Road 35 and the new Arena/Event Centre project.
 - Debt is proposed to be used in 2019 for refurbishment of a number of bridges in the Capital Budget.
 - More detailed information about debt financing can be found later in this section.
- 4. Introduction of a capital levy to fund the infrastructure renewal/replacement requirement.
 - For 2019 staff is recommending a 1.5 % special capital levy in the form of increased property taxes to be used on the roads infrastructure renewal requirement. This recommendation is consistent with prior years.
- 5. Infrastructure and service rationalizations: analyzing current service levels of arenas, community centres, playgrounds, roads, municipal fleet and others.
 - The City continued in 2018 to successfully sell properties deemed to be surplus.
 - The municipal fleet continues to be reviewed and vehicles were removed from the 2019 Budget.

The Long-Term Financial Plan incorporates key goals and objectives while being fiscally responsible and sustainable.

Measuring Performance

By measuring progress toward goals and objectives, key performance indicators (KPIs) build understanding about the delivery of municipal services, and provide context for decision making.

BMA Study

Each year, the City participates in the BMA Management Consulting Inc. (Ontario) municipal comparative study, more commonly known as the BMA Study. Data from the BMA Study is collected mainly from Financial Information Returns filed with the Ministry of Municipal Affairs and tax roll and assessment data provided by the Municipal Property Assessment Corporation (MPAC). The BMA Study provides comparisons of financial information, select user fees, tax policies and rates, sewer and water services, and taxes as a percentage of income. In addition, the City belongs to several industry-

specific organizations, which collaboratively compile and analyze benchmarking data to determine service improvements.

MBNCan

The City joined the Municipal Benchmarking Network Canada (MBNCan) to share expertise and data about municipal services. The benchmarking network is designed to highlight opportunities for improving service performance and demonstrate transparency and accountability to taxpayers.

MBNCan collects data for 36 program areas and provides comparisons with municipalities across the country. Staff has access to a secure database of municipal performance data and to a network of peers that meet regularly throughout the year. The data provides staff the opportunity to identify opportunities for change, ask questions and learn from other municipalities to improve performance.

Through an annual process of collecting service performance data, Greater Sudbury's results can be compared with other communities across the country. Results are publicly reported in divisional business plans in the Operating Budget section of this document and on the City's website at www.greatersudbury.ca/MBNCan.

Operating Budget

The annual operating budget includes estimated operating expenditures and revenues required by the City to deliver service levels approved by Council. Increases to the operating budget are limited to contractual and legislated obligations, inflationary increases, and increased costs associated with maintaining current service levels.

While the overall increase is consistent with previous periods, the City is facing significant pressures in some areas:

- **Assessment Growth:** a low rate of change in the number of properties paying taxes exacerbates a long-standing challenge to address asset renewal requirements because costs increase over time, so leaving asset renewal projects unaddressed leads to higher operating costs and, ultimately, higher replacement costs.
- **Provincial and Federal Funding:** Recent changes in the provincial government resulted in a reduction of social housing funding, where service needs and asset renewal requirements remain high.
- **WSIB Presumptive Legislation:** New legislation related to the Workplace Safety and Insurance Board, including chronic mental health, puts additional financial obligations on the City.

CAPITAL BUDGET HIGHLIGHTS

Renewal

The renewal of infrastructure relates to existing infrastructure and other assets to maintain business as usual functions. Generally, it is focused on rebuilding or replacing existing assets that have reached the end of their useful lives, or on repairing and rehabilitating existing assets to extend their useful lives. Asset renewal maintains existing services and service levels. It does not, and is not designed to, address new capacity requirements or enhance service levels.

Key Deliverables

- Fixing roadways in our community remains one of the City's top priorities. The City continues to spend record levels on road infrastructure, from \$32.8 million in 2009 to \$103.4 million in 2018 (including the four-laning of Municipal Road 35 and reconstruction of Lorne Street) to \$46.6 million in 2019. The 2019 roads budget includes various replacement and rehabilitation of arterials, collectors and local roads, such as York Street, Attlee Avenue, Dean Avenue, CKSO Road, and many others, as well as \$15.6 million for repairs to various bridges and culverts, including the CNR Overpass on Falconbridge Highway and the Allan Street Bridge. In addition, the roads budget includes funding commitments for the Maley Drive Extension project, Municipal Road 35 and Lorne Street. All of these capital investments provide safer and smoother road infrastructure for residents to travel on.
- An increase in the Ontario Community Infrastructure Fund (OCIF) from \$2.2 million per year in 2016 to a total of \$19 million for the combined years of 2017 to 2019 will be spent on various road-related capital projects. The amount of OCIF funding for the 2019 Budget is \$9.3 million (previously announced, but not yet confirmed), an increase from the 2018 grant of \$6 million. The funds in 2019 will be used toward various arterial, collector and local roads such as York Street, and Main Street from Municipal Road 15 to the railway tracks. OCIF funds provide much needed investment into addressing the significant infrastructure renewal requirement relating to roads within our city.
- The 2019 Capital Budget includes investments in facilities of \$4.5 million. This includes various projects at Tom Davies Square, fire halls and the transit/fleet garage. In addition, the budget includes the previous funding commitments for the Tom Davies Square courtyard renovations.
- The investment to Leisure Services in the amount of \$4.3 million includes building upgrades at Howard Armstrong Recreation Centre of \$1.5 million and Dowling Leisure Centre of \$1.0 million. These improvements will enable residents to enjoy these recreational facilities for years to come.
- Projects at the Azilda and Sudbury landfill sites as well as the Recycling Centre total \$3.4 million. These investments will enable the City to responsibly dispose and divert waste collected from residents and to protect the environment around the landfill sites.
- Significant capital investments in Water and Wastewater of \$40 million is recommended in 2019. The investments include various watermain and sanitary sewer pipe replacements and rehabilitations, as well as improvements to water and wastewater plants, including wells and lift stations. These improvements ensure that residents continue to have safe and reliable drinking water and proper collection and treatment of wastewater.
- The 2019 Capital Budget includes investments in key information technology projects of \$2 million which includes the Customer Relationship Management (CRM) system, the Land and Property Management system, and Meeting Management Solution. Each of these capital projects will provide direct benefits to the community through their interactions with the City for various requests and information.
- Staff is completing capital projects as a result of significant federal and provincial funding announcements that took place in 2016 and were reflected in the 2017 Capital Budget. The funding was used to improve roads, water, wastewater and transit, replacing aging assets and enhancing service quality for residents and transit riders through reconditioned roads, new water and wastewater pipes for decreased number of breaks, new transit buses, and improvements completed at the Transit Terminal building on Elm Street. The majority of these projects are required to be completed during 2019, with the exception of the Maley Drive Extension project that is expected to be completed by the end of 2022.
- The City has, and continues to, contribute \$250,000 per year toward subwatershed studies, which will help to protect our environment by assessing the health of area waterways and making recommendations for their care.

- In addition, the City continues to contribute \$800,000 per year toward cycling infrastructure. Investments in cycling infrastructure included the construction of the first segment of the Paris-Notre Dame Bikeway from York Street to Walford Road, to provide a signalized trail crossing of the Junction Creek Waterway Park at Regent Street, and to install pavement markings and signage for 16 kilometres of on-street cycling routes. Current and future funds will be allocated to a bike parking program and to complete the construction of the Paris-Notre Dame Bikeway, which is a multi-year construction project.
- The Asset Management Plan was presented to Council in December 2016. The plan shows the City had infrastructure renewal requirements of \$1.9 billion at the end of 2016 and that requirements will grow to \$3.1 billion by the end of 2026. The additional government funds announced in 2016 for roads, water/wastewater, drains/stormwater and transit will help in addressing requirements in their respective areas, however, facilities are also in need of replacements, renovations and improvements to bring them to a state of good repair. The majority of municipal buildings and facilities were constructed in the 1960s and 1970s and are at the end or close to the end of their estimated useful lives. These facilities include arenas, pools, fire and paramedic stations, public works depots and Tom Davies Square.
- The capital budget reflects staff's best judgment about enterprise-wide priorities. This means a team of experienced staff from across the organization collaborated to assess all capital budget requests against standard criteria. This assessment produced a ranked list of projects that the Executive Leadership Team reviewed and, following an analysis of financing options, recommended for Council's approval as part of the 2019 Budget.

ACCOUNTING PROCESS

Basis of Presentation

The City of Greater Sudbury uses fund accounting, a set of accounts dedicated to specific purposes, for management reporting purposes in the form of operating and capital budgets.

The operating fund is comprised of transactions relating to operational revenues and expenses such as grant revenues, user fees, salaries and benefits, materials, and purchased contract services. The operating budget funds the day-to-day operations of the City. The annual operating budget is in excess of half a billion dollars.

The capital fund is comprised of revenues and expenses relating to capital projects, as approved in the capital budget. These accounts are maintained until projects are complete, which can be over multiple years.

Basis of Accounting

The City of Greater Sudbury uses the modified cash basis of accounting for budgeting purposes, in accordance with the Municipal Act, Budget Preparation Policy and best practices. This translates to the annual operating and capital budgets being tools to raise the funds necessary to meet spending requirements and revenues being recognized as they are earned, while expenses are recognized in the period in which they are expected to be paid.

Revenue recognition policies are classified by major category such as government transfers, taxation revenues, user charges, fines and penalties, other revenue and investment income.

Summary of revenue recognition policies:

- Taxation revenue is recognized when bills are issued.
- Government transfers are recognized when eligibility or stipulation criteria have been met.
- User charges, other revenue and investment income are recognized when services have been provided or the event that has given rise to the revenue has occurred.
- Fines and penalties are recognized on a cash basis as the City is not able to reliably estimate the collection of these revenues.

Revenues with external restrictions, such as grants, which are not earned in the period, are recorded as deferred revenue until the criteria for recognition has been met.

Tangible capital assets are recorded at the cost which includes amounts directly attributable to the acquisition, construction, development or betterment of the asset.

BUDGET PROCESS

The municipal operating and capital budgets are prepared annually. City Council is also responsible for funding its share of three outside boards' budgets: Greater Sudbury Police Service, Public Health Sudbury & District, and Conservation Sudbury (Nickel District Conservation Authority).

The first stage of the budget process includes receiving directions from Council regarding its expectations for service levels and the level of taxation it is willing to consider. An analysis of workload requirements and anticipated service levels for each division, in accordance with Council's budget directions, identifies resource requirements. Financial information is prepared in accordance with the Base Budget Preparation Policy to support preliminary reviews that identify inflationary pressures, such as wage adjustments in accordance with collective bargaining agreements, contract cost changes and material price increases.

Operating departments and finance staff review projected year end actuals against budgets to identify variances such as overruns, areas in need of more resources to maintain service levels, or items that can be reduced. A review of historical trend analysis is performed to assess changes in the budget. Any adjustments are done in accordance with the Base Budget Preparation Policy. The budget also reflects any known funding approvals from senior levels of government or partnerships. Any requests for additional permanent staff must be approved by City Council. The program support allocations and internal recoveries are calculated in accordance with the Municipal Benchmarking Network Canada (MBNCan) methodology.

A review of provincially-mandated programs and service contracts, costs to service growth, and prior year Council decisions and commitments is also conducted. In order to propose service level changes, operating departments prepared comprehensive business cases. All submitted business cases for service level changes were reviewed by the Executive Leadership Team, and based on priorities and available funds, a recommended list is included in this budget document for Council's consideration (see Business Cases section of this document).

Council provides final approval of the operating and capital budgets. Budgets are monitored by departments in accordance with the Operating Budget and Capital

Budget policies. These policies provide fiscal control and accountability. On a quarterly basis, the Finance and Administration Committee of Council reviews variance reports including a year-end projection of operating revenues and expenditures. The variance reports provide Council with an overview of potential year-end variances by division or section. Furthermore, the Finance and Administration Committee reviews a Capital Variance Report for completed projects.

Departments have the ability to amend their Council approved operating budget during the year based on several factors, including announcements of new funding, or by reallocating funds for new contracts. If such changes occur, staff can reallocate funds as long as there is no increase in the Council-approved amount. The Capital Budget Policy outlines how the capital budget can be amended during the year when expected spending on a project is over or under the budget approved by Council, or when new unbudgeted priority investments are required. All amendments to the Capital Budget are subject to limits and reporting requirements. Additional funding for projects, to fund over expenditures can be accessed from the newly created holding accounts, and if significant, via approval by Council with an appropriate funding source, such as reserve funds, including the holding account, or grants. Projects with surplus funds, or deferred and cancelled projects will fund the holding account. Council is informed of all cancelled/deferred projects and all transactions for the holding account within the Capital Variance Reports.

The City of Greater Sudbury is always looking to improve its financial sustainability through a balanced approach to financial management. Finding ways to save money and improve efficiency is always top of mind.

February 2019

Budget Q&A with Finance and Administration Committee

Finance and Administration Committee budget deliberations

Council approval of 2019 Budget

COUNCIL'S ROLE

Council directly participates in the budget process at three stages:

- At the start of the process, Council provides direction on the building of the budget plan for the upcoming year. For the 2019 Budget, Council directed staff to develop a budget of no more than a 3.5 % property tax increase with options to reduce the tax increase to 3.0 % or 2.5 %.
- As the process unfolds, Council receives an update and provides any feedback necessary to help staff prepare a recommended budget that reflects expectations about anticipated services, service levels and costs.
- At the conclusion of the process, Council reviews the recommended budget, makes any desired amendments and approves the budget.

THE PUBLIC'S ROLE

Public engagement opportunities continue to give interested members of the public the opportunity to review and understand the information staff uses to prepare the budget and provide comments and feedback. Public engagement is essential in building trust and credibility with the community.

An online budget tool and survey will be available to give residents an opportunity to adjust proposed tax amounts for major service areas. This provides a channel for gathering information about residents' views.

The City will host an information fair, following the tabling of the proposed budget. The goal of the fair is to provide residents with an overview of City services, the costs to provide these services, key investments, challenges and how these factors shape the development of the Budget.

FINANCIAL POSITION

Revenues

The City's revenues are used to provide and maintain existing service levels and sustain infrastructure. Revenues are comprised of government transfers, property taxes, user fees, investment earnings, licensing and lease revenues, and other sources of revenue.

Revenues from property taxes and user fees have seen the greatest increase over the years. The 2019 Budget proposes that the City will collect 46 % of its total revenues from property taxes.

Increasing other revenues, such as user fees, allows the City to maintain lower property taxes while maintaining service levels.

Total Annual Revenues (\$000's)

Ontario Municipal Partnership Fund (OMPF)

The OMPF is the province’s main unconditional transfer payment to municipalities, which primarily supports rural and northern communities.

Staff were anticipating that the 2019 allocation would remain the same as 2018 based on the current formula that is in place, and budgeted accordingly. However, recent correspondence from the Ministry of Finance has indicated that the OMPF funding envelope may be reduced. If the City’s allocation is reduced, service adjustments or increased revenues from other sources may be required in order to reduce pressure on tax rates.

Ontario Municipal Partnership Funding (\$000's)

Expenses

The City's expenditures have increased during the past several years to maintain existing service levels and include Council requests for new or enhanced service levels.

Total Annual Expenditures (\$000's)

Capital Assets

The capital budget represents the City's investment in capital assets, including roads, buildings, water and wastewater pipes and facilities, equipment and vehicles for use by staff to provide services to residents, as well as facilities for residents to enjoy the services provided by the municipality.

The total capital budget varies based on the estimate of government grants and debt financing on a year over year basis. Any reduction in funding from other levels of government means the City uses more of its own financing sources (such as the annual contribution to capital from the property tax levy) to cover infrastructure costs. In addition, new debt financing approved for a capital budget results in new debt repayments included in the annual operating budget that would be funded from the annual property tax levy. The intent is to maintain capital funding to address aging infrastructure replacements.

The chart below illustrates the increase to the capital budget over the years and how it has changed year over year based on the amount of estimated government grants and debt financing.

Consistent with prior years, staff is recommending a special capital levy of 1.5 % to advance key projects in roads and reduce the infrastructure renewal requirements estimated in the Asset Management Plan (please refer to the Capital Budget tab for further information).

Capital Funding Sources 2013-2019 (\$000's)

RESERVES AND RESERVE FUNDS

Reserves and reserve funds are a critical component of a municipality's long-term financing plan. The purpose of maintaining reserves is to:

- Provide stability of tax rates in the face of variable and uncontrollable factors, including water consumption, interest rates, unemployment rates and changes in subsidies from other levels of government.
- Provide financing for one-time or short-term requirements without permanently impacting property tax and utility rates.
- Make provisions for replacements and acquisitions of assets and infrastructure currently being consumed and depreciated.
- Avoid spikes in funding requirements of the capital budget by reducing reliance on long-term debt borrowings.

- Provide a source of internal financing.
- Ensure adequate cash flows.
- Provide flexibility to manage debt levels and protect the municipality's financial position.
- Provide for liabilities incurred in the current year, but paid for in the future.

In 2019, reserves will fund \$12.7 million in capital projects. The net impact of the 2019 Capital Budget results in a reduction of City reserves and reserve funds.

It is important to note that a significant portion of the reserve funds are committed to previous Council approved capital and other projects. These funds remain in reserves and reserve funds until spent on the related project.

Increased revenues will be required to replace and strengthen reserve balances over the long-term. Alternatively, a service could undergo changes in which it requires less municipal funding, such as public-private partnerships, or service levels could be reduced.

The City has a low debt to reserve ratio in comparison to the median of 0.7 and the average of 1.0. This means the City has relatively more reserves in place to support its debt obligations, so it presents lower risk from a lender's perspective. This supports the City's strong credit rating. The results of this ratio is a strong indicator for assessing long-term sustainability and the ability to meet the City's debt obligations.

Debt to Reserve Ratio

Reserve Fund Balances 2013-2019 (\$000's)

DEBT FINANCING

The Debt Management Policy, approved by City Council in 2013, was revised in 2017 to increase the amount of debt the City can obtain. The limit on annual debt repayment was approved to be increased from 5 % to 10 % of the City's net revenues. The limit provides more flexibility for the City, but remains below the provincial limit of 25 % of net revenues. The main principles of the Debt Management Policy state that debt should be affordable, sustainable, and structured in a way that those who benefit from the asset pay for the debt. The policy also sets out the principles that debt financing should only be considered for:

- new, non-reoccurring infrastructure renewal requirements
- self-supporting programs and facilities
- projects where the cost of deferring expenditures exceeds debt servicing costs
- debt with terms no longer than the anticipated life of the funded asset

The City's current reliance on its own source of funding for capital investment has also impacted debt levels.

While the issuance of debt can provide increased capital funding, the amount owing, plus the related interest must be paid off in future years from operating funds. Debt is a trade-off between increased fiscal flexibility in the short-term, versus reduced fiscal flexibility over the term of the repayment.

While interest costs will add to the total bill, the rapid escalation of construction costs over the past few years indicates debt financing could lower overall costs in certain circumstances. Although interest rates have increased recently, they remain near historic lows and the City will access debt markets while rates remain low.

In 2018, the City received a AA debt rating from S&P Global Ratings (S&P) with a stable outlook. A debt rating is intended to represent an evaluation of the credit risk of a debtor, anticipating their ability to pay debt. The AA rating indicates the City has a very strong capacity to pay interest and repay principal loans.

This rating anticipates that the City's tax-supported debt burden will remain modest, and that financial management practices will remain strong. It also anticipates that the City's plans and administration remain stable, political direction reflects current, or consistent policies and key staff positions do not experience turnover. In determining an appropriate rating, S&P took several factors into consideration, including the City's plan to issue debt to fund capital projects to reduce the infrastructure funding requirement, current economic conditions, including the significant exposure to the mining industry and the volatility in base metal prices, as well as other subjective factors.

Having a debt rating can provide the City with more control over the rates that will be paid in the future by securing rates up to one year into the future.

Debt per Capita 2016 (\$)

Source: 2017 BMA Study

The chart below details the current outstanding external debt and long-term financing commitments of the City. These obligations total \$70.2 million and require repayments of \$8.5 million per year.

DEBT FINANCING

Project Name	Term (Start Date - End Date)	Total Principal Amount Borrowed/ Committed	Total Outstanding as of Dec 31, 2018	2019 External Debt Payment
External Debt (000's)				
199 Larch St	2003-2023	17,261	5,479	1,456
Pioneer Manor	2004-2024	10,000	4,185	818
Purchase of Falconbridge wells from Glencore (Xstrata)	2009-2025	2,000	937	181
Purchase of Onaping wells from Glencore (Xstrata)	2010-2029	2,175	1,388	173
1160 Lorne St	2015-2035	14,000	12,084	940
Biosolids Plant	2015-2035	46,781	40,898	3,456
Total External Debt		92,217	64,971	7,024
Long Term Financing Commitments (000's)				
Health Sciences North	2001-2023	26,700	4,700	1,000
Northern Ontario School of Architecture	2009-2019	10,000	500	500
Total Long-Term Financing Commitments		36,700	5,200	1,500
	Total	128,917	70,171	8,524

Over the past two years, Council has approved a number of projects that will be paid for using external debt financing. The approved amount and forecasted annual payment follow:

Project	Long-Term Borrowing	Annual Payment	Budget Year Approved
Place des arts	\$5.0 million	\$350,000	2017
Event Centre	\$90.0 million	\$5.2 million	2018
Municipal Road 35	\$30.8 million	\$1.9 million	2018
Lorne Street	\$7.7 million	\$560,000	2018
Playground Revitalization	\$2.3 million	\$150,000	2018
Total	\$135.8 million	\$8.2 million	

The 2019 Budget includes debt to be issued for bridge renewal. The Library/Art Gallery and Convention and Performance Centre business case is also recommended to use debt financing. These projects total \$75 million and would require \$7.4 million of debt repayments per year when complete. Under current debt limits, the City's borrowing capacity will still be in the range of \$300 to \$325 million after funding for these projects has been obtained.

The City's debt per capita is currently much lower than those of other municipalities with a population over 100,000.

Based on the current Council approved limit of 10.0 % of net revenues and taking into account debt currently incurred, prior year approvals, and projects to be approved in current budget, the City does have the capacity to incur more debt. Any new debt incurred will move the debt per capita ratio higher but the current conservative debt limit ceiling should limit the potential impact as noted by S&P in their rating analysis.

2016 Total Debt Outstanding per Capita (\$)

DEVELOPMENT CHARGES

Development Charges (DCs) are established by municipalities in accordance with the Development Charges Act. These charges are collected before a building permit is issued when new development, redevelopment or expansions for residential and non-residential buildings or structures occur.

Most municipalities in Ontario use DCs to ensure the cost of providing the infrastructure to service new development is not carried by existing residents and businesses in the form of higher property taxes. The principle behind DCs is that growth pays for growth, meaning development pays a portion of capital costs associated with new growth and development, while taxpayers fund capital infrastructure which benefits the existing population. Development charges provide municipalities with a tool to help fund the infrastructure needed to serve new growth.

Growth related capital costs are costs that result from the expansion of services to meet the needs to new development and overall increase in the population, households and employment. These capital costs are reduced by an allowance for provincial and federal grants and other sources of funding as well as other deductions required by the DC Act to determine the net capital cost for DC recovery.

In the current by-law, DCs are levied on the following municipal services: water, wastewater, roads, police, general government, libraries, fire, recreation, cemeteries, emergency services and transit.

Generally, the City finances the growth-related portion of capital projects. At the end of each year, the capital projects are reviewed, and the growth-related portion of the capital costs are identified. Actual development charges collected during the year are then applied to fund any growth-related portion of the project as identified in the current DC Background Study.

The current by-law expires on June 30, 2019, as the by-law has a maximum life of five years. In order to continue collecting development charges, the 2019 background study and by-law, which includes the DCs rates, must be approved by Council before June 30, 2019.

The background study will illustrate the City's existing service levels, the growth-related short and long-term capital program on a ten-year planning period from 2019 to 2028 for soft services (includes recreation, police, fire, transit, and more) and 2019 to 2041 for engineered services (includes roads, water/wastewater and drains/stormwater) and the proposed development charge rates.

As part of developing the 2019 Development Charges Background Study and By-law, a working group was established with representation from the Sudbury and District Homebuilders Association, Northeastern Ontario Construction Association, Greater Sudbury Chamber of Commerce, local developers, Hemson Consulting and City staff. To date, the Development Charges working group has reviewed and provided input on the current by-law, policy items such as secondary units, exemption areas, as well as the draft list of capital projects.

Development Charges Collected 2013-2017 (000's)

FINANCIAL CONDITION

The Public Sector Accounting Board (PSAB) has a Statement of Recommended Practice, which offers guidance to public sector entities to support discussions about their financial condition.

A city's financial condition reflects its financial health in the context of the overall economic and financial environment, as well as its ability to meet service commitments to the public and financial obligations to creditors, employees and others. PSAB's recommendations define a government's financial condition using the elements of sustainability, flexibility and vulnerability.

See the Glossary in the Appendices for a description of the calculation of all financial condition indicators.

Sustainability

Sustainability is the ability to maintain existing service levels and meet existing requirements without increasing its relative debt or property tax levels.

The financial position per capita can vary on a year over year basis but remains much stronger than the average and median of all municipalities in the BMA Study.

The City's asset consumption ratio shows that the City's assets are not being replaced as quickly as the City's comparators. The City's ratio of financial assets and liabilities at 1.66 is higher than the recommended range of 0.75 to 1.5 and much higher than the City's comparators as noted in the City's Long-Term Financial Plan. The ratio of debt to revenue is quite low compared to other municipalities.

The debt per household is not an estimate of how much each household must contribute to debt repayment. It is simply a way of describing the City's debt relative to the size of the community. The City's long-range financial plan includes repayment of all debt in its forecasts.

It should be noted that many of these ratios will move more in line with the median as the City incurs the debt that has been approved in the 2017 and 2018 budgets and is proposed in the 2019 Budget. The Long-Term Financial Plan includes further use of debt to address infrastructure renewal/replacement requirements. These plans, if followed, would bring the City in line with asset consumption ratios seen in comparator municipalities. Without the additional debt, City assets will continue to age, the risk of service interruptions will grow and the cost of maintaining those assets will increase.

SUSTAINABILITY

BMA Study	2013	2014	2015	2016	BMA Average	BMA Median
Financial Position Per Capita	\$1,126	\$906	\$1,042	\$1,226	\$454	\$597
Net Financial Liability Ratio	(0.49)	(0.39)	(0.45)	(0.50)	(0.40)	(0.31)
Asset Consumption Ratio	49.1%	49.3%	48.6%	55.0%	42.3%	41.8%

Debt Per Household	\$502	\$434	\$1,178	\$1,096	\$1,027

Source: 2017 BMA Study

Flexibility

Flexibility is the City's ability to increase its financial resources to address additional commitments and change service levels. This is done by increasing property tax revenues or by taking on additional debt.

When analyzing the flexibility indicators, the two major factors to consider are reserves and debt. Compared to other municipalities, discretionary reserve funds are lower than the average, which indicates that the City does not have as much flexibility as the comparators to use reserve funds to immediately address unanticipated expenditures. The City does have a much lower debt per capita and other debt ratios than the median comparator municipalities. The City's ability to react to unanticipated expenditures, take on new capital spending and change service levels is quite strong if it is willing to issue new debt or raise more revenue. Debt, particularly combined with funding opportunities from senior levels of government, is a viable, partial solution to the City's asset condition issues.

The City's debt outstanding per capita is low compared to the median and average municipality of a comparable size. This indicates there is capacity for increased borrowing, which was noted in the Long-Term Financial Plan and by S&P when it issued its credit rating analysis.

FLEXIBILITY

BMA Study	2013	2014	2015	2016	BMA Average	BMA Median
Tax Discretionary Reserves as a % of Taxation	54%	54%	57%	52%	71%	64%

Source: 2017 BMA Study

Vulnerability

Vulnerability is the degree to which the City is susceptible to changes in funding sources outside its control. There is a risk in relying too heavily on funding sources, which can be reduced or eliminated without notice.

The City receives several funding grants from senior levels of government, including Ontario Municipal Partnership Fund allocations, Provincial and Federal gas taxes, and Stewardship Ontario blue box funding, to name a few.

The Rates Covered ratio states that the City is able to cover 74.2 % of the municipality's cost without the use of external funding. According to the Ministry of Municipal Affairs, a basic target is 40 to 60 %, an intermediate target is 60 to 90 %, and an advanced target is 90 % or greater. Although the City's ratio is intermediate, the comparable municipalities are within advanced range.

The trend over the last number of years had been a decrease in reliance on federal and provincial funding sources as shown by a decrease in the City's government transfers to total revenue. This trend reversed in 2017 due to new programs in Social Housing and significant investments in infrastructure projects such as the Maley Drive Extension and Clean Water and Wastewater Funding. Although a higher ratio indicates higher vulnerability, the City will continue to maximize grant revenue.

Summary

The City of Greater Sudbury's financial condition has been relatively stable over the last three years with many areas showing improvement. As noted in the discussion above, many of the financial ratios compare favourably to other municipalities, when considering taxation and debt.

Costs for maintaining existing services and service levels exceed the rate of general inflation. Coupled with the need to address long-term asset renewals/replacements, there will be continued upward pressure on the tax levy and user fees. The City is embarking upon a robust asset planning methodology to minimize long-term costs as assets are rehabilitated or replaced. The City will be using its Asset Management Plan and Long-Term Financial Plan as tools to address the infrastructure renewal requirement, and has significant debt capacity to address these challenges.

VULNERABILITY

BUDGET SUMMARY

Memorial Park

CONSOLIDATED OPERATING AND CAPITAL BUDGET

The City approves two budgets annually: an operating budget and a capital budget. The two budgets taken together, with adjustments to account for funds provided by annual operations to support the capital budget, represent the City's consolidated budget.

The total consolidated budget for 2019 is \$628 million. This is a decrease of 16.7 % from 2018, largely as a result of significant one-time capital projects funded in 2018 such as the Kingsway Entertainment District and Arena/Event Centre as well as major road projects including Municipal Road 35 and Lorne Street.

With so many facets to Greater Sudbury's operations, there are several changes that produce the net change in the consolidated budget. These are described in the "Analysis of Operating Budget Changes – Expenses" chart presented on p. 47.

Below is the City's consolidated operating and capital budget.

	2018 Approved Budget		2019 Base Budget	
	Operating	Capital	Operating	Capital
Tax Levy	260,493,307	37,777,276	272,616,372	37,988,385
User Fees	120,187,949	31,135,330	125,199,705	33,431,663
Federal Grants and Subsidies	777,459	19,630,817	655,997	11,597,562
Provincial Grants and Subsidies	132,035,411	16,335,459	135,610,484	10,526,943
Contribution from Reserves and Capital	8,889,827	15,079,612	10,512,688	14,122,048
Other Revenues	43,028,516	12,514,000	44,326,910	2,082,717
External Debt Financing	-	130,884,239	-	6,900,000
Total	565,412,469	263,356,733	588,922,156	116,649,318
Less: Capital Funding Included in Operating Budget Above				
Contribution to Capital (Tax Levy)	-	(37,777,276)	-	(37,988,385)
Contribution to Capital (User Fees)	-	(31,135,330)	-	(33,431,663)

ANALYSIS OF STAFFING CHANGES

CAO and Communications**Office of the CAO**

- The decrease in part-time hours is due to the completion of the special projects contract.

Communications and Community Engagement

- The increase in permanent positions are due to a staff transfer from the Community Development General Manager's office (1), and Economic Development (1) to better align with work requirements.
- The decrease in part-time hours is a result of the Web Content Editor position becoming permanent mid 2018 as approved in the 2018 Budget, offset by additional hours for 311 operations as approved in the 2019 business cases under \$50,000.

Economic Development

- The decrease in a permanent position is due to a staff transfer to Communications and Community Engagement to better align with work requirements.
- The decrease in part-time hours is a result of funded contract positions in 2018.

Corporate Services**Information Technology**

- The increase in part-time hours is due to a funded project manager position.

Financial Services

- An increase of one permanent position is due to a staff transfer from Community Safety to centralize all finance staff.
- A decrease of one permanent position is due to a staff transfer to Fleet Services to better align with work requirements.
- The increase in part-time hours is due to the funded Municipal Accommodation Tax Administrator.

Assets and Fleet Services

- Eight permanent positions have been transferred to Transit Services to better align with work requirements.
- An increase of one permanent position from Children and Citizen Services is due to a transfer of library maintenance staff to centralize building maintenance services.
- An increase of one permanent position transferred from Financial Services to align with work requirements.
- The increase in part-time hours is due to two additional apprenticeship programs funded through reserves.

Community Development

General Manager's Office

- The decrease in permanent positions is due to a transfer of staff to Housing Services (2), Leisure Services (1), and Communications and Community Engagement (1) to better align with work requirements.

Housing Services

- The increase in permanent positions is due to a transfer of staff from the General Manager's office.

Long-Term Care – Senior Services

- The increase in part-time hours is required to bring the budget in line with the actual hours worked.

Children and Citizen Services

- The decrease in permanent positions is due to a transfer of library maintenance staff to centralize building maintenance services.
- The increase in part-time hours is to support funded programs in Children Services.

Leisure Services

- The increase in permanent positions is due to a transfer of staff from the General Manager's office.
- The decrease in part-time hours is required to bring the budget in line with actual hours worked for parks and recreation facilities.

Transit Services

- The increase in permanent positions is due to a staff transfer from Fleet services to better align resources with work requirements.
- The increase in part-time hours is required to bring the budget in line with actual hours for training and relief.

Growth and Infrastructure

Engineering Services

- The decrease in part-time hours is due to re-allocation of these resources to enhance permanent positions in the division.

Environmental Services

- The increase in part-time hours is due to the implementation plan for the changes in curbside collection as approved by Council.

Community Safety

General Manager's Office

- The decrease of one permanent position is due to a staff transfer to Financial Services to centralize finance staff.

Fire Services

- The decrease in part-time hours are the result of the Training Officer position becoming permanent mid 2018 as approved in the 2018 budget.

Outside Boards

Greater Sudbury Police Services

- The increase in permanent positions is approved by the Greater Sudbury Police Services Board.

MAYOR AND COUNCIL

OVERVIEW

City Council is responsible for the governance of the City of Greater Sudbury, subject to provincial legislation. Council Members are elected every four years, with the term of this Council ending in 2022.

The City of Greater Sudbury 12-ward system is used for electing Councillors, with one Councillor elected for each ward and the Mayor elected at large.

City Council establishes strategies, policies and budgets for the programs and services delivered by the City of Greater Sudbury. Mayor and City Council include budgets for:

- The Office of the Mayor
- City Council, including Councillors' remuneration, and related travel, expenses, support staff and services, and other costs
- Memberships in various organizations, including the Federation of Northern Ontario Municipalities, the Association of Municipalities of Ontario, the Federation of Canadian Municipalities and Ontario Good Roads Association.

AUDITOR GENERAL'S OFFICE

OVERVIEW

The Auditor General's Office reports to Council through the Audit Committee and is responsible for assisting Council in holding itself and its administrators accountable for the quality of stewardship over public funds, and for the achievement of value-for-money in municipal operations. The Auditor General's Office also assists Council with the fulfillment of its governance responsibilities by completing a broad range of audits and by supporting the Wrongdoing Hotline, as well as the Enterprise Risk Management (ERM) process. The Auditor General's Office has two contract staff with overall productivity of 75 %.

SERVICES

Financial, Compliance and Information Technology Audits

- Conducts audits and investigations to assess the adequacy of safeguards over public funds and assets.

Value-for-Money and Performance Audits

- Conducts audits to assess the extent of regard within municipal operations for one or more of the three "E"s which include Efficiency, Effectiveness and Economy.

Governance Audits

- Conducts audits to assess the effectiveness of oversight structures and processes.

Wrongdoing Hotline Support

- Supports the hotline by conducting investigations of wrongdoing involving contractors.
- Provides overall coordination and reporting on the status of hotline complaints.
- Recommends process changes to improve the effectiveness and efficiency of the hotline.

Enterprise Risk Management (ERM) Support

- Supports the ERM process in conjunction with the Chief Administrative Officer.

2018 ACCOMPLISHMENTS

- Completed Value-for-Money Audit of Facility Maintenance.
- Completed Performance Audit of Purchasing Services.
- Completed Governance Audits for the Greater Sudbury Housing Corporation, Greater Sudbury Police Services Board, Greater Sudbury Development Corporation, Pioneer Manor and Greater Sudbury Utilities.
- Completed investigations and semi-annual reports on the Wrongdoing Hotline.
- Completed the initial roll-out of ERM within all City departments.
- Completed annual Audit Plan for 2018.

STRATEGIC ISSUES AND OPPORTUNITIES

- Continued expansion of internal capabilities will minimize reliance on external contractors.
- Refinement of business continuity and succession plans for the Auditor General's Office.
- Implementation of ERM processes with the Chief Administrative Officer.

KEY DELIVERABLES FOR 2019

- Complete audits that address significant inherent risks and the priorities of the new Council.
- Complete timely investigations and status reports for the Wrongdoing Hotline.
- Extend the rollout of ERM within each City department.

% of audit action plans, fully or partially implemented

OFFICE OF THE CHIEF ADMINISTRATIVE OFFICER

OVERVIEW

The Office of the Chief Administrative Officer leads the City's Executive Leadership Team and provides strategic leadership to the organization. It includes the Chief Administrative Officer (CAO) Office, Economic Development, and Communications and Community Engagement.

SERVICES

Corporate Leadership

- Engages with key stakeholders in the community and across the municipal sector to advance Council and City priorities.
- Provides leadership and strategic direction to departments to assist in achieving project or program objectives.
- Leads the development of business plans across dozens of service areas within the organization.
- Leads a workforce of approximately 2,500 employees in the delivery of public services.

2018 ACCOMPLISHMENTS

- Continued to lead the advancement of each of the Large Projects endorsed by Council, including the Kingsway Entertainment District and Arena/Event Centre, The Junction and Place des arts.
- Oversaw the substantial completion of a number of Council and organizational strategic priorities, including the completion of the website revitalization project, the Enterprise Risk Management Policy and the Capital Budget Prioritization project.
- Led the leadership development project for the organization's Business Leadership Group.
- Oversaw the completion of the City of Greater Sudbury Employee Survey, which had a 6 % increase in overall participation.
- Oversaw the development of an improved Council orientation program for the 2018-2022 Council.
- Implemented a monthly City dashboard to demonstrate performance and progress in municipal service areas.

STRATEGIC ISSUES AND OPPORTUNITIES

- The Large Projects endorsed by Council continue to require leadership and coordination from the CAO's Office to ensure appropriate project management, strategic and financial oversight, and corporate capacity building.
- Through policy development, process changes and the introduction of technology, opportunities will be realized to ensure alignment between the City's economic development efforts, development permit application/processing and development financing strategies
- The development of communications and community engagement strategies will evolve to increase the assurance that residents have timely access to objective, factual information about municipal issues, programs and services
- Continued emphasis on sustainable long range planning, especially long range financial planning and aligning project management efforts with desired community outcomes, offer significant potential for building trust and confidence.

KEY DELIVERABLES FOR 2019

- Achieve deliverables outlined in Council's Strategic Plan.
- Implement customer service strategy and response standards across the organization.
- Continue to advance the Large Projects endorsed by Council.
- Continue to explore opportunities for funding with senior levels of government.

COMMUNICATIONS AND COMMUNITY ENGAGEMENT

OVERVIEW

The Communications and Community Engagement Division plans and executes strategic communications and engagement activities, building understanding of the City, its people, programs, services and policies. It provides strategic advice and support to the organization on customer service. Through the 311 call centre, the division delivers first-resolution response to callers each day, using judgment, discretion and organizational knowledge to resolve, escalate or respond directly to inquiries.

SERVICES

Communications and Engagement

- Works as business partners to departments in planning, developing and executing strategic communications plans in support of program, service and organizational objectives.
- Manages between 650 and 800 media inquiries and co-ordinates more than 30 media events per year.
- Leads emergency and crisis communication.
- Has governance accountability for the City's overall website presence and online community engagement platform, and manages the City's social media accounts.
- Provides creative and design solutions to support communication, marketing and advocacy activities.
- Provides advice and support to departments and francophone stakeholders in the provision of customer service in French.
- Provides guidance and strategic support related to community engagement, including support to 15 Community Action Networks.

311

- Provides first-resolution customer service wherever possible to citizens inquiring about services.
- Tracks, logs and resolves or escalates more than 19,000 inquiries from residents per month by phone or email.
- Provides front-counter services at the Tom Davies Square Citizen Service Centre, serving 4,720 customers on average per month.
- Provides 24/7 after-hours 311 service for public works emergencies and animal control through a third-party contractor.
- Analyzes call trends to support performance tracking and monitoring.

Customer Service

- Provides advice and guidance related to overarching customer service strategies for the organization.
- Leads best practice research and performance monitoring activities related to customer service.
- Leads the City's use of Customer Relationship Management (CRM) technology to support customer service outcomes.

2018 ACCOMPLISHMENTS

- Developed the City's first enterprise-wide customer service strategy, Respect. Excellence. Connection. Service., a roadmap for employees and citizens alike to make a positive customer service culture part of the City of Greater Sudbury brand.
- Completed the second phase of the City website revitalization project, resulting in two awards, and a more user-friendly, customer-focused communications tool for residents.
- Led the development of a business plan and a change management plan for the replacement of the City's CRM system.
- Implemented random screening and auditing of 311 calls for quality assurance/training purposes.
- Developed the organization's first overarching communications policy to guide and streamline the communications function of the City.
- Delivered the 2018 Employee Survey under a new provider, with a 6 % point increase in participation.
- Completed the Connecting You, Connecting Us, communications strategic plan, with a focus on community understanding, positive story sharing and empowered communications.
- Produced the City's second annual Report to the Community, the story of work done in 2017, and a snapshot of progress to come.
- Trained and included several new service areas on the Customer Relationship Management system and/or 311, including Citizen Services, Cemetery Services, Engineering Services, Construction Services and Sudbury Airport.

STRATEGIC ISSUES AND OPPORTUNITIES

- The ongoing opportunity to change the perception of municipal services and government in the community by way of positive, dynamic, and targeted communication and customer service activities and strategies.
- The creation of a foundation for customer service excellence through the implementation of a number of actions associated with the City's customer service strategy.
- The City's Customer Relationship Management (CRM) system, the Active Citizen Request (ACR) system, is no longer being supported by its provider. A new CRM system will enable technological, customer service, and business outcomes to effectively come together for greater outcomes for staff and residents alike.
- The extension of 311 operating hours could provide additional options for citizens to access municipal services and requests for information.

KEY DELIVERABLES FOR 2019

- Lead the ongoing process to implement a new Customer Relationship Management (CRM) system.
- Lead the implementation of the City's Customer Service Strategy.
- Execute a positive internal and external multimedia reputation enhancement campaign for municipal government.
- Publish a regular digital newsletter from the City.
- Establish an issues management guide for the organization.
- Develop a community engagement toolkit for internal and external stakeholders.

KEY PERFORMANCE INDICATORS

Measure Name	Category	2017	2018	Target

ECONOMIC DEVELOPMENT

OVERVIEW

Economic Development is focused on investment attraction, community promotion, improved quality of life and support for local business. Staff achieve goals through the creation and coordination of strategic partnerships with internal stakeholders, community institutions, local businesses, and regional, provincial and federal government agencies. Staff also provide support to, and receive guidance from, the 18-member community board of the Greater Sudbury Community Development Corporation, operating as Greater Sudbury Development Corporation (GSDC).

SERVICES

Investment and Business Development

- Serves existing businesses with expansion opportunities, export development, funding access and municipal development processes.
- Promotes Greater Sudbury for business investment and expansion, and physician attraction.
- Maintains and grows strategic partnerships for mining supply and services, and local immigration.
- Provides analysis and due diligence support to the GSDC Board as it manages community economic development grants.
- Works with post-secondary, health and business association institutions to support priorities and engage their leadership to advance the community's development goals.
- Maintains strong relationships with legislative representatives and ministries at the provincial and federal level.

Tourism and Culture

- Coordinates the Sudbury Tourism Partnership.
- Promotes tourism in Greater Sudbury through media visits, group tour stakeholders, marketing and promotions, and partnerships.
- Manages the annual arts and culture grants process.
- Manages and coordinates events and conferences.
- Provides event support through in-kind or financial contributions to events and festivals in the city.
- Leads regional tourism initiatives.
- Coordinates the downtown Market operations.

Entrepreneurship and Small Business Development

- Manages the Regional Business Centre Partnership.
- Serves individual and small business entrepreneurs to assist startup and growth through one-on-one consultations, guidance on licences, permits, registration and regulations, market research, a business resource library, seminars, networking and mentoring opportunities, business plan support, funding and finance guidance, and referrals.
- Provides small business professional development through annual Bridges to Better Business Conference.
- Administers provincially-mandated programs, including Summer Company, Starter Company and Starter Company Plus.

2018 ACCOMPLISHMENTS

- Created successful Greater Sudbury mining marketing partnership and staged initiatives in Nevada and Toronto.
- Advanced The Junction (Convention and Performance Centre and Library/Art Gallery), two of the four Large Projects endorsed by Council.
- Coordinated municipal support for Place des arts.
- Managed public process to introduce new Municipal Accommodation Tax.
- Co-hosted Aboriginal Business Match and continued to develop economic development relationships with area First Nations.
- Coordinated municipal support for 2018 Telus Cup National Midget Championships.

STRATEGIC ISSUES AND OPPORTUNITIES

- Establish and maintain strong strategic partnerships within the entrepreneurial ecosystem to reduce the duplication of services and ensure the right mix of products and services for the small business and startup community.
- Leverage existing partnerships to increase revenue generating opportunities for Economic Development to advance marketing, promotions and capacity building efforts, and address financial gaps faced by projects and initiatives.

KEY DELIVERABLES IN 2019

- Work with established partnership to advance the Business Incubator and Seed Capital initiatives.
- Coordinate the creation of an employment recruitment network in partnership with employment agencies, large employers, recruitment officers and other stakeholders to establish a coordinated strategy for workforce recruitment.
- Support the newly established Tourism Development Committee and develop successful strategy and implementation plan for investment of proceeds of the Municipal Accommodation Tax.

LEGAL AND CLERK’S SERVICES

OVERVIEW

Legal and Clerk’s Services provides governance and legal support to the organization. The division administers and oversees numerous processes pursuant to a variety of legislation, including but not limited to the Municipal Act, 2001, the Provincial Offences Act (POA), the Municipal Freedom of Information and Protection of Privacy Act and the Municipal Elections Act.

SERVICES

Clerk’s Services

- Provides leadership and direction on administrative governance matters to staff and Council members.
- Manages all processes related to approximately 100 Council and Committee agendas and meetings annually.
- Coordinates and delivers municipal elections and related processes.
- Provides services to the public related to the issuance of approximately 700 marriage licences, the issuance of approximately 1,700 burial permits and the solemnization of approximately 95 marriages on an annual basis.
- Administers duties and responsibilities directed to the municipal Clerk under various provincial statutes.
- Provides mail delivery services to municipal facilities throughout the city.

Regulated Services

- Administers the processes related to Provincial Offences Court pursuant to the Provincial Offences Act, including receipt and processing of approximately 35,000 charges annually, coordination and staff support for approximately 700 hours of court time annually, and administration of collection processes for outstanding or defaulted fines.
- Manages the City’s municipal and corporate archival services.
- Administers all processes related to an annual average of 236 Freedom of Information requests as well as appeals or complaints to the Information and Privacy Commissioner.
- Provides advice to the organization on records management and privacy matters.

Legal Services

- Provides leadership and advice on legal matters throughout the organization including local boards and corporations.
- Conducts and oversees litigation matters before courts and administrative tribunals.
- Conducts prosecution and appeals for Provincial Offence matters.
- Completes real estate transactions, registration of subdivisions and other interests in land including title searching for the entire organization.
- Drafts and advises on agreements of all types and other legal documentation as may be required to support the organization, including procurement matters, real estate, and planning and development matters.
- Provides advice and assistance in the identification and management of risk and liability.

Council Support

- Provides clerical and administrative support to Councillors.

2018 ACCOMPLISHMENTS

- Delivered the City's 2018 Municipal and School Board Election with increased communication efforts for voter engagement and electronic voting as the exclusive method of vote.
- Implemented or recommended numerous changes stemming from Bill 68, Modernizing Ontario's Municipal Legislation Act, 2017, including the appointment of an integrity commissioner, the development of a Code of Conduct and Complaint Protocol for Members of Council and a new Council Procedure By-law.

STRATEGIC ISSUES AND OPPORTUNITIES

- Recent changes to the Municipal Act, 2001 and other statutes have resulted in numerous positive changes needing new or updated policies and processes, including mandatory adoption of the services of an integrity commissioner. While many of these changes have been implemented in 2018, they will affect the new term of Council and future councils as the new measures are put into practice. Training and education early in the term as well as throughout Council's term will assist with ongoing awareness.
- Record management practices (paper versus electronic) will need to be weighed as the costs to maintain facilities for the storage of documents are significant. The new IT Strategic Plan will assist in determining organization-wide practices and systems to reduce physical space requirements.
- Improvements to agenda and Council meeting management systems will result in increased efficiency of staff time required to support agenda and meeting processes, increased efficiency of processes during meetings and a better experience for users.
- Increases are being seen in the occurrences of legal action and reliance on external legal support with specialties to represent City interests.
- Political and legislative trends are resulting in a municipal operating environment that is more open, transparent and responsive to citizen inquiry.

KEY DELIVERABLES IN 2019

- Delivery of key orientation and educational components for the new Council including meeting procedure, freedom of information and privacy, various legal matters and the Code of Conduct.
- Completion of required elements under the Municipal Elections Act related to campaign filings and the City's Compliance Audit Committee.
- Assist Council with processes for the appointment of Members of Council and members of the public to committees, boards, corporations, panels and other required groups.
- Commence the process for the procurement of a new agenda and meeting management system.
- Continued review and improvement of records management practices.

CORPORATE SECURITY AND BY-LAW SERVICES

OVERVIEW

Security and By-law Services provides public education, investigation and enforcement of municipal by-laws and specific provincial legislation to protect the welfare, health, and safety of our staff and residents. The Parking Services area provides convenient and accessible downtown parking to those visiting City Hall, doing business, running errands, working or simply enjoying the downtown core.

SERVICES

Security Services

- Provides security advice and support to the organization, including investigation of threats to staff and facilities, management of similar risks and direct supervision of contract security staff.

By-law Services

- Administers public education and enforcement of a number of municipal by-laws that establish minimum standards of health and safety and preserve the image and character of Greater Sudbury.
- Responds to approximately 8,000 complaints per year.
- Provides licensing services to support municipal and provincial licensing requirements such as business, vehicle for hire and lottery licences. Licensing staff issue approximately 1,200 business licences and 200 lottery licences per year.

Animal Control and Shelter Services

- Administers animal control and animal shelter services for the City. The shelter provides care for approximately 1,000 domestic dogs and cats per year, providing facilitating the adoption of more than 600 animals per year.

Municipal Parking Services

- Administers on-street and municipal lot parking for the City. Issues approximately 1,000 monthly and yearly parking passes to staff and residents. Provides 438 on-street parking spaces and fourteen municipal off-street parking lots totaling approximately 1,667 parking spaces.

2018 ACCOMPLISHMENTS

- Finalized a regulatory review that saw the implementation of a consolidated Noise By-law for the City of Greater Sudbury.
- Completed a review of the Vehicle for Hire By-law to ensure a regulatory model that aligns with the needs of owners and residents, ensuring a safe, accessible and adequately priced taxi service in the community.
- Completed a review of security services at Transit; resulting in a service level increase for security services at the Transit Terminal.
- Completed a review of municipal on-street and off-street parking services, with signage and lighting improvements implemented for municipal lots.

STRATEGIC ISSUES AND OPPORTUNITIES

- An examination of service levels for security, enforcement and parking activities in the municipality will identify efficiencies that support changes in legislation and compliance to align with industry standards and will explore opportunities for consolidation of security, by-law enforcement and policing.
- Emerging cannabis legislation creates the requirement for municipal licensing, enforcement and educational resources.

KEY DELIVERABLES IN 2019

- Relocate Greater Sudbury Animal Shelter.
- Implement security service level enhancements.
- Implement downtown parking app and pay by plate initiatives.
- Enforce cannabis legislation.

- Enhance use of technology, especially mobile technology, to deliver parking services and enforce parking by-law.

INFORMATION TECHNOLOGY

OVERVIEW

The Information Technology Division is responsible for all aspects of Information Technology (IT) at the City. IT provides the City with technology services in the areas of computer hardware, software and telecommunications required to manage municipal operations. IT provides strategic planning and project management to enhance services provided by the City to improve operations and services to citizens.

SERVICES

IT Strategic Planning and New Project Delivery

- Provides consistent City-wide definition, planning and progress monitoring for projects that leverage information technology.
- Conducts business analysis, in partnership with City business units, and project management for IT projects.
- Presents an update on the IT Strategic Plan at least once annually to Council.
- Measures the percentage of approved IT Strategic Plan projects that are within +/-10 % of budget and schedule.
- 9 % of IT FTEs are allocated to this service.

IT Infrastructure Delivery and Access

- Plans, delivers and supports operationally the underlying hardware, software and networks upon which IT Business Solutions run.

- Provides cyber security protection for all IT systems and data.
- Supports approximately 2,500 end user computing devices, approximately 1,500 phones and 1,000 Internet of Thing (IoT) devices, such as parking meters.
- 35 % of IT FTEs are allocated to this service.

IT Client Services Delivery and Access

- Plans, delivers and operationally supports end-user hardware, software and connectivity.
- Partners with business units to plan and deliver agreed service levels.
- Measures end user satisfaction annually.
- Supports service requests, resolution of incidents and training for 2,145 users.
- 18 % of IT FTEs are allocated to this service.

IT Business Solutions Delivery and Access

- Plans, develops, delivers and operationally supports approximately 230 business applications used to deliver CGS services, exclude standard commodity software such as Office suites.
- 35 % of IT FTEs are allocated to this service.

2018 ACCOMPLISHMENTS

- Developed a new Corporate Information Technology Strategic Plan.
- Completed the procurement phase of the leisure and program registration system.
- Completed development of the Geographic Information Systems (GIS) implementation plan.
- Provided technical support and resources for the 2018 Municipal Election.
- Upgraded the software infrastructure of the corporate budget system, the building automation systems at 199 Larch St., and GIS infrastructure and software for the City.
- Implemented multi-year budgeting within the corporate budget system.
- Launched an upgraded child care registry management systems including a public portal.
- Built and replaced 13 legacy systems moving them to a new maintainable platform.
- Completed the City's application to the Canada Smart City Project.
- Deployed appliance to manage cyber attacks including the Open Threat Exchange on all servers.
- Added important core servers to Disaster Recovery (DR) replication for faster recovery to DR site.
- Migrated workstations at libraries to the new Chromebooks solution as part of an ongoing pilot.
- Completed improved redundancy for Water/Wastewater Treatment SCADA systems through virtualization and application of Artificial Intelligence cyber defense.
- Moved from current helpdesk system to new service desk and customer support system.
- Implement new copiers and infrastructure with load balancing servers (increasing reliability) and secure print (increasing privacy).

STRATEGIC ISSUES AND OPPORTUNITIES

- The Corporate Information Technology Strategic Plan's vision is "Great service experiences powered by technology and data, available anywhere, anytime." The plan provides a defined roadmap of strategic projects to achieve this vision.
- Cyber security continues to be a global issue, IT must continue to monitor and upgrade systems and programming to reduce security risk.
- Champion the development of greater analytical capacity to ensure the City has the staff and technology tools to make data driven decisions.
- Exploration of the potential associated with enhanced communication network access and potential linkages to the internet will result in new methods in the delivery and performance monitoring of City services.

KEY DELIVERABLES IN 2019

- Procure and implement the Land and Property Management System (LPMS) and the Customer Relationship Management System.
- Implement the new leisure and program registration system.
- Support Advanced Metering Infrastructure (AMI) and Automatic Meter Reading (AMR) project.
- Support periodic upgrade releases of CityWorks, the municipal asset management system.
- Support periodic upgrade releases of the Enterprise Resource Planning (ERP) system.
- Develop data driven dashboards for the public and decision support tools to guide staff decision making.
- Establish IT Governance, including annual Council updates on IT Strategic Plan progress.
- Implement IT Strategy recommended training across all staff levels regarding the ability to anticipate, adapt and integrate technology in ways that improve key results.
- Implement mobile computing strategy (for field workers) to support Cityworks, GIS and LPMS.
- Work on a Community Data Network Plan to enable sustainable connection to Smart City technology in the community such as automated traffic lights.

- Modernize employee experience to enable efficient communications, collaboration and secure wireless access.
- Implement GIS Strategy.
- Complete Corporate Disaster Recovery Plan.
- Complete implementation of the eTendering system.
- Complete implementation of the new Transit scheduling system.
- Complete Windows 10 migration.

HUMAN RESOURCES AND ORGANIZATIONAL DEVELOPMENT

OVERVIEW

Human Resources and Organizational Development delivers human resources support and services to the City of Greater Sudbury. The division stewards all corporate human resources activities to ensure employee efforts are focused on producing the right results, and the City can attract and retain the right skills, values and behaviours in the workforce.

SERVICES

Human Resources and Labour Relations

- Provides general labour relations and human resources strategic support to City management, bargaining agents and employees in a business partnership model. Including the development of six in-house training modules delivered twice a year with over 130 participants annually.
- Total of 141 grievances were heard at third stage, 28 grievances heard at mediation and 20 grievances heard at arbitration.
- Interprets and applies relevant human resource policies, Ontario and Canadian labour and employment legislation, and related case law.
- Develops and participated in Behavioural Event Interviews for Non Union recruitment (28 in 2017 and 19 in 2018).
- Conducted 14 investigations and resolved seven complaints submitted under the Workplace Violence, Harassment and Discrimination Prevention Policy or Human Rights Tribunal.

- Lead multiple sets of negotiations (CLAC, ONA, CUPE 148 in 2018) as well as continue to manage interest arbitration processes (SPFFA and CUPE 148).

Compensation and Benefits

- Coordinates employee lifecycle changes, the functionality of the Human Capital Management system, and administers total compensation, including administration of group insurance and all aspects of OMERS pension reporting.
- Administers over 7,400 transactions that include 62 retirements, 1,620 data changes, 1,124 hires and rehires, 1,500 pay rate changes excluding general wage increases, 200 position changes, 1,810 leaves of absence and return from leave reporting, 1,000 terminations, over 10,000 records updates related to benefits and over 4,800 T4's. These tasks were performed for all City and Police Services employees and retirees.

- Ensures the integrity of the City's compensation systems including salary administration, job evaluation and pay equity.
- Provides expert advice/guidance and leads process for the job evaluation of 89 jobs. Resources in both Human Resources and Labour Relations and Compensation sections provide advice on and process over 180 job description changes.
- Administered over 175 WISE recognition awards.

Organizational Development, Safety, Wellness and Rehabilitation

- Enhances organizational effectiveness and development through leadership of recruitment and selection, leadership development, performance planning and development, talent evaluation and succession planning, and workforce management systems. Nine hundred and eighty-seven jobs were posted.
- Oversees Workplace Safety Insurance Board (WSIB) claims, early intervention programs, return to work, accommodations and disability claims (473 claims).
- Provides leadership and direction regarding occupational health and safety for the entire organization, which encompasses over 3,000 employees with diverse needs.
- Supports and coordinates employee wellness programming. This includes 353 employees participating in wellness initiatives, 111 employees subscribing to the wellness mailing list, and our facilities having over 7,819 visits by eligible employees.

2018 ACCOMPLISHMENTS

- Provided greater access to key corporate employment related resources and policies.
- Competitively procured and transitioned to a new benefits provider.
- Developed a Psychological Health and Safety policy and a plan to implement a Psychological Health and Safety Standards.
- Completed the rollout of the new performance planning and development process for all non-union employees.
- Delivered training to all employees on the Workplace Violence, Harassment Prevention Policy.
- Created a Substance Use and Fitness for Duty in the Workplace Policy to address the legislative change related to cannabis.

- Negotiated an updated Collective Agreement with Christian Labour Association of Canada (CLAC) Volunteer Firefighters.
- Negotiated an updated Collective Agreement with Ontario Nurses Association (ONA).
- Implemented enhanced recognition initiatives to celebrate contributions of employees.

STRATEGIC ISSUES AND OPPORTUNITIES

- The potential retirement of just under 20 % of the City's workforce by 2020 means a new demographic of employees.
- Increases in accumulative stress claims and presumptive Workplace Safety and Insurance Board legislation present the opportunity for proactive health and safety management practices.
- Interest arbitration system in Police and Fire continues to lead to outcomes that would not be reasonably anticipated by free collective bargaining.
- The leveraging of technology, in line with the new IT strategy, presents the opportunity to alleviate and streamline administrative tasks and allow staff more time to focus on strategic priorities.
- Negotiations with Canadian Union of Public Employees (CUPE) Local 4705 to establish a framework for employee relations in 2019.

KEY DELIVERABLES FOR 2019

- Negotiate an updated Collective Bargaining Agreement with CUPE 4705 Inside and Outside Bargaining Units for agreement that expires March 31, 2019.
- Enhance key Human Resource systems in support of the Human Capital Strategic Plan to ensure the City is able to attract, retain and engage employees for now and into the future. Initiatives to include: enhancing HR analytics, streamlining recruiting process, updating policies to attract and retain key talent, and focus leadership development initiatives including offering a front-line supervisory program.
- Implementation of enhanced training and support for Peer Support Network in Community Safety to support Psychological Health and Safety Standard initiative.
- Implementation of organization-wide software for workplace inspections.
- Integrate Greater Sudbury Housing Corporation systems and policies within the City.

KEY PERFORMANCE INDICATORS

FINANCIAL SERVICES

OVERVIEW

Financial Services provides tax billing and collection, accounting, payroll and financial information system support, purchasing and procurement, budgeting, financial planning, risk management and insurance, and financial and support services.

SERVICES

Taxation

- Actively maintains 60,000 property tax accounts with 9 staff.
- Processes 800 elderly tax credits and 300 vacancy rebate applications.
- Ensures all lands and buildings are taxed appropriately and expedites tax collection for these properties.
- Ensures valuation of property assessments are maximized and picked up in a timely fashion by the Municipal Property Assessment Corporation (MPAC).
- Manages the collection efforts on failed tax sale properties.

Accounting

- Oversees general accounting activities, internal control systems and financial benchmarking.
- Processes 6,000 accounts receivable invoices annually, along with collections and customer inquiries.
- Manages contract with Greater Sudbury Utilities for water/wastewater billing and collection.
- Processes 74,000 vendor invoices annually through accounts payable and ensures timely payment.
- Oversees the City's payroll processing for 2,016 full-time employees and 2,285 part-time employees, including all statutory reporting and payments.
- Coordinates internal and external reporting including the City's Annual Consolidated Financial Statements and Annual Report.

- Coordinates program audits.
- Manages PeopleSoft Finance, the City's financial information system.
- Develops policies and procedures for strong internal controls, including compliance monitoring.
- Administers and collects the Municipal Accommodation Tax.

Purchasing

- Partners with operating department to plan, develop and coordinate the City's procurement activities.
- Ensures all City procurements are in compliance with the Purchasing By-law, trade agreements (CETA/CFTA) establishing transparency, fairness and accountability.
- Processes approximately 1,800 purchase orders, 40 requests for proposals and 100 tenders annually.

Financial Planning and Budgeting

- Leads the City's annual operating budget of approximately \$590 million and capital budget ranging from \$125 - \$270 million, including the ongoing monitoring, as well as internal and external reporting.
- Develops Property Tax Policy and tax rates.
- Manages the City's financing strategies, including Development Charges Background Study, and the Long-Term Financial Plan.
- Manages the City's insurance and risk management program processing approximately 300 to 400 claims a year.
- Manages, develops and implements investment plans for over a \$300 million portfolio.
- Oversees and manages capital asset accounting and reserve funds totaling \$190 million.
- Provides financial support and analysis related to internal and external reporting, such as Annual Consolidated Financial Statements and Council and Committee reports.
- Provides financial support and analysis to operating departments in a business partnership model.

Financial Support Services

- Manages the City's activity-based Computerized Maintenance Management System.

2018 ACCOMPLISHMENTS

- Provided first annual update to Long-Term Financial Plan.
- Completed implementation of efficiency projects in both PeopleSoft Human Capital Management and Finance.
- Updated internal policies and procedures related to Payroll and Accounts Receivable.
- Received Government Finance Officers Association (GFOA) award for Financial Reporting for 2016 Annual Report.
- Received GFOA award for Distinguished Budget Presentation for 2018 Budget Report.
- Led the inaugural capital prioritization process for inclusion in the 2019 Budget.
- Secured a AA debt rating from S&P.
- Accumulated required information and analysis for inclusion in the upcoming Development Charges Background Study and By-law.
- Led participation in the Municipal Benchmarking Network Canada.
- Established e-Tendering project team to implement e-Tendering for Request for Tenders and Proposals, effective March 2019, streamlining the procurement process.
- Amended Purchasing By-law 2014-1 to address two trade agreements, Canadian Free Trade Agreement (CFTA) and the Canadian European Comprehensive Agreement (CETA) requirements, and increase tendering thresholds.
- Adopted and implemented new policy relating to the collection of tax arrears that allows the Municipality to take action after the second year of arrears.
- Adopted and implemented new policies that eliminated commercial and industrial subclasses and phased-out the vacant unit rebate on commercial and industrial properties.
- Implemented the Municipal Accommodation Tax effective September 1, 2018.

STRATEGIC ISSUES AND OPPORTUNITIES

- Asset Management Policy and Long-Term Financial Plans will become the foundation for future financial decisions. These plans describe the long-term needs to support and enhance services, maintain infrastructure to support existing service levels, and the costs and choices associated with potential decisions by Council.
- Continue to develop and deliver timely transparent financial information to the organization and the public to build trust with the community.
- Leverage enterprise-wide system of capital planning and capital reserve fund management to address highest priority capital needs and provide clarity to senior levels of government about Greater Sudbury's needs.
- Utilize increased debt limits for long-term financial commitments to minimize overall impact to the taxpayer in line with the Long-Term Financial Plan.
- Continued work on an enterprise-wide business planning process will enable the growth of our budget process from a financial budget to a performance budget.
- Continued focus on tax fairness and revenue generation opportunities in consultation with MPAC and the provincial government.

KEY DELIVERABLES IN 2019

- Implement additional efficiency projects in PeopleSoft Human Capital Management and Finance and develop a long-term plan for enhancements.
- Support the implementation of a new leisure program registration and facility booking software.
- Launch e-tendering in March 2019, and support the operating departments through this change.
- Provide mandatory training to the operating departments due to purchasing threshold changes and trade agreement requirements.
- Complete revisions to Capital Budget Policy and Reserves and Reserve Funds and Trust Funds By-law to better align with Asset Management and Long-Term Financial Plan.
- Complete the Development Charges Background Study and By-law for approval by Council before June 2019.
- Implement improvements afforded by updates to insurance claim management software.
- Implement multi-year budgets for tax years 2020 and 2021.
- Development of a more robust assessment base protection policy.
- Initiate the development of a funding model for stormwater infrastructure.
- Continued implementation of updated tax policy as per new legislation in the Municipal Act relating to tax collection and vacancy rebates.

ASSET AND FLEET SERVICES

OVERVIEW

The Assets and Fleet Services division manages the places where City employees work and interact with the public, as well as the vehicles and equipment needed to deliver services. Specifically, this division is responsible for the maintenance of City-owned buildings, including capital works, energy efficient initiatives, land inventory, property acquisitions, sales and leasing, corporate asset management planning and fleet services.

SERVICES

Real Estate

- Performs approximately 80 real estate appraisals annually to ensure value for the municipality.
- Administers 160 leases, licences of occupation and land use permits.
- Negotiates and closes approximately 30 real estate transactions for the acquisition of properties to be used for municipal purposes or sold as they are no longer required for municipal purposes.

Capital Projects

- Oversees the planning, design and management of approximately 50 capital projects annually required to preserve and/or improve municipal facilities, including electrical, structural, civil, plumbing, mechanical and technological to the approximately 3.5 million square feet of building space owned and operated by the City.

- Provides risk mitigation involving health and safety matters related to structural, mechanical and designated substances.

Facilities Management

- Responsible for the day-to-day operation and maintenance of approximately 1 million square feet at 200 Brady St., 190 Brady St., 199 Larch St., Lorne Street Transit Garage, the Downtown Transit Terminal, libraries, Lionel E. Lalonde Centre and other facilities.
- Responds to over 6,000 preventative and emergency work orders in order to maintain equipment, provide janitorial and grounds maintenance, and comply with various legislation and regulations as it relates to facility management.

Fleet Services

- Provides for the repair and maintenance of over 700 units of fleet, machinery and equipment used in the delivery of municipal services.
- Assesses, acquires or disposes of approximately 50 units of fleet, machinery and/or equipment annually.
- Operates 6 fueling stations that are accessed by City fleet, Greater Sudbury Hydro Inc., school boards and the Greater Sudbury Police Service.

Energy Initiatives

- Administers energy and emission monitoring and reporting for over 600 City-owned facilities.
- Oversees energy audits, develops business cases for energy retrofits and new projects, and applies for financial incentives.

Asset Management

- Leads the development of the corporate asset management strategy for the \$2.8 billion investment that the City has made in infrastructure.
- Ensures asset management data and legislation is consistently collected and adhered to.
- Develops and maintains levels of service framework to reflect Council direction.
- Provides input on business plans, capital budgets and strategic planning initiatives based on asset management requirements.
- Supplies analytics and decision support for asset investment decisions.

2018 ACCOMPLISHMENTS

- Agreement to provide fleet services to Manitoulin Sudbury District Services Board, resulting in operational flexibility.
- Installed new signage with wayfinding at City-owned parking lots.
- Made significant investments in and progress on Tom Davies Square projects including courtyard redesign, elevator replacement, skylight replacement and generator projects.
- Completed assessments of 70 City-owned facilities relating to building condition and designated substances which are to be used in the creation of asset management plans.
- Centralized facility maintenance at libraries, Lionel E. Lalonde Centre and other buildings.

STRATEGIC ISSUES AND OPPORTUNITIES

- Continue to centralize maintenance at City facilities in order to standardize procedures, treatments and technologies resulting in efficiencies, improved asset condition and adherence to regulations.
- Expand knowledge of trades via internal training to add value and knowledge to existing maintenance personnel.
- Take advantage of opportunities to lessen unproductive assets or rationalize existing assets.
- Trade disputes and a lower Canadian dollar are contributing to rising vehicle, equipment and parts pricing from the United States. Continued analysis of building materials and the related health affects requires particular attention to ventilation, energy impacts and climate management. Similarly, energy efficient and/or alternative energy vehicles and equipment continue to become more popular, reliable and practical.
- Telematics, which include vehicular technology, telecommunications, technology related to road transportation, connectivity, sensors and multi-media, are becoming commonplace on many vehicles and equipment. This puts upward pressure on capital costs and maintenance and drives the need for a technology savvy workforce. It also offers benefits to operating departments in the form of data that can be used to increase safety, reduce costs, reduce risk, and provide information on the optimal use of a fleet.

KEY DELIVERABLES IN 2019

- Install pay by plate parking machines in the downtown core.
- Continue to review, and implement standardized work procedures in Fleet Services.
- Continue to review assets and build complete asset management plans in line with the City's Asset Management Policy.
- Reduce reliance on third-party facility maintenance.
- Lead the production of the City's Asset Management Plan in order to more appropriately service the asset over the full lifecycle.

HOUSING SERVICES

OVERVIEW

Housing Services administers social housing programs for the City of Greater Sudbury, which are mandated by the Ministry of Municipal Affairs and Housing and the Housing Services Act, 2011. The City’s primary role is program delivery and administration. Housing Services is also responsible for the operation of a central social housing wait list registry for Rent-Geared-to-Income (RGI) subsidies.

SERVICES

Greater Sudbury Housing Corporation (GSHC)

- The City of Greater Sudbury is the sole shareholder of the corporation. Housing Services is responsible for ensuring that the GSHC meets their mandate and complies with all applicable legislation, regulations and program requirements.
- The corporation acts as the landlord for the 1,848 public housing units owned by the City, including housing individuals and families seeking affordable housing, ensuring eligibility for RGI assistance for its tenants, and maintaining the properties in accordance with property standards.
- Council approved the recommendation to bring GSHC administration in house effective September 2018. A transition team has been struck and work has commenced to ensure there is a smooth transition for GSHC staff and tenants. The transition team expects work to be completed by the fourth quarter of 2019.

Housing Programs

- Ensures that local non-profit and cooperative housing providers comply with applicable legislation, regulations and program requirements.
- Develops and implements local social housing rules and policies.
- Provides direction, training and education to stakeholders, social housing providers and the public.
- Administers the Commercial Rent Supplement program.
- Delivers all provincially and federally funded housing Programs.

Housing Registry

- Determines eligibility for RGI assistance for all social housing applicants.
- Ensures low income households are housed in accordance with provincial legislation and local requirements.

2018 ACCOMPLISHMENTS

- Ongoing construction progress on the Rental Housing Investment in Affordable Housing for Ontario Program (2014 Ext.) at 1381 Paris Street, a 65-unit, 6-storey seniors rental housing building.
- Ongoing construction progress on the Rental Housing 2016 Social Infrastructure Funding (SIF) Investment in Affordable Housing (2016 SIF IAH) program advanced to the March of Dimes Canada Non-Profit Housing Corporation for the construction of a 12-unit, 1-storey supportive rental housing building.
- Awarded 82 households with \$20,000 forgivable loans through the 2016 SIF IAH Ontario Renovates, IAH-E 2014 Ontario Renovates and SIF Year 3 Ontario Renovates Programs.
- Ongoing energy efficient retrofits on infrastructure work on 12 social housing projects and GSHC through the Investment in Affordable Housing for Ontario Program (2014 Ext.) – Social Housing Improvement Program (SHIP).
- Completed Phase 1 of the social housing portfolio revitalization plan, intended to guide the City in decisions regarding revitalization, repurposing, replacement or disposal of local housing corporation (GSHC) assets with financing options to bring forward to City Council.
- Completed Building Condition Assessments for 22 non-profit housing providers to provide complete and up-to-date information to inform the social housing portfolio revitalization plan.
- Assisted 57 households through the Investment in Affordable Housing for Ontario – Housing Allowance Program, a shared delivery program with the Ministry of Finance.
- Housed 574 households through the City's centralized wait-list registry.
- Assisted 25 households through the Housing Allowance Program, and assisted 653 households through the Rent Supplement Program.

- Awarded Social Housing Apartment Improvement Plan (SHAIP) funding to the local housing corporation (GSHC) for energy retrofits and emission reduction for 1960 Paris St.
- Secured Home for Good Funding from the Ministry of Housing through an expression of interest with community partners. Home for Good is part of an overall provincial investment in supportive housing under the Long-Term Affordable Housing Strategy and intends to make a significant contribution to the Province's goal of ending homelessness by 2025.

STRATEGIC ISSUES AND OPPORTUNITIES

- An aging population is placing higher demands on the centralized wait list. Programs and initiatives for seniors, and partnerships with other seniors' organizations, including the City's age-friendly community initiative, will be explored in order to properly identify the specific housing needs of this population.
- The National Housing Strategy was announced in November 2017, outlining a \$40-billion commitment to social and affordable housing in Canada. Multiple programs under this strategy will be phased in the coming years. Two streams of federal funding available through the National Co-Investment Fund in the National Housing Strategy include the New Construction Stream and the Repair and Renewal Stream.
- The Affordable Housing Community Improvement Plan, approved by Council on July 9, 2018, will provide incentives for the development of affordable housing projects in Greater Sudbury.

KEY DELIVERABLES FOR 2019

- Complete construction and make units available for occupancy funded through the Rental Housing Investment in Affordable Housing for Ontario Program (2014 Ext.).
- Complete construction and make units available for occupancy funded through the Rental Housing 2016 Social Infrastructure Funding Investment in Affordable Housing (2016 SIF IAH). March of Dimes Canada Non-Profit Housing Corporation built a 12-unit, 1-storey supportive rental housing project.
- Complete energy retrofits at 1960 Paris St. through SHAIP.

- Complete infrastructure work on 12 social housing projects through the Investment in Affordable Housing for Ontario Program (2014 Ext.)
- Complete residential home renovations that received funding through the Ontario Renovates Program.
- Complete Phase 2 of the Social Housing Revitalization Plan.
- Continue the development of the Ministry of Housing's Home for Good Program.
- Transition from existing Housing Registry software to Yardi RENTCafé software system.
- Review recommendations made by the Provincial Auditor General from the Social and Affordable Housing Report, and include recommendations that are pertinent to the City in the next Affordable Housing and Homeless Plan update.
- Update the City's 10-year Affordable Housing and Homelessness Plan.
- Continue to participate in the Province's Investment in Affordable Housing for Ontario – Housing Allowance to address shortage of affordable housing units and to bridge households as they wait for permanent social housing units.
- Focus on resident improvement initiatives to increase the level of customer service satisfaction. Conduct annual customer satisfaction surveys in order to measure progress.
- Review municipal housing programs to determine if efficiencies can be found by consolidation of programs within the Community Development Department (Human Services Integration).

KEY PERFORMANCE INDICATORS

Measure Name	Measure Category	CGS results		Median 2017
		2016	2017	
Percent of Social Housing Waiting List Placed Annually	Community Impact	33%	31%	11%
Social Housing Operating Cost (Administration and Subsidy) per Housing Unit	Efficiency	\$5,617	\$6,250	\$6,047

NORTHEASTERN CENTRE OF EXCELLENCE FOR SENIORS' HEALTH (PIONEER MANOR)

OVERVIEW

Pioneer Manor is a 433-bed Long-Term Care (LTC) Home owned and operated by the City of Greater Sudbury. The Home's mandate is the provision of care to individuals whose care needs can no longer be met in the community. Pioneer Manor is accountable under the Long-Term Care Homes Act, 2007, as well as to the North East Local Health Integration Network and the Ministry of Health and Long-Term Care, for funding and compliance with the Act.

SERVICES

Resident Care Services

- Provides regular physician visits, and nursing and personal care 24 hours a day.
- Provides assistance with activities of daily living such as bathing, dressing, and toileting as required by resident care staff, skin care program, restorative nursing program, advanced wound care, and alternate pain therapies.
- Provides a unique dementia care program and environment.
- Provides specialized staff with the Behavioural Supports Ontario program (BSO).
- Provides a Palliative Care Program.
- Provides audiology, optometry, podiatry, dental, and pharmacy services.
- Provides on-site blood work, electrocardiograms (ECG), bladder scanning, assessment and monitoring of oxygen levels, and provision of oxygen concentrators and portable oxygen.
- Provides on-site psychiatric, urology, dermatology and dementia specialists.

- Provides access to HSN's LTC Mobile Emergency Program Nurse from 8 a.m. to 10 p.m. daily.

Therapeutic Services

- Provides full functional assessments, including walker and wheelchair assessments.
- Provides prescriptions and assists with funding applications for mobility equipment.
- Provides occupational and physical therapeutic programs to maximize function, including walking and fall prevention programs.
- Provides recommendations for safety equipment.
- Provides wheelchair and walker repair clinics.
- Provides daily leisure and recreational activities, and event programming for residents.
- Provides educational sessions for residents and family.
- Works as part of the interdisciplinary team for palliative care.

Food Services

- Provides clinical nutrition assessments and individualized nutrition care services to residents.
- Provides meal and snack service to residents according to their nutritional needs.
- Meals are decentralized: food is heated immediately before service in the resident dining rooms.
- Operates the Bistro for residents, visitors and employees.
- Provides catering services to facilitate events.

Administrative Services

- Provides employee scheduling and payroll.
- Provides accounting, financial reporting, manages Resident trust accounts and purchasing.
- Provides front desk reception.
- Coordinates all government reporting services.

Physical Services

- Provides maintenance of facilities, grounds and equipment.
- Provides laundry services.
- Provides housekeeping services, infection control and prevention, garbage removal, and delivery of medical supplies.
- Provides labelling of personal clothing items.

2018 ACCOMPLISHMENTS

- Awarded a \$25,000 Francophone Community Grant (I AM Francophone), to develop and enhance Francophone programming at Pioneer Manor.
- Hired permanent in-house physiotherapists.
- Moved to electronic records of activity attendance and resident performance, through the purchase of Activity Pro software package, aimed at improving efficiency, identifying successes, and allowing for improved analysis of program effectiveness.
- Implemented the Activity Worker – Resident Care Assistant positions to assist with Personal Support Worker staff shortages.
- Initiated environmental enhancements in Lodge 1 Dementia Care area, with murals painted strategically on corner doors to reduce responsive behaviours.
- Completed the upgrade of the domestic hot water system, including computerized monitoring of temperatures, and the ability to adjust system temperatures to meet varying demands, at the same time achieving energy efficiencies.
- Upgraded flooring in 2 serveries to reduce slip and fall incidents.
- Installed a Franco Ontario flag and Ontario flags permanently.
- Continued conversion of lighting fixtures to LED, for lower energy consumption and bulb usage.
- Continued updating of fire protection and detections systems.
- Two new energy-efficient large-capacity dryers added to the laundry system.
- Hired new Coordinator of Volunteerism and Recruitment with the focus on expanding the volunteer base.

STRATEGIC ISSUES AND OPPORTUNITIES

- Capital redevelopment of 149 beds in an older section of the building, will assist in the modernization of Pioneer Manor and result in an improved environment.
- Continue to review food service operations, to improve ergonomic workflow.
- Continue to work to build a full in-house rehabilitation team to maximize efficiencies and expertise for therapy services.
- Build and enhance the volunteer base.
- New provincial funding for Long-Term Care Homes to hire a single Registered Nurse (RN) position.

KEY DELIVERABLES FOR 2019

- Hire a dedicated RN to oversee wound assessments. This will allow for relocation of current nursing hours back into resident care.
- Hire permanent in-house staff for the Rehabilitation Assistant positions.
- Complete the I AM Francophone project with positive and sustainable outcomes.
- Select and implement new food and nutrition computer software program to improve customer service and accessibility.
- Complete implementation of Kronos TeleStaff scheduling software module, which will allow better employee access to current schedules, electronic submission of time-off requests and shift exchanges, and integration between the call-out and scheduling components.

SOCIAL SERVICES

OVERVIEW

The Social Services Division administers and delivers the Ontario Works Program, which includes financial and employment assistance. In addition, the Division oversees the emergency shelters and homelessness initiatives across the community. With help from community partners, Social Services actively coordinates programs and initiatives for the most vulnerable residents in the community.

SERVICES

Finance and Administration

- Develops and supports internal controls that include performance and risk management as well as program monitoring and oversight.
- Administers the Feel Free to Feel Fit Program in partnership with Leisure Services.

Ontario Works Program

- Administers all aspects of the Ontario Works Program, including financial and employment assistance to eligible clients in order to meet provincially mandated program outcomes.
- Provides ongoing case management to move clients forward toward financial independence.

- Supports Ontario Disability Support Program (ODSP) dependant adults through mandated employment assistance supports.
- Coordinates with community partners for client supports with housing, childcare, mental health, employment, education and addiction services.
- Assists clients to obtain other sources of income such as ODSP, child and spousal support, and other government supports.
- Participates in community initiatives that promote healthy community development including the Community Drug Strategy, Rapid Mobilization Table, and other community-based strategies.

Emergency Shelters and Homelessness

- Manages contracts for homeless shelters, including:
 - Men's Emergency Shelter Program run by the Salvation Army
 - Women and Families Emergency Shelter Program run by the Salvation Army
 - Youth Emergency Shelter Program run by L'association des jeunes de la rue
 - Off the Street Emergency Shelter Program run by Canadian Mental Health Association (CMHA)
- Manages contracts for Housing First Programs, including homelessness Network led by Centre de santé communautaire and Housing First Intensive Case Management Program led by Centre de santé communautaire.
- Provides leadership and oversight of the Housing First Steering Committee and the development of a coordinated access system.
- Supports and oversees the Community Advisory Board on Homelessness and the federally funded Homelessness Partnering Strategy.
- Administers the provincially-funded Community Homelessness Prevention Initiative (CHPI) which focuses on homelessness prevention and provides direct financial support to those experiencing homelessness.
- Coordinates with the Homelessness Network and the Elgin Street Mission on Extreme Cold Weather Alerts to increase community services to the most vulnerable during these alerts.
- Administers Emergency Social Service plans in partnership with the Red Cross during community based emergencies which range from neighborhood level emergencies to large scale evacuations.
- Implementation of provincially-funded Home for Good Program which includes:
 - Transition of 200 Larch St. to Canadian Mental Health Association for the development of a 15-bed Managed Alcohol Program and permanent Emergency Shelter location.
 - Funding for 20 monthly housing allowances to participants of the Housing First Program.
 - Approval of the transfer of the City owned building located at 291 Lourdes St. to the Canadian Mental Health Association for the development of a 3-unit affordable housing apartment complex.
- Completed the provincially-mandated Homelessness Enumeration.
- Implemented used syringe collection strategy for the community.
- Led the Community Hubs Steering Committee to guide the City toward a final strategy.
- Initiated a full review and evaluation of the emergency shelter system.
- Increased development and financial support to the Housing First Program resulting in housing stability for people previously experiencing chronic homelessness.
- Implemented training opportunities for clients through Ontario Works Employment Programs in the areas of culinary arts, carpentry fundamentals, and personal support worker.

STRATEGIC ISSUES AND OPPORTUNITIES

- The increased complexity of caseloads and client needs will affect the demand on discretionary benefits.
- Provincial policy changes are expected based on a 100-day social services review due to be released in November 2018.
- Impacts as a result of federal changes to the Homelessness Partnering Strategy are anticipated to be known in early 2019.
- Provide further training and support to increase Indigenous cultural sensitivity.
- Continue development of a Housing First System with training and technical support from the Canadian Alliance to end homelessness.

2018 ACCOMPLISHMENTS

- Implementation of policy changes in line with the provincial Social Services Modernization Strategy which aims to reduce administrative burdens in order to focus more on client outcomes.
- Revised the Discretionary Rate Policy in line with the Social Determinants of Health.
- Made policy changes to increase direct client supports to prevent homelessness and support clients to become housed through the Community Homelessness Prevention Initiative (CHPI).

KEY DELIVERABLES FOR 2019

- Continue work on the implementation of the Provincial Modernization Strategy with input from client feedback surveys.
- Build stronger links with community partners to move clients forward.
- Continue to work with clients to achieve mandated provincial outcome goals while striving for operational efficiencies based on caseload size.
- Develop an implementation plan following the Emergency Shelter Review findings.
- Develop coordinated access system and by-name list to enhance community response to addressing homelessness.

CHILDREN AND CITIZEN SERVICES

OVERVIEW

- Children Services is the provincially-designated early years service system manager responsible for planning and managing licensed child care services and child and family centres.
- Citizen Services provides in-person access to municipal services at seven Citizen Service Centres throughout the city. Greater Sudbury also has 13 public library locations that provide a broad range of services, including access to resources, technology and programs.
- Greater Sudbury operates four small community history museums.
- Cemetery Services takes pride in sustaining the beauty and dignity of the cemeteries.

SERVICES

Children Services

- Leads and promotes a comprehensive local service system network of partners, to plan, coordinate and deliver integrated, seamless and quality early years programs to the community.
- Is responsible for the ongoing contract management of early years funding through the general operating grant, wage enhancement grant, repairs and maintenance funding, capital funding and other special purpose funding, as required under the provincial service agreement.
- Is responsible for the ongoing contract management to support a system of EarlyON Child and Family Centre programs that provide parents and caregivers early years resources and supports for children zero to six years.
- Administers the child care subsidy program for eligible parents and guardians to access licensed child care programs based on provincial guidelines and local policy.
- Manages child care subsidy cases to ensure applicants' ongoing eligibility and assistance in meeting their child care needs.
- Evaluates and supports continuous quality improvement in licensed early years programs and EarlyON Child and Family Centres.
- Leads funded projects related to child health and well-being, such as the Healthy Kids Community Challenge and Local Poverty Reduction Fund projects.

Citizen Services

- Accepts payments for property taxes, water and wastewater, Greater Sudbury Hydro bills, parking fines and more.
- Sells parking and transit passes, lottery, business and animal licences, and garbage bag tags.
- Registers citizens for sports and recreation programs, and books city facilities, including ice time and more.
- Responds to inquiries about City services and programs.

Libraries

- Provides no-charge access to information and recreational resources including books, eBooks, eAudiobooks, movies, magazines, newspapers, online databases and tools.
- Provides no-charge access to internet and offers technology support and instruction for users.
- Provides access to emerging technologies, such as 3D printers and Makerspace resources.
- Delivers workshops, information sessions, events and programs for all ages.
- Delivers library materials to homebound residents.
- Provides alternative format books and other resources to individuals who have difficulty reading due to a visual, physical or learning disability.

Museums

- Operates four museums across the city: Anderson Farm, Copper Cliff, Flour Mill and Rayside Balfour.
- Produces public exhibitions, site tours and programming.
- Highlights the existing cultural assets and resources of the community.
- Forms the building blocks in preserving the heritage community.

Cemetery Services

- Manages and maintains all plots and burials throughout the city.
- Manages and maintains the Sudbury Mausoleum at Civic Cemetery on Second Avenue.
- Preserves 25 cemeteries on behalf of the community.

2018 ACCOMPLISHMENTS

- Completed implementation of new child care registry software and trained all child care providers.
- Completed Phase 1 of the website redesign for sudburyfamilies.ca hosted by Children Services.
- Transitioned the EarlyON Child and Family Centres with service providers across the city.
- Completed the first three phases of the development of the Early Years Service System Plan for the Ministry of Education in collaboration with community partners.
- New columbarium installation at Valley East Cemetery.
- Integrated Stone Orchard cemetery software with PeopleSoft accounting system.
- Partnered with a Copper Cliff community group and the Community Action Network to exhibit the second exterior mural celebrating the history of the community at the Copper Cliff Library.
- Hosted Graphic-Con event, which drew approximately 5,000 participants and vendors to the Sudbury Community Arena.
- Launched Greater Sudbury Heritage database, a platform of historical newspapers.
- Partnered with Science North for the Sudbury Maker Fest event, attracting more than 1,500 visitors with an interest in celebrating innovation and maker culture.
- Partnered with several residents, to deliver innovative programming through the Maker-in-Residence and Poet Laureate programs.
- Launched Chromebook laptops for use by patrons at all Library and Citizen Services Centre locations.
- Installed Smart TVs and Capital Networks Black Boxes at each library and Citizen Service Centre locations providing an accessible format that displays and promotes City services, community events and library programming.

STRATEGIC ISSUES AND OPPORTUNITIES

- A review of child care subsidy policies continues into 2019.
- New provincial and federal funding allocations will be used to expand access to licensed child care.
- The Library Board, Art Gallery of Sudbury Board, and City staff continue to develop a proposal for a joint Art Gallery/Library facility creating a gathering place in Greater Sudbury's downtown.

KEY DELIVERABLES FOR 2019

- Integration of frontline services for Children, Social and Housing Services into the Citizen Service model.
- Relocate the Flour Mill Museum buildings to the O'Connor Park area.
- Full implementation of revised program delivery for EarlyON Child and Family Centres.
- Full implementation of the website redesign for sudburyfamilies.ca
- Implement a new electronic system for Cemetery Services.
- Implement action plans arising from the 2018 Employee Survey.
- Fully integrate the Customer Relationship Management Software (CRM) into all libraries and Citizen Service Centres.

LEISURE SERVICES

OVERVIEW

The Leisure Services Division provides opportunities for citizens to access physical recreation and leisure activities through direct provision and support to volunteers. The division provides both management and coordination to the community’s leisure and recreation system, as well as fosters and develops community partnerships and engagement. Leisure Services manages the operation of community arenas, community centres and halls, recreational facilities, playing fields, parks and aquatics, all of which are community resources that support both direct and indirect program delivery. The division is organized into three sections: Arenas, Parks Services and Recreation.

SERVICES

Arenas

- Operates and maintains 16 ice pads across 14 municipal arenas.
- Oversees the agreement with the Sudbury Wolves Hockey Club for the use and occupation of the Sudbury Community Arena.
- Manages seven community halls attached to arena facilities.
- Provides support for over 50 annual tournaments and events hosted at arena facilities.

- Maintains 49 ball diamonds, 59 soccer fields, 19 half and 21 full basketball courts, and 56 tennis courts.
- Provides inspection and maintenance of community centres, splash pads, off-leash dog parks, field houses and other leisure facilities.
- Maintains 173 km of non-motorized, recreational trails.
- Maintains outdoor rinks, the Ramsey Lake Skating Path and Queen’s Athletic Skating Oval.

Parks Services

- Maintains 1,400 hectares of parkland, including 189 playgrounds.
- Maintains more than 360 flower beds and 180 planters within City parkland.

Recreation

- Maintains, operates and supervises five pools and provides supervision at seven beaches during the summer.

- Coordinates programming and events at the Grace Hartman Amphitheatre, Memorial Park, Bell Park and other leisure facilities.
- Offers programming opportunities including day camps, summer playground programs, youth drop-in centres and adult interest courses.
- Provides programming for Adanac and Lively Ski Hills.
- Supports volunteer groups and stakeholders, including neighbourhood associations, Volunteer Sudbury and sports associations in the delivery of recreation and leisure services.
- Operates five fitness centres and manages contracts for three seasonal trailer parks.

2018 ACCOMPLISHMENTS

- Playground Revitalization Strategy in partnership with United Way Centraide North East Ontario and installing 12 new playgrounds as part of Phase 1.
- Completion of the St. Joseph's Parking Lot redevelopment resulting in additional green space, improved stormwater management, parking and enhanced access to the waterfront at Bell Park.
- Opened four new splash pads in the communities of Capreol, Coniston (donated by Lopes Ltd.), Garson and Onaping (grant from the Canada 150 Infrastructure Program).
- Presented an affordable access to recreation strategy to Council.
- Initiated the implementation of the PerfectMind platform to replace the City's leisure program registration and facility booking software.
- Completed a review of children and youth direct programming.
- Converted the under-utilized tennis courts at O'Connor Playground to create the City's first dedicated pickleball facility.
- Supported the launch of the Sudbury Five, the new local franchise of the National Basketball League of Canada.
- Hosted the 2018 Telus Cup, Canada's National Midget Hockey Championships, at the Sudbury Community Arena.

STRATEGIC ISSUES AND OPPORTUNITIES

- Parks and leisure infrastructure is aging and in need of strategic renewal.
- New investment should come in the form of multi-purpose facilities, where appropriate, for operational efficiencies and to provide greater support to sport development and tourism.
- With the aging population of Greater Sudbury, there has been a decline in program participation and volunteerism. This trend provides an opportunity to revamp programs, engage new volunteers and repurpose existing facilities, for example the use of tennis courts to play pickleball.
- Our aging population requires increased accessibility considerations for facilities and parks providing the opportunity to strategically invest capital dollars and leverage available grants to remove physical barriers.
- Traditional sports are becoming unaffordable for many individuals and families providing the opportunity for further development of affordable access to recreation programs.
- Investment in recreation and promotion of opportunities is important to combat inactivity trends.
- Busy lifestyles have led to a decreased interest in structured, organized programs. Increased demand for more drop-in, self-scheduled activities.
- Declining ice rental revenues present an opportunity to re-evaluate operating schedules and fee structures.

KEY DELIVERABLES FOR 2019

- Implement additional phases of the Playground Revitalization Strategy in partnership with United Way North East Ontario.
- Conduct a review of the Parks, Open Space and Leisure Master Plan (2014) reconfirming direction, priorities and accomplishments.
- Implement the Affordable Access to Recreation Strategy given Council approval.
- Development of a Play Charter for the City of Greater Sudbury.
- Improve customer service and communications with residents through the implementation of the PerfectMind platform, the City's leisure program registration and facility booking software.

- Review and update the City's Corporate Sponsorship Policy in order to secure funding and develop partnerships to invest in new leisure infrastructure.

TRANSIT SERVICES

OVERVIEW

Greater Sudbury Transit plays a vital role in providing residents and visitors with access to various destinations within the City of Greater Sudbury. Greater Sudbury Transit provides safe, reliable and affordable transportation options through many services.

Conventional transit service is delivered at routes and stops in higher population areas through a regularly scheduled fixed route network system. Conventional transit operates with a fleet of 59 accessible buses on 38 routes, seven days a week. These routes cover more than 4.2 million kilometres and provide approximately 4.5 million passenger trips on an annual basis.

TransCab Service is a door-to-door demand response shared service and is delivered by partner taxi companies to nine designated areas that are not easily accessible by Greater Sudbury Transit buses. The taxis offer connections to conventional transit at key points.

Handi-Transit Service provides transportation to persons who have physical disabilities and are unable to use the conventional transit service. Handi-Transit services the same area as Greater Sudbury Transit buses and TransCabs, with boundaries that extend three kilometres. The service operates with 15 specialized accessible buses, supplemented with conventional taxi services when necessary. Handi-Transit Service covers more than 1.3 million kilometres and provides approximately 130,000 passenger trips on an annual basis.

SERVICES

Transit Operations and Administration

- Uses approximately 55 % of the division’s resources to deliver approximately 170,000 service hours for the conventional transit system, and nine designed trans-cab routes.
- Oversees delivery of charters.
- Designs, plans, and monitors route performance based on transit service design standards and key performance indicators.
- Schedules detours during service interruptions.
- Ensures the provision of exemplary customer service in the delivery of Transit Services.
- Coordinates marketing strategies and promotes transit programs.

- Coordinates tenders for contracts and administers agreements related to Transit Services.
- Oversees quality assurance of service provided through third-party agreements.
- Uses approximately 1 % of the division's resources to oversee a Crossing Guard Program, with 31 locations throughout the city.

Driver Certification Program and Handi-Transit

- Uses approximately 2 % of the division's resources to provide testing and training of new City hires requiring use of vehicles.
- Manages and reviews the City's commercial vehicle operator's registration (CVOR).
- Manages the collision review process.
- Provides travel training to educate seniors and other riders on Transit Services.
- Uses approximately 14 % to manage Handi-Transit service delivery through a third party contract.

Transit Fleet Service

- Uses approximately 29 % of the division's resources for the maintenance of fleet vehicles and all operational service requirements.
- Oversees transit terminal maintenance.
- Provides a maintenance program for bus stops and shelters.
- Oversees cleaning, fueling and general daily servicing of transit buses.
- Provides maintenance of bodywork for transit fleet.
- Oversees maintenance and repair of fare boxes.

2018 ACCOMPLISHMENTS

- Presented a draft of the Transit Action Plan report to Council, completed the second public engagement process and refined the recommendations based on information gathered.
- Presented the Affordable Fare Strategy to Council.
- Issued and awarded a request for proposal for specialized transit services (Handi-Transit).
- Purchased and installed a transit planning scheduling system to improve efficiency and eliminate manual processes.
- Evaluated and updated internal safety practices and training requirements.

- Evaluated safety measures and transit by-law requirements for the Downtown Transit Terminal in collaboration with Security and By-law section.
- Completed a bus rebuild program, accelerating the mid-life rebuild of 25 buses in collaboration with Assets and Fleet Services staff.
- Installed bike racks on all buses and purchased three 40-foot buses.
- Initiated procurement process to replace existing fare box system with Smart Card Technology.

STRATEGIC ISSUES AND OPPORTUNITIES

- Building on the previous Public Transit Infrastructure Fund (PTIF), on March 14, 2018, the federal and provincial governments signed an integrated bilateral agreement for the Investing in Canada Infrastructure Program. With an end date of March 31, 2028, the Program encompasses several investment streams. The public transit stream allocates a maximum contribution over that time period to the City of Greater Sudbury of \$39.8 million in federal funding and \$32.8 million provincial funding. Assuming a municipal contribution of 27 %, this provides a potential total funding maximum of \$99.4 million toward public transit infrastructure projects over the next ten years.
- The investments through the first phase of PTIF have given Greater Sudbury Transit the opportunity to re-evaluate and identify gaps in service which need to be addressed to meet the community's transportation needs.

KEY DELIVERABLES FOR 2019

- Complete the Transit Action Plan.
- Implement new service with Council's approval.
- Complete the specialized transit service review.
- Complete the review of transit operator barriers.

KEY PERFORMANCE INDICATORS

Measure Name	Measure Category	CGS results		Median 2017

ENGINEERING SERVICES

OVERVIEW

Engineering Services delivers projects that maintain, renew and expand the City's infrastructure systems. The infrastructure systems include linear infrastructure (roads, stormwater management systems, water distribution systems and sanitary collection systems) and fixed infrastructure facilities (water treatment plants, wastewater treatment plants). The division also provides engineering expertise to the organization in the form of surveying, design, drafting, project management, construction monitoring and quality assurance testing.

SERVICES

Design Services

- Uses approximately 30 % of the division's resources to provide data management, engineering design and drafting services, capital budgeting and construction project management.
- Develops preliminary capital budgets for infrastructure projects.
- Collects pre-engineering baseline data and performs condition assessments via surveying, property searches, designated substance surveys, closed-circuit television of buried services and geotechnical studies in preparation for project engineering for approximately 70 projects.
- Provides detailed engineering design and drafting services for approximately 40 project plans.
- Collaborates with Purchasing to execute and manage the tendering and contracting process for capital projects.

- Reviews and finalizes construction records and as-built documentation of the City's infrastructure assets.
- Engages consultants, contractors, City staff, property owners and other community stakeholders to ensure capital projects are managed efficiently.

Project Services

- Uses approximately 20 % of the division's resources to provide project management services for approximately 226 projects, including technical, supervisory, planning and coordination throughout the capital project lifecycle.
- Provides one point of contact and communication for inquiries and issue resolution.

- Engages citizens, property owners, community stakeholders, vendors, consultants, contractors and City staff to minimize negative impacts of capital projects and resolve issues in a mutually beneficial manner.
- Ensures compliance with standards, specifications and contractual obligations and proactively manages changes to budgets, schedules, scope and quality of deliverables.
- Ensures prompt progress payments for quality work and timely correction to deficiencies and warranty issues.
- Awarded the last two Maley Drive Extension contracts to initiate work between Frood Road and Falconbridge Highway, totaling \$48 million.
 - Completed the engineering for, and began construction of the four laning of Municipal Road 35 from Azilda to Chelmsford.
 - Detailed engineering of the Municipal Road 55/ Lorne Street infrastructure improvement project.
 - Initiated the Kelly Lake Road reconstruction and active transportation project.
 - Detailed design for the Gatchell Outfall Sewer Project.

Construction Services

- Uses approximately 50 % of the division's resources to monitor project progress, quantities and quality of deliverables for all capital projects, including 64 construction projects and 54 projects in warranty.
- Provides inspection services and coordination of quality assurance testing for capital projects.
- Engages citizens, property owners and other community stakeholders impacted by construction activities.

2018 ACCOMPLISHMENTS

- Executed and delivered the largest capital construction program in the history of the City with the construction of the following capital projects:
 - Notre Dame realignment and interchange structures for the Maley Drive Extension project
 - Seventeen capital projects that were funded by the Clean Water and Wastewater Funding program (CWWF)
 - Second Avenue reconstruction and active transportation project
 - Kingsway Boulevard active transportation project
 - Bi-annual bridge inspection and evaluation program
 - Upgrade to the Elgin/Riverside pedestrian tunnel
 - Integrated the Copper Cliff wastewater system with the Sudbury system
 - Minnow Lake and Bell Park Main Beach Outfall Stormwater Management Facilities
 - Phase 1 of Countryside Stormwater Management Facility

STRATEGIC ISSUES AND OPPORTUNITIES

- Improved information collection for surveying, locates and field inspections will align with the City's Geographic Information Systems (GIS) initiative and provide data quality and availability for engineering.
- Development of a sustainable service delivery model will incorporate the principles of project management and collaboration.

KEY DELIVERABLES IN 2019

- Complete Maley Drive Extension from College Boreal to Barry Downe Road and reconstruct existing Maley Drive from Barry Downe to Falconbridge Road.
- Continue the widening of Municipal Road 35 from Azilda to Chelmsford with construction anticipated to be completed in the late fall of 2020.
- Develop work flows, roles and responsibilities, policies and procedures for strong project management, including quality assurance monitoring, change management, risk management, cost control and scheduling to improve departmental processes and budgetary efficiencies. This will result in improved delivery of public projects.

INFRASTRUCTURE CAPITAL PLANNING SERVICES

OVERVIEW

Infrastructure Capital Planning is responsible for long range master planning, asset management and capital budgets for roads and transportation, bridges, stormwater, linear water distribution, linear wastewater collection, and water and wastewater treatment facilities. Responsibilities also include business improvement, technology innovation and transformation, road occupancy and oversize load permitting, and utility locate services.

SERVICES

Capital Planning and Engineering

- Manages approximately 3,600 lane km of roads, 171 bridges, 143 water and wastewater facilities, 1,800 km of water and wastewater mains, 17,000 storm structures and 450 km of stormwater conveyance pipes with an estimated 2018 total replacement value of \$6.5 billion.
- Develops and implements long-term infrastructure master plans to ensure capital investment in the rehabilitation, replacement and expansion of assets is carried out with regard for the City's Long-Term Financial Plan.
- Acts as project sponsors for the annual capital program, which over the last five years has averaged approximately \$110 million of annual infrastructure spending on transportation, drainage and water and wastewater projects.
- Carries out all maintenance and management of 188 km of municipal drains required to ensure compliance with the Drainage Act.

- Reviews and provides comments on approximately 500 development applications annually with respect to transportation network impacts, and for conformance to infrastructure master plans and legislative requirements in an effort to support growth, economic development and environmental protection.

Transportation and Innovation

- Develops and delivers a variety of transportation-related programs to Greater Sudbury citizens including traffic calming, road safety, streetlighting, regulatory signage, community safety signs, speed watch and transportation demand management.
- Leads the development of policies, initiatives, and infrastructure to promote active transportation in Greater Sudbury, including delivering more than 30 km of cycling infrastructure since 2017 equating to approximately 15 % of the recommended network in the Transportation Master Plan (2016).

- Actively manages and maintains a system of 125 traffic signalized intersections throughout the City, including all infrastructure to support the safe and efficient movement of vehicles, cyclists and pedestrians.
- Issues an annual average of 110 driveway entrance permits, 260 single trips and 185 annual oversize load permits, as well as coordinates more than 6,800 requests for utility locates resulting in an average total revenue of over \$105,000.
- Actively reviews processes across the Growth and Infrastructure Department to identify opportunities for service efficiencies and enhancements through business intelligence, performance data analysis, continuous improvement and the implementation of technology solutions.

2018 ACCOMPLISHMENTS

- Completed the Transportation Demand Management Plan.
- Finalized the Water and Wastewater Master Plan.
- Completed the Ramsey Lake, Junction Creek and Whitewater Lake Subwatershed studies and Stormwater Master Plans.
- Completed the Stormwater Asset Management Plan.
- Completed the bi-annual bridge inspection and evaluation program.
- Prepared a Complete Streets Policy for Council adoption.
- Received a Bronze Bicycle Friendly Community Award.
- Developed the Accessible On-Street Parking Program.

STRATEGIC ISSUES AND OPPORTUNITIES

- Develop, finalize and consolidate asset management plans to maximize efficiencies on capital projects by extending overall asset lifecycle through detailed evaluations and programs that will include maintenance and renewal activities. Asset categories include roads, traffic, drinking water, wastewater, drainage and stormwater assets.
- Review departmental processes and practices to identify opportunities for technical transformation, efficiencies and improved services.
- Establish service standards and key performance indicators through asset management planning including consultation with the public and community stakeholders.

KEY DELIVERABLES IN 2019

- Continue preparation of asset management plans for departmental assets and consolidation to establish priorities and budgeting using a corridor approach.
- Initiate review of existing business practices and development of new business practices to identify opportunities for increased efficiencies and digital transformation, establish service standards and KPIs.
- Develop program for asset condition data integration into EGIS and risk assessment capital planning prioritization tools for infrastructure.
- Improve communication with residents to provide construction information through public portals such as the Road and Traffic Restrictions (RATR) application and Citylinks.
- Initiate Sustainable Stormwater Funding Study.
- Complete Whitson River Watershed Study and Stormwater Master Plan.
- Initiate Bicycle Parking Program.

KEY PERFORMANCE INDICATORS

LINEAR INFRASTRUCTURE SERVICES

OVERVIEW

Linear Infrastructure Services (LIS) provides one point of accountability for the management and operation of all linear assets within public access. LIS operates and maintains linear systems including roadways, bridges, sidewalks, stormwater systems, forestry, traffic and safety devices, water distribution and sanitary sewer collection systems with a mandate to provide safe, affordable and environmentally responsible transportation and water and sanitary sewer systems in Greater Sudbury.

SERVICES

Roads Maintenance

- Uses approximately 74 % of the division's resources to support the safe and efficient maintenance and operation of Greater Sudbury's 3,600 (15 % gravel, 15 % surface treated and 70 % asphalt) lane kilometres of road.
- A fleet of 30 municipal tractors, operating on 22 routes, is used to maintain 350 km or about 80 % of the city's sidewalk network each winter.
- The LIS Division responds to nearly 16,000 requests annually for road maintenance services through the City's 311 system.
- The City's dedicated sign shop fabricates approximately 7,500 regulatory, warning and temporary condition traffic control and other community-based signs on an annual basis.

- Deploying from five public works depots across the city, the Roads Maintenance Section responds to an average of 15 winter events, totaling nearly three metres of snow accumulation, with 38 plows (in addition to contracted resources) to manage snowfall each winter.
- Performs forestry services, including pruning about 450 trees, stumping 170 trees and removing approximately 230 trees annually in addition to planting an average of 370 trees each year.

Distribution and Collection

- Uses approximately 26 % of the division's resources to the effective maintenance and operation of the City's 1,800 km of water and wastewater distribution and collection network.

- Responds to and manages an average of 85 emergency watermain breaks throughout Greater Sudbury each year.
- Completes pressure testing for 5,300 fire hydrants annually to ensure appropriate fire flows are available if required to manage fire incidents.
- Operates and maintains underground infrastructure, including nearly 1,000 km of watermains, 800 km of sewer mains, 9,300 water system valves, the South End sewage rock tunnel and over 12,000 maintenance holes.

2018 ACCOMPLISHMENTS

- Lined 4.3 kilometres of watermain and 6 kilometres of sewer main to reduce risk of underground failures and extend the life of infrastructure. Using this approach, minimized impact to traffic during construction.
- Delivered winter control services, including roadway plowing, sanding, salting and sidewalk plowing and sanding from November 2017 to April 2018, including 12 general call-out events, all in compliance with City policy.
- Completed implementation of required organizational changes to better align the operation and maintenance of linear systems within the right-of-way.
- Provided emergency forestry services to areas impacted by the July 9, 2018 storm.

STRATEGIC ISSUES AND OPPORTUNITIES

- Phase 2 of the Computerized Maintenance Management System (CMMS) will assist in the ability to deliver services more efficiently.
- Evaluate the current service delivery model for both Roads Maintenance and Distribution and Collection, with a view to achieving a balance of City-provided and contracted services to best serve the needs of residents. Develop business cases for the delivery of modified service levels based on findings of the evaluation.
- Review, revise and implement performance goals for various maintenance activities to ensure consistency in service delivery based on established service levels.

KEY DELIVERABLES IN 2019

- Establish clear points of accountability, comprehensive teams and a team approach in the management of operations of all assets within the road right-of-way, including road surfaces, drainage systems, sewers, watermains, sidewalks and street lighting.
- Create a cohesive approach to troubleshooting, issue resolution and expectations for response time to matters of public interest such as watermain breaks, lane closures for repairs, and routine operations that disrupt customer service with a goal to improve customer satisfaction.
- Develop business plans based on the findings of the current service delivery model evaluation. The revised business plans will be developed based on principles associated with a Quality Management System (QMS) approach.

KEY PERFORMANCE INDICATORS

ENVIRONMENTAL SERVICES

OVERVIEW

Environmental Services is responsible for the planning, development, approval and operation of all solid waste programs, services and facilities in the city. This includes the development of long-term solid waste strategic plans, including capital and asset management programs. The goal is to provide services in a courteous manner that is safe and efficient, while creating environmental sustainability, promoting waste diversion and maintaining a clean city.

SERVICES

Waste Collection

- Provides weekly roadside collection of garbage, leaf and yard trimmings, blue box materials, green cart organics and large furniture and appliances to approximately 60,000 households.
- Provides centralized waste collection for approximately 400 multi-unit residential properties and the operation of 13 residential waste drop-off depots.
- Collects waste from approximately 250 non-residential sources on a cost recovery system; household hazardous waste via the Toxic Taxi and the collection of blue box materials and organics for special events.
- Oversees various cleanup initiatives and approximately 285 special support programs.
- Services approximately 350 roadside litter containers, collects roadside litter manually and with automated equipment.

Waste Diversion

- Operates the Recycling Centre, Reuse Store and the Household Hazardous Waste Depot.
- Processes leaf and yard trimmings and green cart organics.
- Recycles tires, electronic waste, metal, wood and cloth.
- Oversees the administration of eight funding programs with an estimated value of \$2.6 million dollars per year and administers the sale of various waste containers and composters.
- Develops various educational materials and tools and provides educational services to schools, businesses and the public.
- Conducts various waste audits and participation studies (approximately 500 in 2018).

Waste Disposal

- Operates and maintains the Sudbury, Hanmer and Azilda Landfill and Waste Diversion Sites.
- Operates and maintains the Walden Small Vehicle Transfer Site.
- Operates and maintains various closed sites.
- Administers tipping and processing fees.

2018 ACCOMPLISHMENTS

- Constructed the drop-off pad for the Construction and Demolition Material Recycling Site (additional and final work to be completed in 2019).
- Upgraded the diversion drop-off pads at the Hanmer and Azilda Landfill and Waste Diversion Sites.
- Upgraded the organic receiving pad at the Sudbury Landfill and Waste Diversion Site.
- Completed major repairs to Recycling Centre (wall cladding, loading bays, storm water management).
- Completed the custom integrated software for the Automated Vehicle Locator AVL/GPS technology on City-owned waste collection vehicles.
- Procured a new contract for the operation and maintenance of the Household Hazardous Waste Program.
- Procured a new contract for sample collection and analysis reporting for divisional facilities/sites.
- Implemented additional safety measures to deal with the increase in syringe/needle deposits.
- Re-assigned approximately 875 households from contract crews to City crews.
- Conducted a mattress and box spring recycling trial and reported results.
- Developed additional educational programs for waste reduction, reuse and composting.
- Responded quickly and efficiently to the July storm clean-up efforts.
- Initiated a long-term processing system review for organic materials.
- Initiated a quality management system review.

STRATEGIC ISSUES AND OPPORTUNITIES

- The City is participating in various programs that support a circular economy (a system in which products are never discarded, but reused, recycled and reintroduced into new products) and a waste-free Ontario. These programs, including the management of solid waste, have and will continue to provide our citizens with the tools required to manage their waste.
- There is currently a subsidized global market for recycling materials. Citizens and collection and processing contractors have an opportunity to work together to sort waste properly to ensure that waste materials can continue to be sold around the world. This includes the communication of up-to-date information, through the City's Waste Wizard app.
- An update to the Solid Waste Master Plan is tentatively scheduled to commence in 2021. The terms of reference will frame the scope and describe the update process to be undertaken. This will include gathering input and feedback from citizens, evaluating the current system and programs, assessing future needs of the community and identify new waste management trends, approaches and opportunities.

KEY DELIVERABLES IN 2019

- Procure a new waste collection services contract.
- Communicate and educate residents on the new waste collection policy changes.
- Complete the custom integrated software for the AVL/GPS technology on contractor-owned waste collection vehicles.
- Develop a draft terms of reference for the Solid Waste Master Plan Update.

KEY PERFORMANCE INDICATORS

PLANNING AND DEVELOPMENT

OVERVIEW

Planning Services ensures Greater Sudbury is planned and developed in a manner consistent with local and provincial priorities, policies and requirements. It employs good land use planning principles to create policy frameworks to guide long-term change, works with the development community to facilitate economic development and growth, and restores the natural environment through re-greening and other projects.

SERVICES

Community and Strategic Planning

- Creates, maintains and implements the Official Plan and other strategic plans, including the Downtown Master Plan, Community Improvement Plans (CIP) and Development Cost Sharing. Approximately 5,500 person hours are allocated to this service, which represents 6 % of the division's resources.
- Collects, maintains, analyzes and shares core geographic datasets, including survey control network, topographic maps and aerial photography. Approximately 8,500 person hours are allocated to this service, which represents 9 % of the division's resources.
- Provides data analysis and Geographic Information Services (GIS) to other divisions and external stakeholders. Approximately 12,600 person hours are devoted to this service, which represents 14 % of the division's resources.

Development Approvals

- Facilitates growth by creating and maintaining the policies, regulations and business processes that guide the administration of land use decision making.
- Reviews and analyzes approximately 315 land use applications per year, with 83.4 % of decisions made within legislative service standards.
- Reviews and analyzes another 300 development related applications per year and implements all of City Council's land use planning decisions.
- Approximately 28,400 person hours are allocated to these services, which represent 31 % of the division's resources.

Environmental Planning Initiatives

- Works with nearly 200 companies and numerous city departments to deliver and communicate municipal sustainability initiatives to the community through EarthCare Sudbury. Approximately 2,200 person hours are allocated to this service, which represents 2 % of the division's resources.
- Provides environmental and watershed remediation services, including the planting of more than 260,000 trees and shrubs on average each year since 1978, through the Regreening Program. Approximately 26,300 person hours are allocated to this service, which represents 29 % of the division's resources.
- Monitors 67 city lakes to assess their environmental health, and delivers community-based lake stewardship initiatives with nearly 30 lake stewardship groups, through the Lake Water Quality Program. Approximately 3,300 person hours are allocated to this service, which represents approximately 4 % of the division's resources.
- Maintaining our planning frameworks to position the community relative to mega trends within the external environment such as the economy, demographics, climate change, water quality and emerging technologies.
- Completing the Nodes and Corridors Strategy to set an urban structure that integrates land use planning, public transit and active transportation and provides a framework to advance more community and neighbourhood plans in the future.
- Maintaining a balance between customer expectations regarding the level of service provided (efficiency, cost) and community's expectations for more meaningful involvement in the land use planning process.
- Strengthening our understanding of the relationship of the long-term costs and benefits of land use planning decisions and alignment between plans.
- Continuing to build planning capacity in the community through outreach, engagement and communication.

2018 ACCOMPLISHMENTS

- Updated the population, housing and employment projections for the city.
- Completed Phase 1 and initiated Phase 2 of the Official Plan review program.
- Completed Phase 1 and initiated Phase 2 of the Nodes and Corridors Strategy.
- Created an Affordable Housing Community Improvement Plan.
- Celebrated the 40th Anniversary of the Regreening Program by presenting a proclamation in the spring, hosting four scheduled trail tours, and participating in the garden festival and Glencore's open house.
- Initiated the Community Energy and Emissions Plan project.
- Created a Lake Water Quality Strategic Plan.
- Developed environmental impact study guidelines.

STRATEGIC ISSUES AND OPPORTUNITIES

- Remaining responsive to changes in the legal and policy framework governing the provision of municipal land use planning services enacted by the new provincial government, which may affect service levels.

KEY DELIVERABLES IN 2019

- Provide orientation for the incoming Planning Committee.
- Participate in the implementation of the Land Management and Property Tracking system.
- Respond to the province's decision on Phase 1 of the Official Plan Review Program.
- Complete Phase 2 of the Official Plan Review Program.
- Implement Nodes and Corridors Strategy Phase 1 Recommendations.
- Manage the Downtown and Town Centre CIP intake processes.
- Create an Affordable Housing Land Banking Strategy.
- Create a Survey Control Network mobile application and Community Profiles Dashboards.
- Complete the Community Energy and Emissions Plan.
- Prepare a five-year plan for the Regreening Program (2021 to 2025).

BUILDING SERVICES

OVERVIEW

Building Services ensures compliance with the legislation to ensure the safety of residents, as well as the structural adequacy of construction undertaken in Greater Sudbury. The Division provides provincially-mandated administration and enforcement of the Ontario Building Code and other applicable legislation, including the City of Greater Sudbury Zoning, Site Alteration, Property Standards, and Pool Enclosure by-laws. Building Services facilitates safe and cost effective development within legislative regulations to foster economic development in Greater Sudbury.

SERVICES

Permits and Approvals Integration

- Receives, reviews and processes over 2,500 applications for building and demolition permits ensuring the proposed work complies with appropriate regulations.
- Building permit issuance has resulted in an average construction value of \$310 million per year over the last 10 years.
- Ensures processing times adhere to provincially-mandated standards, for example building permit issuance within 10 working days for single family dwellings.
- Provides in-person service to residents and developers during the application process, handling over 130,000 phone calls per year and over 7,400 visitors at the front counter.
- Coordinates, tracks, issues and manages the inspection process.

- Completes lawyer requested property searches, on average over 1,700 per year.

Plans Examination

- Receives and reviews applications for building and demolition permits ensuring the proposed work complies with appropriate regulations.
- Receives, reviews and approves construction drawings ensuring they meet with appropriate regulations on average undertaking 2,500 plans reviews of architectural, structural, mechanical and engineering drawings for projects.
- Ensures approval times adhere to provincially-mandated standards, for example plans examination/approval within 10 working days for single family dwellings.
- Provides front-counter services for residents and developers, including help with permit applications.

Building Inspection Services

- Enforces compliance of Ontario Building Code and applicable municipal by-laws.
- Conducts inspections at various stages of construction and demolition, averaging over 10,000 inspections per year.
- Assists in prosecutions through the courts. Issued over 170 orders to comply to Ontario Building Code infractions.
- Conducts inspections of daycare facilities, group homes and other specialized provincially-funded and licensed facilities.
- Handled approximately 300 automated citizens service requests, including four orders to remedy unsafe conditions for vulnerable occupancies.

2018 ACCOMPLISHMENTS

- Continued consultation with development stakeholders to identify and recommend policy and procedural changes to address industry concerns related to department processes through the Development Liaison Advisory Committee (DLAC) of Council.
- Finalized and launched the secondary unit online registry, which provides a public portal listing of all legal secondary dwelling units to ensure apartments meet minimum fire and life safety requirements for occupants.
- Continued review of the upgrade to and rationalization of the existing Sign By-law, including a public survey, stakeholder consultation and public meetings.
- Participated in the Ministry of Natural Resources and Forestry production of the Ontario Tall Wood Building Reference, a technical resource.
- Participated in joint provincial working group focused on consistent administration and enforcement of the Building Code Act across the province.

STRATEGIC ISSUES AND OPPORTUNITIES

- Transition to a more comprehensive online tracking system, including permit status, appointment booking and payment, will improve the ability to manage operational processes within the building department and improve customer service.
- Anticipated changes to the Ontario Building Code in 2019 will require local process and policy amendments which provide an opportunity for public education on the role of Building Services as well as the impact of any modifications.
- The launch of a restructured DLAC based on stakeholder groups' survey through Oracle Poll research, will improve the City's interaction with the development community.

KEY DELIVERABLES IN 2019

- Finalize the comprehensive and consolidated Sign By-law, which will provide regulations for all signage within the city, including permanent and temporary signs, banners, signs on municipal right-of-ways, tourism signage and posters.
- Complete Phase 1 of the Land and Property Management System (LPMS) in coordination with Planning Services and Information Technology. The integrated LPMS will be a city-wide, property-centric system that provides a comprehensive history of all development, permitting, licensing, inspections and by-law related activities for properties and land within the city.
- Review and update the Building By-law 2006-121 in coordination with DLAC and building industry stakeholders.
- Review and update the Site Alteration By-law 2009-171 with DLAC and industry stakeholders.

EMERGENCY MANAGEMENT

OVERVIEW

The Emergency Management Division provides leadership, guidance and direction to ensure the safety of residents in community emergencies. This division is governed by the Emergency Management and Civil Protection Act (EMCPA). The Office of the Fire Marshal and Emergency Management and the Greater Sudbury Emergency Management Advisory Panel provide further direction and advice to the Emergency Management Section. This Division provides 24/7 support with a primary focus on the safety of our citizens through the effective management of community risks and emergencies.

SERVICES

Emergency Response

- Utilizes approximately 10 % of the division's resources in the support of First Responders (Fire, Police, Paramedic and Infrastructure Services) during major incidents including activation of the Emergency Operations Centre (EOC) with Community Control Group (CCG) involvement, evacuation support and subject matter expertise in major incident management.
- Ensures an accurate level of municipal preparedness and response to large-scale emergencies in accordance with mandated provincial legislation.
- Liaises with City departments and community organizations to cultivate working relationships and build emergency response capabilities.
- Participates in public education activities, pre-incident planning and risk assessment.

Public Safety, Planning and Prevention

- Utilizes approximately 50 % of the division's resources as the lead for emergency preparedness initiatives and planning.
- Oversees and maintains the City's Emergency Management Program as legislated by the EMPCA Act.
- Engages City departments and partner agencies to develop hazard-specific plans to address concerns related to known hazards within the community.

Public Education and Awareness

- Allocates approximately 20 % of the division's resources to provide community-based education programs to encourage citizens to be personally prepared for the various emergencies that may occur within the city.

- Develops and delivers emergency mass notification messaging through Sudbury Alerts.

Training

- Dedicates approximately 20 % of the division's resources to ongoing maintenance and training of staff for the EOC and tri-services Mobile Command Unit (MCU) to ensure operational effectiveness during emergency events.
- Provides professional training, education and resources to the community as per legislated requirements and industry standards.
- Develops and executes multi agency training and exercise for City of Greater Sudbury staff and partner agencies that manage, support and respond to emergencies.
- Regularly tests the effectiveness of the Emergency Response Plan at a multi-departmental level, to allow for continuous improvement of the City's emergency response capacity.

2018 ACCOMPLISHMENTS

- Transitioned emergency notifications for activation of CCG and EOC Support Staff to the Sudbury Alerts platform.
- Conducted annual compliance training and exercise with CCG members and their alternates.
- Building on the first test of Sudbury Alerts, actioned recommendations and ran a successful second test within the community during Emergency Preparedness week in May.
- Hosted a first ever emergency preparedness summer camp named Master of Disaster for children aged nine to 12 in partnership with Leisure Services and a diverse assortment of community stakeholders.
- Supported the activation of the EOC for the July 9, 2018 severe thunderstorm, which allowed for the first real-time use of Sudbury Alerts in the activation of City members.

STRATEGIC ISSUES AND OPPORTUNITIES

- Opportunities exist to increase community outreach utilizing various social media platforms to provide public education in emergency management.
- Efforts continue to expand the emergency management partners' network and increase frequency of engagement and consultation opportunities.
- Based on experience, enhance the Emergency Management website to help citizens and partners quickly find information and enable better engagement and collaboration.
- Introduce new EOC management and communication procedures through a focused model Incident Management System (IMS).

KEY DELIVERABLES IN 2019

- Maintain compliance with the EMCPA.
- Begin implementation of IMS in the EOC to provide a consistent and standardized approach that supports interoperability for incident response.
- Build upon departmental business continuity plan initiatives to provide a corporate-wide proactive planning process to ensure critical services can be maintained during a disaster or disruption.
- Compare the Emergency Response Plan against best practices with the goal of ensuring it provides appropriate decision support to EOC management.

FIRE SERVICES

OVERVIEW

Fire Services is responsible for delivering proactive public safety and response programs to prevent emergencies wherever possible and to preserve and enhance life, property, the environment and the economy due to fire losses in accordance with the Fire Protection and Prevention Act (FPPA) of Ontario, associated regulations, and City by-laws.

SERVICES

Emergency Response

- Uses 88 % of the division's resources to deliver approximately 195,000 person hours of fire suppression services.
- Receives and processes approximately 4,800 requests for service representing 9,300 vehicle responses, in mitigation of emergent and non-emergent events within the scope of Fire Services including fire suppression, medical tiered response (MTR), and technical rescue (water, ice, high angle, confined space, etc.).
- Delivers 160 Knox Box maintenance visits and approximately 60 Tactical Pre-Plans.
- Responds to major emergency incidents through coordination with provincial and federal response agencies.

Fire Safety Education and Prevention

- Uses 5 % of the division's resources to reach nearly 12,000 citizens via fire safety education programs aimed at at-risk populations and the completion of approximately 1,900 inspections enforcing various sections of municipal by-laws and provincial legislation.
- Develops and delivers programs including: Learn Not to Burn, seniors' fire safety, student housing fire safety, the Arson Prevention Program for Children (TAPP-C), industrial fire safety, and fire extinguisher training.
- Delivers fire prevention programs to reduce the possibility and severity of fire or explosion, by providing tools, resources and leadership to the community, with a focus on disadvantaged and vulnerable citizens.

Fleet and Training

- Utilizes 6 % of the division's resources to provide maintenance and logistical support to ensure fire vehicles, equipment and buildings are maintained and ready for use, and to develop and deliver fire service related training programs to nearly 400 firefighters, including recruit training, officer development, emergency care, equipment operator training, fire suppression, and fire prevention.
- Oversees operation of fire training grounds with an average of 35 training sessions occurring throughout the year.

- There is a new regulation that requires all fire services to perform and report on the risks present in their community. These risks relate to the industrial, commercial, institutional and residential infrastructure present in the community as well as road and railway corridors and critical infrastructure and utilities. The City's Enterprise Risk Management policy will help guide this work.
- As reported by the Auditor General, Fire Services needs to address a variety of resource and service needs that will require further direction from Council.

2018 ACCOMPLISHMENTS

- Implemented a Tactical Pre-Plan Risk Assessment Inspection Program to assess and review the risks present in the community.
- Implemented Mobile Data Terminals (MDT) in frontline apparatus to assist in the Tactical Pre-Plan process, and to provide real-time data to responding firefighters.
- Recruited 53 new volunteer firefighters to support the delivery of fire services across the community and to address ongoing attrition rates.
- Implemented Confined Space Technical Rescue and developed a Trench Rescue Plan for program implementation in 2019.
- Trained Growth and Infrastructure Department staff in confined space rescue to a standard required by their governing bodies.
- Reset the Water and Ice Rescue Programs with a complete recertification of the program, including training and equipment.

KEY DELIVERABLES IN 2019

- Through the division's data analytics processes, produce data to measure key components of the Fire Service including suppression, training, fleet, prevention and education.
- Participate in the Community Safety station review to identify and develop a plan to renovate consolidate or rebuild new stations for Council's future consideration.
- Complete implementation of the Trench Rescue Program.
- Assess the possible implementation of a National Fire Protection Association (NFPA) compliant training program for firefighters.
- Begin development and initiation of community response standards in compliance with new FPPA Regulations.
- Begin development and initiation of a community risk assessment in compliance with new FPPA Regulations.

STRATEGIC ISSUES AND OPPORTUNITIES

- Changes to the FPPA introduce the potential for change to firefighter training and certification requirements, response standards and community risk assessments, creating opportunities for collaboration with the province and peer municipalities.
- There is a new requirement for all fire services to collect and publicly report performance data relating to response efforts in relation to established NFPA benchmarks. Efforts to comply must be made within the prescribed timeframe.

PARAMEDIC SERVICES

OVERVIEW

Greater Sudbury Paramedic Services is responsible for the delivery of a performance-based paramedic service that complies with legislative and regulatory requirements, ensuring pre-hospital emergency medical care and transportation to those individuals suffering injury or illness. A performance-based paramedic service focuses on clinical excellence, response time performance, patient outcomes, patient satisfaction, continuous quality improvement, and a healthy work environment conducive to professional growth.

SERVICES

Paramedic Operations

- Uses 83 % of the division's resources to deliver approximately 114,000 hours of ambulance services in accordance with mandated provincial legislation.
- Responds to over 27,000 calls for service with a response time for the most serious patient acuity (CTAS 1) within eight minutes, 80 % of the time.
- Provides approximately 21,000 patient transports to hospital and between health-care facilities, the airport and residences.
- Through the Community Paramedic program, deploys two paramedics in non-traditional roles providing approximately 2,200 patient encounters delivering home visits, clinical interventions, and preventative health initiatives with the goal of reducing 911 calls, demand for emergency department visits and hospital admissions.

Training

- Uses 5 % of the division's resources to orient new staff, sustain legislatively mandated training requirements for staff and support reorientation for staff returning to work after a medical leave.
- Provides training to 165 staff on initiatives that include continuing medical education and remedial education to address identified gaps in knowledge, skill or critical decision-making.
- Delivers an average of 28 days of orientation support for newly hired paramedics.
- Coordinates with educational institutions for the clinical placement of paramedic students, and educational observer shifts for other allied agencies.
- Participates in national and international clinical research initiatives aimed at improving pre-hospital clinical care.

Logistics

- Uses 7 % of the division's resources to provide asset management and supply maintenance services for paramedics and vehicles.
- Processes approximately 5,400 paramedic vehicles each year meeting the processing standard 93 % of the time ensuring both vehicle and equipment are sanitized and stocked and operationally ready for service, in accordance with all legislative requirements and industry best practices.
- Ensures inventory control through the purchasing and deployment of materials within a centralized model with delivery to five satellite stations on a regular basis.
- Maintains operational oversight of the Mobile Command Unit and remote response Gator unit as well as maintenance oversight of the city emergency helipads.
- Ensures paramedic vehicles are operationally maintained according to manufacturer's recommendations through monitoring and delivery of paramedic vehicles to the maintenance depot on average over 780 times per year.

Professional Standards

- Uses 5 % of the division's resources in the delivery of continuous quality improvement programming ensuring that legislatively mandated responsibilities of the division are upheld.
- Manages the electronic patient care record system in accordance with various legislative and regulatory requirements, and through which conducts approximately 1,600 clinical audits of paramedic documentation with the goal of improving safety and high-quality clinical care.
- Conducts approximately 1,400 event analysis/ reviews in relation to patient care and operational investigations and in coordination for related legal proceedings.
- Provide approximately 500 hours of stakeholder/ community relations to ensure integration into the health-care framework.

2018 ACCOMPLISHMENTS

- Completed the triennial land Ambulance re-certification with the MOHLTC Emergency Health Services Branch, ensuring compliance with the Land and Air Ambulance Certification Standards including all provisions of the Ambulance Act, regulations and standards.
- Successfully implemented the largest recent change in legislative standards including: Basic Life Support Patient Care Standards, Advanced Life Support Patient Care Standards, Equipment Standards, and Documentation Standards.
- Expanded outreach and public education using various social media platforms including active messaging on Twitter and updated website content to allow better engagement and collaboration.
- Developed a comprehensive Post Traumatic Stress Disorder (PTSD) strategy in consultation with the Canadian Mental Health Association to meet the growing needs of First Responders.
- Expansion of PTSD prevention and intervention programs aimed at increasing resiliency and literacy and reducing the stigma associated with mental illness through the delivery of PTSD Awareness Training, including the Road to Mental Readiness (R2MR) Family program which was delivered to families of first responders for the first time in 2018.
- Replaced traditional stair chair patient extrication devices with powered stair chairs to reduce falls and associated injuries improving safety to both patients and staff.
- Secured funding for the continuation of our two Community Paramedicine Programs into 2019.

STRATEGIC ISSUES AND OPPORTUNITIES

- Changes within the Ambulance Act through Ontario Bill 160, Strengthening Quality and Accountability for Patient Act 2017, allows for an expanded scope for paramedics to provide appropriate on-scene treatment and refer patients to non-hospital options, such as primary care and community-based care. This change has created the opportunity to provide more flexibility in allowing patients to receive appropriate care at the appropriate location while reducing unnecessary trips to the hospital thereby reducing overcrowding in the emergency departments and allowing paramedic resources to redeploy faster back into the community.
- Negotiations with Canadian Union of Public Employees Local 4705 will establish a framework for employee relations in 2019.

KEY DELIVERABLES IN 2019

- Continue the evolution of the division's data analytics to measure key components of the Paramedic Service including operations, training, logistics, and professional standards.
- In partnership with McMaster University, the Health Promotion Community Paramedic Program will participate in a study which focuses on health promotion in older adults.
- Conduct a review of the current Paramedic Services deployment plan.
- Conduct a fleet management review to ensure the Paramedic fleet size is appropriately sized and configured to ensure the current service levels and standards are maintained.
- Participate in the Community Safety station review to identify and develop a plan to renovate consolidate or rebuild new stations for Council's future consideration.
- Improve our records management system to allow for more process automation and interagency collaboration.
- Update the Business Continuity Plan for Paramedic Services.

BUSINESS CASES

Sudbury Transit

BUSINESS CASES FOR SERVICE LEVEL CHANGES

The Executive Leadership Team (ELT) reviewed the proposed business cases and ranked them based on impact on health and safety, possibility of risk to the City or community, alignment with Council's Strategic Plan, and overall financial impact. It recommends the following items for consideration by the Finance and Administration Committee.

When determining which business cases to recommend, ELT considered the following themes:

- Large projects
- Community-wide initiatives
- Customer service
- Roads
- Addressing strategic plans

As approved by Council, any business case for consideration with a taxation levy impact below \$50,000 and recommended by ELT has been incorporated into the base budget. The list below details the items added to the base budget, with a summary on the next page.

Business Case Summary - Base Budget

	Resolution	2019 Budget Impact
Alternate Service Delivery of Camp Wassakwa		(3,654)
Alternate Service Delivery Model for Integrated Summer Playground Program		-
Affordable Housing CIP	PL2018-114	-
Syringe Recovery Bins		33,265
Road Safety Enhancements	OP2018-16	25,000
Development Review Fee Study	OP2018-14	-
Extended Operating Hours for 311		23,701
		78,312

BUSINESS CASES ADDED TO THE BASE BUDGET

Alternative Service Delivery of Camp Wassakwa

Camp Wassakwa is a summer day camp in the Fairbank Lake area. Over the past several years, the costs to operate the camp have risen, while participation rates have decreased. A review of children and youth programming in 2018 recommended that an alternative service delivery model be considered. The City will issue a request for proposal for a third-party service provider to offer recreational programming at Camp Wassakwa.

Alternative Service Delivery for Integrated Summer Playground Program

The City has offered an integrated summer playground program for more than 25 years under various plans. In an effort to maintain the program and enhance the experience of its users by providing specialized services, the City will contract out the delivery of the program to a third party provider.

Affordable Housing CIP Incentives

The Affordable Housing Community Improvement Plan (AHCIP) will provide incentives for the development of affordable housing projects in the city. The incentives offered under this program will be funded from the Social Housing Capital Reserve Fund up to \$1 million and can be stacked with other community improvement plan incentives. The AHCIP will include incentive programs such as a Tax Increment Equivalent Grant program, a planning and building fee rebate program, a feasibility program, a residential incentive program, and a secondary unit incentive program.

Syringe Recovery Bins

The City of Greater Sudbury has eight syringe recovery bins installed at designated sites in the downtown core for the safe disposal of sharps. Due to the amount of discarded sharps in public areas, a need has been determined for an additional three bins to be installed in community hotspots as recommended by the Sudbury Action Centre for Youth (SACY). The three locations recommended by SACY are Paris Street (in the vicinity of Brady Square), Notre Dame Avenue (in the vicinity of the Salvation Army), and St. Catherine's Street (in the vicinity of the Elgin Street tunnel). The locations will be finalized in 2019 based on recommendations from SACY.

Road Safety Enhancements

Traffic and Transportation Services completed a road safety assessment of all roadways within Greater Sudbury. This assessment used the road characteristics and collision history to determine areas of the road network that would most benefit from road safety enhancements. The City will perform road safety enhancements at five locations, and install a Type D pedestrian crossover on Loach's Road near LoEllen Park Secondary School.

Development Review Fee Study

The City's development fees are currently included in the Miscellaneous User Fee By-law and have not been reviewed in several years. Given Council's desire to move toward a cost recovery model for services where appropriate along with changes within the development community, it is an appropriate time to undertake a review of all development fees with a view toward establishing an appropriate fee structure for all development approvals and development engineering fees, including the Downtown Patio Program. It is anticipated that the study will cost \$100,000 and will be funded from Capital Financing Reserve Fund – Planning.

Extended Operating Hours for 311

Extending the regular operating hours of 311 would provide more options for citizens to get information about municipal services and to submit requests for service, whether they are of an urgent nature or not. It would also allow the City to offer better customer service overall by ensuring that more calls are being handled by CGS call centre operators who are trained and know the City's policies and procedures. The 311 operating hours will be extended to 7:30 a.m. to 6 p.m. on regular business days, which is the time period that appears to show the most potential for improved customer service based on current call log data. This is also in line with similar extended hours at other municipalities.

The following is a list of recommended business cases for staffing conversions which were reviewed by ELT and can be implemented within Council's approved taxation limit as provided in the 2019 Budget Directions.

Business Case Summary - Recommended Staffing Conversions

Page No.		Resolution	2019 Budget Impact
164	Conversion of Journeyman Building Maintenance Person from Part-Time to Full-Time		18,949
166	Conversion of Data Analysis Coordinator from Part-Time to Full-Time		(1,124)
168	Convert Active Transportation Coordinator from Part-Time to Full-Time		4,844
170	Convert Part-Time Employee to Full-Time to be funded by Manitoulin-Sudbury District Services Board	FA2018-07	-
172	Conversion of Municipal Accommodation Tax Administrator from Part-Time to Full-Time		-
174	Convert Health and Safety Advisor Position from Contract to Permanent		3,822
			26,491

The following is a list of recommended business cases for service level changes. These can be implemented within Council's approved taxation limit as provided in the 2019 Budget Directions.

Business Case Summary - Recommended Service Level Changes

Page No.		Resolution	2019 Budget Impact
176	Red Light Camera Program	FA2018-30	-
179	Affordable Transit Fare Structure - Grant Programs	CC2018-177	-
182	Two Permanent Rehabilitation Assistants at Pioneer Manor		-
185	Permanent Specialized Registered Nurse Position at Pioneer Manor		12,851
188	Water/Wastewater Legislative Compliance Supervisor		-
191	Hazardous Materials Response Capability (HAZMat)		125,000
195	Additional Labour Resources for Capital Project Delivery		247,121
198	Lasalle Boulevard Corridor Plan and Strategy - Streetscape Design Pilot	PL2018-127	210,000
202	Development of Additional Universal Recreation Programs	CC2018-176	130,382
205	The Junction - Library/Art Gallery/Convention/Performance Centre	CC2018-186	730,000
212	Removal of Snowbanks During the Winter Season for the Downtown Core	OP2018-15	55,000
			1,510,354

The list below reflects business cases that have been identified but not recommended within the 3.5 % tax increase guideline. If Council wishes to approve any of these enhancements, the net cost would exceed the Council-approved taxation limit as provided in the 2019 Budget Directions. This would produce either a property tax increase above the anticipated limit, or further downward adjustments would be needed to create the financial room needed for these changes.

Business Case Summary - Additional

Business Case for Staffing Change

Request/Project Name: Conversion of Journeyman Building Maintenance Person from Part Time to Full Time

Department: Asset and Fleet Services

Division: Finance, Asset and Fleet Division

Council Resolution (if applicable):

I. Executive Summary

Overview of Proposal

The Facility Management Section is responsible for the operation and maintenance of approximately one million square feet of CGS facility infrastructure. The section is actively working on a plan to centralize facility management and increase building preventative maintenance to aid in extending the useful life of aging CGS facilities. The objective is to employ skilled tradespersons to perform such activities, reducing the City's reliance on third party contractors and associated operating costs. The section currently faces ongoing challenges with turnover and securing qualified part time staff as skilled tradesmen have multiple full time employment options in the City of Greater Sudbury. The Manager of Facility Management is proposing to convert two TDS based part time junior maintenance positions to an FTE Journeyman position. The staffing classification change to a licensed trade position will permit for a more "hands on", in-house approach to facility management and will assist with the many challenges of maintaining our aging infrastructure. The position will also provide troubleshooting support and technical expertise to other areas of the CGS facilities portfolio.

II. Background

Current Service Level

The section is currently responsible for facility maintenance at Tom Davies Square, 190 Brady, 199 Larch, Lorne Fleet garage, Transit Terminal, Library facilities, Anderson Farm, Lionel Lalonde, along with a number of smaller buildings. The focus over the past several years has been on securing skilled tradespersons in electrical, plumbing and HVAC where opportunities existed and performing in house preventative maintenance while ensuring compliance to various codes and legislation. Current staff are cross trained to effectively assist and troubleshoot failures at all facilities under the sections responsibility. This initiative has proven to be beneficial at facilities in increasing the level of preventative maintenance while reducing the cost of contracting out. It has also assisted in standardization of systems in several areas and better use of technology such as building automation. Three part time positions exist in the maintenance section. Two junior maintenance person positions would be converted to a full time journeyman position if this business case is approved.

Drivers for Proposed Course of Action

Older facilities, aging infrastructure, higher frequency of equipment failures and increasing facility operating costs. Many facilities have surpassed their useful life and can pose a higher risk to its occupants if not maintained properly. With a new Asset Management Strategy and work on an enterprise facilities management plan underway, it is anticipated that demand for maintenance will be constant and supported by plans. Past practice in many areas has been reactive in nature and resulting repairs become more cumbersome and costly. An audit prepared by the Auditor General in April of 2018 recommends the preparation of a business case to examine opportunities to create additional specialized facility maintenance positions to reduce the City's reliance on contractors. This business case further supports the Auditor's recommendations and aligns with the corporate vision to create a more centralized / corporate approach to facility management over time.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget	<input checked="" type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input type="checkbox"/>	Investment in project (Capital)

Recommendation

The recommendation presented will convert total approved part time hours (2496) including associated benefit costs equating to \$72,394. The proposed Journeyman position cost based on 2019 budget dollars and existing positions is anticipated at \$91,413. The impact to the salary account in 2019 is \$19,019.

The long term impact will be a reduction in unexpected failures as the introduction of preventative maintenance planning, and more in-house solutions result in a reduction in third party contracting. This result will ultimately extend the useful life of equipment and the facility as a whole. While difficult to quantify, based on a similar approach at TDS and 199 Larch, the City of Greater Sudbury has realized a decrease in contractor expenses of \$280,000 with an increase in labour of \$177,000 since 2013. With this conversion, it is assumed that these savings would continue.

The alternative, "status quo" limits the ability for staff to address maintenance and repairs where a experienced licensed Journeyman is required.

Operational cost along with contracting out cost would increase and the City is limited in its ability to attract candidates to part time positions. The Assets/Fleet division will monitor the savings and potential to displace contracted resources if the option is approved.

IV. Impact Analysis**Qualitative Implications**

Benefits include more technical expertise resulting in increased preventative maintenance, better planning, immediate response and support that reduces risk and assists in continuity of operations. Additionally, technical expertise has allowed the City to cross train staff which has increased the overall competency in the maintenance section and led to increased diligence in many areas such as health and safety, occupant life and safety and compliance to legislation and regulations.

Quantifiable Implications

Since 2013, Assets services (specifically Tom Davies Square and 199 Larch) have experienced a \$280,000 drop in contractor expenses with an associated increase in labour of \$177,000 providing a positive net impact of \$103,000 while increasing the level of preventative maintenance. It is assumed that these savings would continue.

Business Case for Staffing Change

Request/Project Name: Conversion of Contract Data Analysis Coordinator from Part Time to Full Time

Department: Growth and Infrastructure

Division: Planning Services

Council Resolution (if applicable):

I. Executive Summary

Overview of Proposal

This business case proposes the conversion of the existing Data Analysis Coordinator (DAC) position in Planning Services from a full time contract position to a full time permanent position. Funding for the DAC position is currently provided by the Ministry of Education. This funding is included as part of the transferred responsibility for the implementation and management of EarlyON Child and Family Centres (formerly Ontario Early Years and Child and Family Centres in the City from the Ministry to CGS, which took place in 2017.

II. Background

Current Service Level

In 2017 the Province transferred responsibility for the implementation and management of EarlyON Child and Family Centres (formerly Ontario Early Years Child and Family Centres) in Sudbury to the CGS, which included annual funding for Data Analysis Coordinator (DAC) Services. DACs are community-based research analysts responsible for data gathering, analysis, and reporting to support research, evaluation, and planning efforts in Ontario's early years sector. DACs, and DAC funding, have historically been linked to Ministry-funded child and family programs. In response to the transfer of responsibility, the City created a two-year DAC contract position in 2017, which expires in April 2019. This position has become very valuable to CGS by providing not only support for Children's Services, but statistical, data analytics and GIS services for the entire corporation.

Drivers for Proposed Course of Action

In response to the recent transfer of responsibility for DAC services from the Ministry of Education to the CGS, the DAC position was created in 2017 as a two year, full time contract position to fulfill the new mandate. Since that time, the DAC position has matured and expanded to support not only Children's Services, but also the corporation in a statistical, data analytics and GIS capacity. The urgency to convert this position from a full time contract to a permanent full time position is due to the two year contract expiring in April of 2019. The conversion of the DAC position is being recommended at this time as there is a stable funding source for the position (Ministry of Education), the position has proven to be very valuable to corporation, and there has been a significant training investment made in the position.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget	<input type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input type="checkbox"/>	Investment in project (Capital)

Recommendation

The recommended change is to convert the existing DAC position in Planning Services from a funded full time contract position to a permanent full time position. This change responds to the drivers for the proposed course of action by creating a full time position to fulfill the EarlyON Child and Family Centres Data Management mandate transferred from the Province, which also provides much needed statistical, analytical and GIS support to the CGS. This change is recommended over others as it creates a permanent solution to the DAC responsibilities transferred from the Ministry of Education and also builds on the capacity that has been created in the position.

IV. Impact Analysis

Qualitative Implications

This change would create a permanent full time position in a role that is necessary with the transfer of responsibility from the Ministry of Education, is highly specialized and, provides services that are in high demand across the corporation with the expansion and integration of GIS and data analytics. This position will assist the corporation by continuing to provide data and analytics necessary for evidence based decision making and policy development.

Quantifiable Implications

The change would require an increase to the FTE compliment of the Community and Strategic Planning Section. The change would also require a minor adjustment to the base operating budget of the Community and Strategic Planning Section, which represents the difference between the part time contract and full time position.

Business Case for Staffing Change

Request/Project Name:	Conversion of Active Transportation Coordinator from Part Time to Full Time		
Department:	Growth and Infrastructure	Division:	Infrastructure Capital Planning Services
Council Resolution (if applicable):		N/A	

I. Executive Summary

Overview of Proposal

Momentum is growing for active and sustainable transportation and for more travel mode choice in Greater Sudbury. The Transportation Master Plan, approved by Council in 2016, outlines an implementation plan for the proposed cycling facility network and the delivery of strategic policies that extends beyond the next 15 years. The Active Transportation Coordinator will continue to play a significant role over the medium and long-term in providing guidance on the delivery of capital projects for cycling and pedestrian infrastructure. As the cycling facility network continues to grow, the role will also continue to require the delivery of public engagement, encouragement and education-based programs which aim to effectively make the highest and best use of infrastructure investments. The Transportation Demand Management Plan, approved by Council in June 2018, provides a framework for these programs and proposes a 10-year action plan to begin implementation.

To ensure the ongoing implementation of these Council-approved plans, development of successful and impactful policies and programs and the overall sustainability of the active transportation program, a continuous dedicated staff resource is required. The Active Transportation Coordinator position is currently a long-term temporary contract, funded through the capital envelope, and it is recommended that this position be converted to a permanent, full-time equivalent.

II. Background

Current Service Level

The City of Greater Sudbury hired an Active Transportation Coordinator in December 2016 on a 5-year long-term temporary contract which has been funded through the capital envelope. Since the position was filled, the City has delivered nearly 15% of the recommended cycling network in the Council approved Transportation Master Plan; been awarded a Bicycle Friendly Community Award (Bronze) from Share the Road Cycling Coalition; adopted a Transportation Demand Management Plan for the City; became only the 6th municipality in Ontario to adopt a Complete Streets Policy; launched a new digital newsletter to engage citizens in a different way and built strong, positive partnerships with many local community groups, organizations and agencies. The Active Transportation Coordinator was also responsible for coordinating and administering the Sustainable Mobility Advisory Panel, which was an advisory panel to Council. The Active Transportation Coordinator will continue to build positive relationships with residents, stakeholders and community agencies as well as participate in initiatives which result in raising the profile of the Greater Sudbury community, such as presenting at industry conferences, including the Association of Municipalities of Ontario (AMO) Conference in 2018.

Drivers for Proposed Course of Action

Generally, cities across the Province and beyond are seeing a shift in resident preferences for more opportunities to access destinations by walking and cycling. It is also evident that momentum is continuing to grow locally for active and sustainable transportation and generally for more travel mode choice in Greater Sudbury. In 2014, Council incorporated a key priority into Greater Together, to deliver multimodal transportation options to connect communities within Greater Sudbury. Since this time, significant strides have been made towards accomplishing this priority including the Council adoption of the Transportation Master Plan in 2016, which highlights infrastructure recommendations and key policies; the approval of the Transportation Demand Management Plan, outlining programs to be developed to support the highest and best use of infrastructure investments and finally the adoption of a Complete Streets policy which will enhance the way the City approaches transportation infrastructure capital projects.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

Change to base operating budget	X	Change to base FTE allocation
Change to fees (unit price)		Change to revenues (volume change)
Investment in project (Operating)		Investment in project (Capital)

Recommendation

It is recommended that the current long-term temporary contract be converted into a full-time equivalent to ensure staffing resources remain in line with Council's stated desire to support and deliver multimodal transportation options to connect neighbourhoods and communities within Greater Sudbury. Further, a dedicated full-time staff position focusing on active transportation will also ensure that the recommendations of the Transportation Master Plan, the Transportation Demand Management Plan and the Complete Streets Policy continue to be implemented in a timely and context-sensitive manner.

IV. Impact Analysis

Qualitative Implications

Hiring an Active Transportation Coordinator on a full-time permanent basis would enable the City to continue to capitalize on the momentum that has been gained with respect to cycling and walking improvements since December 2016. By converting the contract to a permanent position, this will enable staff to begin to address longer-term priorities and develop more education and encouragement programs which would have a delivery timeframe extending beyond the end of the existing contract in December 2021. Many of the recommendations outlined in the Transportation Master Plan and the Transportation Demand Management Plan for Greater Sudbury extend well beyond December 2021. To be able to meet resident and Council expectations for delivery of this infrastructure and these programs, a full-time permanent staff resource is required.

Quantifiable Implications

Should this business case be approved, the position would then be funded through the operating budget, rather than the capital envelope as the long-term temporary contract is currently funded. This is not a request for new funding, but rather a re-allocation of capital funding to the operation budget. With a dedicated staff resource for active transportation, the City has been able to leverage annual capital funding commitments for cycling infrastructure to access an additional \$1.6 million in 2018 from other levels of government. Should the position be made permanent, resources would be available to continue to pursue these funding opportunities as they arise. Approval of this business case would result in a reduction of the capital budget at the end of the contract term due to the contract being funded entirely from the capital envelope. The position will continue to be funded from the capital envelope until 2022 as originally intended. Once the contract is complete, the position will be funded by the operating budget via the tax levy.

Business Case for Staffing Change

Request/Project Name: Convert Part Time Employee to Full Time to be funded by Manitoulin-Sudbury District Services Board

Department: Corporate Services

Division: Finance, Assets and Fleet

Council Resolution (if applicable): FA2018-07/BL2018-76

I. Executive Summary

Overview of Proposal

On April 17, 2018 the Finance and Administration Committee passed resolution FA2018-07 which authorized the G.M. of Corporate Services to enter into an agreement with Manitoulin-Sudbury District Services Board (MSDSB) for Fleet Services to maintain 19 MSDSB vehicles. The resolution also recommended that staff prepare a business case to convert the authorized part time hours to a permanent full time technician position. This business case is for the conversion of authorized part time hours to a permanent full time technician position that is fully funded by MSDSB. In the event that the maintenance agreement between the City and MSDSB is cancelled, Fleet services will reduce the permanent technician staffing complement preferably using anticipated attrition. This option is entirely cost neutral as all costs and potential costs are recovered by MSDSB per the service agreement.

II. Background

Current Service Level

Currently, Fleet services have part time hours that will allow the hiring of a technician on a contract basis with a limited time frame. Emergency vehicles have very particular maintenance requirements and as a result require trained vehicle technicians. In order to attract the highest quality candidate that is interested in a long term career at the City of Greater Sudbury, staff is requesting the authorization to hire a permanent FTE to fill this role.

Drivers for Proposed Course of Action

The driver for this is the new agreement with MSDSB. The change is being recommended as long term employment attracts a greater number of candidates and a higher quality of candidate. This will allow CGS to attract a greater number of candidates including those that are trained in the maintenance of emergency vehicles and those committed to long term employment. In the case that the agreement with MSDSB is cancelled by either party, staff will reduce the permanent positions in Fleet by one via attrition. The maintenance agreement requires MSDSB to fully fund a full time technician position.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/> Change to base operating budget	<input checked="" type="checkbox"/> Change to base FTE allocation
<input type="checkbox"/> Change to fees (unit price)	<input checked="" type="checkbox"/> Change to revenues (volume change)
<input type="checkbox"/> Investment in project (Operating)	<input type="checkbox"/> Investment in project (Capital)

Recommendation

It is recommended that all part-time hours for the technician II position associated with the agreement between the City and MSDSB be converted to a full time position, and that all other terms and conditions in the initial agreement remain status quo.

IV. Impact Analysis**Qualitative Implications**

The change in staffing classification improves the City's likelihood of attracting a better talent pool of applicants when hiring for a full time position. It will also provide CGS with a larger pool of experienced and fully trained EMS technicians and a level of protection from unforeseen absences or attrition.

Quantifiable Implications

The agreement with MSDSB requires MSDSB to fully fund the position. In discussions with MSDSB, the City has advised that it is preferable to hire a permanent full time employee and MSDSB is in agreement with fully funding a permanent full time employee. As a result this will be a zero cost to the City.

Business Case for Staffing Change

Request/Project Name: Conversion from Municipal Accommodation Tax Administrator from Part Time to Full Time

Department: Corporate Services

Division: Accounting Services

Council Resolution (if applicable): N/A

I. Executive Summary

Overview of Proposal

This request is to convert the Municipal Accommodation Tax (MAT) Administrator part-time hours to a full-time employee. This position is fully funded by MAT revenues in accordance with legislation.

II. Background

Current Service Level

The Municipal Accommodation Tax (MAT) was implemented September 1, 2018. Existing staff can administer the collection and audit of these revenues in the short term. The City was able to attract a qualified employee to administer the tax on a contract basis. Also, the City had contracted out the development of the MAT collection and audit processes prior to being able to fill the position.

Drivers for Proposed Course of Action

Council approved the MAT by-law 2018-127 on July 10, 2018 with an effective date of September 1, 2018. In accordance with Ontario Regulation 435/17 the City may deduct costs to administer the program before distributing 50 % of the revenue to the eligible tourism entity (The City of Greater Sudbury Community Development Corporation). The City has included the cost (including a temporary full-time staff position for the entire year) to administer the MAT collection and audit process in the 2019 budget. As this is an ongoing revenue stream that must be managed a full-time permanent employee is required to administer this program in an efficient and consistent manner.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget	<input checked="" type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input type="checkbox"/>	Investment in project (Capital)

Recommendation

The alternative to an FTE is to hire contract employees, which will not provide for consistent service, or contract out the services to a third party at a higher cost while incurring additional overtime to manage the third party, which would result in a decrease in the net revenue to the City of Greater Sudbury and to The City of Greater Sudbury Community Development Corporation (GSDC). The City of Greater Sudbury portion, estimated at \$800,000, has already been committed to finance the Arena/Event Centre and the GSDC portion is to be used to promote tourism in Sudbury.

IV. Impact Analysis

Qualitative Implications

The position will provide the City with the ability to collect the MAT revenue from accommodation providers in an efficient and consistent manner thereby increasing revenue available to fund the Arena/Event Centre and to increase promotion of the City of Greater Sudbury for tourism.

Quantifiable Implications

The base operating budget will be increased by the additional cost of benefits to convert from part-time hours to a full-time employee. The additional cost will be fully funded by the MAT revenue and reduce the contribution to the City and to GSDC. With the MAT Administrator in place, the City has been able to recover additional MAT revenues by identifying additional accommodation providers resulting in an increase in the municipal accommodation tax recovered.

Operating Revenue - Incremental

Business Case for Staffing Change

Request/Project Name: Convert Health & Safety Advisor Position from Contract to Permanent

Department: Corporate Services

Division: HR & OD

Council Resolution (if applicable):

I. Executive Summary

Overview of Proposal

Convert one (1) Health and Safety Advisor, which is currently a long term temporary Employee in ODSWR to a full time permanent employee status. The current incumbent has over six (6) years of experience working in the field of health and safety, and has been with the organization for approximately a year and a half. The incumbent possesses a strong educational background in occupational health and safety and has a broad spectrum of experience in the field. If the Organization were to lose the incumbent and the knowledge and experience she brings, it could negatively impact the client group she supports; the majority of the Growth and Infrastructure Department, and it's increased capacity to achieve a higher standard relating to health and safety.

The ODSWR section currently employs three (3) full time Employees to provide corporate wide Health and Safety advice and guidance, two (2) of which split their time between health and safety, and Rehabilitation, and one (1) long term temporary Employee currently funded by the GIS department.

If approved, the conversion of this additional full time Employee would result in a more appropriate level of stability for the City of Greater Sudbury's health and safety program, and would assist in the process of continuing to develop a robust, operationally responsive health and safety program.

II. Background

Current Service Level

The Health and Safety Advisor position provides support to over 400 Employees, ranging from frontline staff, to director level staff. The position provides support and services to the Growth and Infrastructure group in order to assist in facilitating safety while the group is delivering the essential services to the community.

The support includes: promotion of a positive safety culture, best practice study and implementation relating to health and safety, provides consultation to ensure that the operation is compliant with legislative requirements, assists with the safety management framework such as revising policies and practices to ensure accuracy, develops and coordinates proactive accident prevention strategies, provides consultation in the development of safe work/safe operation procedures, supports supervisors and management to investigate incidents/accidents, provides guidance for onsite inspections, and assists in developing a key performance indicator surrounding health and safety metrics.

Drivers for Proposed Course of Action

Originally the Health and Safety Advisor position was created for a long term contract to support a the Growth and Infrastructure client group, as it was recognized that the nature of the work performed by that group is highly regulated, and carries a certain level of risk. It was determined approximately two (2) years ago, that the issues surrounding health and safety could best be managed by a person who possessed specialized knowledge in the area of health and safety and the specialized knowledge of the operating department.

Now, two years later, the position has proved to be beneficial to the Growth and Infrastructure group, due to the structure and consistent availability and guidance provided by the dedicated resource that the Health and Safety Advisor position provides.

In the fifteen (15) months that there has been a dedicated Health and Safety Advisor, there has been a downward trend in the number of Workplace Safety and Insurance Board claims. In the first seven (7) months of there being a Health and Safety Advisor (June 2017 to December 2017), there was an average of 7 injuries per month. Throughout the latter eight (8) months (January 2018 to August 2018), and once the Health and Safety Advisor settled in, the average number of injuries trended down to 5 per month.

Associated with the aforementioned number of workplace safety and Insurance Board claims, the average number of days lost in the first seven (7) months was fifty-eight (58), and trended down to thirty-eight (38) over the latter eight (8) months (January 2018 to August 2018).

In addition to this, the Health and Safety Advisor has established in excess of thirteen (13) Standard Operating Procedures and Safe Work Procedures for the Growth and Infrastructure group.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget	<input checked="" type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input type="checkbox"/>	Investment in project (Capital)

Recommendation

The one (1) identified Health and Safety Advisor would simply receive an offer of ongoing employment as a permanent, full time Employee. There are no additional expenses other than what is identified above. If this enhancement is not acted upon during 2019 budget, there is a risk that the incumbent will leave the City of Greater Sudbury when full time permanent employment becomes available elsewhere. Health Sciences North, Laurentian University, Vale and Glencore all have similar sized HR/Health and Safety Departments that are facing the same demographic changes as the City of Greater Sudbury, resulting in availability of opportunities in this sector of the labour market.

IV. Impact Analysis

Qualitative Implications

Almost certain turnover of an educated, experienced member of staff resulting in a disruption in the short to medium term for the health and safety stream of service to the Growth and Infrastructure group. The remaining health and safety staff members will have to cover the Growth and Infrastructure department's safety needs, but with less client-specific field knowledge. The enhanced level of health and safety services that can be provided builds trust and confidence within the employees and helps reduce the risks associated with hazards in the workplace. In turn, this will improve overall productivity and improve service delivery to citizens.

Quantifiable Implications

The financial change which results from this position being converted from a long-term temporary position to a permanent position is driven from the cost of benefits associated with the conversion. The total cost is funded from three divisions within Growth and Infrastructure.

We would also expect to realize a cost avoidance by having a full-time permanent Health and Safety Advisor position, as a result of both fewer injuries, and severity reduction.

Business Case for Service Level Change

Request/Project Name: Red Light Camera Program

Department: Growth and Infrastructure

Division: Infrastructure Capital Planning

Council Resolution (if applicable): FA2018-30

I. Executive Summary

Overview of Proposal

The Red Light Camera Program is an automated traffic enforcement system, designed to enhance overall safety at intersections. Red light camera equipment is proposed to be installed at 6 intersections in Greater Sudbury which have the largest impact on minimizing collisions as well of modifying driver behaviour on red light running. A report detailing the program was presented to the Finance and Administration Committee on July 10, 2018 (<http://agendasonline.greatersudbury.ca/index.cfm?pg=agenda&action=navigator&lang=en&id=1274&itemid=15512>)

II. Background

Current Service Level

Red light running infractions are currently enforced by Greater Sudbury Police Services. Infractions observed by Police Services may result in fines levied under the provincial Highway Traffic Act (HTA). Since there are substantially more signalized intersections than available police officers, many drivers choose to ignore the obligations of the signals. These infractions of the HTA go undetected, resulting in unsafe conditions for motorists, pedestrians and cyclists.

Drivers for Proposed Course of Action

The City commissioned a study to assess the need for implementing a red light program and to identify sites which would benefit the most from the deployment of the RLCs. The goal was to identify intersections where an RLC was the best engineering solution to minimize right angle collisions. This strategy is in line with the City's goal to facilitate a safe and efficient road network. Of the City's 124 signalized intersections, the study identified 55 intersections as possible candidates to install a RLC to minimize right angle collisions.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget	<input checked="" type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input type="checkbox"/>	Investment in project (Capital)

Recommendation

It is recommended that the City installs red light cameras at 6 intersections. The installation of the red light cameras has been shown to reduce right angle collisions by 25% and fatalities caused by red light running by 35%. The installation of red light camera equipment provides automated enforcement 24 hours a day, 7 days a week. The alternative would be to ask Greater Sudbury Police Services to place more of an emphasis on enforcing red light running at select intersections throughout the community. Enforcing red light running is challenging for police services due to the unpredictability of when and where a red light running offence may occur. This unpredictability makes enforcement of red light running very time consuming and often ineffective.

How does this align with Council's Strategic Plan?

<input type="checkbox"/>	Growth and Economic Development	<input type="checkbox"/>	Responsive, Fiscally Prudent, Open Governance
<input checked="" type="checkbox"/>	Quality of Life and Place	<input type="checkbox"/>	Sustainable Infrastructure

The installation of red light cameras relates to the pillar of Quality of Life and Place. By reducing the number of severe collisions at intersections, the health and well-being of our community will be improved.

IV. Impact Analysis

Qualitative Implications

Implementing a red light camera program will improve the safety at the intersections where the equipment is installed as well as nearby intersections by reducing the number of severe collisions.

Quantifiable Implications

It is anticipated that the red light camera program will cost approximately \$500,000 per year to run. This cost includes the leasing of the red light camera equipment, the processing of red light violations, the fee associated with obtaining vehicle license information, the costs associated with Provincial Court administration, an additional City staff resource and the costs associated with education and awareness measures that would be implemented as part of the red light camera program. With six cameras installed and the assumption that there will be 1 conviction per site per day, it is expected that the red light camera program would generate \$580,000 on an annual basis. In addition, the societal benefits of reducing severe collisions has not been included as part of the financial analysis.

Total				\$ -	\$ (87,780)	\$ -	\$ -	\$ -

Implementation

Implementation of a RLC program involves many steps and various approval processes which are outlined below:

1. Receive initial approval for the RLC program from City Council.
 2. Request membership with the existing Ontario RLC group of municipalities so that Greater Sudbury can benefit from the joint operating costs and administration of the program.
 3. Report back to Council in 2019 with an update on the status of the project.
 4. Develop an internal team to implement the program that would be led by the Traffic and Asset Management section and include staff from Finance, Police, Communications, Legal and Provincial Court Administration.
 5. Adoption by City Council of the RLC locations and apply to have the Highway Traffic Act regulations amended to include these locations. All RLC sites in Ontario must be listed in the Highway Traffic Act.
 6. Enter into an agreement with the City of Toronto for the processing of the RLC infractions, after it obtains permission from their Council. Toronto currently processes all RLC infractions in Ontario.
 7. Enter into a RLC contract with the current vendor (Traffipax) for RLC leasing, installation, and maintenance and obtain confirmation from the camera vendor on site suitability.
 8. Obtain the approval of the Ministry of the Attorney General to join the RLC program.
 9. Enter into an agreement with Ministry of Transportation to obtain license plate and ownership information and sharing of data from the RLC program.
 10. Development of a red-light running educational campaign to be implemented concurrently with the RLC program.
- Based on data gathered from other municipalities, it is anticipated that the above steps would take 24 months to complete the various approvals.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> The red light camera program is expected to generate enough revenue to offset the costs of running the program. Automated enforcement equipment operates 24 hours a day, 7 days a week so the behavior of motorists is not dependent on the presence of Greater Sudbury Police Services The societal benefits of reducing severe collisions has not been included as part of the financial analysis. These benefits include reduced property damage, a reduced burden on the health care system and on emergency services as well as the reduction in pain and trauma of families involved in these severe collisions. 	<ul style="list-style-type: none"> The number of red light running violations may not meet the estimated amounts It will be difficult to benchmark and analyze the information provided by the Province as it is the same statute as running a stop light or red light. All fines under this statute will be presented as one.

V. Alternatives

Alternatives Considered

Solution Options	Advantages/Disadvantages	Financial Impact
Do not implement a red light camera program.	Advantage: It would save the cost of running the red light camera program should fine revenues not exceed the costs of the program. Disadvantage: The historical collision rates would continue to occur.	

Business Case for User Fee Change

Request/Project Name: Affordable Transit Fare Structure - Grant Programs

Department: Transit Services

Division: Community Development

Council Resolution (if applicable): CC2018-177

I. Executive Summary

Overview of Proposal

On June 26, 2018, a report titled Affordable Transit Fare Structure was presented to Council (<https://agendasonline.greatersudbury.ca/?pg=agenda&action=navigator&lang=en&id=1243&itemid=15177>). This proposal seeks to modify the Youth Pass (Ride the Bus on Us) and Community Group programs funded through Provincial Gas Taxes. The business case addresses a policy change referenced in the report and does not have a budget impact.

II. Background

Current Service Level

The youth transit pass program "Ride the Bus on Us" permits an annual allocation of \$25,000 of five ride cards to be distributed to youth in the community ages 12 to 24 through the library services. The goal of the program is designed to encourage young people to take part in community programs and to familiarize themselves with the public transit system with the hope that they will see the benefits of using transit in the future. The impact of the subsidy on ridership growth however, is not known, as success of the program cannot be measured.

A \$30,000 annual allocation is available to facilitate transportation opportunities for not-for-profit programs and events. Council approved an application process which had as a goal to provide equity in the distribution of the grants to community groups, by issuing a cap of \$500 per applicant. Although providing some benefit to the community, the support provided does not address the goal of promoting or increasing transit use, but instead provides a financial subsidy to organizers and not-for-profit agencies. The financial barriers to transit use is being addressed through the Affordable Fare Structure Policy business case.

Drivers for Proposed Course of Action

Greater Sudbury Transit services have been under review over the last two years with an aim to improve customer service, increase ridership and encourage new users to try the services. The Affordable Fare Structure report presented to Council on June 26, 2018 has provided policy recommendations as it relates to the grant programs. Council direction is required to proceed with the change in policy.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget	<input type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input type="checkbox"/>	Investment in project (Capital)

Recommendation

It is recommended that the two existing Grant programs be discontinued and replaced with the following:

Transit Travel Training – In class and on the road training will be provided to groups (such as older adults, people with disabilities, newcomers, and school age students (Grade 7-10). A ride card will be provided once a participant has attended the session.

Free Access to Transit Services –Not-for-Profit and school board related initiative will be supported by providing free access to Transit Services. Upon request, a not-for-profit organization or school board outing related organizers can travel with their groups for free on Greater Sudbury Transit routes to and from their destination. The group organizer will provide a letter of confirmation from the Greater Sudbury Transit Director to the Transit Bus Operator as proof of eligibility.

Community Event and for-profit initiatives – Upon request, a community event can be supported through a cost-sharing program called “Ride the Bus for \$1”. The individual would require to pay \$1 to access Transit Services to reach the event; the organization would be billed \$1 per passenger, and the City will subsidize the remaining revenue loss per passenger. In exchange for the support, the organizer must provide proof of advertisement (social media, radio, posters or any other means of publicity).

All programs will be monitored and reported to Council to assess the success and extension of the program each year. Modification and extensions will be proposed to ensure that the grant opportunities are meeting Council goals. The current grant programs carry a value of \$55,000 (youth program \$25,000, community charters \$30,000) annually and are fully covered by Provincial Gas Tax funds.

How does this align with Council's Strategic Plan?

Growth and Economic Development	X	Responsive, Fiscally Prudent, Open Governance
Quality of Life and Place		Sustainable Infrastructure

Implementing the new Transit Grant Programs would conform to priorities A & D under the Responsive, Fiscally Prudent, Open Governance pillar of Council's Strategic Plan. These priorities seek to focus on openness, transparency and accountability in everything we do and emphasize the relationship between governance, community engagement and information, in support of better decision-making.

IV. Impact Analysis

Qualitative Implications

The Transit Grant Programs in this proposal aim to increase transit use, promote the service and provide transit service support to the Community. The success of the programs can be measured and monitored, and reported to Council in a meaningful way to ensure their goals are met.

Quantifiable Implications

The Grants will be funded through Provincial Gas Tax and will have no impact to the levy. The grant portion to be paid by the City will hold a value of \$55,000 annually.

Implementation

The program can be implemented once approved. Communication of the new program guidelines would be required for both previous and potential recipients. Marketing efforts will be undertaken to ensure the programs' success.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> Program is transparent and can be monitored to ensure Council's goal is met. Uses existing service to support the community, without incurring additional operating costs (administration and deployment of Charters). Ridership increase and promotion of services. More people will benefit from these programs. 	<ul style="list-style-type: none"> Some community event organizers currently use their grant towards a charter service which will no longer be available. Recipients of 1 Ride cards to support their program will no longer be subsidized and will require to purchase all ride cards they wish to distribute to their clients. Persons between the age of 12 and 24 will no longer have access to free 5 ride cards during the summer

V. Alternatives**Alternatives Considered**

Solution Options	Advantages/Disadvantages	Financial Impact
Continue existing Grant Program	Advantage: Not-for-profit agencies will continue to receive financial support for their programs. Disadvantage: The programs cannot be monitored and does not provide subsidy which aims to increasing ridership and attract new	None

Business Case for Service Level Change

Request/Project Name: Two Permanent Rehabilitation Assistants at Pioneer Manor

Department: Community Development

Division: Pioneer Manor

Council Resolution (if applicable):

I. Executive Summary

Overview of Proposal

Since the 2006 initiation of the Ministry of Health & Long-Term Care's (MOHLTC) Physiotherapy in Long-Term Care Homes strategy, Pioneer Manor has contracted physiotherapy services for its residents. Initially, services were provided with a direct OHIP billing funding model. However, in 2013 the funding model was changed to fixed funding. At that point, Pioneer Manor began paying a third-party provider directly to obtain its physiotherapy services. With that contract expiring in December 2017, it seemed an opportune time to consider solidifying the physiotherapy services, by moving to an in-house model of service delivery, aimed at improving retention and quality of service. Council approval was obtained, and with a bridging of contracted services until February 2018, in-house physiotherapists were hired. Rehabilitation assistants were also hired, but on a limited basis. This business case proposes the permanent hiring of two full-time and two part-time rehabilitation assistants to complete the transition to a fully in-house physiotherapy team. Physiotherapy services will be provided at a level that matches the funding provided by the MOHLTC.

II. Background

Current Service Level

Currently, Pioneer Manor has 1.6 full-time Physiotherapists. There are two full-time and two part-time rehabilitation assistants who deliver treatment to residents as deemed appropriate by the Physiotherapists.

Drivers for Proposed Course of Action

The use of contracted services presented challenges such as the inability to personally screen and select staff with the skill level desired for a facility with such a high demand and caseloads, frequent turnover, and limited ability to control vacation, absences, and schedule flexibility. In 2017, there was a turnover of 8 physiotherapist assistants and 1 physiotherapist. Rapid turnover poses potential risk to the residents, due to lack of familiarity with routines, and the knowledge of facility policies and resident treatment programs. Inefficiencies exist with frequent need to retrain and orient new staff, in order for them to work independently and skillfully within the Home. Lack of previous experience in a long term care setting results in inefficiency, and again poses some risk while learning "on the job" in such a demanding environment. Approximately 45 to 50% of the 433 residents at Pioneer Manor are on a physiotherapy program at any given time. Since bringing staff in-house, there has been stability on the team. Efficiencies have been maintained if not improved. All staff hired currently in the limited capacity had previous long term care experience, and half of them are fluent in French and English, which has proven to be a huge asset in service delivery. The limited positions are coming to term by the end of December. We recommend making the change permanent in order to continue moving in this positive direction.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

Change to base operating budget	<input checked="" type="checkbox"/>	Change to base FTE allocation
Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
Investment in project (Operating)	<input type="checkbox"/>	Investment in project (Capital)

Recommendation

The change recommended is to hire in a permanent capacity two full-time and two part-time rehabilitation assistants, to further stabilize the in-house physiotherapy team. The alternatives would be to revert to contracting the rehabilitation assistants. This would only serve to once again restrict the ability to select through a careful screening process the individual staff that will be working with our residents. The probable return of rapid turnover is also highly undesirable.

How does this align with Council's Strategic Plan?

	Growth and Economic Development	Responsive, Fiscally Prudent, Open Governance
x	Quality of Life and Place	Sustainable Infrastructure

This proposal aligns with Council's Strategic Plan for Quality of Life and Place, in ensuring skilled, capable, reliable staff are hired to deliver a high quality service to our residents. I believe this proposal is sustainable and provides stability to the rehabilitation team.

IV. Impact Analysis**Qualitative Implications**

This change will achieve stability in the rehabilitation team, as well as promote service excellence. This will increase overall customer satisfaction, as well as improve outcome measures for our residents. Stable physiotherapy treatments that are delivered in a consistent and efficient manner will also help to generate future funding dollars from the MOHLTC, as treatment minutes are captured as part of the funding formula. Staff permanency will also serve the organization and its customers well, by creating greater employee job satisfaction and reducing turnover.

Quantifiable Implications

Physiotherapy services are funded 100% by the Ministry of Health and Long Term Care. There is no direct financial impact associated with this change.

Operating Revenue - Incremental**Detail**

On-Going	\$ -	\$ -	\$ -	\$ -	\$ -
One-Time	\$ -	\$ -	\$ -	\$ -	\$ -
Total	\$ -	\$ -	\$ -	\$ -	\$ -

Implementation

If approved, positions will be posted for rehabilitation assistants in March following the budget process with the new Council, with shortlisting, interviewing, and hiring shortly thereafter. It is expected that all permanent staff will be in place by the end of March or early April. Limited positions will be extended until permanent staff are in place, to ensure smooth transition of caseloads as required.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> • Retention and stability in team • Service excellence • Skilled staff • Ability to manage the staff as per City and Home policies and procedures 	<ul style="list-style-type: none"> • Unable to hire as many workers as possible through contracting services, due to higher Pioneer Manor wages.

V. Alternatives

Alternatives Considered

Solution Options	Advantages/Disadvantages	Financial Impact
Contracting staff	Pioneer Manor has contracted staff for many years. Disadvantages include not being able to be part of the screening / hiring process of staff to ensure staff excellence and high staff turnover. There were limitations in the ability to manage the staff in terms of managing absences, as well as any disciplinary or performance expectation measures.	Fixed funding model from the MoHLTC, therefore no impact.

Business Case for Service Level Change

Request/Project Name: Permanent Specialized Registered Nurse Position Pioneer Manor

Department: Community Development

Division: Long Term Care Services

Council Resolution (if applicable):

I. Executive Summary

Overview of Proposal

This Business Case proposes that Pioneer Manor increase one full time equivalent in order to implement a dedicated wound, ostomy and continence care nurse. The current weekly wound care assessments are shared amongst all full time registered nurses (RNs) four days a week. This proposal will have a single RN responsible for the provision and management of high quality, appropriate nursing care to all residents with actual and potential skin integrity issues related to wound management, ostomy care, and continence related nursing diagnoses at Pioneer Manor.

Having a RN dedicated to wound management will assist with the work load of both the RNs and the RPNs, and provide additional expertise for the Home. Workload for the registered nursing staff members was a common theme identified during the operational review completed in 2016, employee surveys conducted for the city and accreditation and at meetings held with the RPN workload subcommittee.

II. Background

Current Service Level

Currently, Pioneer Manor has 8 FTE Registered Nurses who work over a twenty-four hour time frame (four are scheduled to work 0700 to 1500 hours, two work 1500 to 2300 hours and two work 2300 to 0700 hours). There are ten part time RNs who cover the days off of the full time RNs.

RNs supervise, assess, co-ordinate and determine the effectiveness of the delivery of care services to individual residents. They supervise staff to ensure that the highest quality of care is delivered to Pioneer Manor residents by being a presence on his/her assigned home areas. They are the gatekeeper between home area registered staff and Pioneer Manor Physicians. They assist RPNs with treatments as required and complete treatments that require the RN scope of practice for assigned home areas. The RNs are the Emergency Control Officer (ECO) and will take charge of the emergency situation until the emergency operations team and/or emergency services arrive, e.g. fire department, police, or other. RN Supervisors are responsible for wound assessment on a weekly basis of all residents with wounds in their Home Areas as per schedule provided.

Drivers for Proposed Course of Action

Currently, four days per week RNs are covering home areas from other programs as each day one of the RNs is assigned to do wound care assessments for their program. This results in the full time RNs supervising and caring for residents they aren't familiar with. In having a RN responsible for wound management, the RNs will be able to take on a bigger role with the resident care conference process. They will be able to attend care conferences which will benefit the families, the resident, the doctor and the Program Coordinator. They will initiate and participate fully in the process, which will help the home area RPNs as this is currently being done by them. In addition, with four RNs on duty each shift, the RNs will have more time to help if the RPNs need assistance with assessments, processing orders ect.

The driver for change is workload for the registered nursing staff members as it has been a common issue identified during the operational review completed in 2016, employee surveys conducted for the city and Accreditation Canada, during meeting with Pioneer Manor's registered staff with the RPN workload subcommittee.

In May, the North East LHIN announced a funding increase approved by the ministry of health and LTC for the 2018-2019 fiscal year of 106K. This funding increase is to support each LTCH home in creating and filling a new RN full-time equivalent (FTE) position. This investment in specialized staffing resources is targeted to increase LTC homes' ability to provide support to residents with growing complexity of needs and to improve overall quality of care within the LTC home sector.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget	<input checked="" type="checkbox"/>	Change to base FTE allocation
	Change to fees (unit price)	<input checked="" type="checkbox"/>	Change to revenues (volume change)
	Investment in project (Operating)		Investment in project (Capital)

Recommendation

Increase one FTE and implement new job classification and hire a Wound, Ostomy Continence Nurse.

The position is funded by the MOHLTC and cannot be allocated to another program or envelope, must be used for the creation of an additional RN FTE only.

How does this align with Council's Strategic Plan?

	Growth and Economic Development	Responsive, Fiscally Prudent, Open Governance
<input checked="" type="checkbox"/>	Quality of Life and Place	Sustainable Infrastructure

This proposal aligns with Council's Strategic Plan for Quality of Life and Place, in that ensuring skilled, capable, reliable staff are hired to deliver a high quality service to the residents of Pioneer Manor.

IV. Impact Analysis

Qualitative Implications

Having a RN dedicated to wound management will assist with the work load of both the Registered Nurses and the Registered Practical Nurses, and provide additional expertise for the home. Workload for the registered nursing staff members was a common theme identified during the operational review completed in 2016, employee surveys conducted for the city and accreditation and at meetings held with the RPN workload subcommittee.

Quantifiable Implications

Pioneer Manor will receive \$106,000 annual funding towards the position from the Ministry of Health and Long Term Care. This change will require an increase of the \$13,000 to the operating budget to cover the remaining cost for the position.

Total	\$ 12,851	\$ -	\$ -	\$ -	\$ -

Implementation

Pioneer Manor starting receiving funding for the position July 1, 2018. The position cannot be posted as a permanent position until the 2019 budget is approved and Pioneer Manor will post the position as a limited full time position in the fall of 2018. If we do not use the funds to provide direct care hours to residents of Pioneer Manor we will be required to return the funds to the MOHLTC.

If approved this full time position will be implemented as permanent versus limited

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> Dedicated position for addressing skin integrity issues in the home Service Excellence Increase staff knowledge and prevention of skin integrity issues Compliant with the Long Term Care Home's Act in relation to providing a Skin and Wound Care Program 	<ul style="list-style-type: none"> Funding to be returned to the Ministry of Health and Long Term Care

V. Alternatives**Alternatives Considered**

Solution Options	Advantages/Disadvantages	Financial Impact
There is no alternative; if Pioneer Manor does not create a FTE, the funding is returned to the Ministry		

Business Case for Service Level Change

Request/Project Name: Water/Wastewater Legislative Compliance Supervisor

Department: Growth & Infrastructure

Division: Water and Wastewater Services (WWS)

Council Resolution (if applicable):

I. Executive Summary

Overview of Proposal

If approved, this position will report to the Manager of Compliance and Operational Support and will ensure that Growth and Infrastructure remains compliant with the necessary reporting and inspections required by regulation and/or legislation. The duties will include oversight and tracking of the more than 65 monthly and annual legislated reporting requirements. This position will also fulfill the role of Risk Management Official, a duty required by the Safe Drinking Water Act. This position will also be required to complete tasks under the Drinking Water Source Protection inspections and approvals of Risk Management Plans in conjunction with the Planning department's requests to assess activities being conducted by citizens within the Source Protection zone. The position will also fulfill duties under the CGS Source Control program related to inspections of Industrial, Commercial and Institutional establishments as it pertains to grease trap inspections and compliance with the City backflow prevention bylaw and will also be responsible for education and outreach as it pertains to Source Protection and Source Control. Direct reports will include our current complement of Environmental Compliance Officers and Risk Management Officials and a Laboratory Technician.

II. Background

Current Service Level

Oversight and compliance of the 65 legislated reports as well as review and approval/rejection of all Risk Management Plans for Drinking Water Source Protection are left currently with the Manager of Compliance and Operational Support. This Manager is also responsible for oversight of the preventative maintenance plan for all Water and Wastewater, and the Water Meter Shop. Workload in all three areas of the operation are expanding, and becoming more complex.

Drivers for Proposed Course of Action

With the expansion of legislated reports, requests for Source Protection file review from the Planning department and an increased number of staff reporting directly to the Manager there is a requirement to increase the capacity of Water and Wastewater services to meet the demand and day to day oversight of these programs/staff. Other areas the Supervisor would be responsible for include duties related to the recently added backflow bylaw concerning the protection of our drinking water connected to Industrial, Commercial and Institutional properties. Additionally, to the benefit of all Growth and Infrastructure, the position will be responsible for coordinating any and all provincially mandated monthly and annual reports from across the broad jurisdictions that comprise Growth and Infrastructure. The position will have a staff of 5 current CGS employees reporting to the incumbent and the functional duties will be to ensure Growth and Infrastructure remains compliant and current with reports, inspections and overall City accountability in the matters concerning drinking water source protection and wastewater source control and all other legislated requirements as required in Growth and Infrastructure. It should be noted that one of the roles that did exist within Water and Wastewater was known as the Quality Compliance Officer, a role that was modernized for efficiencies whereby the duties were distributed to other classifications within Water and Wastewater. The demands for supervision of this regulatory program is affecting other operational program scheduling. This, combined with the requirement of a dedicated Risk Management Official, is driving the requirement for a change.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget	<input checked="" type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input type="checkbox"/>	Investment in project (Capital)

Recommendation

A change to operational budget, funded by capital, and an increase in FTE will provide the necessary staffing to ensure compliance with the numerous reports due throughout the year.

How does this align with Council's Strategic Plan?

Growth and Economic Development	x	Responsive, Fiscally Prudent, Open Governance
Quality of Life and Place	x	Sustainable Infrastructure

Remaining compliant with legislative requirements is a cornerstone under the Safe Drinking Water Act and the Ontario Water Resources Act.

IV. Impact Analysis**Qualitative Implications**

While water/wastewater staff ensure all legislative requirements are satisfied as required, this change will allow operational managers to focus more on their operational obligations, while the new supervisor manages compliance reporting.

Quantifiable Implications

Operating base budget increase to provide for salary and benefits of 1 FTE. If approved, the additional permanent operating costs would be offset by a corresponding reduction in the contribution to water and wastewater capital to maintain the proposed overall water/wastewater increase to 7.4% as identified in the most recent Water/Wastewater Long Term Financial Plan.

Operating Revenue - Incremental**Detail**

Description	Duration	Revenue Source	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
	On-Going		\$ -	\$ -	\$ -	\$ -	\$ -
	One-Time		\$ -	\$ -	\$ -	\$ -	\$ -

Operating Expenditures - Incremental**Detail**

Description	Duration	Funding Source	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
Salaries - FT	On-going	User Fees	\$ 88,919				
Fringe - Benefits	On-going	User Fees	\$ 26,338				
Contribution to Capital - Water	On-going	User Fees	\$ (57,629)				
Contribution to Capital - Wastewater	On-going	User Fees	\$ (57,629)				
	On-Going		\$ -	\$ -	\$ -	\$ -	\$ -
	One-Time		\$ -	\$ -	\$ -	\$ -	\$ -
Total			\$ -	\$ -	\$ -	\$ -	\$ -

Impact to Capital This business case represents a reduction in capital spending to maintain oversight and compliance with legislative requirements. Wastewater capital projects in the amount of \$600,000 for Sewer Inspection and Maintenance recommendations budgeted for in 2019 will be reduced by \$57,629 if this business case is approved. Correspondingly, Water capital projects in the amount of \$500,000 related to Master Plan and Asset Management Plan recommendations budgeted for 2019 will be reduced by \$57,629 if this business case is approved. The effect will be to push some of the planned work and/or recommendations into future budget years.

FTE Table

Position	Bargaining Unit	Duration	Permanent / Part Time	2019	2020	2021	2022	2023
Legislative Compliance Supervisor	NMGT	On-going	Permanent	1				
		Permanent		1	-	-	-	-
		PT Hours		-	-	-	-	-

On-Going	\$ -	\$ -	\$ -	\$ -	\$ -
One-Time	\$ -	\$ -	\$ -	\$ -	\$ -
Total	\$ -	\$ -	\$ -	\$ -	\$ -

Implementation

Implementation to occur on approval. Hiring process and selection of candidate to be completed in Q1 of 2019.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> • Maintain oversight and compliance with legislative requirements • Relieves the high workload of the Manager of Compliance and Operational Support and under the current configuration there is a risk of a non-compliance. 	<ul style="list-style-type: none"> • Reduction in capital spending

V. Alternatives

Alternatives Considered

Solution Options	Advantages/Disadvantages	Financial Impact
Contracting the compliance and enforcement services to private company	It is expected that CGS staff would be obligated to manage the contracted services, and the contracted services are expected to be more expensive than using in house services. Some program components would be obligated to remain with CGS staff such as Contributions to capital would remain at current levels.	\$ 200,000.00
Status Quo	Compliance would remain a priority, however other tasks or programs would be treated as a lower priority to ensure compliance activity meets regulatory requirements. Programs	None

Business Case for Service Level Change

Request/Project Name: Hazardous Material Emergency Response (HAZMat)

Department: Community Safety

Division: Fire Services

Council Resolution (if applicable):

I. Executive Summary

Overview of Proposal

This proposal seeks to enhance the Greater Sudbury Fire Service response to Hazardous Materials (HAZMat) incidents from the current minimal level (awareness), to a level (technician) more aligned to the risks present in the community. There are 4 levels of HAZMat response as detailed by the National Fire Protection Association (NFPA) 1. Awareness – This level represents the minimum capability for response, generally limited to scene security, 2. Operations – This level represents the capability to respond and mitigate an event in a defensive fashion, and support an agency trained to operate at a higher service level, 3. Technician – This level represents a capability to respond and mitigate an incident in an aggressive fashion, using advanced training and equipment, and 4. Specialist (HAZMat only) – This level is reserved for incidents and hazards of special impact or unique response parameters. To achieve the technician level of response, this proposal requires an investment in initial training, and the acquisition of specialized apparatus and equipment aligned with the response level and training. This response capability is not offered by any other internal or external agency at the level required within the community.

II. Background

Current Service Level

Service levels for Hazardous Material response are established by the NFPA Standard 472. The response level currently offered in the City of Greater Sudbury is the Awareness Level. This is the lowest of the four levels recognized, and is defined as the ability to respond and identify that a Hazardous Material event is occurring, secure the recommended perimeter, and call in the appropriate external resources. To be compliant with this response level, the required outside resources must be identified and prepared to respond. This service level does not result in immediate operations to mitigate the incident. The closest fire services offering higher level HAZMat response from which we may request assistance are North Bay and Barrie. It is important to note that virtually all comparable cities in the Province of Ontario have a higher level of response capability than is currently offered in the City of Greater Sudbury.

Drivers for Proposed Course of Action

The Greater Sudbury Fire Service as part of its regular operations undertakes a regular review of the risks present in the community. This process is known as a Community Risk Profile, and is now a Regulated requirement under the Fire Protection and Prevention Act (FPPA). The City of Greater Sudbury's exposure to Hazardous Materials is as a result of both Hazardous Materials present within and travelling through the community. This is due to the base-metal extraction, refining and smelting nature of the economy, and the City's geographic location as a crossroads for both national railways and the Trans-Canada Highway. The base metal extraction results in the warehousing, local distribution and use of significant types and amounts of Hazardous Materials. The location of the city as a transportation crossroads results in a significant proportion of the Hazardous Materials moving East/West across the country travelling through Greater Sudbury, whether by rail or truck. The most current (2017) Hazard and Risk Assessment (HIRA) for the City of Greater Sudbury ranks hazards within the municipality in relation to Frequency, Probability Consequences and Response Capabilities. HAZMAT for both fixed site and transportation ranks as the highest hazard present within the community with a score of 15 out of 15 in terms of risk. Furthermore, the Value for Money Audit of the Operations of the Greater Sudbury Fire Services (GSFS) produced by the Auditor General of the City of Greater Sudbury noted that the department should, "prepare a business case for specialized training and equipment to bolster the GSFS' technical rescue capability as well as HAZMAT response capability". The following was also noted within the observations of the report, "our review of the skillsets of staff identified gaps in the GSFS' capabilities for technical rescue such as auto extrication, ice and water rescue, confined space, trench and hazardous material (HAZMAT). The depth of expertise in technical rescue currently varies from one community to the next and is not commensurate with the community risk profiles. Staff currently only has an awareness level for HAZMAT response which is insufficient for communities with a large industrial economy and major networks of railways and roads". Within Appendix 3 of the Value for Money Audit, HAZMat is noted as a reputational risk indicating the response capability may be inadequate with a noted score of 11.3 before controls which correlates to being high. In conclusion, the current GSFS response level does not align with the risk exposure for the storage, use or transportation of Hazardous Materials in the community. For example, one of the major railways operating in the community transported 67,000 loads of hazardous materials while the other transported 11,400 in calendar year 2016.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget		Change to base FTE allocation
	Change to fees (unit price)		Change to revenues (volume change)
	Investment in project (Operating)	<input checked="" type="checkbox"/>	Investment in project (Capital)

Recommendation

It is recommended that GSFS train and equip up to the technician level for a HAZMat response. This proposal would result in a change to the level of training provided to existing staff, and the purchase of additional equipment used in the training and delivery of the service. This proposal results in the creation and delivery of a new service. The service level would be designed to respond to the most likely type and size of incident in the community, and would eliminate a gap in service. There are no close proximity alternative providers for this service for emergency situations.

How does this align with Council's Strategic Plan?

	Growth and Economic Development		Responsive, Fiscally Prudent, Open Governance
<input checked="" type="checkbox"/>	Quality of Life and Place	<input checked="" type="checkbox"/>	Sustainable Infrastructure

Quality of Life and Place - An effective HAZMat response program ensure not only a quality of life in consideration of emergency response but also has a positive impact on infrastructure and the environment. In emergency situations, a timely response is the key in mitigating long term damage. This goes for both the health of a community member as well as the health of the environment. A hazardous material release, when not quickly addressed has a negative impact on quality of life and place and this proposal aims at providing an effective and appropriate response. Deeper within this pillar, this proposal effects: A. Create programs and services designed to improve the health and well-being of our youth, families and seniors, and; C. Promote a quality of life that attracts and retains youth and professional, and encourages seniors to relocate to our community, taking into consideration all of Greater Sudbury.

Sustainable Infrastructure - At a foundational level this pillar indicates that we must renew our priority infrastructure and identify what is essential and needed for the future. At current our economy is driven substantially from the mining sector. This is not anticipated to change. As such we have a current need as well as a future need to provide emergency response related to our infrastructure. Acting in the interests of tomorrow this proposal aims to provide a quality of service while encouraging innovation and continuous improvement while ensuring that our priorities are properly protected against the negative effects of a hazardous material release.

IV. Impact Analysis

Qualitative Implications

The primary qualitative impact of this proposal is in the reduction of risk for a negative outcome in the event of a Hazardous Material incident. These incidents vary from small, low impact events, to extended, serious life threatening events which have a long term negative impact on quality of life, environment and community reputation. This proposed additional training would reduce the likelihood of negative outcomes by allowing more rapid and appropriate intervention in incidents. Additionally, the higher level of training ensures greater employee and citizen health and safety due to earlier and more accurate identification of events, and the mitigation strategies to address them.

Quantifiable Implications

The initial training cost is \$50,000 to achieve Operational level in 2019 and \$50,000 to achieve Technician level in 2020, based on a 40 person team, requiring 20 hours of initial training for each level. The equipment costs for the initial purchase of required equipment is \$75,000 in 2019 to support Operational level and \$75,000 in 2020 to support Technician level. The replacement cycle for this equipment varies by product, with some items having a fixed life span, there is an anticipated ongoing \$25,000 cost for equipment commencing in 2021. The 2020 capital costs are to acquire a tow vehicle (with a 10 year lifespan) the expected cost is \$100,000. Ongoing training costs are expected to be \$30,000 annually and are to begin in 2020. Opportunities do exist for cost sharing/capital investment with local industry having exposure to hazardous materials. These opportunities would require further investigation and discussion.

Operating Revenue - Incremental

Description	Duration	Revenue Source	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
	On-Going		\$ -	\$ -	\$ -	\$ -	\$ -
	One-Time		\$ -	\$ -	\$ -	\$ -	\$ -
Total			\$ -	\$ -	\$ -	\$ -	\$ -

Operating Expenditures - Incremental

Detail

Description	Duration	Funding Source	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
Training - HAZmat	One-Time		\$ 50,000		\$ (50,000)		
Training - HAZmat	On-going				\$ 30,000		
Vehicle - HAZmat	One-Time			\$ 100,000	\$ (100,000)		
Equipment - HAZmat	One-Time		\$ 75,000		\$ (75,000)		
	On-Going		\$ -	\$ -	\$ 30,000	\$ -	\$ -
	One-Time		\$ 125,000	\$ 100,000	\$ (225,000)	\$ -	\$ -
Total			\$ 125,000	\$ 100,000	\$ (195,000)	\$ -	\$ -

Impact to Capital

A manufactured vehicle to house the appropriate response equipment, associated command and communications function would be required in 2020. There is the potential for industry partner investment in this capital purchase, this opportunity would be pursued and communicated should the business case be approved.

FTE Table

Position	Bargaining Unit	Duration	Permanent / Part Time	2019	2020	2021	2022	2023
		Permanent		-	-	-	-	-
		PT Hours		-	-	-	-	-
Net Impact				2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
On-Going				\$ -	\$ -	\$ 30,000	\$ -	\$ -
One-Time				\$ 125,000	\$ 100,000	\$ (225,000)	\$ -	\$ -
Total				\$ 125,000	\$ 100,000	\$ (195,000)	\$ -	\$ -

Implementation

The implementation of this proposal involves several tasks prior to full service delivery. Training and acquisition of the appropriate response equipment are necessary, as well as the creation of response models and Operating Procedures. Final implementation will require the amending of the Establishing and Regulating Bylaw. In addition, this service level would be a phased-in plan that will see us first move to an "Operations" level, which allows passive, defensive mitigation of an Incident. Once we have established a functioning Operational level we would then move to the "Technician" level allowing more aggressive tactics capable of resolving chemical based emergencies, using multiple levels of Hazmat strategies. The GSFS would like to be at a "tech" level within this term of Council if we are able to secure the funding to do so. While the Community Risk Profile has identified the scope and nature of the Hazardous Materials in place and travelling through the community, we will consult with internal (Water/Wastewater, Arenas) partners and external partners (Mining, Transportation, Research) which will allow for a more refined design and implementation of the final program.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> Enhanced employee and citizen health and safety Improved business continuity for commercial/industrial/institutional facilities Reduced risk to the natural environment and infrastructure of the city Greater protection of the City's reputation and business appeal. Water supply protection 	<ul style="list-style-type: none"> Additional vehicle will compound the existing problem of apparatus parking/storage due to undersized stations.

V. Alternatives

Alternatives Considered

Solution Options	Advantages/Disadvantages	Financial Impact
That the GSFS not offer emergency Hazardous Material Response services which result in mitigation of the incident.	In the event of an incident, the City of Greater Sudbury would rely on Provincial response by the OPP Provincial Emergency Response Team (PERT), and the nearest communities to offer such services, such as Barrie and North Bay. Additional response could be provided by industrial partners in the community should the incident involve their facilities. These response capabilities are subject to outside influence and response delays due to distance and third party oversight.	Unknown as it is incident specific and dependant on resources required

Business Case for Service Level Change

Request/Project Name: Additional Labour Resources for Capital Project Delivery

Department: Growth & Infrastructure

Division: Engineering Services

Council Resolution (if applicable):

I. Executive Summary

Overview of Proposal

The work load for Engineering Services has expanded due to increased quantity and complexity of capital projects; and increased participation in operational activities that require intermittent or short term engineering support. In addition, community and stakeholder expectations are requiring higher level of communication and public engagement over the entire life-cycle of a project and not just during the construction stage which aligns with the corporate strategy of customer service. Therefore, there is a need to increase the part-time (PT) hours for Engineering Services to ensure the required level of engagement is sustainable during the construction season.

The following changes are based upon the Engineering Services 2019 Work Plan which requires delivery of 221 new & work-in-progress capital projects.

II. Background

Current Service Level

The quantity, value and complexity of projects has been increasing year over year while the internal resources have remained fairly level. Any resource requirements that exceed the capacity of internal available teams, results in contracted services. Due to complexity, some projects will continue to require contracted services where specialists are not available in house. Contracted services tend to be more expensive than internal resources, particularly where the services can be utilized on a daily, full time basis.

The number of capital projects that Engineering Services has been involved with has grown steadily as follows: 2011 - 122 projects with spend of \$29.4M; 2012 - 150 projects with spend of \$24.5M; 2013 - 145 projects with spend of \$41.7M; 2014 - 131 projects with spend of \$33.2M; 2015 - 148 projects with spend of \$31.7M; 2016 - 200 projects with spend of \$39.2M; 2017 - 206 projects with a spend of \$70.8M; 2018 projection - 221 projects with a spend of +\$50M. All other capital projects have been managed and administered by staff in other CGS Divisions, by staff who are not necessarily dedicated full time to capital program delivery.

Drivers for Proposed Course of Action

Continual increase in capital investment requires additional resources for management, design, engineering, field inspection, quality assurance, utility locates and administration to ensure City infrastructure is sustainable and supports economic growth. Other drivers include: revised the Construction Act and requirements of trade agreements (i.e. CETA, CFTA), increased participation in operational activities (i.e. sweeping program, capital maintenance programs).

As the City continues to adopt more formal project management principles, the value of these systems will result in enhanced quality assurance, greater communication and visibility of the status and value of the capital program, and greater probability of achieving the project goals in a reasonable period of time. Relying less on external resources reduces administrative burden on the project teams, allows CGS staff that are not normally involved in project delivery to focus their efforts on other CGS programs, and consumes less of the capital program on indirect project expenses such as inspection services.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget	<input type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input type="checkbox"/>	Investment in project (Capital)

Recommendation

Increase the allocation for part time hours in the operating budget for Engineering Services. This would allow Engineering services to retain more staff for inspections and other project delivery related services on a part time basis to address the expanded work load due to increased quantity and complexity of Capital Projects. Additional investments in engineering services will result in reduced costs for contracted services, and fewer staff hours from other operating divisions that assist with capital project delivery from time to time.

How does this align with Council's Strategic Plan?

	Growth and Economic Development	x	Responsive, Fiscally Prudent, Open Governance
x	Quality of Life and Place	x	Sustainable Infrastructure

The Engineering Services work plan focuses on responsive engagement of the public to ensure fiscally responsible capital investment to build sustainable infrastructure and enhanced maintenance of existing infrastructure, and also supports community growth and development. The work plan aims to satisfy two performance metrics in the 2015-2018 strategic plan, better roads and increased Citizen satisfaction through; 1) earlier and more frequent communication of capital plans over the entire project life cycle; 2) enhanced monitoring of contractor and consultant performance to ensure City receive value for capital; and 3) enhanced reporting to internal stakeholders and decision makers.

IV. Impact Analysis

Qualitative Implications

This program would allow Engineering Services to have a more sustainable program within the resources available in the Division. Since managers in Engineering services will have more resources it is anticipated that there would be improvements in the quality of the project delivery program. By allowing other divisions to be less involved in project delivery there will be an increased focus on quality of product and performance of internal and external resources; and added focus on timely administration of the capital program. The long-term goal of this plan is to increase customer satisfaction (i.e. improved roads, etc.); improved reputation (i.e. public feels the City is receiving value for the investment); and a sustainable project delivery model that helps ensure City's infrastructure can support growth and development.

Quantifiable Implications

The recommended totals \$392,255 in part-time hours which is partially recovered from Water/Wastewater. The total amount to be funded on the levy is \$247,121. Historically, part-time salaries have been overspent. The overexpenditures have been funded from various operating efficiencies.

The requested amount equates to 11,440 hours per year and will help deliver new capital projects and capital projects already in progress.

Operating Revenue - Incremental

Detail

Description	Duration	Revenue Source	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
	On-Going		\$ -	\$ -	\$ -	\$ -	\$ -
	One-Time		\$ -	\$ -	\$ -	\$ -	\$ -
Total			\$ -	\$ -	\$ -	\$ -	\$ -

Operating Expenditures - Incremental

Detail

Description	Duration	Funding Source	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
Costs Recovered - WW	On-going		\$ (47,070)				
Costs Recovered - Water	On-going		\$ (98,064)				
Wages - PT	On-going		\$ 343,613				
Fringe - Benefits	On-going		\$ 48,642				
	On-Going		\$ 247,121	\$ -	\$ -	\$ -	\$ -
	One-Time		\$ -	\$ -	\$ -	\$ -	\$ -
Total			\$ 247,121	\$ -	\$ -	\$ -	\$ -

Impact to Capital

As this is partially funded from Water/Wastewater, a reduction in the Water/Wastewater capital budget is anticipated by \$98,064 and \$47,070 respectively. The line items affected would be contingencies which are historically used for project overruns.

FTE Table

Position	Bargaining Unit	Duration	Permanent / Part Time	2019	2020	2021	2022	2023
Part-time Hours	IW	On-going	PT Hours	11,440

One-Time	\$ -	\$ -	\$ -	\$ -	\$ -
Total	\$ 247,121	\$ -	\$ -	\$ -	\$ -

Implementation

If approved, the 2019 Engineering Services Work Plan will be fully implemented as follows: additional part-time hours will be used from May to November during construction season.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> Reduced allocation for external professional services, particularly related to inspection of capital projects in progress. Reduced allocation of resources from operating divisions that are normally not directly involved in capital project delivery 	<ul style="list-style-type: none"> Increased cost to the operating budget

V. Alternatives**Alternatives Considered**

Solution Options	Advantages/Disadvantages	Financial Impact
Status Quo	<ul style="list-style-type: none"> No impact on tax levy Resource constraints potentially negatively affect operating program delivery External resources require use of capital funds more cost than using internal resources 	None
Use more external resources for detailed engineering, contract administration and field inspection	<ul style="list-style-type: none"> No impact on tax levy but would result in less services acquired Effective reduction in scope of capital projects 	None

Business Case for Service Level Change

Request/Project Name: Lasalle Boulevard Corridor Plan and Strategy - Streetscape Design Pilot

Department: Growth and Infrastructure

Division: Planning Services

Council Resolution (if applicable): PL2018-127/CC2018-199

I. Executive Summary

Overview of Proposal

This business case proposes an increase of \$210,000 to develop options for a pilot program to implement the streetscape design, including the incorporation of active transportation and transit improvements in 2019 on both sides of Lasalle Boulevard, as directed by Council Resolution CC2018-199, which states "THAT the City of Greater Sudbury directs staff to prepare a business case to develop a pilot program to implement the streetscape design, including the incorporation of active transportation and transit in 2019, as outlined in the report entitled "Recommended Lasalle Boulevard Corridor Plan and Strategy".

Council's Strategic Plan called for the creation of a city-wide Nodes of Corridor Strategy, and for the undertaking of a Corridor Design Study and Plan for Lasalle Boulevard between Notre Dame Avenue and Falconbridge Road. This work was completed in September 2016, and July 2018, respectively. The Lasalle Boulevard Corridor Plan and Strategy offers a new vision for the boulevard, including a systematic look at land use, zoning, urban design and transportation.

As part of this study, Council expressed a desire to introduce a pilot program to incorporate active transportation along the corridor. Council directed staff to prepare a business case to develop pilot program options to implement the streetscape design of the corridor.

This is the first of three business cases associated with the Lasalle Corridor Study. The second business case relates to the implementation of the preferred pilot project option. A third business case relates to the feasibility study of separated permanent pedestrian and cycling facilities along Lasalle Boulevard.

II. Background

Current Service Level

There are no pilot programs for Lasalle Boulevard at this time. Lasalle currently has sidewalks on the north and south side and is fully serviced by transit. This proposal would allow the City to investigate pilot program options to implement the streetscape design of the Lasalle Boulevard Corridor Plan and Strategy. This work would incorporate active transportation and improved transit amenities.

Drivers for Proposed Course of Action

The change is being driven by Council resolution CC2018-199, which builds on the findings and recommendations of a number of master plan and policy documents developed by the City over many years. Namely, the recently completed Lasalle Boulevard Corridor Plan and Strategy recommended the development of active transportation facilities along Lasalle to support increased densification and transit usage. The City recently passed a Complete Streets policy, which will guide current and future transportation infrastructure planning and delivery to ensure residents of all ages and abilities, using all modes of transportation are best accommodated during the planning, design, construction and maintenance of City infrastructure. The currently underway Transit Action Plan supports increasing transit rideship along the Lasalle corridor while increasing active transportation options. The Transportation Master Plan recommends that a cycle track, which is a physically separated cycling facility, be installed on both sides of Lasalle Blvd, within a 11-15 year time frame. Delivering a pilot project in the short-term would enable staff to investigate options to provide this infrastructure to residents sooner than the recommended timeframe in the TMP. Additionally, Council's 2015-2018 Strategic Plan calls for quality multimodal transportation alternatives, while the City's Official Plan supports intensification, active transportation and transit supportive development.

The timing of the pilot project also aligns with the construction schedule of the Maley Drive extension, scheduled for completion in late 2019. If this business case is approved, the design work for the pilot program would be undertaken in 2019. The capital required to implement the pilot project can be considered in the 2020 Budget. Preliminary information on this requirement is detailed in a separate business case.

III. Recommendation**Categorize your specific request (mark an 'X' for all that apply):**

<input type="checkbox"/>	Change to base operating budget	<input type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input checked="" type="checkbox"/>	Investment in project (Capital)

Recommendation

Staff is recommending that a consultant be retained to investigate and develop options to provide cycling and pedestrian facilities, as well as enhanced transit stops and streetscape elements in the short term and with minimal capital investment. The consultant would lead the development of a variety of options to re-design Lasalle for a short-term and implementable pilot project, which may include options such as installing pre-cast concrete curbs, removable bollards, self-watering planters or other such delineators to separate cyclists from vehicular traffic. This study would further investigate impacts to traffic on Lasalle and to adjacent neighbourhoods and would propose further mitigating measures, as required. Finally, the study would also propose a monitoring program to enable staff to measure the impacts of the pilot project in the future, should it be implemented (second of three business cases). Monitoring of the pilot project will inform detailed design of permanent active transportation infrastructure (third of three business cases).

How does this align with Council's Strategic Plan?

<input checked="" type="checkbox"/>	Growth and Economic Development	<input type="checkbox"/>	Responsive, Fiscally Prudent, Open Governance
<input checked="" type="checkbox"/>	Quality of Life and Place	<input checked="" type="checkbox"/>	Sustainable Infrastructure

Implementing an active transportation pilot project along Lasalle Boulevard would conform to priorities B and D under the Sustainable Infrastructure pillar of Council's Strategic Plan. These priorities seek to improve the quality of our roads, and provide quality multimodal transportation alternatives for roads, transit, trails, paths and sidewalks, and connect neighbourhoods and communities within Greater Sudbury. The pilot project would also conform with priority A under the Growth and Economic Development pillar as the pilot would provide active transportation options along Lasalle which support increased density and commercial activity. Finally, the pilot project would conform to priorities A, B and C of the Quality of Life and Place pillar as they would provide facilities that encourage active transportation and an improved quality of life.

IV. Impact Analysis**Qualitative Implications**

Staff is recommending that a consultant be retained to investigate and develop options to provide cycling and pedestrian facilities, as well as enhanced transit stops and streetscape elements in the short term and with minimal capital investment. Some of the anticipated qualitative implications of this project are: providing complete streets to residents with more travel mode choice; creating a more engaging public realm and street; creating quality places in our community; supporting the business community along Lasalle; reducing Greenhouse Gas Emissions by providing options for active transportation; addressing of Council's population health priorities, namely "Healthy Streets".

Quantifiable Implications

Securing a consultant to develop the pilot project options, including detailed design of the recommended option, would cost approximately \$210,000. The capital costs of implementing the recommended option would be brought forward in a separate business case for consideration as part of the 2020 Budget process. Ongoing operating costs for the preferred option will also be presented to Council as part of this subsequent business case.

Operating Revenue - Incremental

Detail

Description	Duration	Revenue Source	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
	On-Going		\$ -	\$ -	\$ -	\$ -	\$ -
	One-Time		\$ -	\$ -	\$ -	\$ -	\$ -
Total			\$ -	\$ -	\$ -	\$ -	\$ -

Operating Expenditures - Incremental

Detail

Description	Duration	Funding Source	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
Contribution to Capital	One-Time	Tax Levy	\$ 210,000	\$ (210,000)			
	On-Going		\$ -	\$ -	\$ -	\$ -	\$ -
	One-Time		\$ 210,000	\$ (210,000)	\$ -	\$ -	\$ -
Total			\$ 210,000	\$ (210,000)	\$ -	\$ -	\$ -

Impact to Capital

The business case would approve the Lasalle Boulevard Streetscape design pilot project. This project would involve the contracting of engineering services to recommend pilot project options based on the recommendations of the Lasalle Corridor Study, resulting in a one time expense of \$210,000 in 2019.

FTE Table

Position	Bargaining Unit	Duration	Permanent / Part Time	2019	2020	2021	2022	2023
		Permanent		-	-	-	-	-
		PT Hours		-	-	-	-	-

Net Impact	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
On-Going	\$ -	\$ -	\$ -	\$ -	\$ -
One-Time	\$ 210,000	\$ (210,000)	\$ -	\$ -	\$ -
Total	\$ 210,000	\$ (210,000)	\$ -	\$ -	\$ -

Implementation

Should this business case be approved, City staff would prepare a Request for Proposals to be issued in 2019. The contract would be subsequently awarded and it is anticipated that the study would take approximately 6-8 months to complete. This project will require resources from Transit, and Infrastructure Capital Planning. The level of resources will be estimated through the City's work planning tool.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> City can capitalize on momentum gained by Maley Drive, Transit Action Plan, Lasalle Corridor Study, Complete Streets policy, ongoing active transportation projects Creates confidence in the public that the recommendations of the Lasalle Corridor Study will be implemented. Opportunities to integrate this project with proposed Transit improvements under the Public Transit Infrastructure Funding. 	<ul style="list-style-type: none"> Cost of doing the study

V. Alternatives**Alternatives Considered**

Solution Options	Advantages/Disadvantages	Financial Impact
Do not fund pilot program options study	Advantage: No budget impact Disadvantage: assuming the program is deferred to a future year, the benefits would take longer to be realized	N/A
Complete pilot project options study with internal resources.	Advantage: Project could be executed at reduced cost Disadvantage - Staff do not have the capacity to conduct a study of this scale without reducing the ability to deliver on previously approved programs and projects. The project could take	N/A

Business Case for Service Level Change

Request/Project Name: Development of Additional Universal Recreation Programs

Department: Community Development

Division: Leisure Services

Council Resolution (if applicable):

CC2018-176

I. Executive Summary

Overview of Proposal

At the June 26, 2018 City Council meeting, Council received a report titled Affordable Access to Recreation Strategy. The report outlined a number of strategies to provide affordable access to recreation for Greater Sudbury residents. One existing program is the Feel Free to Swim initiative. The following universal programs were recommended:

Feel Free to Skate

Building on the success of the Feel Free to Swim program, it is recommended that user fees associated with public skating, adult skating, and parent and tot skating programs be eliminated. As part of the program, the City will provide a minimum of one skating program at each of the community arenas on a weekly basis. As the Skate Exchange program, hosted by the City and the Public Health Sudbury & Districts already exists, the barrier of a lack of equipment is also mitigated.

Expansion of the Saturday Morning Sports Program

Through the 2018 Budget process, Council approved funding in the amount of \$12,000 annually for the Percy Playground Sports Program. This program provides a weekly drop-in opportunity for children and youth to learn fundamental movement skills and get an introduction to a variety of sports. As part of the program, children and youth in the area have opportunities to learn and play sports such as hockey, football, basketball and more with instruction provided by local sporting clubs at no charge. This program also builds on the success of the Feel Free to Have a Ball funded program that the City hosted in 2014-2015. The recommendation is for six additional sites.

Introduction of Two New No-Cost Family Festivals

Council has approved annual funding for Snow Day in the amount of \$15,000 through prior budget deliberations. It is recommended that two additional no-cost family events be introduced, one in the spring and the other in the fall. These events could be rotated to other regional parks across Greater Sudbury. The events would feature seasonal activities for families at no cost. Activities would include seasonal sports, entertainment, free transit, games, crafts, and more modeled after the success of Snow Day.

Access to Community Space

One of the principles under the City's conceptual framework for affordable access strategies is to maximize the use of underutilized facilities. It is recommended that the City's Indoor Walking Program at community halls be expanded to community halls located at the Capreol, Chelmsford, Onaping and McClelland community centres. It is also recommended that the City provide access to underutilized facilities to organized accessibility, seniors and older adult organizations offering no cost and low cost programming.

The full Affordable Access to Recreation Strategy report can be found here:

<http://agendasonline.greatersudbury.ca/index.cfm?pg=feed&action=file&agenda=report&itemid=16&id=1243>.

II. Background

Current Service Level

The Feel Free to Feel Fit program provides free public swimming once per week at municipal pool locations. Since the program's inception in 2009, there have been approximately 10,000 participants taking part annually. Older Adults (individuals age 65 and over) are currently offered free public skating. The City also provides discounted access to public swimming, public skating and downhill skiing on Family Day. These rates are captured in the City's Miscellaneous User Fee By-Law. During the 2016-2017 skating season, 158 Older Adult season skating passes were issued.

The City also has a number of facilities and recreation opportunities that are universal and free of charge including access to 55 outdoor rinks, the Ramsey Lake skate path, Queens Skating Oval, seven supervised beaches, 10 splash pads, 173 kilometres of non-motorized trails, eight skate parks and five youth drop-in centres. As per the Miscellaneous User Fee By-Law, the City allows any non-profit group to use meeting rooms and community halls at no charge for the purposes of a meeting. In addition, non-profit groups are entitled to one free community hall rental per calendar year for an event that is outside the definition of a meeting (fundraisers, dances, holiday events, large scale events related to tournaments or other leisure activities).

Drivers for Proposed Course of Action

Resolution CS2013-36 directed that a municipal policy on affordable access to recreation be developed. The 2015-2018 Corporate Strategic Implementation Plan identified expansion of healthy initiatives such as the Feel Free to Feel Fit Swim Program as a priority under the Quality of Life and Place pillar.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget		Change to base FTE allocation
	Change to fees (unit price)	<input checked="" type="checkbox"/>	Change to revenues (volume change)
	Investment in project (Operating)		Investment in project (Capital)

Recommendation

The following rationale for universal recreation programming from Parks and Recreation Ontario's Policy Development and Implementation Guide for Communities demonstrates the importance of universal programs:

"Ideally, all types of recreation would be available to everyone at no cost. This is unrealistic today and the negative, unintentional consequence of rising user fees has been marginalization of those who cannot afford these fees. Evidence -based research provides a strong argument for the sector to reverse this trend. The goal is to identify those program opportunities which align with the social determinants of health and quality of life indicators, and those that support positive social and physical development and provincial policy priorities. These are the kinds of publicly -funded programs that constitute an essential, core activity and should be available to everyone to ensure the healthy development of individuals and to enhance the overall quality of life within the community. As an essential service, these programs must be funded 100 % and offered at no cost so that financial status does not determine who does and who does not participate."

How does this align with Council's Strategic Plan?

	Growth and Economic Development		Responsive, Fiscally Prudent, Open Governance
<input checked="" type="checkbox"/>	Quality of Life and Place		Sustainable Infrastructure

This business case supports Council's Strategic Plan in the area of Quality of Life and Place as it aligns with the Population Health Priorities of Indigenous Youth, Families, Compassionate City, Play Opportunities, Resiliency and Age Friendly Strategy. The recommended strategies for affordable access to recreation ensure that all residents have the opportunities to enjoy programs and services designed to improve the health and well-being of youth, families and seniors.

IV. Impact Analysis**Qualitative Implications**

The recommended additional universal programs provide no cost opportunities to participate in recreation and leisure activities, increasing quality of life for residents and improving utilization of City programs and services.

Quantifiable Implications

The estimated annual impact for the Feel Free to Skate program would be \$20,000 due to foregone public skating revenues. Expansion of the Saturday Morning Sports Program to six additional sites has an estimated cost of \$72,000. The estimated annual budget required for the introduction of two new family events is \$30,000 annually. The estimated cost impact of providing additional access to community space is \$7,500 annually.

Implementation

If approved, Communications will be required to promote new universal programs. It is anticipated that upon approval, the program could launch by April 2019.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> Removes barriers to participation in recreation programs and services. Improves quality of life for residents Increases utilization of City recreation programs and services Enables opportunities for Population Health 	<ul style="list-style-type: none"> Lost revenue associated with public skating and facility rentals Additional costs associated with new universal programs and events.

V. Alternatives

Alternatives Considered

Solution Options	Advantages/Disadvantages	Financial Impact
Status Quo - Continue to provide the existing universal programs offered	The Affordable Access to Recreation Strategy report outlines a number of universal programs and initiatives that the City already provides. Maintaining status quo does not further advance population health in our community, particularly in the priority area of play.	None
Seek corporate sponsorships to fund new universal programs	The City has been challenged in securing corporate sponsorship of programs and services. Sponsorship is inconsistent. Corporate sponsorships would be best suited to expand and support the City's efforts.	

Business Case for Service Level Change

Request/Project Name: The Junction - Library/Art Gallery/Convention/Performance Centre

Department: Office of the CAO

Division:

Council Resolution (if applicable):

CC2018-186

I. Executive Summary

Overview of Proposal

Together the Greater Sudbury Convention/Performance Centre (GSCPC) and the Library/Art Gallery (LAG) make up The Junction.

The GSCPC will be a unique, multi-purpose, tier three convention and live performance facility in downtown Sudbury. It will be a 60,500 sq. ft. building that includes 19,500 sq. ft. of rentable space, with a 13,000 sq. ft. main plenary/live performance hall featuring 950 theatre-style soft seats. Its 950 seat main hall will feature symphony concerts, public lectures and touring stage productions and, in less than an hour, convert to a flat floor ballroom that can host 850 conference delegates. This innovative approach will address community needs that were first identified almost three decades ago and put Greater Sudbury on the next level for public performances and convention business. The GSCPC will be the largest, most state of the art flexible meeting and performance space in northern Ontario.

The new Greater Sudbury Main Library will be a next generation community information and activity hub, an inviting, contemporary, people-oriented space for connecting citizens to a world of information and technology as well as to each other. In its new venue provided by the City of Greater Sudbury, the Art Gallery of Sudbury (AGS) will transform into the Franklin Carmichael Art Gallery, becoming an anchor institution for our community, able to attract visitors to see one of the largest public community art collections in Canada, and strengthening arts education and experience for a broad spectrum of our citizens. The Library / Art Gallery shared facility will be a 92,700 sq. ft. building of which 27,000 sq. ft. is dedicated space for the Art Gallery of Sudbury.

II. Background

Current Service Level

GSCPC: There is a shortage of venues that have the ability to host functions in excess of 300 persons in one space, as well as a low level of audiovisual capabilities and a lack of consistency in quality service at some venues. Furthermore, as result of not having this type of facility we are missing out on approximately \$3Million in new money into the community through increased tourism visitation and related spending and the direct economic impacts.

Library: The Main Branch of the Greater Sudbury Public Library facility on Mackenzie Street in the downtown was originally constructed in 1952 with an addition in 1976. A building condition report prepared in 2012 concluded that "some of the components of the building are not in a state of good repair. Major capital outlay is required to ensure the viability of this facility." Deficiencies cited included: the building envelope, including the reinforced columns and roof cladding, windows and exit and service doors, HVAC systems, including the hydraulic boiler, air handling units, condensers and associated piping and valves, some of which include asbestos insulation. A report by Yallowega Belanger Architects and observations by library specialist Susan Kent identified additional deficiencies associated with parking, public programming spaces, workspace and storage.

Art Gallery: The Bell Mansion has always had limitations as a site and facility for the Art Gallery of Sudbury since when it occupied the building as a centennial project in 1967. A facility analysis prepared by Lord Cultural Resources in 2010 concluded that there was no longer cost-effective to consider retrofitting the Bell Mansion for the following reasons: gallery space is too small for exhibition of sufficient impact to generate sufficient public interest, insufficient space for storage of the Gallery's permanent collection, Category A designation is at risk due to this storage and exhibition space shortage, building systems need significant upgrades, layout of the Bell mansion is convoluted and vertical and is not accessible, location of the Bell Mansion is disadvantageous for the Gallery, placing a public facility in a residential area limiting cross over with retail, restaurants and other cultural institutions that have benefited from synergies with art galleries.

Drivers for Proposed Course of Action

GSCPC: Dating back to the early 1970s, the former City of Sudbury and the City of Greater Sudbury have undertaken no fewer than four feasibility studies and business plans that proposed constructing large performing arts and convention/trade facilities. In all cases, these single purpose buildings were not deemed to be financially sustainable. As a result, the development of local performing arts product in Sudbury has played out mostly in small venues, while meetings/conventions and banquets have been hosted at local hotels and other venues with other core functions. These venues have proven to be constraining for product growth and development, as well as the City's ability to attract larger conventions and other live performance talent.

Library/Art Gallery: Both institutions are focused on community service and both have long outgrown their current deficient facilities—the 1907 Bell Mansion that has been the home of the AGS since 1967 and the Greater Sudbury Public Library Main Branch, which was constructed in 1952. Furthermore, since the AGS has a Category A designation under the Canadian Cultural Property Export and Import Act, it is required to meet specific legal, collections management and environmental requirements to properly care for, preserve and make publicly accessible, objects or collections that are of “outstanding significance and national importance”. Due to storage and exhibition space challenges the AGS does not meet all the requirements and therefore becomes at risk of losing its designation. Also, the need for a new AGS facility relates to an offer by the grandchildren of famed Group of Seven artist, Franklin Carmichael, to donate 30 works of art valued at \$3.5 million plus, \$100,000 in cash to the AGS assuming it has a new facility.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget	<input checked="" type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input checked="" type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input checked="" type="checkbox"/>	Investment in project (Capital)

Recommendation

It is recommended that the City of Greater Sudbury construct a new Library/Art Gallery on the site of existing Sudbury Community Arena and a new tier-three convention and performance centre on the Minto Parking Lot to create The Junction. Furthermore it is recommended that 3 additional FTE positions be created to support the New Main Library Branch, namely an Emerging Technology Programmer, Curatorial Assistant and Security Guard.

GSCPC: As outlined in the business plan prepared by CBRE Limited, the GSCPC will become a significant new demand generator by increasing meeting and convention business by 25% over what is currently available. It will bring approximately \$3 Million in new money into the community through increased tourism visitation and related spending and the direct economic impact of its annual operations, estimated at \$2 Million per year. As a result of the capital investment of \$65.5 Million, the project will create new jobs with an estimated \$15 million in salaries and wages will be generated to support 174 direct jobs in Greater Sudbury. Furthermore, Greater Sudbury can expect 37 annual jobs from operations & visitor spending.

Library/Art Gallery: The Strategic Business Plan prepared for the City of Greater Sudbury was received on December 31, 2017 from Lord Cultural Resources in partnership with Susan Kent Consulting and Altus Group Ltd. The consultant's report identifies the concept of co-location of the GSPL and AGS as a way to reduce capital and operating costs compared to operating separate facilities. Co-location is also intended to achieve potential synergies and additional benefits for both institutions, the City of Greater Sudbury and the surrounding region. The benefits to the two institutions include crossover visits and joint programming initiatives to help create a community hub.

Additional Library Staff: As outlined in the Greater Sudbury Public Library and Art Gallery of Sudbury Co-Location Facility and Business Plan Report approved by Council (Resolution #CC2018-183) it is recommended that Greater Sudbury Public Library plan to add the following positions: Emerging Technology Programmer: This position will develop programming with the public, assist with technology and technology instruction and to work in the MakerSpace and Digital Media Lab as needed. Curatorial Assistant: The position will assist with bringing up to standard the state of all museum permanent collection storage, permanent collection displays and associated documentation. Security Guard: This position will enhance the security at the new facility.

How does this align with Council's Strategic Plan?

x	Growth and Economic Development	Responsive, Fiscally Prudent, Open Governance
x	Quality of Life and Place	Sustainable Infrastructure

GSCPC: Council prioritized growth and economic development in its strategic plan Greater Together, stating that this City will create a healthy, diverse economy and a welcoming environment which attracts high quality jobs, investment and entrepreneurship. Specifically, that the City will invest in large projects to stimulate growth and increase conferences, sports and event tourism, and celebrate cultural diversity. This project realizes the goals outlined in Greater Together. Furthermore, From the Ground Up, a community economic development strategic plan, a strategic plan endorsed by Council, outlines in goal seven, which To be One of Ontario's top tourism destinations describes the need to invest in facilities, spaces and initiatives needed to support the growth of tourism, specifically highlighting a conference facility and a performing arts centre as high priority uses. The convention / performance centre directly fulfills this vision.

Library/Art Gallery: As outlined in Greater Together, Council's Strategic Plan, strengthening the high quality of life we already know and love is a priority of Council. Furthermore, two objectives of this priority are to maintain great public spaces and facilities to provide opportunities for everyone to enjoy; and promote a quality of life that attracts and retains youth and professionals and encourages seniors to relocate to our community taking into consideration all of Greater Sudbury. To reiterate the words of the plan, "the City of Greater Sudbury will strive to make the community even greater and further enhance the quality of life we have become accustomed to by focusing on and investing in arts, culture and entertainment to support our multicultural communities, by creating a more vibrant downtown and by developing arts, culture, heritage, language and tourism in our multicultural city, where many languages are spoken." The Library / Art Gallery project not only is a direct reflection of the objectives outlined in Quality of Life and Place and it becomes a catalyst to realizing many of the actions as well.

IV. Impact Analysis**Qualitative Implications**

Downtown Revitalization: Downtowns are important. They are the historic and symbolic heart of the community, the reflection of the City's image, pride and prosperity. They are the meeting place for the entire city, where all types of different people come together to celebrate and share common experiences. A healthy, active, successful downtown makes a positive statement about the prosperity of the city, sending a confident message to future residents, business and investors. This public investment will result in new investment, generating economic development and increased assessment. Greater Sudbury serves as the capital of northeastern Ontario-functioning as the regional hub for business, retail, healthcare and education. The Junction will be worthy of its place as the centrepiece arts, culture and meeting place of the capital of northeastern Ontario and therefore elevating our reputation and competitive edge.

Increase Tourism: By investing in The Junction, and new destination attractions, confirms our position as the leading event, arts and culturally destination for northeastern Ontario. The demand for accommodations increases and along with the increased number of overnight stays comes increased visitation not only to downtown restaurants and shopping, but to other significant attractions in our community like Science North and Dynamic Earth. The Junction will transform the tourism and business meeting image of the city, with significant spread effects to the rest of downtown and the city as whole.

Increased Quality of Life: There is overwhelming proof that arts, culture and heritage provide value to communities in the form of quality of life, downtown revitalization, sense of community, attraction and retention of creative professionals, economic development and tourism. By fostering an environment that supports cultural pursuits and creative individuals will benefit in these areas. Quality of place is a powerful driver in attracting and retaining talent in the global world. Creativity and culture impact the economy in many ways, from directly employing people to being a component of almost any employment sector. There has been increasing recognition of the powerful role creativity and culture play in economic restructuring and generating wealth in our community.

Increased Innovation: The downtown, specifically The Junction is the crossroads where business and creativity meet. It will be a hub for creative expression and entrepreneurial thinking. Continuing to work with its partners, the Junction will be the leading provider of space that can support and harness the creativity and imagination that leads to cutting edge innovations. This energy of innovation that is created will be magnified by the business community as new sectors emerge and business are created.

Job Creation: It is anticipated that 300 jobs will be created through the construction of The Junction and an additional 100 jobs will be sustained in the community through the operations of these two new facilities through direct and indirect measures.

Quantifiable Implications

The Junction is estimated at \$113 million. It is anticipated that approximately 40% of this can be realized through Senior levels of Government. The amount anticipated from Federal and Provincial sources is estimated at \$45 million. Application for funding will be submitted to FedNor Industry Canada, Northern Ontario Heritage Fund, Canadian Cultural Spaces and Canada-Ontario Infrastructure funding. In addition, the Art Gallery of Sudbury has committed to contributing \$1.5 million through fund raising efforts. This will leave approximately \$68 million to be debt financed over 30 years requiring an annual debt repayment of \$3.9 million. An additional funding source identified includes naming rights at \$100,000 /year. Furthermore, the annual debt requirement will be phased in over the next 5 years requiring a special levy of 0.28% each year. The amount collected in 2019 will fund any incremental costs associated with The Junction in year, and the remaining balance will be contributed to the reserve. As the project moves from capital to operational the additional staff recommended for the Library will increase Library salaries by \$214,942 beginning in Year One.

We anticipated construction starting on the Convention/Performance Centre in the Spring of 2020, this will result in the loss of 165 parking spaces and equates to approximately \$350,480 in lost parking revenue. The business plan indicates that the Convention/Performance Centre is projected to operate at a net loss of \$493,000 in Year 1, decreasing to a net loss of \$272,000 by Year 5. The business plan for the Library / Art Gallery indicates that an additional \$1.2 million in Year 1, \$844,00 in Year 2 and about \$992,000 in Year 3, which would be reflective of subsequent years of operations.

The revenues and expense outlined below for the Library (department code 4250) are derived from the business plan and will be further defined as the project evolves (Resolution # CC2018-183). The business plan recommends that \$250,000 be added to the \$776,929 base level to enhance the collection in the opening year and that \$50,000 be added in subsequent years, reflected in the budget below within Materials & Expenses. for Energy Costs, the base level costs of \$67,742 in the existing building of 32,772 gross sq.ft. translates to \$2.07 per sq. ft. in an energy inefficient building. With a new energy efficient building of 97,200 gross sq. ft., the energy cost will be substantially lower per square foot and are estimated at \$1.95 per sq. ft., leading to annual energy costs, in 2018 dollars of \$189,540 for the Main Branch. Finally as recommended in the business plan, and additional \$500,000 has been suggested in the opening year, one-time expense to equip the building with additional technology with annual upgrades of \$50,000 per year.

The loss of parking revenue identified below is based on existing user fees associated with existing facilities; there is a separate parking project underway that may alter these projections.

Art Gallery: As a tenant of the building and partner of the project the space will be leased by the City, to the Art Gallery of Sudbury on a long term basis at one dollar per year. At \$30.50 per square foot, which includes: rent, Common Area Maintenance Charges (CAMs) and utilities the in-kind contribution would have an annual value of \$549,000 / year. It is recommended that lobby rental income taking place from Friday to Sunday evening when the Library is closed to the public will go to the Art Gallery of Sudbury. This is projected at approximately \$25,000/year. It is assumed that CGS will continue to contribute an operating grant to the Art Gallery of Sudbury at \$200,000/year. This \$200,000 is allocated from the existing Arts & Culture Operating Grant program, administered through the Greater Sudbury Development Corporation. With the above recommendations / assumptions in mind CGS will be providing the Art Gallery of Sudbury with an annual subsidy has a value of \$774,000 / year. As a partner of the project the Art Gallery of Sudbury will offer the value achieved by receiving the art works of the Mastin Collection of Carmichael, which may provide the opportunity to leverage capital dollars. The value of this collection is \$3.5 Million. The Art Gallery of Sudbury anticipates being able to contribute to the capital cost through independent fundraising efforts in the amount of \$1.5 Million.

While staff has prepared and submitted funding applications to reflect the funding outlined in the budget below, should funding requests fall short of the requested amount the difference will need to be added to the City's external debt in order to realize The Junction project.

Impact to Capital

The Junction one of the Large Projects prioritized by Council in 2016 has undertaken significant planning work since that time. As the project proceeds, it is anticipated that \$12 million will be spent in 2020 in order to complete the Program of Requirements, Schematic Design and Design for The Junction. In Year Two, it is estimated that \$36 million will be spent to begin Construction. Year Three and Four will continue to complete the work associated with Construction, anticipating the completion and in service of the project in year 2023.

FTE Table

Position	Bargaining Unit	Duration	Permanent / Part Time	2019	2020	2021	2022	2023

		Permanent		-	-	-	-	3
		PT Hours		-	-	-	-	-
Net Impact				2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
On-Going				\$ 730,000	\$ 760,000	\$ 790,000	\$ 820,000	\$ 1,945,279
One-Time				\$ -	\$ -	\$ -	\$ -	\$ 500,000
Total				\$ 730,000	\$ 760,000	\$ 790,000	\$ 820,000	\$ 2,445,279

Implementation

The Junction is intended to be in service in 2023. In order to meet this deadline there are several tasks that must be completed, including design criteria and RFP and the construction RFP. This timeline is subject and impacted by the timelines outlined for the new Event Centre. In an effort to ensure a consistent "look and feel" to The Junction one architectural firm will be engaged for both facilities.

It will be important for The Junction to generate revenues that will off-set subsidies. As such, CGS Staff recommended that the CGS establish a Municipal Services Corporation (MSC) to manage the facilities, bid on and host large scale conventions, organize and host meetings and deliver live performance programming (Resolution # CC2018-184). This model will rely on exceptional leadership, governing skill and financial management and requires municipal approval of its budget, in order to secure an annual operating grant. The MSC will be focused on achieving the success of The Junction and will be better able to act as a business, making timely decisions and allocating resources appropriately to meet its performance objectives. Under this model, the MSC will operate and manage the Convention/Performance Centre and Library/Art Galley facilities. The Library and the Art Gallery will be tenants with lease agreements with the MSC. This approach, while not the same structure is similar to the model currently employed by the Greater Sudbury Airport Development Corporation.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> • The Junction will generate tourism and business for the City of Greater Sudbury in addition to creating additional jobs • The location will contribute to downtown revitalization while creating an arts and culture hub • The selected site redevelops a site that would have otherwise become vacant with the development of the Kingsway Entertainment District • The Junction realizes the priorities and objectives outlined in Greater Together, From the Ground Up and the Downtown Master Plan • The Franklin Carmichael donation provides an opportunity to attract an increase in visitors to the community • The GSCPC fills a long acknowledged gap in the community to both host large scale conferences and live performance shows not currently available • The Junction builds a significant new demand generator, proposing to increase meeting and convention business by 25% over what is currently achieved 	<ul style="list-style-type: none"> • The development of the Junction will create further pressures related to parking in Downtown Sudbury • Limited private sector investment opportunity and therefore greater reliance on public funding to realize the project • Assumption made in the business plans stretch discretionary household spending when coupled with entertainment opportunities being presented by the Kingsway Entertainment District

V. Alternatives**Alternatives Considered**

Solution Options	Advantages/Disadvantages	Financial Impact
Choose to only proceed with the Library / Art Gallery	This alternative would address the urgency that is associated with building deficiencies currently experienced by the Library Main Branch and the Art Gallery. Also, the need for a new AGS facility relates to an offer by the grandchildren of famed Group of Seven artist, Franklin Carmichael, to donate 30 works of art valued at \$3.5 million plus, \$100,000 in cash to the AGS assuming it has a new facility. Without the new facility the AGS and the community risk losing this significant contribution	\$46,964,912 Includes 1% for Public Art
Choose to only proceed with the Convention / Performance Centre	<p>This alternative would realize a significant economic impact for the community. As outlined in the business plan prepared by CBRE Limited, the GSCPC will become a significant new demand generator by increasing meeting and convention business by 25% over what is currently available. It will bring approximately \$3 Million in new money into the community through increased tourism visitation and related spending and the direct economic impact of its annual operations, estimated at \$2 Million per year. As a result of the capital investment of \$65.5 Million, the project will create new jobs with an estimated \$15 million in salaries and wages will be generated to support 174 direct jobs in Greater Sudbury. Furthermore, Greater Sudbury can expect 37 annual jobs from operations & visitor spending.</p> <p>It should be noted that Council choose to only proceed with the Convention / Performance Centre the Greater Sudbury Public Library and the Art Gallery of Sudbury will need to determine a plan to address deficiencies in the existing facilities.</p>	\$66,024,963 Includes 1% for Public Art

Business Case for Service Level Change

Request/Project Name: Removal of Snow Banks during the Winter Season for the Downtown Core

Department: Growth & Infrastructure

Division: Linear Infrastructure Services

Council Resolution (if applicable): OP2018-15

I. Executive Summary

Overview of Proposal

This business case is for increasing the frequency of snow removal in the downtown core. During winters with excessive snowfall, the number of complaints about snow bank heights in the downtown core and corresponding access to/from private driveways increases. High snow banks also create concerns for access to parking in the downtown business core, for ensuring adequate sight lines at intersections, and for ensuring there is sufficient road width for vehicular traffic. As per resolution OP2018-15, staff were directed to prepare a business case for removal of snow banks during the winter season for the downtown core area(s). The current budget represents snow and snow bank removal on average once a winter from the downtown core. This business case represents increasing the frequency to two times per year which equates to approximately \$55,000.

II. Background

Current Service Level

The principle driver for service is based on two principle criteria, including ensuring that there are two full lanes of traffic for motorists and ensuring there is adequate site distance at intersections. The downtown core area(s) have snow removal services on average once per year based on the last four years to meet this criteria. However, the service provided would fluctuate depending on weather patterns, including periods of significant snowfall without any warm periods or rainfall events that would naturally reduce the snow bank height. The current budget is \$121,288 for the downtown core(s) and areas surrounding the downtown. However, this total includes both fixed and variable costs. The variable amount needed to remove snow from the downtown core is approximately \$55,000.

Drivers for Proposed Course of Action

The driver for this proposed course of action is the public's expectation to park their vehicles along the street and have more direct pedestrian access to the surrounding businesses. The presence of snow banks becomes an impediment to normal pedestrian traffic. The downtown has higher than normal pedestrian activity due to the nature of adjacent property uses. The service levels for snow removal are defined by vehicular traffic, however, most complaints for enhanced service are driven by demand for enhanced pedestrian activity.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	Investment in project (Capital)

Recommendation

Based on the analysis of snow bank clearing the downtown core(s), it is recommended to increase the frequency of snow clearing to a minimum of two times per winter season compared to the current average of once per winter season. This would reduce the amount of ACR's (Active Citizen Requests) received, increase visibility and ease of parking in the downtown core(s), provide better access to bus stops and ensure adequate roadway lane widths. The additional funds would allow greater flexibility for operating managers to address factors such as pedestrian access, in addition to vehicular access to determine appropriate service levels and required effort to meet the standard. The full extent of winter snow removal would still be weather dependent. Any unused funds would be returned to the winter snow reserve fund. Any additional funds required to meet the enhanced service levels during winters with excessive snow fall would be drawn from the winter control reserve fund.

How does this align with Council's Strategic Plan?

<input type="checkbox"/>	Growth and Economic Development	<input type="checkbox"/>	Responsive, Fiscally Prudent, Open Governance
<input checked="" type="checkbox"/>	Quality of Life and Place	<input checked="" type="checkbox"/>	Sustainable Infrastructure

Increasing the frequency of downtown snow bank removal will satisfy two of the performance metrics identified in the 2015-2018 strategic plan which is to have better roads and increased citizen satisfaction. In 2016, and again in 2018, the top of mind issue for citizens is the condition of municipal roads. The Metroline 2018 survey results expressed road conditions as a top concern of residents, increasing from 70% in 2016 to 78% in 2018. This enhanced service level would allow for improved mobility for pedestrians, resulting in an improved quality of life and place.

IV. Impact Analysis**Qualitative Implications**

This change will increase customer satisfaction. It will improve the use of transit in the winter months, enhance parking in the downtown core(s) and increase visibility.

Quantifiable Implications

Staff are recommending increasing the frequency to a minimum of two times per season, which would increase the burden on the tax levy by \$55,000.

Operating Revenue - Incremental**Detail**

One-Time	\$ -	\$ -	\$ -	\$ -	\$ -
Total	\$ 55,000	\$ -	\$ -	\$ -	\$ -

Implementation

A mix of city crews and contractors would be utilized to increase the snow removal frequency to two times per season. Some of the equipment necessary to complete the snow removal is currently owned by the City of Greater Sudbury; therefore, an increase in labour, fringes and contract expenses is warranted.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> • Improve overall customer satisfaction (transit, parking etc.) • Further utilizes already owned equipment 	<ul style="list-style-type: none"> • Increased burden on tax levy • Depending on weather, snow banks may not require to be removed as frequently

Business Case for User Fee Change

Request/Project Name: Transit Universal Fee Structure

Department: Transit Services

Division: Community Development

Council Resolution (if applicable): CC2018-177

I. Executive Summary

Overview of Proposal

On June 26, 2018, a report titled Affordable Transit Fare Structure was presented to Council (<https://agendasonline.greatersudbury.ca/?pg=agenda&action=navigator&lang=en&id=1243&itemid=15177>). As per resolution CC2018-177 Staff was directed to prepare a business case for Option 1 - Universal Fee Structure as outlined in the report. This proposal seeks to modify the transit fare structure under an Affordable Transit Fare policy. The overall guiding principles of the Affordable Transit Fare Policy rewards frequent transit customers, is equitable in its offering of discounts, encourages ridership and is easy to implement, comprehend and operate.

Drivers for Proposed Course of Action

Together, the following drivers culminate in a need to restructure the Transit Fare Structure by May 1, 2019.

- Laurentian University's U-Pass agreement expires April 2019; it recommended that the structure be reviewed prior to entering into a long term agreement.
- Through the Transit Action Plan, one of the community priorities identified was to lower rates for low-income earners including students.
- Over 1000 international students have enrolled in Cambrian College, which has resulted in a 15% increase in ridership as they heavily rely on public transit.
- The Transit Master Plan will also be presented to Council early 2019, followed by an implementation of the first phase of service anticipated by Fall 2019.
- Greater Sudbury Transit will prepare an RFP for Smart Card Technology, and anticipate having a system in place mid to late 2019 should a successful proponent be selected within approved funding allocations.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget		Change to base FTE allocation
<input checked="" type="checkbox"/>	Change to fees (unit price)	<input checked="" type="checkbox"/>	Change to revenues (volume change)
	Investment in project (Operating)		Investment in project (Capital)

Recommendation

Staff is no longer recommending this business case. New information has emerged which will inform a new proposed transit fare structure. This will be presented to Council along with the final Transit Action Plan. The new proposed fare structure will address the same goals as outlined in this business case with minimal to zero impact on the operating budget.

How does this align with Council's Strategic Plan?

	Growth and Economic Development	x	Responsive, Fiscally Prudent, Open Governance
x	Quality of Life and Place	x	Sustainable Infrastructure

The proposed Universal Transit Fee Structure would conform to priorities D & E under the Responsive, Fiscally Prudent, Open Governance pillar of Council's Strategic Plan. These priorities seek to emphasize the relationship between governance, community engagement and information, in support of better decision-making, by adopting better processes to promote, inspire and follow the direction given by Council and by refining reporting mechanisms to Council, enabling them to make better decisions. The proposal also conforms to priority A under Quality of Life and Place, which seeks to create programs and services designed to improve the health and well-being of youth, families and seniors. Finally, this proposal conforms to priority C under the Sustainable Infrastructure pillar as it is a result of a review and modification of the transit system which will address convenience and further achieve the goal of connecting neighborhoods and communities.

IV. Impact Analysis

Qualitative Implications

While public transit is beneficial to everyone, it is particularly important for low income individuals, including students, who typically heavily rely on the service as they are less able to afford a personal vehicle, or other means of transportation. Despite their reliance, the cost of fares can be a burden, and may limit their use of the service. Reducing fares for low income individuals allow them to better participate in the community, work at a greater range of locations, and provide employers with a larger, more mobile market to draw from. The simplified structure will also be easier to understand, easier to administer, and easier to communicate and monitor for trends in ridership and buying patterns. It will have a positive impact on ridership, which will generate revenue from the Provincial Gas Tax.

Quantifiable Implications

The chart below provides the forecast of revenues for 2019 without any changes, year 1 under the assumptions that the LU Pass is effective until April 1 and a new fare structure would apply May 1, and finally year 2+ with the assumption that the Upass is cancelled, and the rates stay the same. To note is that before proceeding to year 2, a report on the effects of the new fare structure and actual revenues will be presented to Council with options to review the rates and structure at that time.

Business Case for Service Level Change

Request/Project Name: Formalize and Maintain Trail from Dundas Street to Silver Hills Drive

Department: Community Development

Division: Leisure Services Division

Council Resolution (if applicable): PL2018-53

I. Executive Summary

Overview of Proposal

There is currently an informal trail between Dundas Street and Silver Hills Drive in the Minnow Lake neighbourhood that is approximately one kilometre in length. The informal trail also serves as a service road to water/wastewater infrastructure. While used by the community, the trail is not currently maintained, nor is it built to City standards. At the Planning Committee meeting of April 9, 2018, Council received an application for plan of subdivision from Three Seasons Investments Limited for the adjacent property at Hargreaves Avenue and Smith Street. As part of the report, it was noted that a section of the informal trail encroached on Three Seasons Investments Limited property. Council approved the subdivision application and also requested a business case to formalize and realign the Dundas Street to Silver Hills Drive informal trail.

II. Background

Current Service Level

The City currently maintains 173 km of non-motorized recreational trails and has 1.07 km of maintained recreational trails per 1,000 persons (MBNCanada measure). The average number of maintained kilometres of trail per 1,000 persons for MBNCanada municipalities is 0.52.

Drivers for Proposed Course of Action

The approval of the Three Seasons Investment Limited subdivision will require realignment of the existing informal trail. As part of the review of the subdivision application, it was noted that the informal trail was heavily used by residents and provided connectivity to other neighbourhood trails, improving walkability in the area. Rainbow Routes Association recommended formalizing the trail.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget		Change to base FTE allocation
	Change to fees (unit price)		Change to revenues (volume change)
	Investment in project (Operating)	<input checked="" type="checkbox"/>	Investment in project (Capital)

Recommendation

It is recommended that the City invests in the informal trail to meet City and Accessibility for Ontarians with Disabilities Act (AODA) standards. It is further recommended that once built, the City includes the new piece of trail as part of its maintenance program of non-motorized recreational trails.

How does this align with Council's Strategic Plan?

	Growth and Economic Development		Responsive, Fiscally Prudent, Open Governance
<input checked="" type="checkbox"/>	Quality of Life and Place	<input checked="" type="checkbox"/>	Sustainable Infrastructure

Non-motorized recreational trails provide recreational opportunities for residents to participate in healthy activities. The trail would also provide a multimodal transportation alternative in the community.

IV. Impact Analysis

Qualitative Implications

The investment would bring the trail up to City and AODA standards and improve walkability in the neighbourhood. Parks Services would require additional part-time hours to maintain the trail on an ongoing basis.

Quantifiable Implications

It is estimated that a capital investment of \$125,000 would be required to realign and bring the existing informal trail up to City and AODA standards. The estimate includes required materials, labour and signage and is based on unit price schedules for trail development. Once developed, additional operational dollars in the amount of \$4,775 annually (consists of crew salaries and benefits as well as ground maintenance) would be required to inspect and maintain the trail.

Operating Revenue - Incremental

One-Time	\$ 125,000	\$ (125,000)	\$ -	\$ -	\$ -
Total	\$ 129,775	\$ (125,000)	\$ -	\$ -	\$ -

Implementation

Parks Services will coordinate with Infrastructure Services to ensure that access be maintained to their infrastructure. Work would commence in the Spring/Summer of 2019.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> Improved walkability in the neighbourhood The trail will be upgraded to meet City and AODA standards The encroachment matter with the adjacent private property will be resolved. 	<ul style="list-style-type: none"> Additional costs will be required to realign, formalize and maintain the trail.

V. Alternatives**Alternatives Considered**

Solution Options	Advantages/Disadvantages	Financial Impact
Continue to treat the trail as informal and a service road only.	Will require realignment where the existing informal trail encroaches on private property.	Capital dollars still required to realign (approximately \$25,000)
Seek funding/sponsorship to upgrade and realign the trail.	Upgrades would be subject to availability of funding programs/corporate sponsorships. Additional maintenance dollars will be required.	Operational impact of \$3,500

Business Case for Service Level Change

Request/Project Name: Community Improvement Plans

Department: Growth and Infrastructure

Division: Planning Services Division

Council Resolution (if applicable): PL2018-162/CC2018-253

I. Executive Summary

Overview of Proposal

This business case responds to Planning Committee Resolution PL2018-162 and Council Resolution CC2018-253. It recommends that \$5.6M be invested to fund the 12 applications received as part of the 2018 Greater Sudbury Community Improvement Plan intake period. Applications received include proposals to improve 9 facades and the creation of approximately 199 new residential units. If approved, these incentives would achieve a number of Council's planning objectives for Downtown Sudbury and for Brownfields, including: revitalizing the core; increasing the residential population of the downtown; creating and retaining employment opportunities; growing the municipal assessment base; growing the municipal property tax revenue; repairing and intensifying the existing urban fabric with compatible projects; taking advantage of existing infrastructure and enhancing the quality of the public realm. For example, these 199 new residential units would represent approximately 320 new people living downtown, which itself represents 6 to 10% of the Downtown Master Plan's goal to increase the downtown population by 3000 to 5000 people.

II. Background

Current Service Level

The Downtown Sudbury Community Improvement plan (DSCIP) and the Brownfield Strategy and Community Improvement Plan (BSCIP) came into effect in 2017 and 2011, respectively. The DSCIP has a number of financial incentive programs designed to revitalize Downtown Sudbury, while the BSCIP's programs are designed to address barriers to redeveloping lands known or suspected to be contaminated. CIPs are managed by the Planning Services Division.

In February, 2018, staff received direction to have an annual intake process to implement the CIPs. Eligible and complete applications received during the annual intake process are to be presented to Council for its consideration as part of the annual budget process. The City received 12 applications as part of the 2018 Intake Period, and through resolution PL2018-162/CC2018-253, staff was directed to prepare this business case for Council's consideration.

Drivers for Proposed Course of Action

There are a number of strategic elements that are driving this request for investment.

1. Corporate Strategic Plan: Growth and Economic Pillar: implement the economic development related plans approved by Council, with the necessary resources to support them.
2. Downtown Master Plan: Refocus incentive programs to match key planning outcomes: new residential, office and retail. Create a per-unit grant programs. Increase residential population downtown.
3. Downtown Sudbury Community Improvement Plan: Revitalize downtown Sudbury; increase residential population; grow assessment and tax revenue; enhance quality of public realm.
4. Brownfield Strategy and Community Improvement Plan: create and retain employment opportunities; increase assessment and tax revenue; increase economic competitiveness; enhance environmental quality, health and safety; intensify and revitalize neighbourhoods and communities.
5. Council approval of 2018 Intake Process (CC2018-50): implement annual deadline to add certainty to the process; bring financial requests forward through the annual budget exercise.
6. Planning Committee Direction PL2018-162 to develop business cases for 2018 Intake applicants

We are recommending this investment in the CIP given the strategic direction of the City as noted in the documents mentioned above, and given recent direction regarding the preparation of this business case for Council's consideration as part of the 2019 Budget.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

	Change to base operating budget		Change to base FTE allocation
	Change to fees (unit price)		Change to revenues (volume change)
X	Investment in project (Operating)		Investment in project (Capital)

Recommendation

Council directed staff to implement the CIPs through an annual intake period. Funding the applications received would be considered as part of the annual budget process.

As part of the 2018 intake period, the City received 12 complete and eligible applications, for a total financial request of \$5.6M. Staff is recommending that the entirety of the request be approved and cash flowed over a 10-year period. If approved, this investment would implement Council's Strategic Plan and the Downtown Master Plan. The applications help achieve the following planning objectives: revitalizing the core; increasing the residential population of the downtown (199 residential units representing approximately 320 new residents); creating and retaining employment opportunities; growing the municipal assessment base (by over \$35M); growing the municipal property tax revenue (by approximately \$550K); repairing and intensifying the existing urban fabric with compatible projects; taking advantage of existing infrastructure; and, enhancing the quality of the public realm.

How does this align with Council's Strategic Plan?

X	Growth and Economic Development		Responsive, Fiscally Prudent, Open Governance
	Quality of Life and Place		Sustainable Infrastructure

Updating the DSCIP framework was identified as part of Council's 2015-2018 Corporate Strategic Plan priority of implementing the economic development related plans approved by Council, with the necessary resources to support them. This priority rests under the Growth and Economic Development pillar.

IV. Impact Analysis**Qualitative Implications**

If approved, this investment would help achieve a number of qualitative planning outcomes, including revitalizing the core; repairing and intensifying the existing urban fabric with compatible projects; and, enhancing the quality of the public realm.

Quantifiable Implications

If approved, this \$5.6M investment would help achieve a number of quantitative planning outcomes, resulting in an increase of financial incentives provided in Downtown Sudbury. It would help stimulate a private sector investment of \$51M, representing a public to private investment ratio of 1:8. Together, the applications propose 9 new façades for Downtown Sudbury, and approximately 199 new residents units (representing 6-10% of the Downtown Master Plan's target of 3000-5000 new residents). If approved in its entirety, this investment would require that new expenses be incurred by the City of Greater Sudbury over a period of 19 years, due to policy requirements under the Community Improvement Plans. This business case proposes that the investment be made over a ten year period (\$560,000 per year), in keeping with proponents' requests to shorten the grant timeframe. Setting aside \$560,000 represents a 0.2% increase to the overall tax levy in 2019.

Operating Revenue - Incremental

Detail

Description	Duration	Revenue Source	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
	On-Going		\$ -	\$ -	\$ -	\$ -	\$ -

On-Going	\$ -	\$ -	\$ -	\$ -	\$ -
One-Time	\$ 560,000	\$ -	\$ -	\$ -	\$ -
Total	\$ 560,000	\$ -	\$ -	\$ -	\$ -

Implementation

If approved, the City would prepare and enter into agreements with the proponents, setting out terms such as when grants will be paid out, timelines for completion, etc.

The individual agreements would include sunset clauses to have work completed by a certain date. The majority of the incentives are provided only once the work is completed.

The desired planning outcomes in approving these requests (revitalizing the core, increasing the residential population, etc) are dependent on the applicants undertaking the proposed improvements.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> Redevelopment and rejuvenation of downtown core Additional residential units in downtown core (199) Grows assessment base (by \$35M +) and taxation (by approx \$550K) 	<ul style="list-style-type: none"> Perception that public funds are being provided to private landowners Short-term impact to municipal budget until additional assessment is realized Outcomes are dependent on private owner undertaking the improvements

V. Alternatives

Alternatives Considered

Solution Options	Advantages/Disadvantages	Financial Impact
Do not fund Community Improvement Plans	Advantage: No budget impact; Disadvantages: Intake process demonstrated opportunities. This would represent lost opportunities in revitalization of Downtown.	N/A
Provide funding based on program objectives. Council may choose to only fund certain programs in Community Improvement Plans. For example, and similar to 2018, Council can choose to fund Façade Improvement and Residential Incentive Programs Only.	Advantages: Some redevelopment in downtown Sudbury is realized. Lesser impact on municipal budget. Focused outcomes realized (e.g. revitalization of core, increase of residential population). If Residential Incentive Program is chosen, it could be seen as year 2 of a 3-year residential incentive program as contemplated in Downtown Master Plan and Downtown CIP (program was funded as part of 2017 Intake). Disadvantages: creates uncertainty in CIP process. Full benefits of CIP programs are not realized. Some projects may be dependant on more than one incentive program to be viable.	TIEG: \$4.7M; Façade Improvement: \$135K; Planning Fees:\$8K; Building Fees: \$120K; Residential Program: \$350K; Loan: \$250K; Tax Assistance: \$33K;
Provide funding based on levels of return-on-investment ratios. The public and private investment ratios found in the 2018 Intake projects range from (1:1) to (1:32). For example, there are 8 projects in the (1:1) to (1:9) range; 1 project in the (1:10) to (1:20) range; and, 2 projects in the (1:21) to (1:30+) range	Advantages: Some redevelopment in downtown Sudbury is realized. Lesser impact on municipal budget. Disadvantages: creates uncertainty in CIP process. Full benefits of CIP programs are not realized. Ratios shown here account for present values only.	Depends on which projects are funded. E.g. "(1:1) to (1:9) range": \$4.8M (\$27M total project costs); "(1:10) to (1:20 range)": \$35K (\$401K total project costs); "(1:21) to (1:30+) range: \$744K (\$24M total project costs)

Business Case for Service Level Change

Request/Project Name: Recreational Fee Assistance Program

Department: Community Development

Division: Leisure Services

Council Resolution (if applicable): CC2018-176

I. Executive Summary

Overview of Proposal

At the June 26, 2018 City Council meeting, Council received a report titled Affordable Access to Recreation Strategy. The report outlined a number of strategies to provide affordable access to recreation for Greater Sudbury residents. One identified strategy was the establishment of a fee assistance fund. The fee assistance fund would include:

- All Greater Sudbury residents with a total net individual or combined family income below Low Income Cut Off (LICO) after-tax would qualify.
- Maximum fee assistance of \$200 per individual per calendar year.
- Financial assistance available for recreation programs, activities or memberships provided by the City with the exception of personal training and private lessons.
- To ensure for confidentiality, the City's Social Services Division will administer the fee assistance program.
- The process of obtaining financial assistance will be non-intrusive and respect an individual's dignity and confidentiality.

The full Affordable Access to Recreation Strategy report can be found here:

<http://agendasonline.greatersudbury.ca/index.cfm?pg=feed&action=file&agenda=report&itemid=16&id=1243>

II. Background

Current Service Level

The City does not currently have a policy established so that individuals facing income barriers have equitable opportunities to participate in City recreation programs and services. The City is not currently conducting means testing for recreation programs and services. Residents inquiring about program subsidies are referred to local community agencies including JumpStart, the Sudbury Manitoulin Children's Foundation and the Human League of Sudbury.

Drivers for Proposed Course of Action

Parks and Recreation Ontario's Policy Framework for Affordable Access to Recreation recommends that where user fees exist, communities and municipalities should consider fee assistance for those facing financial barriers. Through a fee assistance program individuals facing income barriers are able to participate in a wider range of programs and activities. Council has identified accessible opportunities for all ages to play as a population health priority. Resolution CS2013-36 directed that a municipal policy on affordable access to recreation be developed.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget	<input type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input type="checkbox"/>	Investment in project (Capital)

Recommendation

To date, low income individuals interested in City programs or activities with user fees associated have been referred to third parties for fee assistance (Human League of Canada, Sudbury Manitoulin Children's Foundation, and more). It is recommended that the City establish a fee assistance fund for low income individuals wanting to participate in recreation activities where user fees are a barrier.

How does this align with Council's Strategic Plan?

	Growth and Economic Development	Responsive, Fiscally Prudent, Open Governance
X	Quality of Life and Place	Sustainable Infrastructure

This business case supports Council's Strategic Plan in the area of Quality of Life and Place as it aligns with the Population Health Priorities of Indigenous Youth, Families, Compassionate City, Play Opportunities, Resiliency and Age Friendly Strategy. The recommended strategies for affordable access to recreation ensure that all residents have the opportunity to enjoy programs and services designed to improve the health and well-being of youth, families and seniors.

IV. Impact Analysis**Qualitative Implications**

The proposed fee assistance program will remove barriers associated with participation in recreation and leisure activities, increasing quality of life for residents and improving utilization of City programs and services.

Quantifiable Implications

An initial annual budget of \$175,000 for fee assistance is recommended. The budget estimate is based on applying the percentage of unique individuals currently accessing City programs (7.9 %) to the number of LICO (after tax) individuals in Greater Sudbury (11,095) using an annual credit of \$200 per qualifying resident.

Operating Revenue - Incremental**Detail**

Description	Duration	Revenue Source	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
	On-Going		\$ -	\$ -	\$ -	\$ -	\$ -

Fee Assistance Program	On-going	Tax Levy	\$ 175,000				
	On-Going		\$ 175,000	\$ -	\$ -	\$ -	\$ -
	One-Time		\$ -	\$ -	\$ -	\$ -	\$ -
Total			\$ 175,000	\$ -	\$ -	\$ -	\$ -

FTE Table

Position	Bargaining Unit	Duration	Permanent / Part Time	2019	2020	2021	2022	2023
		Permanent		-	-	-	-	-
		PT Hours		-	-	-	-	-

Net Impact	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
On-Going	\$ 175,000	\$ -	\$ -	\$ -	\$ -
One-Time	\$ -	\$ -	\$ -	\$ -	\$ -
Total	\$ 175,000	\$ -	\$ -	\$ -	\$ -

Implementation

The City's Social Services Division would assist in administering the program. The fee subsidy process would need to be considered as part of the new program registration and facility booking software. Communications will be required to promote the fee assistance program. It is anticipated that upon approval, the program could launch by May 2019.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> Removes financial barriers to participation in recreation programs and services. Improves quality of life for residents Increases utilization of City recreation programs and services Enables opportunities for Population Health 	<ul style="list-style-type: none"> The \$175,000 amount may not be sufficient to meet demand. The City will report back annually on the fee assistance program as part of budget deliberations to monitor.

V. Alternatives

Alternatives Considered

Solution Options	Advantages/Disadvantages	Financial Impact
Status Quo - Continuing to refer those inquiring about fee subsidies to third party programs.	Third party programs (Human League of Canada, Sudbury Manitoulin Children's Foundation, etc.) have limited resources and are unable to meet demand.	None
Seek corporate sponsorships to fund a fee assistance program.	City has been challenged in securing corporate sponsorship of programs and services. Sponsorship is inconsistent. Corporate sponsorships would be best suited to expand and support the City's efforts.	

Business Case for Service Level Change

Request/Project Name: Place des arts Operating Funding

Department: CAO

Division: Economic Development

Council Resolution (if applicable):

CC2018-240

I. Executive Summary

Overview of Proposal

Place des arts has requested an annual operational funding contribution of \$260,000 for 2019. This amount represents 20 % of their estimated annual operational budget of \$1.3 million. While the facility itself is anticipated to open in 2020, Place des arts is requesting that the funding support commences in 2019 to assist with hiring and maintaining the Executive Director position and related key staff.

Place des arts has noted that this funding is required to secure staffing (including Executive Director, Artistic Director, Technical Director, Manager of Client Services and administrative support), to support costs associated with providing staff with temporary office space and to cover other operational expenses.

II. Background

Current Service Level

The City is an important contributing partner to the capital project to build Place des arts, providing \$5 million in support toward the \$30 million project. This capital support is formalized through a signed contribution agreement between the City and Place des arts. This funding is requested for the building/facility operations specifically, and would be in addition to and distinct from the funding already received by the member organizations of Place des arts as allocated through the Greater Sudbury Arts and Culture Grant Program, which assists those organizations with programming, promotions and other activities.

The Greater Sudbury Arts and Culture Grant program is administered on behalf of Council by the City of Greater Sudbury Community Development Corporation (GSDC). This funding program includes a number of organizations which are not members of the Place des arts group. As part of Greater Sudbury's 2018 arts and culture grant program, a total of \$541,676 was allocated to organizations through both the operating and project grant streams. Of this total, \$447,280 was allocated through the operating stream to 14 recipients in that stream, seven of which are member organizations of Place des arts. In 2018, these seven Place des arts members received a total allocation of \$239,780 out of the operating stream, which equates to 53 % of dollars available in the operating grant stream and 44 % of grant dollars overall.

Drivers for Proposed Course of Action

As part of the reporting to council in 2016, it was noted that Place des arts would also approach the City for operational support, and the organization requested this funding through a letter to City Council dated July 18, 2018. In response, Council passed resolution CC2018-240 directing staff to develop this business case for the contribution of \$260,000 to be considered as part of the 2019 budget process.

The building itself is not slated to commence operations until 2020 following a phased construction period; however, Place des arts has noted that this funding is needed prior to opening in order to secure an Executive Director and related key staff. As noted in Place des arts' July 18 letter, the organization is hoping to hire the Executive Director for the Place des arts facility in 2019, who will in turn recruit and hire the personnel required to manage facility operations. To maximize effectiveness, Place des arts feels that these key staff members will need to be familiar with the construction process and outcomes "to better administer" Place des arts.

(From information provided by Place des arts)

Staffing:

- Executive Director: to oversee overall operations, hire staff, (further develop and) implement governance and operational procedures, financial and operational management, relations with funders and stakeholders, review and operationalize the business plans, oversee application process for liquor licence, preparation of evacuation plans, working with graphics firm or marketing director to develop marketing and communication strategy beyond construction
- Artistic Director: to prepare programming of grand opening and first season, plan events that will be taking place over the course of the first season, develop partnerships with key partners and stakeholders
- Technical Director: to ensure specialized technical equipment is ready prior to official opening, recruit technical resources needed for operations, work with artistic director to plan technical and production aspects of grand opening and programming for first season, work with external users to meet technical and production needs of external users who will rent the performance venues immediately after opening, oversee preparation of equipment maintenance and renewal plan
- Manager of Client Services: Place des arts is already getting requests to rent performance spaces in 2020 and beyond. "In order to maximise our revenue generating potential, and to ensure our ability to be fully accessible to the community as soon as the doors open, we need to confirm rentals as the requests come forward." (box-office, technical needs, rental contracts)
- Bookkeeping, administrative support and payroll are all support roles which need to be filled in short order.

Office Space: Place des arts has noted that temporary rental space will be required because all member organizations are currently at maximum capacity and cannot house additional Place des arts staff once hired.

Additional expenses: these include communications, information technology needs and administrative functions that are not included in the \$30 million construction budget.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget	<input type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input type="checkbox"/>	Investment in project (Capital)

Recommendation

This business case was prepared by staff as directed by Council motion following a direct request for funding from Place des arts in their letter to Council of July 18, 2018. Place des arts has not budgeted for these costs as part of their overall construction plan and is seeking support for the activities listed above to carry through to the opening of the facility itself in 2020, in order to maximize operations and related revenue generation as soon as possible once the facility is operational.

There is a lack of precedence for the City to provide operational dollars prior to a facility being open for operations; there are also no examples of the City providing subsidies for a building itself. However, Council may wish to consider this request as part of its overall investment in the arts and culture sector given lower-than-average investments as compared with other municipalities (see "Quantitative Implications" below).

The contribution agreement between the City and Place des arts, signed January 2018, includes a clause that states "The Recipient agrees not to apply to the City for any additional form of assistance or incentive for the project beyond that provided for in this Agreement and the City shall be entitled to refuse, without liability to the City, any such application or request, even if the Recipient would otherwise qualify for the assistance or incentive."

How does this align with Council's Strategic Plan?

x	Growth and Economic Development	Responsive, Fiscally Prudent, Open Governance
x	Quality of Life and Place	Sustainable Infrastructure

Growth and economic development

- Once the facility is operational, Place des arts activities will attract people to the downtown, creating an overall more vibrant downtown experience.
- The centre could foster economic activity within the arts sector, diversifying the local economy.

Quality of life and place

- The programming through Place des arts will promote a quality of life that attracts and retains youth and also appeals to professionals, seniors and the community at large, taking into consideration all of Greater Sudbury.
- The centre will provide a publicly accessible space to provide opportunities for a variety of arts and community uses.

The Place des arts project also aligns with specific priorities outlined in City strategic plans including the Greater Sudbury Cultural Plan, From the Ground Up Community Economic Development Strategic Plan and the Downtown Master Plan.

IV. Impact Analysis**Qualitative Implications**

By providing the stability of a permanent arts facility, the City may be helping to maximize the investment of the arts and culture grant dollars in these organizations, as the shared facility will potentially reduce some overhead costs such as administration and maintenance expenses. The addition of operating dollars for Place des arts may also help to protect the City's capital investment by increasing the assurance that sufficient operating funds are available to support appropriate asset management practices.

The seven founding members of Place des arts receive funding through the Arts and Culture Grant Program, which is administered on behalf of Council through the GSDC. This funding program includes a number of organizations which are not members of the Place des arts group. As noted above, in 2018 the seven Place des arts member organizations received a combined \$239,780 through this program, representing 53 % of all operating grant dollars and 44 % of total grant dollars available overall. Place des arts is requesting that this existing annual operational funding to the constituent members is maintained, with the rationale that none of this funding was geared toward the development of Place des arts itself; rather, these organizations run year round concerts, theatre, festivals, publishing works, museum and gallery exhibitions and other community events. Once these seven organizations move to Place des arts, they will all continue paying rent at the new centre and will maintain their respective organizational autonomy. It is anticipated that the shared facility, including administration, maintenance and other overhead expenses, would result in some economies of scale for each of the organizations.

Based on the results of its pre-feasibility study, Place des arts has concluded that in the new facility, several of the Place des arts members would incur higher overhead costs in exchange for the use of enhanced spaces that are significantly larger than those they currently occupy. Those organizations that would see savings in a shared facility would reinvest those savings into more programming. Across the seven Place des arts members there would be an expected net gain with access to wider audiences. In addition to housing the offices that would be rented to the seven founding member organizations, the multifunction and performance halls would be available for rent to outside user groups. Rental rates for these spaces would vary depending on the user, ranging from a reduced rate for founding members up to a commercial rate.

(From information provided by Place des arts)

Rental rates for constituent groups, tenants -

The projected rental revenues (currently under review) for spaces rented year-round (offices, gallery, daycare but not including performance venues, which are rented for short periods of time) is approximately \$120,000. These rents are on par with the rent structure that was developed in the course of the feasibility study. The principles that were articulated during the study are that:

- a) rates are to be established while taking into account resident organizations' ability to pay;
- b) rates need to allow Place des arts to meet its organizational needs, and be sustainable; and
- c) if an organization pays more in rent, it is because they are increasing the square footage they have, or greatly increasing the quality of their installations, or both.

Some organizations will pay more in rent because they are gaining access to larger or better installations. Some organization will pay roughly the same as they are paying now, for similar or slightly improved installations (or offices). All organizations will greatly benefit from pooling resources, and having access to a state-of-the-art facility. Not to mention co-locating downtown, creating a critical mass (employees and audiences), facilitating new or strengthened partnerships.

Quantifiable Implications

Place des arts has requested annual City support to subsidize the centre's operations in order to make it available for community use at affordable rates as recommended in the Place des arts feasibility study.

According to data gathered through the MBNCanada program, the City of Greater Sudbury funding for arts and culture sector is below the average investment of other cities. Greater Sudbury spends 0.04 % of its total operating expenses on arts and culture investing, placing it in the bottom three of all comparable cities participating in the MBNCanada benchmarking initiative. Using the MBNCanada numbers as comparison, specifically table CLTR125 Arts, Heritage and Festival Grants, the median for 2017 was \$6.76 per capita, while the City of Greater Sudbury's investment was \$6.55. Using this data, the City would need to increase annual arts and culture grant funding by \$33,800 to close this gap.

Operating Revenue - Incremental

One-Time				\$ -	\$ -	\$ -	\$ -	\$ -
Total				\$ 260,000	\$ -	\$ -	\$ -	\$ -

Implementation

If approved, this arrangement would be made separately and in addition to the contribution agreement and lease agreement, formalizing the relationship between the City and Place des arts. The requested operating funding would be administered by Economic Development staff via a funding agreement that would include specific deliverables and reporting obligations for Place des arts. This is similar to the existing agreement for annual grant funding provided to the Art Gallery of Sudbury as a separate line item in annual budgets, which also includes deliverables and reporting requirements; it is also in line with the municipality's own approach for evaluating its programs and services via regular reporting, business planning and budgeting processes. Annual performance reports should be publicly available to demonstrate to stakeholders the progress being made and the value perception of the centre's activities.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> Provides community access to creative and cultural spaces in response to identified gaps The addition of operating dollars for Place des arts may also help to protect the City's capital investment by increasing the assurance that sufficient operating funds are available to support appropriate asset management practices. Brings Greater Sudbury's investment in the arts and culture sector closer to the median investment as per MBNCanada data of other municipalities 	<ul style="list-style-type: none"> Funding is over and above existing operational funding already provided to anchor tenants of Place des arts, which represents 53 % of operating funding and 44 % of total arts and culture grant funding available in 2018. Providing funding prior to facility's opening in 2020 may go against the spirit of operational funding

V. Alternatives**Alternatives Considered**

Solution Options	Advantages/Disadvantages	Financial Impact
Fund a portion in 2019, since the facility will not open until 2020	Advantage: lower impact on City finances Disadvantage: reduces Place des Art's ability to hire required staff prior to facility opening	\$ 100,000
Do not fund	Advantage: no impact on City finances Disadvantage: puts additional strain on the facility and its constituent organizations to find funding elsewhere	\$ -

Business Case for Service Level Change

Request/Project Name: Junction Creek Stewardship Funding

Department: Growth and Infrastructure

Division: Planning Services

Council Resolution (if applicable): CC2018-179

I. Executive Summary

Overview of Proposal

Junction Creek Stewardship Committee (JCSC) has submitted a funding request to the City of Greater Sudbury in the sum of \$160,000 to be divided equally from 2019 to 2022, to allow the committee to effectively organize and carry out ongoing community programs and restoration activities in the interest of improving the natural ecosystem and undoing the industrial damage along Sudbury's large urban waterway known as Junction Creek. The JCSC serves to coordinate citizen participation in environmental restoration activities and to increase public awareness and appreciation of Junction Creek by carrying out a variety of educational, community stewardship, and environmental and research programs.

II. Background

Current Service Level

Since 2007, the City of Greater Sudbury has provided the JCSC with annual funding as follows: 2007 (\$30,000), 2008 (\$30,000), 2009 (\$20,000), 2010 (\$25,000), 2011 (\$25,000), 2012 (\$25,000), 2013 (\$25,000), 2014 (\$30,000), 2015 (\$30,000), 2016 (\$30,000), 2017 (\$30,000), and 2018 (\$30,000). During these years the JCSC has accomplished a number of tasks including water sampling, extensive fish study, environmental awareness, environmental restoration of creek banks and adjacent lands through tree and shrub planting, construction of 3 ponds to help improve the water retention capacity within the watershed, and community engagement initiatives aimed at increasing public awareness of the environmental and ecological value of Junction Creek. Thanks to the JCSC's continued restoration efforts, brook trout can now survive in Junction Creek, a feat that seemed almost impossible a few years ago. The JCSC has been collecting rigorous scientific data on biological, chemical and physical features since 2001. The data was made available to the City's recent Junction Creek Subwatershed Study. All JCSC restoration programs rely heavily on volunteer engagement.

Drivers for Proposed Course of Action

City of Greater Sudbury funding to the JCSC is not secured for 2019 and beyond. Without this funding, the environmental and community-based programs provided by the JCSC would need to be reduced substantially or compromised entirely moving forward. The Junction Creek Subwatershed Study will highlight the importance of adequately managing the environmental resources of Junction Creek.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget	<input type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input type="checkbox"/>	Investment in project (Capital)

Recommendation

It is recommended that Council approve the funding of the JCSC in the amount of \$160,000 to be divided equally for each year from 2019 to 2022, inclusive. The Junction Creek Subwatershed Study will highlight the importance of adequately managing the environmental resources of Junction Creek. Funding the JCSC at the recommended level will ensure that the environmental and community-based programs provided by the JCSC will continue to play an important role in the stewardship of the Junction Creek watershed. This alternative is recommended since, as a non-profit organization, the JCSC is able to leverage additional funding from other levels of government for the delivery of their programs.

How does this align with Council's Strategic Plan?

<input type="checkbox"/>	Growth and Economic Development	<input type="checkbox"/>	Responsive, Fiscally Prudent, Open Governance
<input checked="" type="checkbox"/>	Quality of Life and Place	<input type="checkbox"/>	Sustainable Infrastructure

Funding the Junction Creek Stewardship Committee at the recommended level relates to the Quality of Life and Place in Council's 2015-2018 Corporate Strategic Plan. The service level change will enhance the quality of the Junction Creek watershed through community-based environmental stewardship. In particular, many of the community outreach programs delivered by the JCSC are aimed at the health and well-being of youth and families through outdoor learning and environmental improvement activities.

IV. Impact Analysis**Qualitative Implications**

Funding will lead to continued improvement of the Junction Creek watershed through volunteer-based restoration activities, public education and raising awareness of the important services rendered by Junction Creek and its ecosystems for our community.

Quantifiable Implications

The continued operational investment of \$40,000 will allow the JCSC to significantly increase their services within the watershed. This funding is expected to support the creation of new services (e.g. annual water quality report, annual biodiversity report, formal invasive species management plan) and increase existing services (e.g. cleanup activities would increase from two to 16 per year, bank stabilization activities would increase from one to four per year, community events would increase from four to 10, outreach events would increase from four to 15).

Operating Revenue - Incremental**Detail**

Total				\$ 40,000	\$ -	\$ -	\$ -	\$ (40,000)

Implementation

A grant would be transferred to the JCSC on an annual basis from 2019 to 2022.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> Continued community-based, environmental program delivery that serves to improve the quality of the Junction Creek watershed. Program undertaken under supervision of expert committee members. Demonstrated ability to achieve positive outcomes for almost two decades. Existing network for funding and volunteer base. 	<ul style="list-style-type: none"> None

V. Alternatives

Alternatives Considered

Solution Options	Advantages/Disadvantages	Financial Impact
Create an FTE position within the Environmental Planning Services Section to coordinate a similar community-based environmental program for the Junction Creek watershed. Operating expenses will also be required.	The City is ineligible to apply for federal, provincial and corporate funds available to the JCSC therefore limited leveraging ability.	approx. \$150,000 for FTE and operating expenses
Undertake similar community-based environmental initiatives for the Junction Creek watershed within the existing budget for EarthCare Sudbury Program and Lake Water Quality Program.	This solution option would require adjustment of priorities within both existing City programs to accommodate new services. The City would likely not be able to offer all of the services currently offered by JCSC without compromising some of the services currently offered by the EarthCare Sudbury Program and the Lake Water Quality Program.	None
It is recommended that City Council approve the funding of the Junction Creek Stewardship Committee in the amount of \$160,000 to be divided equally from 2019 to 2022, inclusive.	This solution option would ensure the continuation of the full level of service provided by the Junction Creek Stewardship Committee through its environmental and community-based programs that play an important role in the stewardship of the Junction Creek watershed.	\$160,000 divided equally between 2019 and 2022, inclusive

Business Case for Service Level Change

Request/Project Name: Science North Renewal and Expansion

Department: CAO

Division: Economic Development

Council Resolution (if applicable):

CC2018-212

I. Executive Summary

Overview of Proposal

Science North is requesting a total investment of \$1.5 million from the City of Greater Sudbury for major renewal of visitor experiences at Science North and Dynamic Earth (total project cost of \$27 million). On July 10, Council approved a \$750,000 contribution. The Greater Sudbury Development Corporation (GSDC) approved a \$750,000 commitment in July which was ratified by Council in August.

Science North's request from the City of Greater Sudbury is for a grant contribution of \$750,000. This amount represents 3 % of their \$27 million renewal and expansion project budget. The City's contribution to the project will be distributed over three years (\$250,000 in 2020, \$250,000 in 2021 and \$250,000 in 2022). Funding would be conditional on securing the full project funding from all levels of government.

II. Background

Current Service Level

Science North has been a significant contributor to the growth of Greater Sudbury and the primary economic driver for leisure tourism for 35 years. The renewal and expansion plans for both Science North and Dynamic Earth are required to achieve the historic levels of growth and development goals of the recently launched five-year strategic plan, Big Change Big Impact 2018-2023. The project is supported by a funding commitment from the province of Ontario representing a singular opportunity to leverage dollars on a 16 to one basis to renew vital tourism assets. Science North has a strong reputation for completing successful projects that drive its enhancement as one of the largest science centres in Canada. This aligns with the Community Economic Development Strategic Plan, From the Ground Up, in becoming one of Ontario's top tourist destinations.

The former City of Sudbury and Regional Municipality have contributed to the expansion and re-development of Science North and Dynamic Earth over the years. The City has been an important first contributor to a number of its major projects. From the initial development and building of Science North (1980-1983), where they City donated the land and contributed \$2 million to the project, to the building of Dynamic Earth in 2003, where the City contributed \$2 million, and Dynamic Earth's expansion in 2013 with a \$250,000 contribution. Ongoing investments and innovation are crucial to sustaining the largest science centre and year round tourism attraction in northern Ontario.

Science North and Dynamic Earth's existence and investment in Sudbury have been integral in growing tourism for Sudbury. They are a founding member of the Sudbury Tourism Marketing Partnership that was developed in 2001 after amalgamation to leverage community dollars with municipal dollars to broadly promote the destination.

Drivers for Proposed Course of Action

This project was presented to both the Greater Sudbury Development Corporation Board (GSDC) via its Community Economic Development (CED) Committee and City Council in July 2018. As per resolution CC2018-212, City Council approved the request of "\$750,000 to the Science North Big Change, Big Impact renewal and expansion project, with the full amount - and the timing of payment(s) - subject to approval as part of the 2019 Municipal Budget". The proposed distribution of these funds over three years is as follows: \$250,000 in 2020, \$250,000 in 2021 and \$250,000 in 2022.

The support of the City/GSDC will help lever a \$25.5 million investment in seven new projects which will drive increased tourism, create and sustain 143 jobs regionally, and enhance leisure and learning opportunities for all visitors. This proposal to the City/GSDC focuses on three renewal projects that will draw audiences to Greater Sudbury:

- two new multimedia theatres that highlight innovative science in the Sudbury area related to climate change and the deep space research of SNOLAB;
- Go Deeper experiences at Dynamic Earth that showcase Greater Sudbury's modern mining industry; and
- an IMAX® film produced in partnership with Dr. Jane Goodall featuring the Greater Sudbury regreening story, one of the most inspiring environmental restoration projects in the world.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget	<input type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input type="checkbox"/>	Investment in project (Capital)

Recommendation

This business case was prepared by staff as directed by a Council motion following the request for funding from Science North in July. Investment in the project will provide the City of Greater Sudbury with tangible products resulting in provincial, national and potentially international recognition of Sudbury stories (eg. the regreening story). In the proposal submitted to the City/GSDC, Science North estimated the new IMAX film will be seen by 40,000 visitors to Science North, more than 300,000 in Canada, and more than 2 million worldwide. Therefore, staff recommends the distribution of these funds equally over three years with annual reports to both City Council and the GSDC on the project's progress and impact. Also, that this funding be conditional on securing other funding set out in the proposal. Finally, that all projects identified in the project proposal, that were supported by the City's Contributions, must acknowledge the support of the City of Greater Sudbury in any publication of any kind, written or oral, related to the project.

How does this align with Council's Strategic Plan?

<input checked="" type="checkbox"/>	Growth and Economic Development	<input type="checkbox"/>	Responsive, Fiscally Prudent, Open Governance
<input checked="" type="checkbox"/>	Quality of Life and Place	<input type="checkbox"/>	Sustainable Infrastructure

Growth and economic development:

- The project assists in achieving goals set out in the Community Development Strategic Plan, From the Ground Up, by financially supporting the largest tourism attraction that helps put Sudbury on the map as one of Ontario's top tourism destinations.
- The project invests in a large project that will stimulate growth and increase tourism, research and our cultural diversity.
- The project includes components that are built on community partnerships, with the private sector, that are part of enhancing our reputation as the global centre for mining research, environmental restoration and innovation.

Quality of Life and Place:

- Science North is a great public space/facility that provides opportunities for everyone to enjoy.

IV. Impact Analysis

Qualitative Implications

Supporting the expansion and renewal project at Science North to the requested amount, is helping to achieve an ambitious and transformative project that is part of a singular opportunity for significant economic impact, job creation and positive profile for the community within the next three years.

This investment will strengthen Science North as a driver of economic growth in Greater Sudbury, create jobs and elevate quality of place through new must-see experiences and the celebration of Greater Sudbury success stories. Overall, the project is leveraging \$25.5 million in other private and public funding with a large percentage of that investment being spent locally. The support of the City/GSDC for Big Change, Big Impact is instrumental in helping Science North undertake its largest renewal since the centre opened in 1984. This renewal will have far reaching impacts on audiences and the Greater Sudbury community, as the next big step in the centre's history. Overall, the centre's positive brand and image will continue to impact the region.

The Investment in the IMAX production, and potentially the climate change object theatre, provide a venue to share the Sudbury regreening story globally. As the City and board have had interest in assisting with the Sudbury Protocol project over the years, the direct support to these projects will help solidify the storytelling in a professional way.

Quantifiable Implications

Science North will be allocating the funding over three years to achieve transformative change. The proposal to the City/GSDC focuses on three renewal projects specifically that will draw audiences to Greater Sudbury:

- two new multimedia theatres that highlight innovative science in the Sudbury area related to climate change and the deep space research of SNOLAB;
- Go Deeper experiences at Dynamic Earth that showcase Greater Sudbury's modern mining industry; and
- an IMAX® film produced in partnership with Dr. Jane Goodall featuring the Sudbury regreening story, one of the most inspiring environmental restoration projects in the world.

Overall the project aims to achieve:

- Increased science centre attendance and revenue, membership revenue, and school attendance by the end of Science North's 2018-2023 Strategic Plan
- Visitor satisfaction of 95 %
- A new climate change object theatre with opportunities to sell duplicate copies to other science centres and museums
- Increased local attendance and memberships by the end of Science North's 2018-2023 Strategic Plan over 2017-2018 actuals
- Increased partnerships and strengthened connections with existing partners in the mining and education sectors
- Increased number of special events at the site

		Total		\$ -	\$ 250,000	\$ -	\$ -	\$ (250,000)

Implementation

If approved, this arrangement would be formalized separately and in addition to the funding agreement. The requested operating funding would be administered by Economic Development staff via the funding agreement, which includes specific deliverables and reporting obligations for Science North. This is similar to the existing agreements for annual grant funding and is also in line with the municipality's own approach for evaluating its programs and services via regular reporting, business planning and budgeting processes.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> • The opportunity to tell Sudbury stories on international stage via the IMAX production with Dr. Jane Goodall and associated travelling exhibits • Significant impact of the renewal on the Science North's brand and positive image for Greater Sudbury and the region • The economic impact of the funding being spent locally, directly, indirectly and induced • Sustaining jobs in tourism, culture and science (research and communication), locally and regionally • Increase out-of-town visitation to Greater Sudbury 	<ul style="list-style-type: none"> • Reliance on Science North's ability to attain \$6.8 million from both government and private sources needed to completely leverage the full \$16 million provincial grant and therefore be able to complete all the projects set out

Business Case for Service Level Change

Request/Project Name: Whitson River Waterway Trail

Department: Growth and Infrastructure

Division: Planning Services

Council Resolution (if applicable):

PL2018-113

I. Executive Summary

Overview of Proposal

Through resolution CC2018-199, Council directed staff to develop a Business Case for the Detailed Design of the Whitson River Waterway Trail. This Business Case recommends a one time investment of \$1,845,000 for the construction of the Whitson River Waterway Trail. The construction of the Whitson River Waterway Trail is identified as a key Action Item under the Chelmsford Town Centre Community Improvement Plan adopted by Council on July 10, 2018. A conceptual design of the trail was completed in the spring of 2018. It is anticipated that detailed design and construction drawings will be completed by spring 2019. If approved, construction of the trail could occur in summer 2019. The AODA compliant trail is approximately 2.0 km in length extending from the Town Centre (Main Street West), southerly to Brookside Avenue and includes three activity nodes. The first is a picnic shelter and seating overlook on the Conservation Sudbury lands west of the control/generator house south of Main Street. The second is an outdoor shelter and fitness area on the Conservation Sudbury lands abutting the Chelmsford Public Library. The third activity node is a passive open green space adjacent to the Whitson River at the end of Anna Street. The trail includes two pedestrian bridges across the Whitson River in two locations. The proposed multi-use trail connects the trail head on Main St. to the proposed activity nodes located along the trail route with the Town Centre on the east side of the Whitson River with the residential community on the west side of the river and the Conservation lands in the central and south end of the project area. Construction of the trail will provide for better connection between the Chelmsford Town Centre and Adjacent neighbourhoods as well as opportunities for passive and active recreation. The trail fills a gap identified in the Interim Greenspace Advisory Panel Report (2013), follows through with work initiated by the Nickel District Conservation Authority (including land acquisition), as well as being identified in the Official Plan for the City of Greater Sudbury.

II. Background

Current Service Level

There is currently no trail along the Whitson River. A Community Improvement Plan for the Town Centre of Chelmsford was approved by Council on July 10, 2018. The CIP recommends a linear trail along the Whitson River between St. Onge Street and Main Street. Previous and current planning documents call for the construction of the trail. In 1976, Conservation Sudbury (then the Nickel District Conservation Authority) developed a Recreation Feasibility Study for the Whitson River Conservation Area, followed by a Master Plan Study in 1977 proposing a linear park. The 1999 Rayside Balfour Secondary Plan carried that concept forward proposing a linked system of parkland which utilizes land along natural watercourses for pedestrian walkways, not only for public recreation, but to link with the commercial focus of the community. Conservation Sudbury has acquired the majority of lands required to construct the trail, however had not proceeded to construction of the trail.

Drivers for Proposed Course of Action

As noted above, Council direct staff through resolution CC2018-199 to submit a Business Case for the construction of the Whitson River Waterway Trail. The Whitson River Waterway Trail is needed to provide additional recreational opportunities to the Community of Chelmsford. In addition to providing needed active transportation connections, the Trail links multiple neighbourhoods to the Town Centre. The Trail will provide over 500 households with alternative access routes to the Town Centre, library, school and other amenities located in the Town Centre. The construction of the Trail will build on the momentum gained through the development of the Capreol CIP, which proceeded to the construction of waterfront improvements and builds faith that the City sees Plans that are adopted through to implementation. The development of the Trail is a key action Item in the Chelmsford Town Centre Community Improvement Plan, which is the first identified node in the City Nodes and Corridors Strategy which is an action Item under Council Strategic Plan (2015-2018). The Parks Master Plan has identified the lack of linear trail in Chelmsford, this would address that gap. The Greenspace Advisory Panel Interim Report, 2011 identifies a gap of no linear park for the Chelmsford service area. Opportunities were identified along the Whitson River. The Parks, Open Space & Leisure Master Plan Review, June 2014 also recognized the Linear Park gap in Chelmsford. The Official Plan also identifies the Whitson River Linear Park as an area for community improvement plan.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input type="checkbox"/>	Change to base operating budget	<input type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input checked="" type="checkbox"/>	Investment in project (Capital)

Recommendation

The recommended change is investment in a project (the Construction of the Whitson River Waterway Trail). The development of a Business Case for the construction of the Trail was directed by Council and will assist in implementing improvements to one of the Nodes identified in the City's Nodes and Corridors Strategy. The construction of the Trail is recommended over other projects/investments because of the community need and impact it can have with respect to health of the community and potential economic benefit to the Chelmsford Town Centre.

How does this align with Council's Strategic Plan?

	Growth and Economic Development	Responsive, Fiscally Prudent, Open Governance
x	Quality of Life and Place	Sustainable Infrastructure

Council's Corporate Strategic Plan (2015-2018) directs staff to "begin to realize the Nodes and Corridors Strategy, ensuring the Downtown is better connected to revitalized Town Centre, other strategic commercial and core areas by allowing for mixed uses, connecting citizens across Greater Sudbury, while providing excellent public transit". The Nodes and Corridors Strategy approved by Planning Committee on September 26, 2016 and ratified by Council on November 1, 2016 recommends the prioritization of one Sudbury node or corridor, and one Town Centre node or corridor per year. The Chelmsford Town Centre Community Improvement Plan was approved by Planning Committee on July 9, 2018 and ratified by Council on July 10, 2018. The first goal of the CIP is active transportation connections. The first action item under the active transportation connections goal is the development of the Whitson River Waterway Trail. The Trail will provide for recreational activity as well as providing alternative routes for 160 households on the west side of the Whitson River and 150 households on the south side of the Whitson River to the Town Centre.

IV. Impact Analysis

Qualitative Implications

The construction of the trail will provide positive land use planning, healthy community and active transportation outcomes and will achieve the goals of multiple plans. Active transportation has both health and environmental benefits: it increase physical activity, reduce air and noise pollution, and decrease greenhouse gas emissions. The need for a linear trail along the Whitson has been identified as a need since the 1970s, reinforced most recently in the 2014 Parks, Open Space & Leisure Master Plan Review.

Quantifiable Implications

Project management will be provided by Planning Services and Engineering Services for the duration of the construction period. The project will be managed as part of the capital program. Ongoing maintenance costs will be assumed by Leisure Services. There will be some operational changes with respect to maintenance of the Trail. It is anticipated that maintenance will occur in the summer months only and will cost approximately \$5,000 (at the high end) to maintain the trail from approximately May 1 - to November 1). Funding for detailed design has been allocated and the RFP for the detailed design has been issued and the contract will be awarded in early December. The Detailed Design project will include Construction Drawings and development of tender documents. Under this proposed schedule, construction could begin in spring/summer 2019 should this business case be approved.

Operating Revenue - Incremental

Detail

Trail Maintenance	On-going	Tax Levy		\$ 5,000			
	On-Going		\$ -	\$ 5,000	\$ -	\$ -	\$ -
	One-Time		\$ 1,850,000	\$ (1,850,000)	\$ -	\$ -	\$ -
Total			\$ 1,850,000	\$ (1,845,000)	\$ -	\$ -	\$ -

Impact to Capital

This business case would result in the construction of the Whitson River Trail which is Goal 1 of the Chelmsford Town Centre Community Improvement Plan. This would be a one time capital expense of \$1,850,000 in 2019. Funding for detailed design of the project has been secured and the contract has been awarded.

FTE Table

Position	Bargaining Unit	Duration	Permanent / Part Time	2019	2020	2021	2022	2023
		Permanent		-	-	-	-	-
		PT Hours		-	-	-	-	-

Net Impact	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$

Total	\$ 1,850,000	\$ (1,845,000)	\$ -	\$ -	\$ -

Implementation

The Conceptual Design for the Trail is complete. Council approved the Chelmsford Town Centre Community Improvement Plan and gave staff direction to proceed with detailed design on July 10, 2018. It is anticipated that the RFP for the Detailed Design, construction drawings and tender documents will be released in September 2018, with a completion deadline in the spring of 2019. Construction of the Trail would take place in the fall of 2019. Through the development of the Conceptual Design, Planning Services has worked closely with Leisure Services, Engineering Services and Conservation Sudbury. Leisure Services has been involved in this project, including the decision to make the construction of a linear trail a key goal, and has an understanding of the ongoing maintenance costs that will be associated with the Trail construction. Engineering Services will be providing a project manager to assist with overseeing the detailed design process as well as construction.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> Provides active transportation connection - contributes to community health. Provides better connection between Town Centre and adjacent neighbourhoods, which can be an economic benefit to the Town Centre. Provides other recreational amenities such as outdoor fitness equipment and programming space at the Chelmsford library. 	<ul style="list-style-type: none"> It is an additional cost for construction as well as small cost for ongoing maintenance.

V. Alternatives**Alternatives Considered**

Solution Options	Advantages/Disadvantages	Financial Impact
Not funding the construction of the Trail	Advantage: no cost	N/A
Waiting for funding from other levels of government	Advantage: no cost Disadvantage: uncertainty with regard to if and when funding will be obtained and project implemented	N/A
Partnerships with the private and/or non-profit sector	Advantage: reduces the cost to the City Disadvantage: reliance for funding from these sources may be unreliable and/or may not cover the full estimated cost and creates more uncertainty for implementation	TBD

Business Case for Service Level Change

Request/Project Name: Transportation Demand Management

Department: Growth and Infrastructure

Division: Infrastructure Capital Planning Services

Council Resolution (if applicable): OP2018-10

I. Executive Summary

Overview of Proposal

The Greater Sudbury Transportation Master Plan, adopted by Council in December 2016 (Resolution CC2016-380) recommended the development of a Transportation Demand Management (TDM) Plan to provide education and encouragement initiatives and incentive programs to complement cycling, pedestrian and transit infrastructure investments being delivered in the community. The TDM Plan for Greater Sudbury was recommended for approval by the Operations Committee (Resolution OP2018-10) and was subsequently approved by Council on June 12, 2018. Delivering the 23 recommended initiatives, policies and programs as outlined in the approved TDM Plan, will ensure that the benefits resulting from investments in improving infrastructure for residents and visitors who walk, bike and use public transit are maximized. Planned programs to be delivered in 2019 should this business case be approved include: 1) Employee Carpool Parking Program, 2) Emergency Ride Home Program, 3) Education and Skills Training Programs, 4) Promotional and Awareness Campaigns, 5) Participation at Community Events, and 6) Community TDM Grant Program. An annual operating budget of \$50,000 is being requested to deliver TDM programs and initiatives on an on-going basis over the long-term.

II. Background

Current Service Level

The City does not currently provide a comprehensive suite of programs and services related to transportation demand management. In previous years, various City Divisions have developed and delivered programs that support the principles of TDM and are recommended for re-launch or expansion within the approved TDM Plan for Greater Sudbury including EarthCare Sudbury (i.e. Park and Ride, Active and Safe Routes to School) and Greater Sudbury Transit (i.e. Transit Pass Subsidies, MyBus App). Some of these previously created programs and initiatives failed to become sustainable over the long-term, in part due to a lack of dedicated financial resources to support their on-going promotion and delivery.

Drivers for Proposed Course of Action

The Greater Sudbury Transportation Master Plan, adopted by Council in December 2016 (Resolution CC2016-380) recommended the development of a Transportation Demand Management Plan to provide education and encouragement initiatives and incentive programs to complement cycling and pedestrian infrastructure being recommended and delivered in the community. The Transportation Demand Management Plan for Greater Sudbury was undertaken with funding support from the Public Transit Infrastructure Fund (\$27,500) and was presented to the Operations Committee on May 14, 2018, where it was recommended for approval to Council (Resolution OP2018-10). Council confirmed the Operations Committee recommendation to approve the Transportation Demand Management Plan for Greater Sudbury. In addition, a resolution was passed providing staff with direction (OP2018-10) to prepare a business case for operating funding to support the ongoing delivery of education and encouragement initiatives and incentive programs recommended within the Transportation Demand Management Plan. Delivering a suite of recommended initiatives, policies and programs as outlined in the approved TDM Plan, will ensure that the benefits resulting from investments in improving infrastructure for residents and visitors who walk, bike and use public transit are maximized. Other municipalities in Ontario and beyond are making significant investments in reducing the demand for single-occupant vehicle travel in their communities and the City of Greater Sudbury is currently lagging behind best practices in this regard.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget	<input type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input type="checkbox"/>	Investment in project (Capital)

Recommendation

Implementation of the 23 recommended measures contained within the Council-approved TDM Plan, as presented to and approved by the Operations Committee on May 14, 2018, requires an on-going (annual) operating funding commitment to support the long-term vision of the TDM Plan, which for Greater Sudbury is to be a community that embraces sustainable mobility through efficient use of the transportation network and that ensures all residents have equal and equitable access to the services they need, the destinations they want to go to and the people that they want to see. Annual operating funding is being sought to provide complementary programs and services to maximize investments being made in walking, cycling and transit infrastructure, ultimately leading towards a greater proportion of residents and visitors choosing to travel by more sustainable modes and a healthier population in Greater Sudbury. Planned programs to be delivered in 2019 should this business case be approved include:

- 1) Employee Carpool Parking Program - Working with Parking Services, staff will identify a number of spots within municipal parking lots that will be dedicated specifically to monthly pass holders who carpool to work. This will reduce the number of monthly pass holders occupying spots in CGS-owned lots in the downtown core while promoting more sustainable travel and leading by example.
- 2) Emergency Ride Home Program - Working with Human Resources to develop and administer an Emergency Ride Home Program for CGS employees will ensure that employees who travel to work using transit, cycling, walking or as part of a carpool are able to get home quickly should an emergency arise. Not being able to leave in the event of an emergency is often a significant barrier for employees choosing to use a sustainable mode of travel to work.
- 3) Education and Skills Training Programs - Education and training programs specifically for cycling will be developed for all ages and abilities. This could include programs for children learning to ride bicycles, bicycle rodeos at community events, or courses for adults who want to learn to use new cycling infrastructure or skills to ride their bicycle confidently on the road in mixed traffic.
- 4) Promotional and Awareness Campaigns - As Greater Sudbury continues to implement more infrastructure and develop new programs to support people who walk, bike and take transit, additional promotional and awareness campaigns and materials will be required to ensure that residents are aware of these changes in our community and how to use the infrastructure safely and effectively.
- 5) Participation at Community Events - Any opportunity to deliver information about the use of sustainable travel options to residents where they already will increase the reach of our promotional and awareness campaigns. In addition, the more people that we are able to teach how to use the bike racks on the buses (Rack and Roll) in a safe environment, for example, the more likely these residents will be to try using the infrastructure or programs on their own.
- 6) Community TDM Grant Program - A number of local not-for-profit organizations and community groups have expressed interest in forming partnerships with the City to deliver some of the programs and initiatives highlighted in the Transportation Demand Management Plan. The TDM Plan also recommends this approach to be able to effectively deliver these services to residents in the most cost-effective manner. Groups will demonstrate how their proposed projects will meet the objectives of the TDM Plan and will be required to submit a report to the City on outcomes of the investment.

How does this align with Council's Strategic Plan?

	Growth and Economic Development		Responsive, Fiscally Prudent, Open Governance
X	Quality of Life and Place	X	Sustainable Infrastructure

Under the key pillar of Sustainable Infrastructure, Priority D. is to provide quality multimodal transportation alternatives to connect neighbourhoods and communities within Greater Sudbury. Action a.1 is to implement active transportation policies as identified within the Transportation Master Plan (TMP). Chapter 10 of the TMP proposes a comprehensive suite of policies to support active transportation and the recommended sustainability-focused network alternative, including a recommendation for the City to develop a Transportation Demand Management Plan for the community. The Transportation Demand Management Plan was presented to the Operations Committee and received approval on May 14, 2018. The development and delivery of supportive and promotional programs and services is vital to achieving the priority of providing quality multimodal transportation alternatives that connect neighbourhoods and communities within our City.

Under the key pillar of Quality of Life and Place, Priority C. is to create programs and services designed to improve the health and well-being of our youth, families and seniors. Expanding and promoting programs and services that make it easy for all residents to choose to walk, bike and take transit will ultimately lead to Greater Sudbury becoming a healthier community.

IV. Impact Analysis

Qualitative Implications

By investing in the implementation of the Transportation Demand Management Plan, the City will be providing residents with travel choice and will be able to maximize returns from investments being made in infrastructure to better support walking, cycling and transit. The introduction of new programs and initiatives to incentivize residents to choose more sustainable travel modes will result in more residents choosing to travel without a private vehicle, thereby potentially lessening the impact to our roadways and may delay the need for rehabilitation work. With fewer single occupant vehicles and more people transitioning to low carbon travel, the City would also expect to see Greenhouse Gas emissions reductions and improved air quality, which is a goal of the Community Energy and Emissions Plan currently under development. In 2017, Council also adopted ten Population Health Priorities, one of which is 'Healthy Streets'. By providing residents with options to commute by foot, bicycle or using transit, we will be building activity right into people's daily commuting routines, resulting in a healthier population overall.

Quantifiable Implications

Employee Carpool Parking Program - \$5,000
 Emergency Ride Home Program - \$2,000
 Education and Skills Training Programs - \$15,000
 Promotional and Awareness Campaigns - \$13,000
 Participation at Community Events - \$5,000
 Community TDM Grant Program - \$10,000

Operating Revenue - Incremental

One-Time				\$ -	\$ -	\$ -	\$ -	\$ -
Total				\$ 50,000	\$ -	\$ -	\$ -	\$ -

Implementation

The business case will be implemented through the development of a series of individual programs and campaigns, as recommended and outlined in the Council-approved Transportation Demand Management Plan. The TDM Plan proposes 23 measures to be implemented, some of which require few financial resources, such as policy changes. Staff are requesting operating funding to be able to sustainably deliver the recommended programs and incentives outlined in the TDM Plan which have financial resource requirements. Programs and initiatives will begin to be developed immediately upon the approval of this business case.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> Increased return on investment in active transportation, transit and other supportive infrastructure Helps to achieve objectives of the Community Energy and Emissions Plan through improved air quality and reduced greenhouse gas emissions with fewer single occupant vehicles on the roads Helps to achieve population health priority of 'Healthy Streets' Improved or increased community engagement through programs, campaigns and presence at community events Increased return on investment in active transportation, transit and other supportive infrastructure 	<ul style="list-style-type: none"> Increase to operating budget

V. Alternatives**Alternatives Considered**

Solution Options	Advantages/Disadvantages	Financial Impact
Provide no programs or services to incentivize use of existing and new infrastructure for walking, cycling and transit	<p>Advantage: No cost to the City</p> <p>Disadvantages: Returns on investment in active transportation and transit infrastructure will not be fully realized; City will not be seen as being supportive and encouraging of sustainable travel; population health priority of 'Healthy Streets' may not be achieved; Objectives of the Community Energy and Emissions Plan to reduce greenhouse gas emissions locally may not be achieved; potential loss of funding opportunities</p>	N/A
Rely on community agencies and groups to deliver programs	<p>Advantage: No cost to the City</p> <p>Disadvantages: No ability to influence or control how programs are developed and implemented; No ability to monitor progress on achieving desired outcomes of the TDM Plan; Implementation timelines for programs would be unknown; Possibility that no community agencies or groups develop or implement any programs; Some programs, such as a carpool parking, can only be provided by individual employers; potential loss of funding opportunities</p>	N/A

Business Case for Service Level Change

Request/Project Name: Valley East Twin Pad Detailed Design

Department: Community Development

Division: Leisure Services

Council Resolution (if applicable):

CS2018-17

I. Executive Summary

Overview of Proposal

At the June 19, 2017 Community Services Committee meeting, resolution CS2017-16 was passed stating “that the City of Greater Sudbury Council directs staff to prepare a business case to replace various arenas and/or ice pads, with the build of a multipad/multi-purpose arena facility in Valley East. As part of the 2018 budget process, Council received and approved a business case for a Valley East Twin Pad arena. The business case identified the Howard Armstrong Recreation Centre as a potential location for a new twin pad facility. On July 9, 2018, the Community Services Committee directed staff to prepare a business case for the detailed design work required for the development of a new twin pad facility in Valley East. This business case addresses the funding required for the project's detailed design. The City will engage a third party through a competitive process to provide a detailed design for a potential twin pad facility. To inform the detailed design, the City will undertake a community consultation process early in 2019. As part of the process, stakeholders and the public will be asked to provide input into design features and characteristics. The business case presented as part of the 2018 budget process estimated a total project budget of \$24 million to \$26 million. Estimated detailed design costs would be approximately \$1.5 million.

II. Background

Current Service Level

The City of Greater Sudbury operates a total of 16 ice pads that are contained in 14 municipal arenas. Capreol Community Centre and Arena and Gerry McCrory Countryside Sports

Complex are the only twin pad facilities. The average age of ice facilities in the city is more than 40 years, with the majority being constructed between 1950 and 1978. The 2013 Arena Renewal Strategy established a market-specific demand target that reflected the city's unique geography and arena utilization profiles at that point in time.

To identify needs at a city-wide level, the target was set at one ice pad per 405 youth registrants. Based on the recommended target of one pad per 405 registrants, there is a city-wide demand for 14.2 rinks, indicating a surplus of 1.8 pads. Municipal Benchmarking Network Canada (MBNCan) has a measure for the number of operational indoor ice pads per 100,000 population. The City of Greater Sudbury currently provides 9.91 indoor ice pads for every 100,000 persons. The average of MBNCan results is 5.14 ice pads for every 100,000 persons. The Valley East area is currently serviced by three arenas, Raymond Plourde Arena (built in 1974), Centennial Arena (built in 1969), and Capreol Arena (Side1 built in 1954, side 2 built in 1970).

Drivers for Proposed Course of Action

The 2014 Arena Renewal Strategy established a market-specific demand target that reflected the city's unique geography and arena utilization profiles at that point in time. This report identified the Greater Sudbury area has a surplus of 1.8 ice pads. Although the report details insufficient support for expanding the supply of municipal arenas, the report did identify that any future construction of new facilities should be in the form of replacement facilities, with consideration of multi-pad designs.

III. Recommendation**Categorize your specific request (mark an 'X' for all that apply):**

<input type="checkbox"/>	Change to base operating budget	<input type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input checked="" type="checkbox"/>	Investment in project (Capital)

Recommendation

As detailed in previous reports, consolidating three ice pads in one facility will reduce the number of surplus ice pads, realize economies of scale for efficient operations and provide users with a modern facility with up-to-date amenities such as larger ice surfaces, additional dressing rooms to aid with the growth of female hockey, a running track, multi-purpose rooms, accessible design features, energy-efficient and comfortable seating, and the possibility of utilizing the facility for a soccer field house. It is recommended that detailed design work take place in 2019, which would allow the project to commence in 2020 upon Council approval. With detailed design drawings, the project would also be considered shovel ready for any potential external funding which may become available.

How does this align with Council's Strategic Plan?

<input type="checkbox"/>	Growth and Economic Development	<input type="checkbox"/>	Responsive, Fiscally Prudent, Open Governance
<input checked="" type="checkbox"/>	Quality of Life and Place	<input type="checkbox"/>	Sustainable Infrastructure

This report supports Council's Strategic Plan in the area of Quality of Life and Place as it aligns with the Population Health Priorities of Families, Play Opportunities and Age Friendly Strategy. The development of a new twin pad facility will allow for programs and services which would improve the health and well-being of youth, families and seniors. In addition, this helps to achieve the Council priority of investing in projects to stimulate growth and increase sports and event tourism.

IV. Impact Analysis**Qualitative Implications**

Providing funding for the detailed design is an important step in the success of the project. If a detailed design is not completed, the project will not be shovel ready restricting the ability to secure funding from the provincial and federal governments and would prevent accurate costing for future budget deliberations.

Quantifiable Implications

Detailed design is estimated to be 6 % of the total project budget. The business case presented as part of the 2018 budget process estimated a total project budget of \$24 million to \$26 million. Estimated detailed design costs would be approximately \$1.5 million.

Implementation

It is recommended that detailed design work take place in 2019, which would allow the project to commence in 2020 upon Council approval. With detailed design drawings, the project would also be considered shovel ready for any potential external funding which may become available. Detailed design is estimated to be 6 % of the total project budget.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> • Project will be shovel ready • Will provide an accurate costing of the project • Operational efficiencies will be realized • Modern facility developed with up-to-date amenities • The new facility will be energy efficient 	<ul style="list-style-type: none"> • Will not be shovel ready which would increase difficulty to secure external funding • Costing of project will not be more precise • Continue to maintain older buildings that are inefficient and costly to operate

V. Alternatives**Alternatives Considered**

Solution Options	Advantages/Disadvantages	Financial Impact
Maintain current facilities	Older buildings, costly to maintain. Significant repairs are required over the next 10 years.	\$6.7 million in Capital required over the next 10 years.

Business Case for Service Level Change

Request/Project Name: Fabio Belli Foundation Proposal for the Creation of a Multi-Use Facility

Department: Community Development

Division: Leisure Services

Council Resolution (if applicable): CC2018-192

I. Executive Summary

Overview of Proposal

At the May 14, 2018 Community Services Committee meeting, representatives of the Fabio Belli Foundation provided Council information on an indoor multi-purpose facility project. The Foundation informed them that the preferred location was Lasalle Secondary School. The facility would be a 94,000 square foot air supported structure that would house a FIFA regulation field with an artificial turf surface. The facility could be divided into three individual fields of approximately 110' x 210, in size and the facility would also have an indoor track. The Foundation advised that they had received a \$4M funding commitment from the Province of Ontario and that the Rainbow District School Board had committed to \$1.1M towards the project. Full presentation available at: <http://agendasonline.greatersudbury.ca/index.cfm?pg=feed&action=file&attachment=23513.pdf>

At the July 9, 2018 Community Services Committee meeting, Council received a report outlining the unsolicited proposal submitted by the Fabio Belli Foundation requesting financial support towards the creation of the multi-use facility, in the amount of \$2,200,000 as well as an additional \$750,000 towards the construction of a future field house. The group also requested an annual grant in the amount of \$25,000 to assist with operating costs. Full report available at: <http://agendasonline.greatersudbury.ca/index.cfm?pg=feed&action=file&agenda=report&itemid=12&id=1264>

II. Background

Current Service Level

There is no indoor turf facility in Greater Sudbury. The Framework for Partnership Opportunities for Indoor Turf and Multi-Purpose Facilities report completed by Monteith Brown Planning Consultants stated that there was sufficient demand in Greater Sudbury to support an indoor turf facility with two small fields on a pitch measuring approximately 200 by 200 feet each (excluding run-out space and a clubhouse building). The report further stated that there could be economies of scale realized with the construction of an air-supported structure over an artificial turf field.

In October, 2018 it was announced that the Province had revoked the \$4M funding commitment towards the Fabio Belli Foundation project. The Foundation has committed to exploring other funding opportunities and/or securing financing. The Rainbow District School Board remains committed with the project.

A second potential project, through a partnership between the Sudbury District Sports Club and the Conseil scolaire catholique du Nouvel-Ontario (CSCNO) was announced in July 2018. The proposed project would be located at École secondaire du Sacré-Cœur and would house two synthetic turf soccer fields. CSCNO has committed \$300,000 to the project with the remainder of funding financed privately. In October 2018, the Sudbury District Sports Club announced it was continuing with the project.

Drivers for Proposed Course of Action

Since the closure of the Exhibition Centre, there is a lack of a suitable facility to support field sports requiring an indoor location for off season use. The report received from Monteith Brown Planning Consultants also noted that the popularity of soccer is expanding into all seasons, which requires artificial turf indoor facilities, the development of which is a widespread trend across Ontario.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input type="checkbox"/>	Change to base operating budget	<input type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input type="checkbox"/>	Investment in project (Capital)

Recommendation

Given the uncertain landscape of the development of an indoor turf facility, it is recommended that the City not invest in the Fabio Belli Foundation project in 2019. While the proposal received from the Fabio Belli Foundation meets the minimum requirements of providing a business plan, risk assessment and succession plan, the recent announcement by the Province to revoke the funding commitment significantly alters the project's business plan. Additionally, if the alternate Sudbury District Sports Club facility is achieved, it would satisfy our community's need for an indoor turf facility as per the Monteith Brown Consultants report. The City of Greater Sudbury will be in a better position to determine support for an indoor turf facility once it is known if a third party project is achieved and/or if the Fabio Belli Foundation is able to secure alternate funding/financing.

How does this align with Council's Strategic Plan?

	Growth and Economic Development	Responsive, Fiscally Prudent, Open Governance
X	Quality of Life and Place	Sustainable Infrastructure

This project supports Council's Strategic Plan in the area of Quality of Life and Place as it aligns with the Population Health Priorities of Families, Play Opportunities and Age Friendly Strategy. The development of a new indoor multi-use facility would allow for programs and services which would improve the health and well-being of youth, families and seniors.

IV. Impact Analysis**Qualitative Implications**

The Fabio Belli Foundation stated the following community benefits of this type of project:

- Reduces health care costs
- affordable access to recreation •Increases grassroots community excitement
- Provides a year round facility to support tournaments, sport development, high performance athletes
- Increases happiness (full spectrum light and activity)
- Reduce social, race, cultural and economic barriers through activity
- Reduces screen time for kids

Quantifiable Implications

The unsolicited proposal from the Fabio Foundation outlined the following:

- Capital support in the amount of \$2.2M toward finalizing the project which would include necessary site and infrastructure works
- \$750,000 contribution towards a new permanent fieldhouse with change rooms, meeting space, office space and storage
- To reinstate an annual \$25,000 grant that was previously provided to the Sudbury Regional Soccer Association to assist in the administration of the now closed Sudbury Multi-Use facility at 967 Falconbridge Road (Exhibition Centre). Grant would assist with operational costs and allow the Foundation to offer programs at low cost/no cost to community groups that could not normally access such a facility.

Operating Revenue - Incremental**Detail**

Total				\$ -	\$ -	\$ -	\$ -	\$ -

Implementation

The Sudbury District Sports Club has publicly stated it anticipates their indoor turf facility to be open in 2019. The Fabio Belli Foundation has publicly stated it intends to seek other sources of government funding for their project.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> • If the Sudbury District Sports Club facility is realized it would be done with private funds. • If the Sudbury District Sports Club facility is realized it would fill a gap for an indoor multi-purpose facility in the community. 	<ul style="list-style-type: none"> • If the Sudbury District Sports Club facility is not realized, Greater Sudbury would still be without an indoor turf facility.

V. Alternatives

Alternatives Considered

Solution Options	Advantages/Disadvantages	Financial Impact
Invest in the Fabio Belli Foundation project in hopes that the group is able to secure alternate funding.	Advantage - Indoor turf facility realized.. Disadvantages - Additional funding/financing not secured.	\$ 2,975,000.00
City take lead on the development of an indoor multi-purpose facility.	Parks, Open Space and Leisure Master Plan Review (2014) recommends that the City refrain from becoming a direct provider or operator of indoor turf facilities.	Significantly more capital and operating dollars required.
City invest a partial amount towards the project vs. the full request.	Less impact on municipal levy. Foundation would be required find other sources of funding.	Reduces financial impact.

Business Case for Service Level Change

Request/Project Name: Support for Sudbury Food Banks Delivery System

Department: Community Development

Division: Social Services

Council Resolution (if applicable): CS2018-15

I. Executive Summary

Overview of Proposal

This Proposal was written based on information provided by the Banque d'aliments Sudbury Food Bank (BDSFB), a central organization that supports organizations that offers food assistance to emergency food banks and meal providers across the City of Greater Sudbury and to others within the district of Sudbury.

In 2017 the BDSFB began acquiring and distributing fresh produce and frozen meat and protein from local retail partners. In total 128 tons of fresh produce (\$665,600 in food value) and 19 tons of meat and frozen proteins (\$98,800 in food value) were distributed. Currently the collected food is held at BDSFB and the Member Agencies pick it up from the warehouse. BDSFB are seeking funding to expand its ability to not only collect but also deliver the food. The funding requested, \$100,000 per year for the next three years, is to pay for 2 fulltime drivers, maintain and fuel the vehicles as well as hire a pickup and distribution coordinator

II. Background

Current Service Level

There is no funding provided by the City of Greater Sudbury for this service. The service operated by the BDSFB provides part time drivers and a truck that collects food from local retailers. The product is brought back to the BDSFB warehouse and distribution center at 1105 Webbwood Drive and Member Agencies are required to make their own arrangements to pick up the available food. Currently BDSFB has 2 part-time drivers (25 hours/week each) who utilize a selection of vehicles, including a refrigerator truck, to make the required pickups in order to ensure maintenance of a proper cold chain from the retail partners to the warehouse.

Drivers for Proposed Course of Action

At the Community Service Committee meeting on July 9 2019 the BDSFB brought forward for consideration this proposal to support transportation of the food as an option for the City to consider. Under the current system many of the member agencies indicated that they were unable to pick up the available fresh produce in a timely matter or even at all, due to their having to rely upon volunteers and volunteer vehicle availability. Most, if not all of, the member agencies do not have the resources available to maintain proper cold transportation and storage to move fresh product from the warehouse to their location. By increasing the distribution component to the work done, BDSFB can ensure that all of the member agencies receive fresh, healthy product they can distribute across the city.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input type="checkbox"/>	Change to base operating budget	<input type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input checked="" type="checkbox"/>	Investment in project (Operating)	<input type="checkbox"/>	Investment in project (Capital)

Recommendation

The specific recommendation is an investment of \$100,000/year for 3 years. This would cover the operating cost for 2 full time drivers (40 hrs. per week) and a part-time delivery and pick-up coordinator (25 hrs. per week) at \$14.00 per hour + benefits (for a total of \$80,000). It would also cover: additional insurances (\$6,000) and additional fuel and maintenance costs (\$14,000). All additional administrative costs would be covered by the BDSFB.

Based on last year's distribution of product of 462 tons this would result in the following breakdown: a cost of \$216.45/ton delivered or 11 cents/pound delivered. Food Banks Canada in partnership with The Nielson Company has established a national value for donated food of \$2.60/pound. Which means every dollar invested in this program will lead to a return of \$22.63 in food value.

An important note about this recommendation: the actual benefit provided by this investment will be even greater, as this recommended change will result in even more product distributed: The current goal is an increase in food distributed by 20% in the first year. We find it difficult to believe a more cost effective way to impact hunger in our city in a significant way currently exists.

How does this align with Council's Strategic Plan?

	Growth and Economic Development		Responsive, Fiscally Prudent, Open Governance
X	Quality of Life and Place		Sustainable Infrastructure

The BDSFB feels that by increasing the available fresh fruits and vegetables and frozen meats and proteins to the over 11,000 citizens of our community who are facing food insecurity issues will greatly increase the quality of life of those who need it. The mission of the BDSFB to ensure that no one goes hungry in Greater Sudbury and the surrounding District of Sudbury. The BDSFB believes that its mission aligns clearly with the Council's Strategic Plan. Furthermore BDSFB states that there are direct economic benefits to be had from easing the food insecurity issues of the city's residents. Access to fresh, healthy food will allow strained budgets to stretch further, will lead to improved health and reduced stress, all of which means more residents are better able to contribute to its growth and economy.

IV. Impact Analysis

Qualitative Implications

This investment could result in an increase in available fresh food and frozen protein available to citizens facing food insecurity issues. It will allow an increase in food reclaimed from current retail partners and the potential ability to expand the program to include new partners. It is also further felt by BDSFB that this change will significantly reduce the amount of food waste added to city landfills. Member agencies will be able to utilize their volunteers in more efficient ways to better support their programs and clients by freeing their resources who are currently dedicated to picking up product from the warehouse.

Quantifiable Implications

The support requested is \$100,000.00 per year for three years

This would cover the operating cost for

2 full time drivers (40 hrs. per week) and a part time administrator delivery and pick up coordinator (25 hrs. Per week) at \$14.00 per hour + benefits = \$80,000.00

- Additional insurances = \$6,000.00
- Gas per year, regular maintenance, tires etc. (5 vehicles) = \$14,000.00
- Administrative costs would be covered by BDSFB

Operating Revenue - Incremental

Operating Expenditures - Incremental

Detail

Description	Duration	Funding Source	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
Sudbury Food Bank Grant	One-Time	Levy	\$ 100,000			\$ (100,000)	
	On-Going		\$ -	\$ -	\$ -	\$ -	\$ -
	One-Time		\$ 100,000	\$ -	\$ -	\$ (100,000)	\$ -
Total			\$ 100,000	\$ -	\$ -	\$ (100,000)	\$ -

FTE Table

Position	Bargaining Unit	Duration	Permanent / Part Time		2019	2020	2021	2022	2023
		Permanent			-	-	-	-	-
		PT Hours			-	-	-	-	-

Net Impact		2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
On-Going		\$ -	\$ -	\$ -	\$ -	\$ -
One-Time		\$ 100,000	\$ -	\$ -	\$ (100,000)	\$ -
Total		\$ 100,000	\$ -	\$ -	\$ (100,000)	\$ -

Implementation

Currently BDSFB has the capital resources needed to implement the expansion of this program. Implementation would be achieved almost immediately upon receipt of approval. The part-time drivers would go to full-time capacity. The initial scheduling of pickups and deliveries will be handled by current staff and an immediate hiring effort of a part-time delivery and pickup scheduling co-ordinator would be initiated. Upon filling the position the new part-time coordinator would work with the Executive Director to expand both the current retail partnerships and finalize the new partnerships which would be available once the capacity to handle them increased.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> • Increase in available perishable and non perishable food stocks. • High return of food value per dollar invested • The infrastructure and capital components of this program already exist. • An increase in the food safety by extending the centralized management of the cold chain. • Minimal lead time required to implement the program. 	<ul style="list-style-type: none"> • This program could expand at a rate which would outstrip the current infrastructure and require an expansion of capital (ex. Another freezer truck). • At the end of three years the BDSFB would need to secure funding to maintain what would be by that time a very integrated and relied upon program.

V. Alternatives**Alternatives Considered**

Solution Options	Advantages/Disadvantages	Financial Impact
As this is an outside agency request for a service not provided by the CGS, there are no alternatives developed.		

Business Case for Service Level Change

Request/Project Name: Increased Security at Transit Terminal

Department: Corporate Services

Division: Security and By-law

Council Resolution (if applicable): CS2018-19

I. Executive Summary

Overview of Proposal

Transit and Security and By-law staff are recommending immediate changes to the security level at the Greater Sudbury Downtown Transit Terminal. It is recommended that the provision of security at the terminal and on board transit buses be brought in-house under Corporate Services and within the Security and By-law Division. This proposal recommends additional Municipal Law Enforcement Officers (MLEO)/Security at the Transit terminal and on board Transit buses. This service level will consist of four MLEOs providing a combination of fixed post and mobile enforcement services for 20 hours per day between the hours of 6 a.m. and 2 a.m. Enforcing municipal by-laws (Transit By-law, Smoking By-law), provincial legislation (Trespass to Property Act) and federal legislation (Criminal Code) MLEOs will have a broader authority to regulate behaviours on Transit property and on board City Transit buses. An MLEO can enforce a number of violations by way of issuing a Part I Offence Notice under the Provincial Offences Act. This business case addresses both the hours of operations and the staff requirement to increase security where police are not able to support on a consistent basis. This recommendation is scalable and will support the use of MLEOs for mobile response to higher level security incidents that occur at other City properties such as libraries, pools and parks and will further provide a service level to support potential nuisance complaints and related enforcement and licensing duties associated with the legalization of cannabis. The additional annual investment required for this service level enhancement is approximately \$828,713.

II. Background

Current Service Level

Security services at the Downtown Transit Terminal are currently provided by a contract service provider. On July 9, 2018, the Community Services Committee approved additional hours of contracted uniform security at the Transit Terminal in order to ensure two guards are on site between 6 a.m. and 12:30 a.m., seven days a week. The intent is to provide a high level of customer service while actively monitoring for and discouraging criminal and anti-social behaviour witnessed on Transit property. Security guards enforce the Trespass to Property Act on behalf of the City with limited authority provided within the City of Greater Sudbury Trespass to Property Act Policy. The level of service is further supported by the live monitor of 17 surveillance cameras mounted within the facility and externally. When responding to security incidents ranging from physical violence, drug use, disturbances, open alcohol, trespass and threats, where incidents may escalate quickly, security guards are directed to monitor and report to police rather than intervening to stop the offence. This is not the most effective approach to address a number of disturbances.

Drivers for Proposed Course of Action

This is being recommended to address ongoing concerns raised by the public and Transit employees about the perceived safety of the terminal and on buses. It's further recommended to support a strategy to increase ridership for the service. Incidents of assault, drug/alcohol use, fare evasion and disruptive behaviours on buses and at the terminal, directly relate to a fiscal cost to the municipality as it relates to the use of the transit service and the current service level is often unsuccessful in addressing concerns effectively. The MTO confirms that "actual and perceived lack of safety at transit stops, stations and platforms can result in lost ridership, stigmatization and lower revenue. Vandalism and crime also cause damaged equipment, lost workdays, and compensation payments, and affect employee health and morale." This recommendation is based on the need to minimize risk of injury to the public, internal/contracted staff and passengers. There has been a consistently high volume of serious security incidents occurring at the terminal with an average of 54 high-risk incidents occurring per month in 2017 and 40 per month in the first quarter of 2018. The severity of incidents at the terminal and on transit buses has increased in recent months, noting the incident in May 2017 where a transit operator was injured when a male suspect assaulted him with a knife on board the bus, and further the event of April 01, 2018, when a man armed with two knives was shot by police inside the transit terminal after making attempts to access a security office and later charging at police. These incidents have gravely impacted the perception that the service and terminal area is safe, and if left unchecked, will negatively impact ridership, employee engagement and trust in the municipality. Finally, the transit terminal and the downtown core have experienced an increase in intravenous drug use to the extent that it has received significant public and media attention. Sudbury Action Centre for Youth (SACY) has reported picking up over 11,000 discarded needles in the downtown core during the first 11 days of September 2018. A higher caliber, proactive deterrence is required for a consistent time period to address concerns of drug use and sales and needle discarding on site. Finally, transit has seen a sharp increase in short fare rides, which negatively impacts revenue and further places a bus operator in a high risk situation if they challenge a rider who intentionally does not pay. A short fare could be \$0 paid toward a fare, or \$.05 short; unfortunately there is no means to separate the data. Nonetheless, in 2017 Transit reported approximately 48,000 short fare rides, while in the last 6 months of 2017 and the first 6 months of 2018, this number increased to 60,000. Whether on a bus, or at the transit terminal, MLEOs have the authority to arrest, issue fines or trespass someone from all City of Greater Sudbury facilities. Their authorization to do so comes from various forms of legislation, including the Criminal Code of Canada, the Trespass to Property Act and a variety of City by-laws. With a higher level of training for use of force and an increased ability to enforce legislation, this service will better address risks to staff and riders, creating a safe working environment, conducive to requirements within the Occupational Health and Safety Act.

III. Recommendation**Categorize your specific request (mark an 'X' for all that apply):**

<input checked="" type="checkbox"/>	Change to base operating budget	<input checked="" type="checkbox"/>	Change to base FTE allocation
	Change to fees (unit price)		Change to revenues (volume change)
	Investment in project (Operating)		Investment in project (Capital)

Recommendation

The recommended change replaces contracted G4S security guards, with two highly trained and professional Municipal Law Enforcement Officers (MLEO) at the Transit Terminal two more mobile MLEOs that can respond to incidents on board buses. Where MLEOs possess a number of additional legal authorities for enforcement, a contract security guard does not have the authority to issue a ticket. Whether on board a bus, or at the transit terminal, MLEOs have the authority to arrest (in certain circumstances), issue fines or trespass someone from all City of Greater Sudbury facilities. Their authorization to do so comes from various forms of legislation, including the Criminal Code of Canada, the Trespass to Property Act and a variety of City by-laws. With a higher level of training for use of force and an increased ability to enforce legislation, this service will better address risks to staff and riders, creating a safe working environment, conducive to requirements within the Occupational Health and Safety Act. A uniformed MLEO on a bus creates a safe environment for riders and bus operators. The response to inappropriate behaviour or fare evasion with fines and trespass orders sends a clear message that this behaviour will not be tolerated. Partnering with police for investigations will further the positive collaboration that has already begun in order to support an overall commitment to safety and security in the downtown core. The result of transit staff feeling safe at work will increase employee engagement; there will be a reduction in lost time injuries and absences, further benefiting the service. When public trust in the service increases, there will be an associated increase to ridership and revenue. This recommended service level enhancement is consistent with service levels offered in other large municipalities such as York, Mississauga and Ottawa.

How does this align with Council's Strategic Plan?

	Growth and Economic Development		Responsive, Fiscally Prudent, Open Governance
<input checked="" type="checkbox"/>	Quality of Life and Place	<input checked="" type="checkbox"/>	Sustainable Infrastructure

This recommendation refers to a commitment to review and modify the transit system with a focus on reliability, convenience and safety, as well as connecting neighbourhoods and communities; aligning with Council's strategic plan for sustainable infrastructure. In addition to work that is being done to enhance customer experience and create a transit system that is easily accessible, convenient, comfortable and enjoyable for all passengers, this recommended service level increase further aligns with the Quality of Life and Place strategic priority by assisting with maintaining great public spaces and facilities to provide opportunities for everyone to enjoy. Finally, a safe and enjoyable public transportation system in a community will promote a quality of life that attracts and retains youth and professionals, and encourages seniors to relocate to our community.

IV. Impact Analysis**Qualitative Implications**

This change will achieve a safer environment, both in the area of the transit terminal and on board buses, therefore minimizing risk and exposure to the municipality and its employees. In conjunction with all other service improvements at transit, this service level increase will improve the public perception of transit services and increase employee morale and engagement. As there is a positive link between employee engagement and customer satisfaction, this change will have a positive impact on ridership; both in receipt of a high level of customer service and through an overall safe and positive environment for riders. Aligning with the main principles of crime prevention through environmental design (natural surveillance, natural access control and territorial reinforcement), increased ridership and participation in the service will result in an increased territorial reinforcement for the transit terminal and on board buses. Successful territorial reinforcement applications include providing amenities in communal areas as a way to encourage activity and use. The amenity in this case is a highly regarded transit service and terminal that is viewed to be a safe place. "Territorial reinforcement has been described as an umbrella strategy that encompasses natural surveillance and access control. Used properly, natural surveillance and access control can help people to develop a sense of ownership about a space regardless of whether or not they own it. Territoriality often results in challenging behaviour." All encompassed, this service level will reduce exposure to fear, crime, loss and liability, further minimizing risk and exposure for the City of Greater Sudbury.

Quantifiable Implications

The financial impacts of this initiative will be additional costs in the areas of FTEs, part-time hours and operating budget. There will be an increase in revenue associated with Part I and II (parking) infractions being issued. Providing two enforcement officers at the transit terminal and two enforcement officers for mobile patrol/response, for 365 days a year, results in a total of 28,105 hours of labour. The complimenting model of service would see the addition of eight FTEs with an annual cost of \$569,666. An annual increase of 13,489 part-time hours will cost \$499,854. Annual operating costs of \$40,000 are forecasted to cover costs for training (use of force, emergency first aid) uniforms (includes protective vests) equipment (phone, handcuffs) and a vehicle. Annual increases in fine revenue is based on tickets issued under a proposed transit by-law. Assuming an average fine amount of \$150 per offence notice an annual forecast of \$4,000 would be conservative at approximately 27 tickets issued annually. An annual increase in revenue from Part II (parking) offences is estimated at \$4,000. With a fine amount of \$25 per offence notice this would be the result of approximately 160 tickets issued annually. It is assumed that increased enforcement abilities both at the terminal and on board buses will positively impact revenue loss associated with fare evasion, and increased fare revenues could be realized through increased ridership.

Total				\$ 768,791	\$ -	\$ -	\$ -	\$ -

Implementation

Once approved, staff would be required to develop a job description and have it approved. Further, as a portion of the work contained within contract CPS15-4 would be severed, G4S and the City, would need to agree to amend a portion of the contract to remove contracted guards from transit. It is assumed that the current contract provider would be willing to renegotiate this amendment as opposed to requiring complete termination of the contract. To post for permanent and part-time positions and interview candidates, staff would require 60 days to complete the process and allow for start dates. Once hired, staff would reserve one month for job specific training and post assignment. Finally, staff would depend on Fleet Services to provide a marked enforcement vehicle capable of safely holding a suspect in the event of an off site arrest and until such time that police can attend to retrieve the suspect. From start to finish, staff would recommend 120 days to support transition from contractor to in-house enforcement. This initiative would require synergies with Transit management and Communications to effectively communicate the change to riders and staff. Once in place, staff would partner with police to provide for a very active presence at the terminal and on board buses in the early days of the transition to highlight the focus on safety and act as a deterrent.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> • The ability to recruit and retain high caliber employees for security as opposed to the current challenges where there is limited staffing control • An ability to issue Part I Offence Notices in order to deter behaviour on buses and at the transit terminal will create a safe environment for staff and riders and will positively impact the overall perceived level of safety in the downtown core • Reduces the gap between security and police and what can be effectively handled before being escalated to police collaboration • Addresses a safety concern raised by transit operators and discussed by the Transit Task Force • Initiative is scalable in order to provide a response to security issues at libraries, pools, parks and further offers a level of service for potential cannabis related complaints • Will positively impact the reputation of Transit Services and may result in increased ridership, increased employee engagement and increased public trust • Will support increased "bench strength" for other by-law positions when considering this will be a lower entry point into enforcement roles of the department 	<ul style="list-style-type: none"> • An internal service is more costly than a contracted service, with the City having higher per-hour wages and associated operating costs • More forward approach to stopping offensive behaviours creates possible health and safety risks, which will have to be managed by existing management.

V. Alternatives**Alternatives Considered**

Solution Options	Advantages/Disadvantages	Financial Impact
Maintain the provision of two contract security guards at the Transit terminal supported by an in-house MLEO mobile response unit.	<p>Advantage: reduces the overall cost of the initiative while still offering a mobile response to issues on board buses. Further, mobile response can provide additional support to higher level issues at the terminal than would a contracted guard and may be able to issue a notice under the Provincial Offences Act.</p> <p>Disadvantage: guards at the Transit terminal have limited enforcement options and would require the support of a mobile guard to host enforcement such as a ticket.</p>	Overall net annual cost is \$902,001 plus
Where staff have recommended MELOs for both Transit and mobile response an alternate option is to contract out both services.	<p>Advantage: the overall cost is reduced. A mobile response model will be in place to support limited response to on board bus issues.</p> <p>Disadvantages: control over the quality of guards is a challenge outside of meeting the minimum requirements of a contract. Guards are paid less per hour and the loyalty and ownership for the position is less than an internal employee.</p>	Overall bet annual cost is \$642,417

Business Case for Service Level Change

Request/Project Name: Permanent Mattress & Box Spring Recycling Program

Department: Growth & Infrastructure

Division: Environmental Services

Council Resolution (if applicable): OP2018-18 and CC2018-197

I. Executive Summary

Overview of Proposal

The proposal seeks to develop a permanent mattress and box spring recycling program. The program would initially focus on larger mattresses and boxsprings generated from the Sudbury area. Over time the program would be expanded to include smaller units across Greater Sudbury. This business case assumes a gradual transition over time across different areas of the City. The successful implementation of this program will have significant impact on the life of the City's existing landfills.

II. Background

Current Service Level

With the exception of a few recent pilot projects, the City of Greater Sudbury landfills all mattresses and box springs. These items are large, bulky and are built to withstand continuous compaction at the landfill. The stored energy in the mattresses, for example, will cause mattresses to pop out during compaction and metal springs often get tangled in the moving parts of landfill equipment. Due to very low density and compaction ratios which is approximately 400% less than regular garbage, they occupy large volumes of landfill space and since the materials are highly durable, they decompose extremely slowly. They can also cause leachate to percolate up rather than down, causing strong odours.

Drivers for Proposed Course of Action

The main driver for this proposed change is to avoid using landfill space for recyclable items. Landfill space is valuable and should be kept for non-recyclable waste. This helps postpone expensive landfill closure costs and extremely expensive future disposal systems. Other drivers include the re-purposing of the components (i.e. foam, fabric, metal and wood) into new items or as an energy source and the reduction to landfill equipment damage.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget	<input checked="" type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input type="checkbox"/>	Investment in project (Capital)

Recommendation

It is recommended that the City implement a permanent mattress and box spring recycling program. With limited landfill capacity, it is essential to divert as much waste as possible to postpone the seemingly impossible task of siting and receiving approvals for a new site. Diverting mattresses and box springs away from landfills will assist the City in postponing these extremely expensive costs and will free up landfill space for non-recyclable waste.

How does this align with Council's Strategic Plan?

<input type="checkbox"/>	Growth and Economic Development	<input type="checkbox"/>	Responsive, Fiscally Prudent, Open Governance
<input type="checkbox"/>	Quality of Life and Place	<input checked="" type="checkbox"/>	Sustainable Infrastructure

Sustainable infrastructure has been identified as one of four key pillars under Council's strategic plan. This proposal supports the concept that landfill sites are currently an essential infrastructure requirement for the City and should be wisely used so that landfill space is available for the future.

IV. Impact Analysis**Qualitative Implications**

The proposal will divert recyclable mattresses and box springs from landfill sites. This will reserve more landfill space for non-recyclable wastes. The program is expected to extend each landfill site at least one year over the remaining life of each landfill, if waste generation and diversion rates remain the same.

Quantifiable Implications

With a phased in approach, the program will initially cost approximately \$120,000 per year, with an initial one-time cost of approximately \$20,000 for a protective cover in Sudbury. In 2020, two additional protective covers would be constructed at an estimated one-time cost of \$40,000. In 2021, the program would be expanded across Greater Sudbury and include smaller mattresses and box springs. The 2021 expansion is estimated to cost an additional \$300,000 per year. Program portions may be expedited if external funding becomes available or if alternative service delivery models become viable.

Operating Revenue - Incremental**Detail**

Various	IW	On-going	PT Hours	165				
		Permanent		-	-	-	-	-
		PT Hours		165	-	-	-	-

Net Impact	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
On-Going	\$ 120,000	\$ -	\$ 300,000	\$ -	\$ -
One-Time	\$ 20,000	\$ 20,000	\$ (40,000)	\$ -	\$ -
Total	\$ 140,000	\$ 20,000	\$ 260,000	\$ -	\$ -

Implementation

Implementation will commence shortly after Council approval and will expand as detailed above. The expansion in 2021 is related to the waste collection tender. This tender will need to specify that all mattresses and box springs must be segregated from other garbage. The current tender only requires that larger mattresses and box springs be segregated from garbage since the items are too large to be safely compacted in the co-collection vehicles.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> • Reserve landfill space for non-recyclable waste • With a program established, the City will be prepared to take advantage of external funding tentatively scheduled for 2020. • Reduce landfill equipment time and reduces breakdowns • Reduce the chance of nuisance odours caused by mattresses blocking the downward flow of leachate • Increases capacity for waste collection packers, allowing for more non-recyclable waste to be collected. • Re-purpose foam, fabric, metal and wood • Segregates items that are heavy that can be collected by a vehicle with lift 	<ul style="list-style-type: none"> • Phased in approach delays the full impact of the advantages listed • There's a risk that waste collection cost will increase in 2021 in order to have all mattresses and box springs segregated from the regular garbage stream (only larger units are currently segregated).

V. Alternatives

Alternatives Considered

Solution Options	Advantages/Disadvantages	Financial Impact
Establish a complete mattress and box spring recycling program for all sizes across Greater Sudbury in 2019.	Full impact of the advantages listed above. The main disadvantage is the cost to implementing a segregated collection (~\$393,000) of the smaller units across Greater Sudbury outside the tendering process.	\$ 873,000.00
Establish a limited mattress and box spring recycling program with an overall net financial impact of \$200,000 per year.	Advantages would be as listed above but limited. The main disadvantage is that we would continue to landfill a certain amount of mattresses and boxsprings, but it would be better than the status quo.	\$ 200,000.00

Business Case for Service Level Change

Request/Project Name: Pioneer Manor Bed Redevelopment

Department: Community Development

Division: Long Term Care

Council Resolution (if applicable): CC2017-374

I. Executive Summary

Overview of Proposal

Pioneer Manor is responsible for the delivery of long-term care to 433 residents. Currently, 149 of Pioneer Manor's 433 beds are considered to be below the "A" standard in terms of structural compliance.

In October 2014, the Ministry of Health and Long-Term Care (MOHLTC) announced the Enhanced Long-Term Care Home Renewal Strategy (ELTCHRS), which offers a construction funding subsidy to encourage the redevelopment of 35,000 structurally non-compliant long-term care beds across the province of Ontario.

On November 22, 2017, Council approved resolution CC2017-374, authorizing preparation of architectural designs for the Pioneer Manor capital bed redevelopment. Pending Council approval in the 2019 budget, the City will enter into a development agreement with the MOHLTC, who will review the design and approve the construction funding subsidy.

Following a market analysis conducted by the architect, the initial cost estimate for the redevelopment was increased from \$31.2 million to \$51.2 million. The original estimate was based solely on hard construction costs for the new building that will house the 149 redeveloped beds, and did not include interior renovations to the existing building, site development/landscaping, equipment, relocation of the employee parking lot, relocation of the ring road, or contingency fees. Furthermore, according to the architect, prices in the construction market have escalated since 2017, contractor overhead rates are 4 to 5 % higher, and the impact of new tariffs on steel and associated metal construction materials has resulted in material price increases of 8 to 10 %.

Detailed explanation of cost escalation:

- The original estimate developed in 2017 was quantified at \$31.2 million.
- The current estimate, valid until the summer of 2019, is quantified at \$51.2 million.

The following rationale provides details to explain the variance between the 2 estimates as well as elements added to the current design as a result of the detailed investigation and design studies generated as part of the current design option;

- The current design incorporates more private bedrooms than originally anticipated as well as an increase in the dining rooms to suit the expected larger number of mobility devices and a second activity room at every home unit (\$3.2 million),
- The addition of a resident/public activity room on the main floor (2,325sf) to enhance residents quality of life on campus and second elevator (\$1.4 million),
- Renovations within the existing building will provide a more direct public access corridor between the facility's main entrance and the proposed addition located at the rear of the complex and to accommodate impacted staff (\$2.6 million),
- Landscaping and site redevelopment with enhanced walkways, activity zones, vehicular circulation routes and relocated vehicle parking areas. This will result in increases to the campus' exterior activities and safer uses by residents and their families (\$2.6 million),
- Inclusion of micro pile foundations to suit the project's poor soil conditions (discovered as a result of the geotechnical study undertaken as part of the current design study) and escalating material prices as a result of a very active construction market experienced in 2018 and expected to continue into 2019 (\$5.2 million),
- Increase in general contractor's overhead and profit as a result of a very active construction market experienced in 2018 and expected to continue into 2019 and escalation to the expected tender period of summer of 2019 (\$3.7 million),
- Equipment for the new facility previously excluded from the original budget, including ceiling lifts and tracking, tubs (\$1.2 million),

The variance due to the above noted factors totals \$19.9 million

External borrowing at 3.8 % for 25 years equates to approximately \$3.1 million of interest costs, which is proposed to be funded by a construction funding subsidy of \$0.9 million, increased long-term care preferred revenue of \$0.5 million, and an increase in the municipal tax levy of \$1.7 million.

Once all residents have moved over to the new wing, Pioneer Manor will have close to 55,000 square feet of vacated space. The outlined cost for redevelopment does not include any of the future vacated space. The only cost is as a result of resolution CC2017-374, directing staff to retain a third party to secure business opportunities to generate revenue from the future vacant space to lessen the impact on the municipal tax levy. This contract was awarded to KPMG, who is expected to complete the work by the second quarter of 2019. Any future renovations of the vacated space will need to be negotiated the tenant(s).

Once bed redevelopment has been approved by Council, Pioneer Manor will engage with MOHLTC on the next set of steps in securing Ministry design approval and confirmation of the construction funding subsidy. Once the new wing has been completed, occupancy approved by the MOHLTC and the residents have moved into the new wing, Pioneer Manor will start receiving the construction funding subsidy.

II. Background

Current Service Level

The 149 structurally non-compliant resident rooms were built to 1970 design standards; they are smaller, and present barriers to providing quality resident care. The smaller rooms, hallways, and doorways make it difficult to navigate residents, carts, wheelchairs, and modern lifting devices. These rooms are not able to accommodate residents who require intensive care using ceiling lifts. Also, this older section of the home does not have air conditioning in the resident rooms, rather only in the hallways and common areas. Hot weather and humidity make it difficult to maintain comfortable resident living and staff working conditions. Residents in the older section often request transfer to the newer parts of the home, resulting in approximately 100 to 130 resident room transfers per year. The redevelopment of these 149 rooms is necessary to provide quality of life for residents, a safer working environment for staff, and equitable standards in terms of accommodation.

Drivers for Proposed Course of Action

The ELTCHRS is encouraging redevelopment of structurally non-compliant beds in long-term care homes. If municipal homes, such as Pioneer Manor, do not participate in the long-term care home renewal, they will fall behind in terms of accommodation standards. Should the capital redevelopment plan not move forward, it is estimated that by 2021, Pioneer Manor will be the only LTC Home in Greater Sudbury with substandard beds, likely affecting its status as a leader in providing long-term care in the community.

The objective of the new LTC building standard is to create a less institutional and more homelike setting, promoting a higher quality of life. Rooms built according to the 1970 design standard have rooms that are much smaller, with less than adequate privacy, as up to four residents with chronic care needs share a washroom. Additionally, smaller rooms, doorways, and washrooms present many challenges for staff in maneuvering and utilizing the equipment required to meet the needs of the residents. The old section of the home is unable to accommodate new technology, such as ceiling lifts, which can be used to reduce staff and resident injuries. The smaller doorways also make navigation difficult for residents in wheelchairs. The new design standard includes one washroom for every two basic accommodation residents, and separate washrooms for residents in private accommodations. This will protect privacy and dignity of residents, and improve the ability of staff to contain any infectious outbreaks.

A secondary driver for action is that the current area for the 149 beds will require significant capital investment in the foreseeable future, as the infrastructure is nearing the end of its useful life.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget		Change to base FTE allocation
	Change to fees (unit price)	<input checked="" type="checkbox"/>	Change to revenues (volume change)
	Investment in project (Operating)	<input checked="" type="checkbox"/>	Investment in project (Capital)

Recommendation

The recommendation is to build a new wing at the back of Pioneer Manor for the 149 beds that have been identified as below the "A" standard of structural compliance. There will be a new connecting hallway, the employee parking lot will be relocated, and a section of the ring road surrounding the existing building will be rerouted.

On October 4, 2018, following a presentation of the schematic design by the architect, the Committee of Management unanimously endorsed the \$51.2 million bed redevelopment project for Pioneer Manor and asked that staff continue to move forward with the capital redevelopment business case for the 2019 budget.

How does this align with Council's Strategic Plan?

	Growth and Economic Development		Responsive, Fiscally Prudent, Open Governance
<input checked="" type="checkbox"/>	Quality of Life and Place	<input checked="" type="checkbox"/>	Sustainable Infrastructure

The capital redevelopment business case is in alignment with the Mission, Vision, and Values of the City of Greater Sudbury Strategic Plan, by enhancing the quality of municipal services provided to the residents at Pioneer Manor, while also revitalizing Pioneer Manor to meet the future needs of long-term care in the community.

The Strategic Pillar of Quality of Life and Place included a priority to create programs and services designed to improve the health and well-being of youth, families, and seniors. Action item (d) under this priority was to investigate the feasibility of redeveloping the remaining B and C level beds at Pioneer Manor.

Furthermore, the Strategic Pillar, Sustainable Infrastructure is responsible for the prioritization, building and rebuilding of community infrastructure. Capital redevelopment falls under this strategic priority, as Pioneer Manor has identified 149 beds that were built in the early 1970s that are below provincial standards of structural compliance.

IV. Impact Analysis

Qualitative Implications

The project would enhance quality of life and place for residents, families and staff. The new long-term care design standards are more homelike, and the standard of a washroom for every two basic accommodation residents (rather than four) provides increased privacy and dignity for residents. Heat and humidity provide challenges to maintaining comfortable living and working conditions for residents and staff as there is no air conditioning in resident rooms in the old section of Pioneer Manor. This project would result in compliance with current long-term care design standards. The bed redevelopment investment will improve the current level of service, and provide for increased sustainability.

Quantifiable Implications

Decrease in internal transfers by 100 to 130 per year - Pioneer Manor has an internal waiting list of residents who are residing in rooms identified as below standard, who want to reside in a newer, larger room.

Decrease in complaints by residents and family members regarding the temperature in the old section - Rooms in the old section have limited to no air conditioning resulting in many complaints during the summer months. The old section is heated by electric baseboard heaters, with less than adequate insulation in walls, causing some colder areas, and leading to high electricity consumption.

Decrease in maintenance cost for older plumbing and other building components.

	On-Going		\$ 324,938	\$ 500,000	\$ 1,168,840	\$ 1,343,840	\$ -
	One-Time		\$ 10,370,460	\$ 32,725,000	\$ 8,183,540	\$ -	\$ -
Total			\$ 10,695,398	\$ 33,225,000	\$ 9,352,380	\$ 1,343,840	\$ -

Impact to Capital

If approved, this business case will result in a new capital project that is debt financed. Cash flow required for construction by year is indicated above. Consistent with previous long-term care projects the Ministry provides any approved construction funding in monthly payments to coincide with the debt payments over 25 years .

FTE Table

Total				\$ 324,938	\$ 500,000	\$ 646,884	\$ 750,761	\$ (140,324)

Implementation

The project architect has completed the schematic design at a cost of approx. \$270,000. With Council's approval, a development agreement with the province can be executed and the design can be submitted for review and approval. The estimated time to complete the redevelopment project is 18 to 24 months. The financial numbers above assume occupancy by the end of June 2021.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> • Cost sharing with the provincial construction funding subsidy • Homelike design, less institutional, with enhanced resident privacy and dignity • Increased resident living and dining space, and barrier-free washrooms • Standardization of all rooms • Potential to reduce employee injuries with the installation of ceiling lifts in the new section • New section will be energy efficient with proper air conditioning in each room, and heat controls to allow for resident and family comfort 	<ul style="list-style-type: none"> • May impact the ability to fund other capital projects within the City

Solution Options	Advantages/Disadvantages	Financial Impact
Renovate vs. Build New	<p>Advantage:</p> <ul style="list-style-type: none"> - Reduced cost of \$18 million for renovation compared to \$51.2 million to build new <p>Disadvantage:</p> <ul style="list-style-type: none"> - Unable to relocate all residents for the duration of renovations; there is currently no space able to accommodate all 149 residents within Sudbury for 18 to 24 months - Reduction in bed count from 149 beds to 110 beds due to space needed in order to conform to the new building standards - Loss of ministry revenue with the reduction to 110 beds, resulting in an increase to the net operating budget - Closure of LTC beds in the city will increase wait times 	None - unable to accommodate
Status Quo	<p>Advantage:</p> <ul style="list-style-type: none"> - No impact to the local tax levy <p>Disadvantage:</p> <ul style="list-style-type: none"> - Residents continue to occupy beds that have been identified as being below the "A" Standard in terms of structural compliance. Residents continue to cohabitate in an environment that is less than desirable and does not promote quality of life and dignity for each resident. Pioneer Manor will not been seen as a long-term care leader in the City of Greater Sudbury. In the foreseeable future will be the only LTC Home with identified beds below the "A" Standard. 	None

Business Case for Staffing Change

Request/Project Name: Permanent Animal Shelter

Department: Corporate Services

Division: Security and By-law

Council Resolution (if applicable): CC2017-154

I. Executive Summary

Overview of Proposal

On May 30, 2017, Staff provided Council with an update on the pilot program for Shelter Services. The one year pilot program was extended, and through resolution CC2017-154, Staff were "directed to bring a business case analysis to support decision making on options for a permanent solution for the location and operation of Pound Services to Council during the 2019 Budget deliberations". During the 26-month pilot project for animal shelter services, the Bylaw Department has provided an efficient, accountable and transparent service level for Animal Shelter services that meets or exceeds the expectations of the community. The pilot has confirmed that the service can be provided by municipal staff at a cost that is less than the last comparator contract price. While placing emphasis on responsible pet ownership in the community, the service level offered has fostered a sense of trust in this municipal service and created many partnerships that benefit the health and wellbeing of animals and residents. Within this Business Case, Staff propose to transfer the current pilot project to a permanent municipal service. Further, Staff recommend starting a siting process which would allow for a more central location for the shelter. The City of Greater Sudbury Animal Shelter provides for the care and shelter of approximately 1,000 animals annually. In addition to the provision of animal care at the Shelter, this service level supports enforcement and an officer response to a number of animal, sign or traffic complaints in the community. Budgeted annual operating expenses for the Shelter are \$635,780. User Fees for Shelter Services provide approximately \$285,710 in revenue annually. The net annual cost of the service level for the Animal Shelter is \$350,070. This recommendation is based on already approved budgets with a minimal forecasted increase of \$21,248 annually for benefits associated with the transfer of limited positions to permanent FTE's.

II. Background

Current Service Level

Since October 2016, the City of Greater Sudbury has provided animal control enforcement in the community, with a hybrid response model that allows for overlap between times where Municipal Law Enforcement Officers are responding to other bylaw cases in the community and can further align the response to animal cases. An after-hours emergency service is provided to the public for incidents that require immediate attention to ensure the health and safety of the animal (or community in extreme cases). The department completes approximately 2,200 animal control cases per year. At an annual reported cost of \$475,144, within the 2016 MBNC Performance Measurement Report, the City of Greater Sudbury is the second lowest ranked municipality providing the service level. The cost of the service further falls well below the median average annual cost of \$555,513 for municipalities enforcing animal control by-laws. In addition to animal control enforcement, using Junior Bylaw Enforcement Officers, the City of Greater Sudbury provides animal shelter services, currently within a pilot project. The Shelter receives over 1,000 domestic cats and dogs per year. The Shelter is open to the public seven days a week for adoption or animal redemption. In addition to assigned enforcement duties, Junior Bylaw Enforcement Officers clean animal areas, feed animals, provide vaccinations and complete administrative tasks associated with redemption, adoption and animal licensing. To ensure the comfort of all animals during their redemption period, a veterinarian completes specific animal medical treatments and euthanasia services. The City collaborates with local animal rescues to increase animal adoption rates in the community and to lower the length of stay for animals in the care of the City. The City provides a transparent service to the public, offering photos and videos of animals being socialized within the Shelter environment.

Drivers for Proposed Course of Action

Costs for the contracted Animal Shelter and Enforcement Service were \$414,201 in 2013 and \$460,905 in 2014. For 2015, a new contract was negotiated with the same service provider, which saw contact costs increase in 2015 and 2016. Respectively, the municipality paid \$610,560 and (would have been, if not taken in house in October) \$622,771 for those years. Within the contract, the service provider maintained all associated shelter revenues and received 50% of all municipal animal license revenue collected. In 2016, the City of Greater Sudbury released an RFP for Shelter Services and saw quoted prices increase. The City would have spent \$550 per animal or \$577,500 per year on this contract for service and lost 50% of license revenue and 100% of other revenues totaling approximately \$200,000. The collective agreement with CUPE Local 4705 (Inside Unit) requires CGS to post full time unlimited jobs for permanent, recurring work. Although there is special project language within the CBA that allows for a 24-month posting, there are a small number of staff (two to three) whose limited assignments are exceeding the 24-month limitation.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input type="checkbox"/>	Change to base operating budget	<input checked="" type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input type="checkbox"/>	Investment in project (Capital)

Recommendation

Based on the success of the 26-month pilot project for shelter services, and using the differential savings of approximately \$308,430 annually between in-house and contracted service, Staff are recommending animal shelter services to be a permanent City service.

To accomplish this transition, Staff recommend the following;

- Transfer one limited F/T Junior Bylaw Officer FTE and 2,500 part-time hours from temporary/limited to permanent
- Citing appropriately zoned land on which to construct a 6,000 sq. ft. Animal Shelter within the City Limits. This will allow for up to 1,000 sq.ft. for staff space and 5,000 sq.ft for animals (see quantitative implications below).

How does this align with Council's Strategic Plan?

<input type="checkbox"/>	Growth and Economic Development	<input checked="" type="checkbox"/>	Responsive, Fiscally Prudent, Open Governance
<input checked="" type="checkbox"/>	Quality of Life and Place	<input type="checkbox"/>	Sustainable Infrastructure

Aligning with Council's strategic plan pillar of Responsive, Fiscally Prudent, Open Governance, in 2015, Council took steps to get to know the needs of the entire community through a community consultation survey on animal control and shelter services. With 825 responses, 80% of respondents viewed "animal services as a high priority for the City of Greater Sudbury". It further indicated that most residents felt strongly that Animal Services were not meeting their expectations in the service areas of public education, field services (including enforcement) and animal care in the shelter. This recommendation is based on the success of the pilot project for the Shelter where the City has achieved increased public trust and accountability in the area of animal services and enforcement. Further, this recommendation refers to a commitment made by Council through Resolution CC2016-52 when the City of Greater Sudbury formally adopted a Low Kill Service philosophy with a 90%+adoption rate based upon the 11 core tenets, generally recognized as being: Trap-Neuter Release (TNR); High-Volume, Low-Cost Spay/Neuter Programs; Rescue Group Partnerships; Foster Care; Comprehensive Adoption Programs; Pet Retention; Medical & Behavior Programs; Public Relations | Community Development; Volunteers; Proactive Redemptions; and

Compassionate | Accountable Management. Supporting the safety and well-being of domestic pets in the community and within the direct care of the City, this further aligns with Council's strategic plan for Quality of Life and Place.

IV. Impact Analysis

Qualitative Implications

Making this service permanent will continue to provide a fiscally responsible municipal service that aligns with the expectations and needs of residents in the community. It concludes a pilot program where staff worked hard to learn all associated and relevant fiscal costs of animal Sheltering in order to ensure a fiscally responsible service for the community. Making this service permanent will increase employee engagement in the area and provide opportunity for Shelter staff to gain permanent employment with the City of Greater Sudbury after working limited positions during the pilot project. With a permanent service in place, Staff can consider siting options for the Service in order to address health and safety and communications (cell and internet) at the current location, again positively impacting employee engagement and productivity. Where the Shelter Service already has a positive reputation in the community, and has been used as a template for other Municipalities, the conclusion of the pilot program and creation of a permanent service will bolster the reputation of the department and the City as a whole.

Quantifiable Implications

The financial impact of this initiative will be slightly higher than the already approved departmental operating budget as a result of additional costs to transfer two current limited positions to permanent FTEs. An additional annual \$21,248 of salary and benefits will be incurred as a result of added employee benefits attached to permanent positions. Revenue achieved through User Fees for animal redemption, microchip services, animal boarding, adoptions and canine license sales of approximately \$295,310 will continue. The current location of the Shelter, at a leased facility in Wahnapiatae is not sustainable as there are concerns for the integrity of the building and inefficiencies for the amount of travel for staff to transfer animals and respond to calls. Staff recommend beginning a siting process for municipal property with adequate zoning, setbacks and municipal services in order to construct a 6,000 sq. ft. Animal Shelter within the City Limits. This will allow for up to 1,000 sq.ft. for staff space and 5,000 sq.ft for animals. With construction costs at \$200 and \$350 per sq.ft., the estimated cost of the build would be approximately \$1,550,000. Recommending a debt repayment model, considering mortgage rates between 3.6%-4.0% and an amortization period between 20-30 years, the annual cost of borrowing would be between \$89,000-\$110,000 annually, thus allowing for an overall annual savings of approximately \$198,430 (the net benefit compared to contracting for the service level considering all costs and revenues, including cost of borrowing for the newly cited location). Comparing utility costs of a 12,000sq.ft. Solid Waste Education/Administration facility that average (four years) \$18,938, Staff do not foresee an increase to the current budget amounts when comparing operations between the current leased facility and a new location.

Operating Revenue - Incremental**Detail**

Description	Duration	Revenue Source	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
Debt	One-Time		\$ (250,000)	\$ (250,000)	\$ (800,000)	\$ 1,550,000	
	On-Going		\$ -	\$ -	\$ -	\$ -	\$ -
	One-Time		\$ (250,000)	\$ (250,000)	\$ (800,000)	\$ 1,550,000	\$ -
Total			\$ (250,000)	\$ (250,000)	\$ (800,000)	\$ 1,550,000	\$ -

Operating Expenditures - Incremental**Detail**

Description	Duration	Funding Source	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
Salary	On-going		\$ (145)				
Benefits	On-going		\$ 21,393				
Building Lease	On-going			\$ (49,000)			
Contribution to Capital	One-Time		\$ 250,000	\$ 250,000	\$ 800,000	\$ (1,550,000)	
Debt Repayment	One-Time			\$ 110,000			
	On-Going		\$ 21,248	\$ (49,000)	\$ -	\$ -	\$ -
	One-Time		\$ 250,000	\$ 360,000	\$ 800,000	\$ (1,550,000)	\$ -
Total			\$ 271,248	\$ 311,000	\$ 800,000	\$ (1,550,000)	\$ -

Impact to Capital

This recommendation adds a new project to the Capital Budget. The estimated timing of cash flow by year is as follows:

1. \$250,000 is expected to be spent in 2019 for an Architect.
2. 30%-40% of the remaining \$1,250,000 (\$500,000) will be required up front in early 2020 for a contractor as a result of costs associated with mobilization of the project
3. The remaining costs \$800,000 will be into 2021 for project completion.

FTE Table

Position	Bargaining Unit	Duration	Permanent / Part Time	2019	2020	2021	2022	2023
FT Junior Bylaw Enforcement Officer	IW	On-going	Permanent	2				
PT Junior Bylaw Enforcement Officer	IW	On-going	PT Hours	(3,654)				
		Permanent		2	-	-	-	-
		PT Hours		(3,654)	-	-	-	-

Net Impact	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
On-Going	\$ 21,248	\$ (49,000)	\$ -	\$ -	\$ -
One-Time	\$ -	\$ 110,000	\$ -	\$ -	\$ -
Total	\$ 21,248	\$ 61,000	\$ -	\$ -	\$ -

Implementation

The business case will be implemented by transferring current limited staff to permanent City employees. Following this, consideration will be made for siting of a new facility. The City is currently leasing the Shelter for \$49,000 annually. The location of this shelter presents challenges both to residents and staff when considering the distance from the City core (26km). The remoteness and size of the facility presents challenges to staff and residents for the continued operation at this location. For this, and considering costs associated with retrofit of any current facility to create a specialized facility, Staff recommend continuing within a lease agreement until such time that a facility be built on City property.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> • Addresses concerns of the Union about the impact on staff • Service level that aligns with the needs/wants of the community • Ability to recoup revenue that would otherwise be lost to a contractor • Controllorship over all animal related activities in the City-combined with enforcement service level • Fiscally responsible service for the community • Address concern about the longevity of the leased facility and ability to renew the lease year over year. • Permanently address the remoteness of the shelter location and its impacts on employees, cost and the general public 	<ul style="list-style-type: none"> • Take on a service permanently that many other municipalities bid to private enterprise in the animal shelter business • Increased risk of injury for staff that perform shelter services • High stress environment for staff that work in the position(s)

V. Alternatives

Alternatives Considered

Solution Options	Advantages/Disadvantages	Financial Impact
Contract out animal shelter services	Disadvantage(s)- less control over the service as it relates to customer service, professionalism, animal care. Possible increase in euthanasia rates in the community that would go against Council commitments for a low kill shelter	Increase in budget for the service
Continue services at the existing leased facility	Disadvantage(s)- longevity of the facility is questionable. Sustainability of the service is not gauranteed when leasing such an important asset in the delivery of the service	Service conintuity

Business Case for Service Level Change

Request/Project Name: New Sidewalk Funding

Department: Growth and Infrastructure

Division: Infrastructure Capital Planning Services

Council Resolution (if applicable):

CC2018-263

I. Executive Summary

Overview of Proposal

Streets are a significant aspect of the public realm and need to be designed to enable access for all users of the transportation system, including pedestrians. The Sidewalk Priority Index was recommended within the Transportation Master Plan, presented to and recommended for approval by the Operations Committee (OP2017-17) and approved by City Council on August 22, 2017 (CC2017-236). The Sidewalk Priority Index is used to examine the City's road network as a whole to determine where pedestrians are travelling and where there are gaps in the sidewalk network. On November 20, 2018, City Council passed resolution CC2018-263, directing staff to prepare a business case to allocate \$500,000 annually within the Capital Budget for the specific purpose of installing new sidewalks in areas that are deemed a high priority, as identified through the Sidewalk Priority Index. It is anticipated that these funds will be used for new sidewalks that may be constructed independently or in conjunction with other capital projects.

II. Background

Current Service Level

The City currently allocates annual funding within the Capital Budget for the construction of new sidewalks and the maintenance/ replacement of existing curbs and sidewalks. In recent years the funding has been used primarily for the maintenance/replacement work and new pedestrian facilities on planned roads capital projects. Staff use the Council-approved Sidewalk Priority Index, as well as network connectivity analysis, to determine where sidewalks or other pedestrian facilities are required. Funds to deliver the new required/recommended pedestrian facilities for planned capital projects are included within the project amounts presented in the Capital Budget. A project for \$1,000,000 of construction of new sidewalk and existing sidewalk repair has been included in the proposed 2019 budget. It is anticipated that at least 50% of this project will be used for new sidewalk. An annual amount of \$600,000 is currently proposed for new sidewalk and maintenance of existing sidewalk in the 2020 to 2023 outlook.

Drivers for Proposed Course of Action

Sidewalks facilitate active living and are an essential component of good neighbourhood design, providing a safe pedestrian environment and access to other transportation linkages such as transit stops and trails (CGS Official Plan, Section 11.7). The City is currently working on a number of initiatives which support the construction of additional sidewalks in locations where gaps exist within the network. In July 2018, Council passed resolution CC2018-196 approving the Complete Streets Policy, which hinges on the principle that people who travel by foot, bicycle or transit are legitimate users of the transportation system and equally deserving of safe facilities to accommodate their travel. The success of the Transit Action Plan, currently under development, will also be closely linked with citizens' ability to access the transit network through a safe and connected pedestrian network. Further, in 2018 City Council approved the Call to Action for Population Health (CC2018-258), a priority of which is 'Healthy Streets'.

III. Recommendation

Categorize your specific request (mark an 'X' for all that apply):

<input checked="" type="checkbox"/>	Change to base operating budget	<input type="checkbox"/>	Change to base FTE allocation
<input type="checkbox"/>	Change to fees (unit price)	<input type="checkbox"/>	Change to revenues (volume change)
<input type="checkbox"/>	Investment in project (Operating)	<input checked="" type="checkbox"/>	Investment in project (Capital)

Recommendation

Council has requested that a business case be prepared for the annual allocation of \$500,000 within the Capital Budget for the specific purpose of installing new sidewalks in areas that are deemed a high priority, as identified through the Sidewalk Priority Index. Allocating dedicated capital funding to close gaps within the existing pedestrian infrastructure network will support mobility for people who walk, citizens' access to transit and opportunities for activity, ultimately improving the health of the Greater Sudbury community.

How does this align with Council's Strategic Plan?

	Growth and Economic Development		Responsive, Fiscally Prudent, Open Governance
X	Quality of Life and Place	X	Sustainable Infrastructure

Under the key pillar of Sustainable Infrastructure, Priority D. is to provide quality multimodal transportation alternatives to connect neighbourhoods and communities within Greater Sudbury. Providing new sidewalks and other forms of pedestrian infrastructure, where gaps currently exist, will enable the City to continue to improve the comfort and safety of citizens who walk while making it a more attractive form of travel or recreational activity.

Under the key pillar of Quality of Life and Place, Priority C. is to create programs and services designed to improve the health and well-being of our youth, families and seniors. Expanding and providing infrastructure that makes it easy for residents to choose to walk whether for utilitarian or recreational purposes, will ultimately lead to Greater Sudbury becoming a healthier community.

IV. Impact Analysis

Qualitative Implications

A dedicated annual Capital Budget fund of \$500,000 for construction of new sidewalks will increase resident satisfaction with the pedestrian infrastructure network and improve citizen's access to transit and other services provided by the City. Building additional sidewalks in Greater Sudbury will also improve accessibility for people with mobility challenges.

Quantifiable Implications

Building new sidewalks will lead to a corresponding increase in both the winter and summer sidewalk maintenance budget as there will be an expectation of citizens that if new sidewalks are constructed, that the City will also maintain them in a state of good repair, particularly during the winter months.

Operating Revenue - Incremental

Detail

Description	Duration	Revenue Source	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
	On-Going		\$ -	\$ -	\$ -	\$ -	\$ -
	One-Time		\$ -	\$ -	\$ -	\$ -	\$ -
Total			\$ -	\$ -	\$ -	\$ -	\$ -

Operating Expenditures - Incremental

Detail

Description	Duration	Funding Source	2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
Sidewalk Construction	On-going	Tax Levy	\$ 500,000				
Materials	On-going	Tax Levy	\$ 1,304				
Labour	On-going	Tax Levy	\$ 175				
Contract Costs	On-going	Tax Levy	\$ 1,509				
	On-Going		\$ 502,988	\$ -	\$ -	\$ -	\$ -
	One-Time		\$ -	\$ -	\$ -	\$ -	\$ -
Total			\$ 502,988	\$ -	\$ -	\$ -	\$ -

Impact to Capital

It is estimated that \$500,000 will result in approximately 500 linear metres of new sidewalk. The estimated number of linear metres of sidewalk will vary depending on site conditions and the supporting infrastructure that may need to be provided. The increase in sidewalks result in an additional operating costs of approximately \$5.97 per linear meter.

FTE Table

Position	Bargaining Unit	Duration	Permanent / Part Time	2019	2020	2021	2022	2023
		Permanent		-	-	-	-	-
		PT Hours		-	-	-	-	-
Net Impact				2019 \$	2020 \$	2021 \$	2022 \$	2023 \$
On-Going				\$ 502,988	\$ -	\$ -	\$ -	\$ -
One-Time				\$ -	\$ -	\$ -	\$ -	\$ -
Total				\$ 502,988	\$ -	\$ -	\$ -	\$ -

Implementation

Funds dedicated to new sidewalk construction will be used, starting in 2019, to close high priority gaps in the pedestrian infrastructure network, as guided by the Council-approved Sidewalk Priority Index rankings of road segments within the City of Greater Sudbury. The top location in the Sidewalk Priority Index is the south side of Regent Street from Long Lake Road to Old Burwash Road. The budgeted funds will be used to the full extent to advance and construct as much of this sidewalk as possible.

Advantages/Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none"> Closing gaps in the sidewalk network will make walking a more attractive and comfortable form of travel for more residents Installing new sidewalk, particularly on high volume, high speed roads, will improve the safety of pedestrians Residents will have more travel mode choice Investing in new sidewalk construction will improve equity in the transportation network for people who walk Enabling more residents to walk will lead to a healthier community with lower incidence of chronic disease (i.e. diabetes, heart disease) Greenhouse gas emissions will be reduced and air quality will improve if more residents are able to walk to their destinations rather than use a vehicle Walkability is directly linked to quality of life 	<ul style="list-style-type: none"> Increased operation and maintenance costs for new sidewalks This new sidewalk funding program will have an effect on the funding for Capital Project Prioritization Program, either by reduction of funds for other capital projects or overall increase in capital project spending. If \$500,000 of funding is added to the funded capital project list, and used specifically for construction of new sidewalks, projects next on the prioritization list would be unfunded for 2019.

V. Alternatives**Alternatives Considered**

Solution Options	Advantages/Disadvantages	Financial Impact
Choose not to allocate \$500,000 annually from the capital budget for the specific purpose of constructing new sidewalk.	Advantage: Funds will not be redirected from the Capital Budget process, namely the Capital Prioritization Program. New sidewalks will be constructed when prioritized with all other proposed capital projects.	N/A

CAPITAL BUDGET

Maley Drive Extension

INVESTING IN SERVICE SUSTAINABILITY: LINKING ASSET MANAGEMENT POLICY AND THE CAPITAL BUDGET

The capital budget represents investments in assets owned by the City. These assets include roads, buildings, water and wastewater pipes, equipment and vehicles used by staff to provide services to residents, and facilities used by residents to enjoy the services provided by the municipality.

As in all household budgets, there are competing demands for capital investment. Is it best to replace the roof or the furnace before the winter months set in? Should a new, more efficient vehicle be considered before the old one starts to cost money? Can the family afford more than one of these investments and if so, how will they pay for them?

Capital budgeting means making choices, setting priorities and developing a plan to ensure assets are in acceptable condition to maintain service delivery at desired levels in the future. This involves an assessment of a variety of risks and of the capacity of assets to produce the outputs necessary to deliver services to the community.

The City's Enterprise Asset Management Policy guides how these choices are made. The policy requires that detailed asset management plans and strategies be created. These plans will provide information that is critical to understanding which investments should be made and when. Once priorities are clear, a long-term perspective is taken to decide the best ways to finance the required capital investments. This long-term perspective drives the contents of annual capital budgets and the forecasted capital plans over a five-year period.

Council has an important role in asset management planning. It is the ultimate authority in determining levels of service expectations. Council approves asset management plans on an enterprise-wide basis and approves asset investment and service delivery requirements for capital and operations through the annual budget process.

The City's policy is based on a number of principles to guide these choices, these principles favour asset investments which:

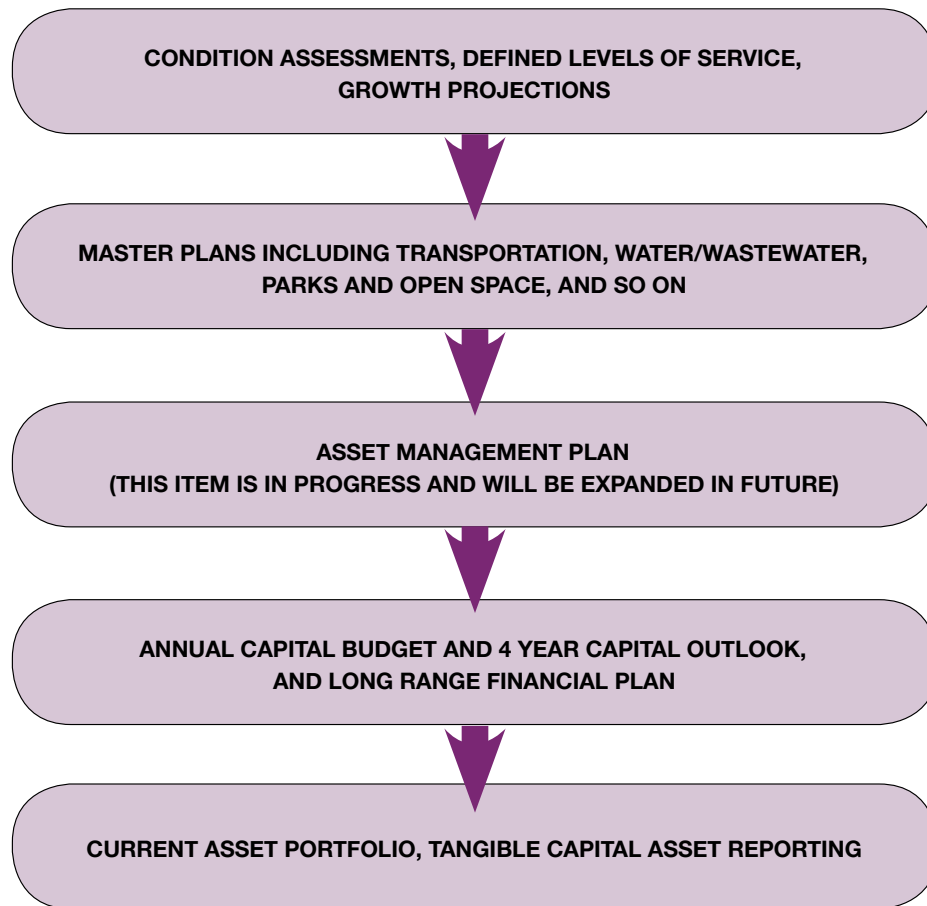

- Minimize the cost of ownership over an asset's life cycle.
- Reduce reactive maintenance costs by planning for asset replacement at the optimal time.
- Connect capital investment plans to long-term financial plans and consider the City's ability to pay for investments now and into the future.
- Monitor performance of assets, noting changes in the asset's ability to provide service.
- Perform maintenance work at the right time to prolong the life of assets.
- Coordinate the maintenance and replacement of interrelated assets (i.e. roads, sidewalks and the pipes and services that are buried beneath them).
- Reduce the overall asset footprint, or size of the City's assets holdings to only those required to provide service.

Municipalities have a number of challenges the average household will not need to consider in their capital investment planning. The City has to favour asset investments which also:

- Deliver defined levels of service that meet legislative requirements like accessibility and environmental requirements.
- Minimize potential liabilities and loss to the public, businesses or visitors to the community.
- Align with infrastructure and land use planning principles.
- Promote innovation and economic competitiveness in the community.
- Maintain assets to protect the health and safety of the public and employees.

Next Steps in Asset Management Policy and Planning

The principles outlined above are a part of an asset management policy that was presented to Council in April 2018. The next steps in the process are directed at providing more accurate information and context for decision-making. This means that our policy statement is translated into a robust asset management plan that reflects both the service levels anticipated by ownership of a given asset and its capacity to respond, referred to as asset levels of service. For example, water service is planned based on a target water pressure. Higher levels of service will generally cost more to develop and maintain. Finding the right balance between affordability and levels of service requires an ongoing examination of data related to condition and service level performance.

The Asset Management Policy describes how this information flows and is reported to Council and the community in order to provide this context. There are key elements already in place, while others are still evolving or will begin in the future. By the end of 2019, the City will produce its first State of the Infrastructure report. Although detailed asset management plans for all asset classes will take several years, this report will provide an enterprise-wide snapshot of asset condition and the risks posed to service delivery for each asset class. As asset management plans and strategies become more detailed so will the City's understanding and confidence that the asset investments being made truly represent the highest order priorities and value for money. While this policy and planning approach is legislatively required by O. Reg. 588 / 17: Asset Management Planning for Municipal Infrastructure by 2024, the City will meet this requirement ahead of the legislated milestones and is already benefitting from this planning approach.

This planning framework begins with the City's current asset portfolio, with an estimated value of over \$7 billion in replacement costs. This portfolio includes facilities, roads, water and wastewater infrastructure, parks and fleet. The City is behind in maintenance and renewal as a result of deferred replacement activities, as shown in the unfunded capital needs in previous capital budget documents and previously stated infrastructure renewal requirements. The City will continue to work on items relating to planning for capital assets that include:

- **Condition Assessments:** Providing an indication of the condition of the asset. The condition of an asset determines whether or not it can provide the level of service required. While some assets can be examined visually, others, such as water and wastewater pipes, are difficult and costly to assess. However, without this information, it is impossible to develop a manageable and affordable renewal plan.
- **Growth Projections:** Asset planning must take into consideration the requirements of new people moving to the city. Population growth requires the development of new assets based on the target level of service.
- **Master Plans:** For each asset class, the City has either developed or is developing a long-term plan using the information described above as the key inputs. These plans are generally more than 20 years in scope and will describe investment, construction and renewal plans for assets to maintain the target level of service.
- **City-Wide Asset Management Plans:** Each of the master plans are consolidated and adjusted to ensure that over time, the required investment plan is manageable, feasible and affordable. Peaks in one plan may require corresponding valleys in another plan to be adjusted so they don't come at the same time.
- **Long-Term Financial Plan:** In addition to the consolidated City-Wide Asset Management Plan, the City will develop 20 to 50 year assumptions regarding revenues and other sources of funding for the plan, as well as assumptions about the cost of operations. A long-term financial plan, which the City completed during the second quarter of 2017, provides guidance for making major decisions. Staff will be able to understand the impact of major financial investments and the capacity in future years and better determine the answers to significant planning and financial questions.

Each project identified in the capital budget means an undertaking for which capital expenditures are made or are to be made, including expenditures to acquire, improve, repair, replace, construct or extend life of land, buildings, structures, machinery and equipment, software, infrastructure, linear assets, and studies.

The capital budget includes the cost of each capital project and the source of funding, including annual contribution to capital, reserves – capital, reserves – obligatory, government grants, debt financing, and third party recoveries. The annual contribution to capital amount is the portion from the annual property tax levy which is shown as Contribution to Capital within the operating budget. For water and wastewater investments, annual contributions to capital are a portion of annual water/wastewater user fees.

CAPITAL PRIORITIZATION PROCESS

The objective of the capital budgeting process is to recommend a plan that addresses the City's highest priority needs based on a rational, enterprise-wide review of risk, service priorities, spending choices and financing options. Capital budget priorities are identified based on an enterprise-wide understanding of service priorities and reflect our best available, and still evolving, data about asset condition, service performance, strategic objectives and financing choices. The end result is a capital plan that is reliable (i.e. we deliver on the service promises inherent in the recommended projects) and executable (i.e. we have the resources to deliver the projects on time and on budget).

In order to achieve this principle an enterprise-wide tool was created that included the following criteria in line with the principles in the Enterprise Asset Management Policy:

1. Strategic Priority (including link to strategic plan, integration and qualitative return on investment)
2. Leveraging Funding Opportunities (including estimated certainty of funding)
3. Risk Management (including legislative requirements and health and safety)
4. Asset Renewal/Restoration (including life cycle costing and environmental return on investment)

A multi-disciplinary team was created to review capital budget project proposals and recommend relative priority rankings for all projects to the Executive Leadership Team (ELT). The members of the team took an enterprise-wide view of the recommended projects. The team presented the results to ELT, and with ELT's guidance a finalized listing with a financing plan now forms the basis of the 2019 Capital Budget.

Several areas did not use the tool for preparation of the 2019 Capital Budget due to their current funding model.

These are Fleet, Water, Wastewater, Paramedic Services, Parking, Parks Equipment and the outside boards. It is possible that some of these areas will be included in future enterprise-wide capital prioritization. For example, recently transitioned housing assets under the care of the Greater Sudbury Housing Corporation will be integrated into this approach in subsequent budgets. Some of these areas must be kept separate but staff is developing a method to report on the state of all asset classes from one enterprise viewpoint in line with our principles and the need to make choices across areas and regulations in the best long-term interest of the community.

LONG-TERM FINANCIAL PLAN

The Long-Term Financial Plan, presented in 2017, covers the years 2018 to 2027 and contains information about infrastructure investment requirements and financing recommendations. It noted that the then recently completed Enterprise Asset Management Plan quantified the infrastructure renewal requirement of \$3.1 billion during the duration of the Long-Term Financial Plan. This is in contrast to the \$1.3 billion projected to be spent on capital during that time. The plan included a number of strategies designed to assist in decreasing the infrastructure renewal requirement thereby decreasing the gap in capital investment required. The City has been working at these strategies and updating Council on progress as follows:

1. Increase the debt limit to 10 % of net revenues to support an increase in allowable debt as the expanded use of debt may represent a strategy of interest to the City.
 - The increase to the debt limit was approved in 2017.
 - The use of debt was approved in 2018 for reconstruction on Lorne Street, improvements to Municipal Road 35 and the replacement of the Sudbury Community Arena.
 - City obtained a AA stable credit rating during 2018.
 - Debt is proposed to be used in 2019 for refurbishment of a number of bridges in the Capital Budget.
2. Consider the adoption of a five-year capital levy that would be used exclusively for capital purposes (including debt or reserve contributions). A multiple year 2 % capital levy would provide upwards of \$80 million over five years and over \$300 million over 10 years. Strategies for use of the levy included the funding of debt servicing costs.
 - For 2019, staff is recommending a 1.5 % special capital levy to be used on the roads infrastructure renewal requirement consistent with recommendations of prior years.

Given the magnitude of the City's infrastructure renewal requirement, the current low interest rate environment and the relatively low level of its indebtedness, the strategies above will contribute toward the long-term financial sustainability of the City.

Infrastructure Requirement Over the Next Ten Years (in millions)

(Per 2016 Long-Term Financial Plan)

2019 CAPITAL BUDGET

The 2019 Capital Budget recommends capital expenditures of \$116.6 million this year. The 2019 Capital Budget addresses the City's most critical capital needs to support strategic business plans and address aging infrastructure and is summarized by department/division and detailed by specific capital projects on the following pages within this tab. The majority of the City's capital needs continue to be related to the replacement of existing infrastructure in the areas of roads, bridges, water/wastewater, facilities and fleet.

The table below summarizes the overall capital budget by funding sources:

Funding Source	2019	2020	2021	2022	2023	Total	2018 Approved Amounts
Annual Contribution to Capital	\$37,988,385	\$33,474,330	\$10,374,176	\$6,863,741	\$5,174,747	\$93,875,379	\$37,777,276
User Fees	\$33,431,663	\$3,593,315	\$4,943,315	\$2,593,315	\$2,593,315	\$47,154,923	\$31,135,330
Reserves – Capital	\$12,751,311	\$1,826,640	\$1,280,640	\$330,000	\$330,000	\$16,518,591	\$13,904,612
Reserves – Obligatory	\$1,370,738	\$3,103,986	\$2,106,013	\$1,075,000	\$1,075,000	\$8,730,737	\$1,175,000
Government Grants	\$22,124,505	\$19,835,926	\$1,473,976	\$1,464,486	\$1,269,576	\$46,168,469	\$35,966,276
Debt Financing	\$6,900,000	\$2,125,000	\$0	\$0	\$0	\$9,025,000	\$130,884,239
Third Party Recoveries	\$2,082,717	\$375,000	\$0	\$0	\$0	\$2,457,717	\$12,514,000
Total Funding = Total Capital Budget Expenditures	\$116,649,319	\$64,334,197	\$20,178,120	\$12,326,542	\$10,442,638	\$223,930,815	\$263,356,733

*Presentation of the 2019 Capital Budget has changed from prior years. The 2019 (and future) capital budgets will be based on the estimated cash flow spending of individual projects in the year expected to be spent, whereas in prior years, the practice was to approve the overall project cost in the first year with estimated funding identified in the same year, as opposed to spread the funding based on cash flow spending. This means that in approving the projects listed in the 2019 Capital Budget, all future cash flows (i.e. in 2020 and beyond) are also approved.

HIGHLIGHTS OF 2019 INVESTMENT RECOMMENDATIONS

Roads and Drains

The Roads and Drains 2019 Capital Budget is approximately \$48.9 million and represents almost 38 % of the capital budget. This is lower than the 2018 budget of \$103.8 million as the 2018 budget included the full estimated spending for Municipal Road 35 of \$33.2 million through use of debt financing and Lorne Street of \$24.9 million through two thirds proposed grant funding. These amounts show the City is continuing to spend at record levels to improve roads in our community.

An increase in Ontario Community Infrastructure Funding (OCIF) from \$6.0 million in 2018, to \$9.2 million (not yet confirmed) in 2019, will be used toward road improvements, including various arterial, collector and local roads such as York Street, Attlee Avenue, Dean Avenue, and Main Street from Municipal Road 15 to the railway tracks.

Federal Gas Tax funds of \$8.8 million are being used to fund various bridge and local road improvements.

A few of the significant projects within the Roads area include York Street, Attlee Avenue, Dean Avenue, CKSO Road, O’Neil Drive East, Douglas Street Bridge, CNR Overpass on Falconbridge Road and Allan Street Bridge. As well as previous Council approvals that includes funding for Maley Drive Extension, Municipal Road 35 and Lorne Street.

Projects within the Drainage area are the McNaughton Terrace Treatment Facility as well as previous Council approved funds toward the Mountain Street Storm Outlet that will be funded in the 2019 Capital Budget.

Roads and Drains Budget History (\$000's)

Water and Wastewater

The capital budget for Water and Wastewater Services is approximately \$40 million in 2019, compared to \$35.8 million in 2018. This increase is mainly the result of higher contribution to capital from operating (from water/wastewater user fees), contributions from reserve funds and recovery from a third party. The increase to the contribution to capital from operating includes a higher allocation due to Council direction for a water/wastewater user fee increase of 7.4 % in 2019 (similar to 2018), in line with the long-term financial plan for this division.

A few of the significant projects in Water includes various watermain replacements of \$6.7 million, well building repairs and upgrades of \$3.3 million, watermain upgrades relating to the Coniston Industrial Park of \$2.0 million, as well as various watermain rehabilitation of \$1.6 million. Some of the specific watermain locations include Dean Avenue, Jane Street, Tudor Court, Municipal Road 24 (trunk watermain), O'Neil Drive East and Allan Street. In addition, there is funding allocated toward the automatic meter reading (water meter) replacement project.

Some of the significant projects in Wastewater include various lift station upgrades of \$5.5 million, sanitary sewer replacements of \$2.0 million, sanitary sewer system rehabilitation and repair of \$1.6 million, as well as wastewater treatment upgrades of \$2.0 million, at the Sudbury Wastewater Treatment Plant and \$1.2 million in the Copper Cliff wastewater system.

Leisure Services

The capital budget includes an investment of \$4.3 million in various leisure facilities and equipment. A few of these projects include building upgrades at the Howard Armstrong Recreation Centre of \$1.5 million and at the Dowling Leisure Centre of \$1.0 million, and investments at Terry Fox Sports Complex of \$0.6 million for artificial turf and parking lot improvements.

Children and Citizen Services

There are significant investments within Citizen Services of \$1.5 million for various building upgrades to museums, cemeteries as well as the previous council funding commitment for the South End Library.

Transit Services

The capital budget for Transit is approximately \$1.2 million in 2019 and includes various transit related studies for Public Transit Infrastructure Fund (PTIF) Phase 2 as well as previously committed funding toward the projects identified in the 2017 Capital Budget from PTIF Phase 1 funding program.

Phase 1 of the PTIF from the 2017 Capital Budget funded 50 % of project costs and continues to be used to accelerate the replacement of transit buses, transit ridership and maintenance software, roof replacement at the transit/fleet garage and other facility replacement and improvement projects. The City funded the remaining 50 % of these projects with \$1.4 million in Provincial Gas Tax funds, including internal financing being repaid with future Provincial Gas Tax funds of \$3.7 million and funds from contribution to capital. The repayment of these PTIF Phase 1 projects is shown in the 2019 Capital Budget from Provincial Gas Taxes of \$0.7 million.

Fire Services

The capital budget for Fire is \$1.3 million in 2019, which includes the purchase of a pumper fire truck as well as the previous funding commitment for the aerial fire truck that was approved in the 2017 Budget.

Facilities

The capital budget for Facilities is \$4.5 million in 2019, which includes various projects at Tom Davies Square, fire halls, transit/fleet garage, as well as two building demolitions. It also includes the previous funding commitments for the Tom Davies Square Courtyard renovations. There are significant capital needs for replacements and improvements to various City facilities due to age, condition beyond useful life, and health and safety concerns. There is currently insufficient funding for the repair and maintenance of these facilities.

Information Technology

The 2019 Capital Budget includes investments in key information technology projects for a total of \$2.0 million. This includes the Customer Relationship Management (CRM) system, the Land and Property Management System (LPMS), and Meeting Management Solution. Each of these capital projects will provide direct benefits to the community through their interactions with the City for various requests and information.

Police Services

Greater Sudbury Police Services Board is reviewing options for a new building. The options and recommendations will be presented in a future budget year and presented to City Council once recommended by the Board. This significant capital project is recommended to be funded by transfers from the Police Capital Financing Reserve fund, which includes previously approved funding, with the remaining \$55 million (estimated) coming from debt financing of \$2.9 million per year over 30 years.

ANNUAL INCREASE TO OPERATING BUDGET

The capital budget includes new or expanded capital assets and infrastructure that will have an impact on future operating budgets when these assets are completed and placed into service. Increases and decreases in operating costs are due to higher staffing costs, materials, contract services and utilities associated with maintaining the operation and use of these new and expanded assets. These new and expanded assets provide for improved technology solutions such as the CRM and the LPMS (Phase 1). The table below shows a summary of the impact on the operating budget for increased expenses as shown within the project details for the respective capital projects below:

Capital Budget Area and Project		Incremental Operating Costs	Incremental Salaries and Benefits	Total
Roads	Annual Recurring Road Programs and Projects	\$750	\$0	\$750
Roads	Arterial/Collector Roads Rehabilitation and Resurfacing	\$18,986	\$0	\$18,986
Roads	Levack Equipment Storage Facility	(\$18,000)	\$0	(\$18,000)
Roads	Loader Hydraulic Crusher Attachment	(\$20,953)	\$0	(\$20,953)
Roads	Lorne Street (MR55)	\$2,987	\$0	\$2,987
Roads	New Sidewalk Construction and Repair	\$1,800	\$0	\$1,800
Roads	Municipal Road 35	\$35,387	\$0	\$35,387
Roads	Traffic Signal System Renewal	\$39,000	\$0	\$39,000
Environmental Services	Sudbury Landfill - Leachate Treatment System	\$35,000	\$0	\$35,000
Facilities	Red Deer Lake Fire Station Demolition	(\$900)	\$0	(\$900)
Communications and Community Engagement (2 FTEs)	Customer Relationship Management System	\$0	\$160,000	\$160,000
Information Technology (1 FTE)	Customer Relationship Management System	\$100,000	\$80,000	\$180,000
Information Technology (1 FTE)	Land and Property Management System - Phase 1	\$200,000	\$105,400	\$305,400
Information Technology	Meeting Management Solution	\$62,000	\$0	\$62,000
Total		\$456,057	\$345,400	\$801,457

FINANCING PLAN

Government Grants

The 2019 Capital Budget includes approximately \$22.1 million in federal and provincial grants. This amount is mainly from ongoing grants of \$19.7 million, which includes: \$9.8 million from Federal Gas Tax; \$0.7 million from Provincial Gas Tax; as well as \$9.2 million from Ontario Community Infrastructure Funding (not yet confirmed). The amount of Provincial Gas Tax funds used in the capital budget varies year-to-year based on the Transit long-term financial plan. In 2019, it continues to represent the financing repayment for the PTIF Phase 1 related capital projects approved in the 2017 Capital Budget.

One-time funding opportunities of approximately \$2.4 million from senior levels of government for PTIF Phase 2 and Northern Ontario Heritage Fund Corporation (NOHFC) are summarized in the chart below. This funding has been announced but no formal funding agreement has been signed. If the government grant funding is not approved, a future report will be presented to Council for direction on the projects and any other funding sources.

2019 Grants	Gas Tax	PTIF	OCIF	NOHFC	Total
Federal Grants					
Bridges and Culverts Replacement and Rehabilitation	\$7,000,000	\$0	\$0	\$0	\$7,000,000
Local Roads Rehabilitation and Resurfacing	\$1,840,484	\$0	\$0	\$0	\$1,840,484
Traffic Signal System Renewal	\$0	\$910,000	\$0	\$0	\$910,000
St. Joseph's Parking Lot Redevelopment Phase 2	\$0	\$130,000	\$0	\$0	\$130,000
Various Transit Related Studies for PTIF Phase 2	\$0	\$250,000	\$0	\$0	\$250,000
Sanitary Sewer System Rehabilitation and Repair	\$960,000	\$0	\$0	\$0	\$960,000
Total Federal Grants	\$9,800,484	\$1,290,000	\$0	\$0	\$11,090,484
Provincial Grants					
Arterial/Collector Roads Rehabilitation and Resurfacing	\$0	\$0	\$5,500,000	\$0	\$5,500,000
Road and Water/Wastewater Improvements	\$0	\$0	\$3,685,917	\$0	\$3,685,917
Traffic Signal System Renewal	\$0	\$418,600	\$0	\$0	\$418,600
St. Joseph's Parking Lot Redevelopment Phase 2	\$0	\$59,800	\$0	\$0	\$59,800
Various Transit Related Studies for PTIF Phase 2	\$0	\$115,000	\$0	\$0	\$115,000
Various PTIF Phase 1 Projects	\$747,626	\$0	\$0	\$0	\$747,626
Coniston Industrial Park Watermain Upgrades	\$0	\$0	\$0	\$507,078	\$507,078
Total Provincial Grants	\$747,626	\$593,400	\$9,185,917	\$507,078	\$11,034,021
Total Grants	\$10,548,110	\$1,883,400	\$9,185,917	\$507,078	\$22,124,505

This is a significant decrease from the 2018 Capital Budget, which included \$17.6 million of one-time capital funding for the Lorne Street/Municipal Road 55 Project as well as the Elgin Greenway Project. As of late 2018, government grants for these projects had not been secured. These projects are on hold until government grant funding is approved, otherwise the projects will be reviewed in a future budget year deliberation for funding sources.

There are a number of ongoing capital projects approved by Council in prior years with government grants, including the Maley Drive Extension and various projects associated with the Clean Water and Wastewater Fund (CWWF) and PTIF Phase 1. The majority of these projects are expected to be completed in 2019 with the exception of the Maley Drive Extension, which is planned for completion by the end of 2022.

Special Capital Levy of 1.5 %

The City's first Long-Term Financial Plan from 2002 recommended an annual increase in capital funding of 2.27 % from each previous year's property tax levy to address infrastructure renewal requirements. As mentioned in the Long-Term Financial Plan Audit by the Auditor General's Office in 2017, previous Councils approved a separate capital levy for a few years during the mid 2000s, which was then offset by a permanent reduction in the capital envelopes in 2010 and further reductions to capital in 2015.

Council has directed staff to provide options to move key projects forward with an additional capital levy of 1.5 %, which would equal an approximate \$3.9 million investment into our infrastructure. If approved, it is recommended that this amount be used to fund specific road capital projects during 2019 such as surface treatment and large asphalt patching which has been a success in prior years. The capital levy is meant to address the infrastructure renewal requirement, including replacement of existing capital assets.

Capital Project/Program	Scope of Work	Objective/Accomplishment
Surface Treatment (approximately \$1.35 million)	Rehabilitate approximately 10 km of surface treated roads.	Complete required rehabilitation on surface treated roads that require rehabilitation sooner than base budget proposal.
Large Asphalt Patches (approximately \$2.55 million)	Single grind and single overlay of approximately 48,000 square metres of asphalt (at assumed lane width of 3.5 m equivalent to approximately 13.7 lane km).	Large asphalt patches are maintenance repairs completed to extend service life of road and extend time to rehabilitation.

If Council approves an additional capital levy for 2019, staff will present a report identifying specific Road capital projects with a risk based enterprise-wide approach.

Debt Financing

The total external debt held by the City is among the lowest as a percentage of “own source” (property taxes and user fees) revenues 20.7 % compared to an average of 41.9 % amongst our comparator municipalities, according to the 2017 BMA Study.

The use of debt financing has been considered and incorporated into the 2019 Capital Budget for bridges and culverts due to continuous low interest rates. The amounts below are in addition to the Council approvals in prior budgets including \$90 million for the Kingsway Entertainment District and Arena/Event Centre (2018 Budget), \$31 million for Municipal Road 35 from Highway 144 to Notre Dame East (2018 Budget) and \$7.7 million for Lorne Street (Municipal Road 55) from Elm Street to Power Street (2018 Budget for the City’s share as estimated two thirds government grants not yet approved).

Projects	Term	Assumed Interest Rate	Total Debt Financing Amount		Total Debt Financing	Total with Interest
			2019	2020		
Bridges and Culverts Replacement and Rehabilitation	25 years	3.80%	\$6,900,000	\$0	\$6,900,000	\$10,809,875
McNaughton Terrace Treatment Facility	30 years	4.00%	\$0	\$2,125,000	\$2,125,000	\$3,686,670
Total			\$6,900,000	\$2,125,000	\$9,025,000	\$14,496,545

Please refer to the Budget Overview tab for additional information on Debt Financing.

Water/Wastewater Capital Budget

Please note that detailed financial information on Water/Wastewater Capital Budget can be found at the Water/Wastewater tab of this document.

2019 CAPITAL PROJECT FUNDING SUMMARY BY YEAR

2019 Capital Project Funding Summary by Year

Recommended Funding	2019	2020	2021	2022	2023	Beyond 2024	Total
Annual Contribution to Capital	37,988,385	33,474,330	10,374,176	6,863,741	5,174,747	56,068,361	149,943,740
User Fees	33,431,663	3,593,315	4,943,315	2,593,315	2,593,315	1,926,136	49,081,059
Capital Reserves	12,751,311	1,826,640	1,280,640	330,000	330,000	-	16,518,591

2019 CAPITAL PROJECT DETAILS

Project Title: Arterial/Collector Roads Rehabilitation and Resurfacing **Project Type:** Recommended

Asset Class: Roads Infrastructure **Department:** Infrastructure Capital Planning

Summary: This project includes resurfacing or rehabilitation of construction in 2019 of the following arterial/collector roads:

- York Street from Regent Street to Paris Street
- Attlee Avenue from Gemmell Street to LaSalle Boulevard
- Main Street East from Municipal Road 15 to Railway Tracks
- Dominion Drive from Elmview Drive to Municipal Road 80

This project also includes design costs for resurfacing or rehabilitation in 2019, with the construction costs in 2020 of the following arterial/collector roads:

- Melvin Avenue from Kathleen Street to Mabel Street
- Kingsway from Barry Downe Road to Falconbridge Highway
- Brady Street from Underpass to Keziah Court
- Notre Dame Avenue from Dominion Drive to Oscar Street (Hanmer)
- Municipal Road 15 from 600m West of St. Laurent Street to Montee Principale
- Walford Road from Regent Street to Paris Street
- Auger Avenue from Hawthorne Drive to Falconbridge Highway
- Valleyview Road from Martin Road to St. Laurent
- Kelly Lake Road from Copper Street to Junction Creek Bridge
- Hill Street from Hwy 17 to 0.9 km South

2019 CAPITAL PROJECT DETAILS

Project Title: Bridges and Culverts Replacement and Rehabilitation
Asset Class: Roads Infrastructure
Project Type: Recommended
Department: Infrastructure Capital Planning

Summary: The following bridges and culverts are scheduled for rehabilitation or replacement in 2019:

- Douglas Street Bridge, CNR Overpass (Falconbridge Road)
- Allan Street Bridge
- Frappier Road Bridge
- Martindale Road Bridge
- Nelson Lake Road Bridge
- CPR Overpass (Elm Street West)

The design phase for the rehabilitation or replacement of the following bridges is scheduled for 2019, with the construction following in 2020:

- Spanish River Road Bridge
- Beatty Street Bridge
- High Falls Road Bridge
- Moose Mountain Road Bridge
- Walter Street Bridge
- Old Soo Road Bridge

This also includes the funding for engineering and pre-engineering field work for rehabilitation or replacement of the College Street Bridge which will include pedestrian facilities, a review of other active transportation facilities and a review of the horizontal and vertical alignment of College Street and the bridge. This project also includes the replacement of large culverts in 2019 as part of the annual program.

2019 CAPITAL PROJECT DETAILS

Project Title: Capital Project Delivery Resources
Asset Class: Roads Infrastructure

Project Type: Previously Approved
Department: Infrastructure Capital Planning

Summary: Represents funds previously approved by Council for additional staff for a period of five years. This is to allow the City to maximize investments from senior levels of government (funding commitment is from years 2018 through to 2022). This is to address the significant increase in workload to deliver the capital program (i.e. Maley Drive Extension, Clean Water and Wastewater Fund, PTIF, OCIF).

Project Title: Complete Streets Design Guidelines
Asset Class: Roads Infrastructure

Project Type: Recommended
Department: Infrastructure Capital Planning

Summary: On July 10, 2018 Council passed resolution CC2018-196 approving the Complete Streets Policy and directing staff to prepare a business case to develop Complete Streets Design Guidelines and Implementation Strategy. The development of comprehensive guidelines and a corresponding implementation strategy will provide the City with a consistent and transparent approach to the design of the public right-of-way that integrates key policies, by-laws, standards and guidelines and uses the latest best practices in transportation corridor design. As street design has a direct impact on the work, interests and operations of numerous city divisions (i.e. Infrastructure Capital Planning, Linear Infrastructure Services, Planning Services, Greater Sudbury Transit, Leisure Services), the guidelines will be developed collaboratively with extensive community input and provide a uniform approach to inform, streamline and better coordinate internal decision-making and commenting when reviewing capital infrastructure projects and development applications going forward.

2019 CAPITAL PROJECT DETAILS

Project Title: Construction Services Survey Equipment
Asset Class: Roads Infrastructure

Project Type: Recommended
Department: Infrastructure Capital Planning

Summary: Currently, Construction Services have seven Sokkia GSR2700ISX GPS antennas that were purchased in 2008. Three of these antennas no longer have the ability to receive a radio signal and cannot be used on the GPS network. The remaining four antennas can receive and transmit a radio signal and are used as a network GPS rover. Replacement parts are no longer available and the supplier no longer can service these GPS antennas. The only way to continue to repair these units is to take the necessary parts from one of the other antennas. The plan is to replace four Sokkia GR2700ISX GPS antennas with four Sokkia SOKKIA GCX3 GPS antennas at \$13,000 each. The 4 antennas being replaced will be used to provide parts for the Sokkia GR2700ISX GPS still in operation to extend their useful life further. This plan will ensure reliability of the equipment necessary to continue providing the survey services required for delivery of the capital infrastructure program.

Project Title: Cycling Infrastructure
Asset Class: Roads Infrastructure

Project Type: Previously Approved
Department: Infrastructure Capital Planning

Summary: Represents funds previously approved by Council toward Cycling Infrastructure of \$800,000 per year. This is to improve transparency regarding the City's investment in the Active Transportation Network, and to construct cycling infrastructure connectivity and road retrofits.

	2019	2020	2021	2022	2023	Beyond 2024	Total

2019 CAPITAL PROJECT DETAILS

Project Title: GIS Database and As-built Drawing Updates
Asset Class: Roads Infrastructure

Project Type: Recommended
Department: Infrastructure Capital Planning

Summary: Every year Engineering Services must prepare as-built drawings to commence and complete capital projects. The City currently has 126 km of linear assets with outdated or no as-built data. This represents approximately 840 drawings and the data required to create them. Engineering Services requires additional resources to update and maintain the as-built drawings to current conditions. It is recommended that two full-time contract draftpersons, two temporary limited instrument persons and two limited temporary rod persons (i.e. two survey crews) be hired and equipped over a four year duration to address this shortfall. All of the above positions would be on a 40 hour work week. There is currently additional capital funding allocated within Water/Wastewater of \$560,000 for this project, which would be supplemented by the funds included herein.

Project Title: Levack Equipment Storage Facility
Asset Class: Facilities

Project Type: Recommended
Department: Infrastructure Capital Planning

Summary: The project objective includes the purchase of property in Levack and the building of an equipment storage facility used for roads winter maintenance operations. The building would have a estimated useful life of 30 years. Council Resolution CC2016-18 and CC2016-19 authorized staff to sell the existing Levack Municipal Building located at 55 Levack Drive and to negotiate alternate depot arrangements in order to retain a sand depot service. Currently, equipment storage and sand storage is being leased that can be revoked at any time.

2019 CAPITAL PROJECT DETAILS

Project Title: Loader Hydraulic Crusher Attachment
Asset Class: Equipment

Project Type: Recommended
Department: Infrastructure Capital Planning

Summary: The project objective includes the purchase of a hydraulic crusher loader attachment. The attachment would allow the recycling of surplus excavated material currently located in the Frobisher Yard for reuse in various Roads and Distribution and Collection (D&C) maintenance activities. Approximately 1,000 metric tonnes of modified granular B as well as 7,600 tonnes of granular A is purchased for use in Roads and D&C operations annually at a cost of \$112,000. Using the loader attachment, the surplus excavated material can be refurbished into an unspecified granular type of material and used in operations.

Project Title: Local Roads Rehabilitation and Resurfacing
Asset Class: Roads Infrastructure

Project Type: Recommended
Department: Infrastructure Capital Planning

Summary: This project includes resurfacing/rehabilitation design and construction in 2019 of the following local roads:

- CKSO Road from Goodview to Leedale
- Vagnini Court from Mumford to End
- Henry Court from George East to George West
- Second Avenue from Bancroft to Railway
- Roy Avenue from Leon to Rinfret

Project Title: New Sidewalk Construction and Repair
Asset Class: Roads Infrastructure

Project Type: Recommended
Department: Infrastructure Capital Planning

Summary: This project includes installation of sidewalk at the highest priority locations as ranked by the Sidewalk Priority Index. The top location is Regent Street from Long Lake Road to Old Burwash Road. Project funds will be used to advance this new sidewalk and complete repairs to existing sidewalks identified as high priority replacement assets.

Project Title: Road and Water/Wastewater Improvements
Asset Class: Roads Infrastructure

Project Type: Recommended
Department: Infrastructure Capital Planning

Summary: This project includes funding for roads improvements to be completed in conjunction with water and wastewater projects. These projects were selected in consideration of both water/wastewater and roads priorities. The streets included in this project for design and construction in 2019 are as follows:

- Dean Avenue from Lorne to Landsend
- St. Brendan Street from Homewood to Marion
- Fairburn Street from Barry Downe to East End
- Henry Street from McDougall to East End, Garson
- Tudor Court from Windsor to East End
- O'Neil Drive East from Penman to Margaret South

Streets included in this project for design in 2019 and construction in 2020 include:

- 10th Avenue from Municipal Road 24 to 9th Street, Lively
- Hyland Drive from Regent to Winchester
- Dell Street from Notre Dame to Snowden
- Maple Street from Reginald to Parkwood

	2019	2020	2021	2022	2023	Beyond 2024	Total

2019 CAPITAL PROJECT DETAILS

Project Title: Silver Hills Phase 2
Asset Class: Roads Infrastructure

Project Type: Previously Approved
Department: Infrastructure Capital Planning

Summary: Represents funds previously committed by Council for the City's share of Silver Hills Phase 2 project that is cost shared with developers and development charges as per report to Council in December 2016. The City's share of estimated costs are as follows:

- Internal Road Segment estimated at \$442,046 funded from existing committed reserve funds from the previous Growth Related Capital Envelope.
- External Road Segment estimated at \$311,715 and Intersection Improvements estimated at \$861,120 to be funded from a combination of Annual Contribution to Capital and Capital Financing Reserve Fund – General.

Project Title: Subdivision Surface Asphalt
Asset Class: Roads Infrastructure

Project Type: Recommended
Department: Infrastructure Capital Planning

Summary: Surface asphalt is placed in new subdivisions annually by the City through one of the annual construction contracts. Deposits are received from the developer to pay for the surface asphalt and when work is completed under City contracts, additional costs exceeding the deposit amounts are funded by the City.

2019 CAPITAL PROJECT DETAILS

Project Title: Surface Treatment
Asset Class: Roads Infrastructure

Project Type: Recommended
Department: Infrastructure Capital Planning

Summary: This project includes the rehabilitation of the following surface treated roads:

- West Bay Road (0.9 km)
- O'Neil Drive West (0.5 km)
- Moxam Landing (1.0 km)
- Fairbanks East (1.0 km)
- Spanish River Road (0.5 km)
- Kantola Road (1.0 km)
- St. Agnes Street (1.0 km)
- Montpellier Road (1.3 km)
- South Shore Road (1.0 km)
- Stinson Hydro Road (0.3 km)
- Beaudry Road (0.3 km)
- Valleyview Road (0.7 km)
- Kalmo Road (0.3 km)
- Morgan Road (2.2 km)
- and various other roads.

This project also includes single surface treatment for various locations.

2019 CAPITAL PROJECT DETAILS

Project Title: Traffic Signal System Renewal
Asset Class: Roads Infrastructure

Project Type: Recommended
Department: Infrastructure Capital Planning

Summary: In 1998, the Region of Sudbury procured a traffic signal system for the regional road network. This system was maintained after amalgamation and is in use today. The version of this system is not compatible with Windows 7 or any newer operating system and lacks many of the features required to more efficiently operate the traffic signal system. The current system also requires the use of proprietary field hardware most of which will not be compatible with a new traffic signal system. This project would involve the procurement of a new traffic signal system and the replacement of all the traffic controllers and cabinets installed on the roadside.

The failure to replace the system would result in the eventual failure of the existing traffic signal system, which would create significant vehicle delays on the road network. In addition, this project would replace the existing traffic signal priority system. The traffic signal priority system is currently used by Fire Services to provide green lights to vehicles responding to emergency situations. The Transit Action Plan has identified the need to implement a priority system to improve reliability for customers. The stakeholders for this project include Traffic and Transportation Services, Fire Services and Transit Services. This project will be implemented over a five year time frame with phasing closely matching the priority routes identified in the Transit Action Plan.

2019 CAPITAL PROJECT DETAILS

Project Title: Countryside Drainage Improvements Phase 2
Asset Class: Roads Infrastructure

Project Type: Recommended
Department: Infrastructure Capital Planning

Summary: The 2004 Algonquin Road Watershed Study produced a list of priority projects for stormwater control. Projects were proposed to be completed as development progressed to where they were required for development to continue. Development has reached a point where the Countryside drainage improvements including channel and dry pond are required. The work has been phased to meet the needs of development and offset costs to when they are required. The 2018 phase included the construction of the dry pond and some of the channel improvements. Phase 2 includes the remainder of the channel improvements and the installation of a box culvert at the future Greenvalley Road extension.

2019 CAPITAL PROJECT DETAILS

Project Title: Stormsewer Closed-Circuit Television Program
Asset Class: Roads Infrastructure

Project Type: Recommended
Department: Infrastructure Capital Planning

Summary: The Stormwater Asset Management Plan identified many assets at risk based on probability/consequence of failure and identified many assets beyond their projected life cycle. This project would utilize existing service contracts to inspect the condition of these assets to assist in prioritizing capital needs and focus capital re-investments where most required. The program will provide a conditional and operational assessment of approximately 5 % of the City's stormsewer assets annually.

	2019	2020	2021	2022	2023	Beyond 2024	Total

Project Title: Stormsewer Rehabilitation
Asset Class: Roads Infrastructure

Project Type: Recommended
Department: Infrastructure Capital Planning

Summary: Many stormsewer assets are at or past their life cycle, this project provides a cost effective method to extend the life of some of these assets through the use of trenchless technology. This project will help lead to sustainable infrastructure and protection of people, property and the environment. Stormsewer for rehabilitation include:

- Charrette Street and Main Street West in Chelmsford
- Adie Street
- Easements from College Street to Bloor Street
- Segments on Falconbridge Road

Project Title: Stormwater Sustainable Funding Study
Asset Class: Roads Infrastructure

Project Type: Recommended
Department: Infrastructure Capital Planning

Summary: The recently completed draft stormwater asset management plan summarizes existing stormwater assets, operations and maintenance activities and provides a comparison of capital reinvestment against best practices from across Canada. Based on those best practices, an operations and maintenance plan and capital investment plan have been established with costs. To meet the City's asset management goals, the recommendations of the subwatershed studies and the requirements of O. Reg 588/17: Asset Management Planning for Municipal Infrastructure, Council must define the level of service the City will deliver and establish an sustainable funding strategy. These goals will be accomplished through this study.

2019 CAPITAL PROJECT DETAILS

Project Title: Subwatershed Planning
Asset Class: Roads Infrastructure

Project Type: Previously Approved
Department: Infrastructure Capital Planning

Summary: Represents funds previously committed by Council of \$250,000 per year (beginning in 2015) to support subwatershed planning. A subwatershed is an area of land divided by natural features, where all water naturally drains to a particular watercourse or body of water. In Greater Sudbury, some of the significant subwatersheds are Ramsey Lake, Junction Creek, Whitson River, Wahnapiatae River, Onaping River, Whitewater Lake and Panache Lake.

Asset Class: Landfill Improvements

Project Type: Recommended
Department: Environmental Services

Summary: Ministry of Environment, Conservation and Parks (MOECP) has approved a progressive final cover placement program throughout development of the landfill site, as a condition of Environmental Compliance Approval (ECA) for the site. Low permeability final cover is used for a natural attenuation landfill where reduce rate of infiltration and leachate generation is desired. Design for final cover for Stage One of the Azilda landfill site has been completed. The final cover will be constructed with a 150 mm bedding layer, a geosynthetic clay liner (GCL), 150 mm drainage layer, 450 mm protective layer and 150 mm vegetated top soil. Wind-driven rotary turbines will be provided to vent-off landfill gases and GCL lined perimeter ditch will be provided to control surface run-off.

Project Title: Hanmer Landfill - Compost Pad Construction
Asset Class: Landfill Improvements

Project Type: Recommended
Department: Environmental Services

Summary: The Ministry of Environment, Conservation and Parks (MOECP) has approved leaf and yard compost processing at the Hanmer landfill site. The current receiving and processing pad is on a native sandy surface that requires grading and a stabilized platform to support machinery movement, proper storm water and leachate management. A proper receiving and processing pad is required in accordance with the Environmental Compliance Approval. The project will include: hiring a consultant for design, tender administration, contract administration and as-built report; and contractors for construction of the pad as per approved design and drawings.

Project Title: Recycling Center - Tipping Floor Replacement
Asset Class: Facilities

Project Type: Recommended
Department: Environmental Services

Summary: The Recycling Centre is vital infrastructure and its operation is critical to meeting waste collection and diversion services approved by Council and legislated in the Waste Diversion Act. Approximately 12,000 square feet of the Recycling Centre concrete floor has degraded and exposed the rebar and is causing safety concerns. In order to continue the recycling processing operation at this facility, the deteriorated parts of the floor must be replaced. A structural consulting engineer has inspected the floor and will be performing section tests to assess the ability of the pre-engineered building to withstand removal of the floor. The results of this test will allow a methodology for the replacement of larger sections of the floor without causing any damage to the building.

2019 CAPITAL PROJECT DETAILS

Project Title: Sudbury Landfill - Leachate Treatment System
Asset Class: Landfill Improvements

Project Type: Recommended
Department: Environmental Services

Summary: Treatment of landfill leachate is a condition of Environmental Compliance Approval (ECA) for the site by the Ministry of Environment, Conservation and Parks (MOECP). The current leachate treatment system (LTS) includes a leachate equalization basin and three treatment cells using constructed wetland treatments system. The LTS requires an upgrade to handle the high hydraulic loading. If LTS is not upgraded, leachate may contaminate downgradient surface and ground water and eventually the site will be out of compliance. Current water monitoring program has shown migration of site-driven leachate indicator parameters. A review of current conditions by a consulting engineer has suggested major renovations in the system, which include dewatering the equalization basin and treatment cells; dredging and excavating buildups, and regrading the surface to maintain the required profile; replacing existing inlet and outlet pipes with proper clean outs at both ends; supply and placement of topsoil and wetland plants; supply and installation of a flow meter at the inlet, water level control structures and inlet and outlet structures with leachate bypass arrangements. Scope of work also includes improvement in the storm water management and modification in the drainage system to eliminate excessive surface water going to the LTS.

Project Title: Survey and GPS Equipment
Asset Class: Equipment

Project Type: Recommended
Department: Planning and Development

Summary: The City's Surveys and Mapping section, is a control survey agency for the Province of Ontario. The section maintains a network of 10,000 control stations and benchmarks to provide a common spatial reference system throughout the 3,600 square kilometre municipality. In maintaining this network, the Survey and Mapping section currently uses a multistation that was purchased in 2003 and is at the end of its life cycle. The current station requires replacement and new technology is available to turn complex data into realistic and workable 3D models by combining all available measurement technologies in one instrument. The estimated cost of the unit is \$70,000 and the anticipated life cycle of the new instrument is 10 years.

Project Title: Housing Registry System Replacement
Asset Class: Equipment

Project Type: Recommended
Department: Housing Services

Summary: The project objective is to procure and implement a replacement of the current Housing Registry System. The current system (Lotus Notes) is built on obsolete technology and is operating at great risk of failure. The market offers significant improvements over the current system and will greatly improve staff efficiency and overall customer experience including an online portal for citizens and social housing providers. The replacement of the Housing Registry System is critical due to the high risk of failure as the current operating system is no longer supported. Housing Services is legislated to host a coordinated access social housing registry to manage households making application for subsidized housing.

2019 CAPITAL PROJECT DETAILS

Project Title: Boiler Replacement and Isolation Valves
Asset Class: Facilities

Project Type: Recommended
Department: Long-Term Care - Senior Services

Summary: Pioneer Manor currently has seven boilers (three small one-stage boilers; two large two-stage boilers; and two large four-stage boilers) for 15 stages of boiler production. The heating system and domestic hot water system is produced by this boiler system for the majority of the home. The Ministry of Health and Long-Term Care (MOHLTC) have requirements for both the heating level (22 C) and the domestic hot water (DHW) temperatures (40 C to 49 C). Failure to achieve these requirements is a violation and a compliance issue. Three boilers are at end of life expectancy (installed in 2002 with an 18 to 20 year life) at a value of \$20,000 each and two are 16 years old and will be nearing end of life in next two years as life expectancy is 18 years cost is \$75,000 each. One of the current small boilers is offline and in need of repairs. At same time, there is a need to install isolation valves as there are currently none on the system. This involves installing a drain valve as well. Currently hot water generated by the boiler is circulated in the heating pipes during the summer as there is no isolation valves in place causing an excess load on the cooling in section of the building as well as increase in demand on boilers to maintain the DHW at the Ministry regulated temperature range. While the system is down overnight, it makes sense to conduct all repairs and installation of new isolation valves and drain valves so that in the future a repair required to one system does not affect the other system.

Project Title: Anderson Farm Museum Repairs
Asset Class: Facilities

Project Type: Recommended
Department: Children and Citizen Services

Summary: Anderson Farm Museum was the site of one of the largest dairies in the Sudbury area during the 1920s and 1930s. Today, the site has been developed to preserve the rich history of the surrounding community. In 2017, the museum had 16,359 visitors and currently holds partnerships with the Northern Ontario Agri-Food and Marketing and the Anderson Farm Museum Historical Society. Three major events are held each fall including the Fall Fair, Creighton Mine Reunion and the Sudbury District Children's Water Festival. Other events include the Christmas Tree Lighting Festival and Rock the Farm. This funding is required to address the various capital repairs required to comply with legislative requests as well as repair various areas/items identified throughout the site which will adhere to fire and general code compliance.

Project Title: Civic Cemetery Mausoleum Building Improvements
Asset Class: Facilities

Project Type: Recommended
Department: Children and Citizen Services

Summary: Civic Cemetery Mausoleum building envelope components have failed and need replacement. The roof is leaking, and exterior insulation and finish system are compromised by water penetration. An in depth investigation is required to determine the extent of water damage. The roof is in need of replacement due to the poor design for drainage and repairs. The systems have suffered serious blistering that carries a high risk of penetrations, that may lead to extensive water leaks into the facility. The shingled roof has leakage in areas where the angled portions meet.

2019 CAPITAL PROJECT DETAILS

Project Title: Flour Mill Museum Office Building
Asset Class: Facilities

Project Type: Recommended
Department: Children and Citizen Services

Summary: The Flour Mill Museum is being relocated due to the Wastewater capital project for the St. Charles Lift Station. The Flour Mill Museum office building serves as a workspace for museum staff, a storage area for museum artifacts as well as the common area for citizens and visitors. The office building is not a heritage structure and was originally constructed to mirror the existing buildings of the Flour Mill Museum. The current office building is in need of repairs that exceed the cost of a rebuild and currently does not have proper HVAC system to preserve artifacts. With this capital project, the Flour Mill Museum office building will be built more efficiently with a better functionality and storage capabilities.

Project Title: Ammonia Refrigeration Audits for Arenas
Asset Class: Facilities

Project Type: Recommended
Department: Leisure Services

Summary: On October 16, 2017 three individuals (two municipal employees and a contractor) died in Fernie, B.C. after an incident with the arena's ammonia refrigeration system. Technical Safety BC recently released their Investigation Report of the incident. The report includes a number of recommendations for local governments and arena owners. The Ontario Recreation Facilities Association (ORFA) has circulated the report and it is anticipated that a number of the recommendations will become legislative requirements in Ontario in the near future. To ensure that the City's ammonia refrigeration systems at 14 arenas are fully compliant and that staff and contractors are prepared for emergency situations, it is recommended that independent audits are completed. A level one audit per facility is estimated at \$8,500, with a 15% price discount expected if multiple arenas are audited.

Project Title: HARC - Roof, HVAC, Doors, Windows
Asset Class: Facilities

Project Type: Recommended
Department: Leisure Services

Summary: Howard Armstrong Recreation Centre was constructed in 1983, and has not had any major HVAC, roof, windows and doors, repairs and/or refurbishment to the track side systems. This budget request is for the roof and HVAC replacements. Further review and updates are required for the roofing systems due to age and deteriorating condition. The facility has several roofs and a consultant review of the roofs was performed utilizing infrared scanning that revealed the roofs are saturated with water. It was determined that no patching mitigation can be provided, and a full roof replacement is necessary. The track-side HVAC system is past life and requires replacement as many components are significantly degraded.

2019 CAPITAL PROJECT DETAILS

Project Title: St. Joseph's Parking Lot Redevelopment Phase 2
Asset Class: Land Improvements

Project Type: Recommended
Department: Leisure Services

Summary: Reports to City Council in 2014 and 2015 identified a phased-in approach and cost estimate for the redevelopment of the former St. Joseph's parking lot. Cost estimates to complete the entire project were \$7M to \$10.9M. Work would include regreening, accessibility upgrades, lookouts, storm water improvements and connections to the boardwalk. Council approved funding in the amount of \$950K for Phase 1 of the project which was to include regreening of the site and stated that future phases of completing the vision of the area be funded through anticipated revenues from parkland dedication from the redevelopment of the former St. Joseph's Hospital, future capital contributors and/or government grant funding. The initial phase is now complete. With this phase complete, it is noted that the redeveloped area still requires additional work and amenities that were originally part of the park's vision. These items include a transit bus lay by, park signage, completion of bike path, repairs to the existing retaining walls, park furniture (benches, shade, bike racks), gardens and irrigation.

Project Title: Security Upgrades - Municipal Pools
Asset Class: Facilities

Project Type: Recommended
Department: Leisure Services

Summary: In 2017, the City's Threat Response Team reviewed security at Nickel District Pool in response to an incident involving an employee. A number of recommendations were made related to improving employee safety, specifically the installation of video surveillance systems. It was recommended that surveillance systems be installed at public space pools where staff work alone (or in pairs) and where staff would benefit from the ability to see the external area before departing facilities. Surveillance cameras would also better support follow up investigations where there are claims made by staff or patrons. It is recommended that surveillance systems be installed at Nickel District, RG Dow and Gatchell pools as they are isolated facilities where staff are working alone or in pairs. Estimate of \$15,000 per site based on recent installations at other leisure facilities.

2019 CAPITAL PROJECT DETAILS

Project Title: Terry Fox Sports Complex Parking Lot
Asset Class: Land Improvements

Project Type: Recommended
Department: Leisure Services

Summary: Terry Fox Sports Complex is the City's premier baseball complex, home of the Sudbury Minor Baseball Association and Laurentian University varsity baseball. The parking lot servicing the Terry Fox Sports Complex requires significant repairs. There are numerous humps, bubbles and undulations in the parking lot. Engineering Services has conducted a field visit and provided recommendations for reinstatement. Full reinstatement of the parking lot is estimated at \$344,200 while reinstatement of the critical areas only is estimated at \$157,100. College Boreal has an occupation agreement for the use of the parking lot, which states that the City and College Boreal will equally share the cost of repairs and maintenance of the lot.

Project Title: Various Transit Related Studies for PTIF Phase 2
Asset Class: Equipment

Project Type: Recommended
Department: Transit Services

Summary: The estimated costs of consultants and staff require to complete studies is approximately \$1 million. The City's share of expenses are 27 % or \$270,000. Whether the City's share of funding for this project can be funded from Provincial Gas Tax is unknown at this time. Additional PTIF details will be available in 2019. The 2019 funding is for conceptual design for Bus Rapid Transit systems and to determine possible locations for major mobility hubs and the potential relocation of the downtown terminal. Detailed design and engineering studies would follow the completion of conceptual design and carryover into 2020. Other initiatives related to transit infrastructure growth and/or improvements are subject to the terms and conditions set forth by the province.

Project Title: Auto Extrication Tool Replacement
Asset Class: Equipment

Project Type: Recommended
Department: Fire Services

Summary: The Greater Sudbury Fire Service operates with 13 stations having auto extrication capabilities. The expected lifespan of these tools is approximately 10 years. As part of the ongoing effort to standardize the equipment used in the service, all new replacement tools are Hurst eDRAULIC (cordless tools), and the old generation corded hydraulic tools are replaced by age and condition. To maintain this fleet of tools requires an annual purchase of one complete set of tools consisting of a spreader, cutter and ram. This replacement schedule will result in a 13 year lifespan for the equipment purchased. Currently, there are eight old generation corded hydraulic tools required to be replaced.

2019 CAPITAL PROJECT DETAILS

Project Title: Bunker Gear Replacement
Asset Class: Equipment

Project Type: Recommended
Department: Fire Services

Summary: Greater Sudbury Fire Services employs 104 career firefighters and approximately 275 volunteer firefighters. Each of these firefighters requires bunker gear (personal protective equipment for their protection, and bunker gear has a regulated lifespan of 10 years. The Ministry of Labour has ordered in the City of St. Catharines that career firefighters require two sets of gear per firefighter, which presents a future risk for provincial regulation to enforce this best practice. Bunker gear has a useful life of 10 years as regulated by the Ministry of Labour. At this time, there is no requirement for two sets of bunker gear for volunteers, however a stockpile of spare gear is required to ensure employee health and safety, and continuity of operations. When a set of bunker gear is exposed in a fire, it is required to be sent for cleaning and the spare set is put into service until the original returns. Without this spare bunker gear, career and volunteer firefighters cannot respond to an incident. Based on these requirements, the annual replacement for bunker gear requires approximately 60 sets per year at \$2,500 per set to ensure that units are replaced after 10 years, and a sufficient stockpile exists.

2019 CAPITAL PROJECT DETAILS

Project Title: Pumper Fire Engine Replacement
Asset Class: Vehicles

Project Type: Recommended
Department: Fire Services

Summary: The Greater Sudbury Fire Service operates a fleet of 16 fire engines as part of its fleet of 73 response vehicles. A fire engine is the primary response vehicle in the high response stations and includes the capabilities of a pumper vehicle, with auto extrication and technical rescue. To maintain this fleet with all vehicles under the critical age threshold of 20 years (as defined by the National Fire Protection Association and the Fire Underwriter's Survey) requires four new engines every five years. Consideration should be given to entering into a five year contract with a single vendor to satisfy these purchasing requirements. This arrangement is expected to help the department standardize its fleet and achieve the benefits of bulk costing over an extended purchase cycle.

	2019	2020	2021	2022	2023	Beyond 2024	Total

Project Title: Rigid Hull Inflatable Boat (RHIB)
Asset Class: Vehicles

Project Type: Recommended
Department: Fire Services

Summary: The Greater Sudbury Fire Service operates four stations with water rescue craft. The largest of these is Marine 22, a rescue boat dedicated to Lake Wanapitei and stationed in Skead. The purchase of a new RHIB water craft would support response across the community to all bodies of water and provide a platform that is specifically designed for the safe delivery of water rescue operations in all conditions. Best practice research by staff has identified a RHIB as the appropriate vessel. This project would increase the Fire Services water rescue fleet by one additional boat.

2019 CAPITAL PROJECT DETAILS

Project Title: Customer Relationship Management System
Asset Class: Equipment

Project Type: Recommended
Department: Information Technology

Summary: The City's current Customer Relationship Management (CRM) system, which was implemented over a decade ago, must be replaced because it is no longer being supported by its vendor. This foundational municipal system is used to track requests for municipal service and customer interactions for business units across the organization. Over 300 different types of service requests are reported through the CRM, and approximately 42,500 files are created in the CRM system every year.

With no vendor support for the City's current CRM system, the level of service being provided to citizens is at risk. The City also does not have the ability to implement municipal trends or best practices for customer service, such as self-service or the ability to request service through new access channels. Given changes in technology and trends in customer service in Canada, a new CRM has the potential to greatly improve the service that is provided to citizens.

In early 2018, a consultant was retained to conduct internal and external analysis, to determine optimal requirements for the City and to develop a full CRM Business Plan, which states that Customer service modernization is about leveraging information and communication technology to modernize how government delivers service and interacts with its customers. It is about new service delivery channels, breaking down silos between and within governments, new citizen engagement methods, and new service delivery standards. The CRM system is also a critical component of and underlying supporting structure for the implementation of the City's Customer Service Strategy for 2019 to 2022, which was approved by Council in November 2018.

This submission is for procurement, purchase and implementation of a new enterprise-wide CRM solution for the City. This project will require the recruitment of up to three full-time equivalent positions (full-time and part-time positions) and annual software maintenance when the new system is in service as estimated below in the Operating Impact of Capital. Specifically, the FTEs consist of 1 FTE (\$80,000) within Information Technology and 2 FTEs within Communications and Community Engagement (\$160,000) as 311 will be undertaking more first-level support and knowledgebase maintenance as a result of this project.

2019 CAPITAL PROJECT DETAILS

Project Title: Land and Property Management System - Phase 1
Asset Class: Equipment

Project Type: Recommended
Department: Information Technology

Summary: The integrated Land and Property Management System (LPMS) will be a citywide, property centric system that provides a comprehensive history of all development, permitting, licensing, inspections, and by-law related activities for properties and land in the City. The system includes real time mobile tools for field staff, the integration of financial transactions to business processes, applicant access to tools to submit and track applications online, electronic plans review, and public access via the City's website to query the City's planning and development related records.

This recommendation covers implementation of the first phase of the project - which focuses upon building and planning processes. It also includes operating impact with the addition of one full-time equivalent and annual software costs once system in service/use.

Project Title: Meeting Management Solution
Asset Class: Equipment

Project Type: Recommended
Department: Information Technology

Summary: Replace AgendasOnline with a modern meeting management system to deliver an enhanced experience for all (Council, citizens/public and staff). This recommendation is a direct response to dissatisfaction with the current system as expressed by members of Council, Executive and staff. The project will include:

- Mobile device support and other user interface / experience enhancement;
- Enhanced search ability of historic video and content;
- Enable a move to a fully paperless agenda process;
- Eliminate auxiliary SharePoint and spreadsheet managed processes;
- Meeting management functionality including electronic voting;
- Accessibility enhancements including the closed captioning of Council and Committee meeting videos. This will also result in a platform to enable close captioning of all City video content;
- Ongoing support for Clerks to configure and role out work-flow changes, responding to the evolving requirements of the organization.

2019 CAPITAL PROJECT DETAILS

Project Title: Telecom PBX Upgrade
Asset Class: Equipment

Project Type: Recommended
Department: Information Technology

Summary: The old CS1000 Private Branch Exchange (PBX) which runs the City's phone system is end of support by December 2020. The project to replace a phone system can take more than one year so needs to start in 2019. A reliable phone system is critical to City operations.

The Avaya upgrade (Avaya CS1000 PBX Migration to Sip Based Avaya AURA product) path allows the City to continue using all existing desktop phones and hardware components that are currently owned. This upgrade will move the city into a more modern and less datacentre based PBX model, which takes advantage of existing infrastructure and allows mobile devices and laptops/desktops to take advantage of modern collaboration tools.

Project Title: 1160 Lorne - Building Automation Systems
Asset Class: Facilities

Project Type: Recommended
Department: Facilities

Summary: As part of the original 1160 Lorne Fleet/Garage project, it was decided not to include Building Automation System (BAS) as value engineering. Installation of a BAS provides maintenance staff the ability to track and trend, remote functionality tweaks, and improve energy savings. Currently, maintenance staff time is increased at the facility as there is no remote monitoring of the ventilation systems and they need to physically be on site to do the monitoring.

	2019	2020	2021	2022	2023	Beyond 2024	Total

2019 CAPITAL PROJECT DETAILS

Project Title: AODA Assessment and Reports
Asset Class: Facilities

Project Type: Recommended
Department: Facilities

Summary: Accessibility for Ontarians with Disabilities Act (AODA) assessments are used to better understand the current accessibility of City facilities. Citizens have increasingly requested more AODA related items, and this request will begin the ground work to achieve that goal. The assessments are required to understand in better detail than a Building Condition Assessment (BCA) of what modifications will need to be made to the facilities to become AODA compliant. This is a provincial government mandated regulation and reports are required to be obtained. This request would allow the completion of assessments for all required city facilities over several years. These reports are intended to be read in conjunction with a BCA report.

	2019	2020	2021	2022	2023	Beyond 2024	Total

Operating Impact of Capital	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -

Project Title: BCA and DSS Reports
Asset Class: Facilities

Project Type: Recommended
Department: Facilities

Summary: Building Condition Assessments (BCA) and Designated Substance Surveys (DSS) are used to better understand the existing condition of City facilities. BCA reviews are crucial in determining immediate and future capital needs.

As a continuity of 2012-2014 and 2016, 2018 series of reviews, approximately 50 % of City facilities have not been assessed as to their condition and need to be reviewed as soon as possible. In addition, all City facilities are required to have a DSS completed. Approximately 50 % of City facilities have yet to have DSS reports completed. This request would allow the completion of BCA and DSS reports for all remaining City facilities over the next three years.

2019 CAPITAL PROJECT DETAILS

Project Title: Fire Hall - Point Source Diesel Emission Capture
Asset Class: Facilities

Project Type: Recommended
Department: Facilities

Summary: Point source capture is a device used to ensure that vehicle exhaust is directly removed from the building to ensure air quality for workers. The Greater Sudbury Fire Services (GSFS) does not use point source capture devices on any of its diesel apparatus. This is the industry best practice for fire department vehicles, and is recognized and recommended by the Ontario Fire Service Advisory Committee on Occupational Health and Safety under Section 21 of the Occupational Health and Safety Act (commonly known as the Fire Services Section 21 Committee) for Fire Service operations. The service would require a phased-in installation of approximately 40 such devices in the 23 operational stations to provide for the protection of our workforce. The lesser systems in place at some stations do not satisfy the Section 21 recommendations and therefore do not satisfy the due diligence expectation for diesel removal. Further many of the stations in the service have no diesel emission removal systems in place. Implementation of the installations is projected over three years in three phases, based upon the exposure likelihood and impact. This recommendation is for one year/one phase only.

2019 CAPITAL PROJECT DETAILS

Project Title: Fire Hall - Van Horne HVAC
Asset Class: Facilities

Project Type: Recommended
Department: Facilities

Summary: For the evaluation and replacement of HVAC systems at the Van Horne Fire Hall. Approximately 50 % of the existing systems are at or near end of life and are in need of replacement. In addition, due to upgrades, modifications and renovations over the years, the existing systems have become a disparate piecemeal of devices that run in isolation from one another often in contention. General ventilation is also lacking within the building and is to be upgraded. All systems are to be put onto a BAS for improved coherence of operation and efficiency.

2019 CAPITAL PROJECT DETAILS

Project Title: Tom Davies Square - Electrical Service Gear
Asset Class: Facilities

Project Type: Recommended
Department: Facilities

Summary: The TDS complex was originally constructed in two separate projects: 1972 for 190/200 Brady, and 1978 for 199 Larch for the Province of Ontario. The mechanical and electrical systems are separate between TDS and 199 Larch complexes. The TDS complex share the main incoming electrical switchgear components between the two towers. The electrical system is considered mission critical. Failure in any one branch of the system will impact service of the facility. This project will involve the replacement of various equipment that serve as main feeder power supply and distribution network for the complex. The electrical equipment are generally in poor to fair condition, past expected life (obsolete) and replacement of the equipment is a priority. The project will be complicated in terms of logistically coordinating the work as to not interfere with the operations of the City.

	2019	2020	2021	2022	2023	Beyond 2024	Total
Expenses	\$ 880,000	\$ 1,850,000	\$ 780,000	\$ -	\$ -	\$ -	\$ 3,510,000
Funding

Operating Impact of Capital	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -

Project Title: Tom Davies Square - Fire Alarm System
Asset Class: Facilities

Project Type: Recommended
Department: Facilities

Summary: The TDS complex was originally constructed in two separate projects: 1972 for 190/200 Brady, and 1978 for 199 Larch for the Province of Ontario. The mechanical and electrical systems are separate between the two towers, and have not been coordinated or installed for efficiency. This budget request is for the complete replacement of both the TDS Complex and 199 Larch fire alarm systems for life safety. A single system will be installed for the entire complex, rather than the two independent systems that are currently in place (two systems might lead to potential confusion in case of emergency). The fire alarm system currently in place at 190/200 Brady is past life (approximately 20 years in age), components are beginning to fail and may soon be obsolete. The original wiring for the fire alarm devices is still in place and is in poor condition, which causes frequent faults within the system.

	2019	2020	2021	2022	2023	Beyond 2024	Total

2019 CAPITAL PROJECT DETAILS

Project Title: Tom Davies Square - Main Ventilation Unit Fan
Asset Class: Facilities

Project Type: Recommended
Department: Facilities

Summary: The TDS complex was originally constructed in 1972 for 190/200 Brady. The mechanical and electrical systems are not separate between the two towers. This budget request is for the complete replacement of the main 190 Brady fresh air supply fan number 15 feeding the Greater Sudbury Police Services tower (190 Brady), and Human Resources. Currently, the main ventilation unit fan number 15 components are past life, failing and in need of replacement. Although, the fan motor was replaced in 2017, the remaining components of the air handler unit are not reliable, and there remains a risk involved with keeping it functioning in the near future. The replacement unit will be a gas operated unit and may have operational savings. This project will consist of design in 2019 with replacement in 2020.

	2019	2020	2021	2022	2023	Beyond 2024	Total

Project Title: Tom Davies Square - Security System and Lighting
Asset Class: Facilities

Project Type: Recommended
Department: Facilities

Summary: This project involves the complete replacement of the existing security system which is obsolete and not functioning as expected. Parts are generally not available, or very hard to source. The new security system will be updated with current technology and will provide security and safety to the affected areas of TDS. Some doors will need new equipment or panels, and others need to be added to the system (strikes, magnetic holders, etc.).

2019 CAPITAL PROJECT DETAILS

Project Title: Police Fleet
Asset Class: Vehicles

Project Type: Recommended
Department: Police

Summary: Provides resources for the replacement of vehicles and equipment. Currently, the fleet consists of approximately 160 vehicles including automobiles, vans, SUV's, motorcycles, boats, snow machines, ATV's, paddy wagon, trailers, and bicycles. Funds annual contributions for mobile data terminals and associated hardware, radar units, light bars, prisoner shields, specialized weaponry mounting, the mobile command centre and mobile radios. A multi-year replacement cycle is established that ensures vehicles and equipment are replaced in a timely manner.

Project Title: Renovations
Asset Class: Facilities

Project Type: Recommended
Department: Police

Summary: This project is to set aside funds from the annual property tax levy for future debt repayments once the decision is made for building renovations to an existing building or for a new building to be decided by the Greater Sudbury Police Board in time for the 2019 Budget. Starting in 2020, each year will be increased by \$500,000 as shown in the outlook. The annual amounts are shown in the Operating Budget in the Contribution to Reserve Fund account/section as the funds would be transferred to the Capital Financing Reserve Fund - Police committed for the Police Building Renovations.

2019 CAPITAL PROJECT DETAILS

Project Title: Next Generation 911
Asset Class: Equipment

Project Type: Recommended
Department: Communications Infrastructure

Summary: The Canadian Radio-television and Telecommunications has ruled that all Public Service Answering Points (PSAP) agencies must be ready to accept more than just voice calls into their 911 answering centres. This legislation is referred to as NG911. PSAP's are required to begin accepting digital voice calls as of June 30, 2020. Due to this legislation, mandatory upgrades and new equipment will be required prior to June 30, 2020. These include but are not limited to, a softphone solution, an upgrade from PBX to an IP based PBX, tablets or new computers for the softphone client, training.

Project Title: Police Communication Tower Repairs
Asset Class: Facilities

Project Type: Recommended
Department: Communications Infrastructure

Summary: The towers are part of the mission critical operations for Greater Sudbury Police Services, Fire and Paramedic Services. The towers are the primary and best way of maintaining communications to its members and vehicles due to the geographical constraints of City region limits.

This project includes immediate repairs to the following components of the towers:

- Verticality/guy tensions outside of acceptable limits
- Damaged grounding lead
- Unsupported safety rail spans
- Loose/incorrect fittings
- Poor ground installation
- Obstructed ladder faces
- Missing end sleeves/ice clips
- Burnt out bulbs, etc

Note 1 - Staff will be reviewing the Facility Rationalization program during 2019 and annual cash flow estimates for each building construction will be included within the 2020 Capital Budget that will be presented to Council in the fall of 2019. The estimated total costs of \$91.6M for the buildings as previously presented to Council are as follows: Black Lake Depot Salt Dome \$6.93M; Frobisher Administration Depot \$18.94M; Frobisher Depot Salt Dome \$8.04M; Frobisher Works Facility \$19.65M; St. Clair Depot Facility \$5.75M; St. Clair Depot Salt Dome \$10.16M; Suez Depot Facility \$5.01M; Suez Salt Dome \$6.51M; Vehicle Storage Facility \$7.46M; Waste Management Vehicle Storage Facility \$1.03M; and Whitefish Depot Salt Dome \$2.12M. The buildings above do not include improvements in Phase 3 of the program as it is expected beyond 2023.

Note 2 - Additional capital investment in the range of \$8 million to \$28 million is estimated. This will be dependent on which processing technology is selected and at which location. Excludes funding grants (if available).

Note 3 - Current cost unknown, the Social Housing Revitalization Plan (the Plan) aims to develop a range of strategies to revitalize and optimize the aging social infrastructure stock. CGS is responsible for providing "sufficient" operating and capital funding to the GSHC through the Housing Services Act, 2011.

Note 4 - Police Building Renovations project is to set aside funds from the annual property tax levy for future debt repayments once the decision is made for building renovations to an existing building or for a new building to be decided by the Greater Sudbury Police Board in time for the 2019 Budget. Starting in 2020, each year has been increased by \$500,000. The annual amounts are shown in the Operating Budget in the Contribution to Reserve Fund account/section as the funds would be transferred to the Capital Financing Reserve Fund - Police committed for the Police Building Renovations.

WATER WASTEWATER

WATER
WASTEWATER

Kalmo Beach

WATER/WASTEWATER BUDGET

Unlike the municipal tax levy, which is applied to all properties in the City to support a variety of services provided broadly to the community, Water and Wastewater Services are paid for by roughly 48,000 residential and non-residential customers.

In 2011, a 10-year water and wastewater financial plan was approved by Council and recommended an annual rate increase of 7.4 % to achieve financial sustainability. Council approved the 7.4 % rate increase for 2016, 2017, and 2018. This 7.4 % increase is also being recommended for 2019.

The current Water/Wastewater Long-Term Financial Plan covers the period 2012 to 2020. In accordance with legislation, the plan must be updated prior to the City applying for renewals to its drinking water licences in the fall of 2019. The plan is currently being updated and will be presented to Council during the spring of 2019. The plan includes updated capital requirements based on the recently completed water/wastewater master and asset management plans. The plan also includes a provision to phase out the current fire protection levy of \$3,785,000 over the next three years starting in 2019, and will account for declining water consumption trends.

The City has three main components to the water/wastewater billing structure that fund expenditures:

Variable Water Rate

The City establishes a rate per cubic metre of water used. All water customers pay the same amount for every cubic metre (1,000 litres of water). Since a customer only pays for the volume of water they use, this portion of the rate is referred to as the variable water rate.

Fixed Water Charge

Water budgets contain fixed costs that do not change in direct proportion to water consumption. The cost to treat and distribute municipal water remains relatively constant, regardless of the volume actually consumed by residents. The fixed water charge provides the City with a stable source of annual funding to offset these fixed costs. The fixed water charge is set for a residential meter (5/8 and 3/4 inch meter) and is increased for each larger size meter in accordance with the ratios established by the American Water Works Association.

Wastewater Surcharge

The wastewater surcharge is a charge applied to offset the cost associated with the water discharged as it leaves your home or business. Costs include the operation and maintenance of wastewater infrastructure such as the sewer system and treatment plants that handle wastewater outflow from properties. Wastewater outflow is directly related to the amount of water discharged into the sewer system and treatment plants, which is why the surcharge is calculated as a percentage of the total water rate charged. This rate structure is consistent with most Ontario municipalities.

Typical Water/Wastewater Charges (200 Cu M/year) (\$)

WATER/WASTEWATER RATES

The City of Greater Sudbury is dedicated to the supply and delivery of high quality potable water and the effective collection and treatment of wastewater to meet the current and future needs of our community. As one of our most precious resources, the City is committed to working with our residents and partners to protect water in all of its forms.

Water/wastewater operates in a highly regulated framework of federal, provincial and municipal regulations, standards and policies. The operation is guided by financial and tactical strategic plans, with an updated asset management and master plan currently in development.

A significant component of water and wastewater rates in any municipality are directed to long term asset management considerations. The City of Greater Sudbury is responsible for 1,800 kilometres of water and wastewater mains otherwise known as linear infrastructure. That's more than the distance to Winnipeg. The City's 12 wastewater treatment facilities, 69 sewage lift stations, one biosolids facility, 23 wells, two water treatment facilities, eight metering stations, 12 pumping (booster stations) and 9 water storage facilities were constructed to meet the needs of individual communities prior to amalgamation. This level and scope of assets is several times the size of municipalities of our population and rate base and significantly overbuilt from the perspective of the number of customer serviced. Rates contribute to operations as well as to the core asset management objectives described in the Capital Budget section of this budget.

The Province of Ontario requires that all municipalities collect the full cost of water and wastewater services directly from end users. City Council adopted a user pay system in 2001, which resulted in charges being billed directly to customers rather than being rolled into municipal property taxes, as was previously done.

The City understands the effect of rate increases on households. Water/wastewater operations are under constant review to improve efficiencies wherever possible.

The following are sections and the applicable areas of service for the Water/Wastewater Division:

Water/Wastewater Treatment and Compliance

- Water Treatment
- Wastewater Treatment
- Compliance and Operational Support

Linear Infrastructure Services

- Water Distribution
- Wastewater Collection

Infrastructure Capital Planning

- Capital Engineering

A more complete description of these services can be found in their respective sections of the budget document.

Rate Structure

The rate structure for water includes a monthly service charge that varies according to the size of the water meter. The variation in the service charge is based on ratios recommended by the American Water Works Association (AWWA).

The rate structure for water also includes a uniform rate for each cubic meter of water consumed. For water, the uniform rate is applied to all consumption. The impact of the proposed rate increase on the monthly service charge and consumption water rate is shown in the following table.

2019 Water Rates

Monthly Service Charge

Meter Size	2019
5/8"	\$21.46
3/4"	\$21.46
1"	\$53.60
1.5"	\$107.20
2"	\$171.51
3"	\$343.03
4"	\$535.98
6"	\$1,071.96
8"	\$1,715.13
10"	\$2,465.50
Volume Charge per Cubic metre	\$1.728
Wastewater Surcharge	111.80%

The wastewater surcharge is a percentage applied to total water charges (volume and fixed) as there are no meters to measure the outflows of wastewater. For 2019 the wastewater surcharge is 111.8 % of water charges.

Average Homeowner

The chart below illustrates the impact of the 2019 rates on a homeowner who uses 200 cubic metres of water per year. The cost increase for 2019 is approximately \$7.35 per month for the average homeowner.

2019 Water/Wastewater Rate Impact				
	2018	2019	\$ Change	% Change
Water				
Annual Usage Charge	320.40	345.60	25.20	
Annual Fixed Service Charge	238.68	257.52	18.84	
Total Annual Water	\$559.08	\$603.12	\$44.04	7.9
Wastewater				
Annual Usage Surcharge	361.09	386.38	25.29	
Annual Fixed Service Surcharge	268.99	287.91	18.92	
Total Annual Wastewater	\$630.08	\$674.29	\$44.21	7.0
Total Annual Water/Wastewater Charges	\$1,189.16	\$1,277.41	\$88.25	7.4

Rate Consumption: Sample Residential Customers

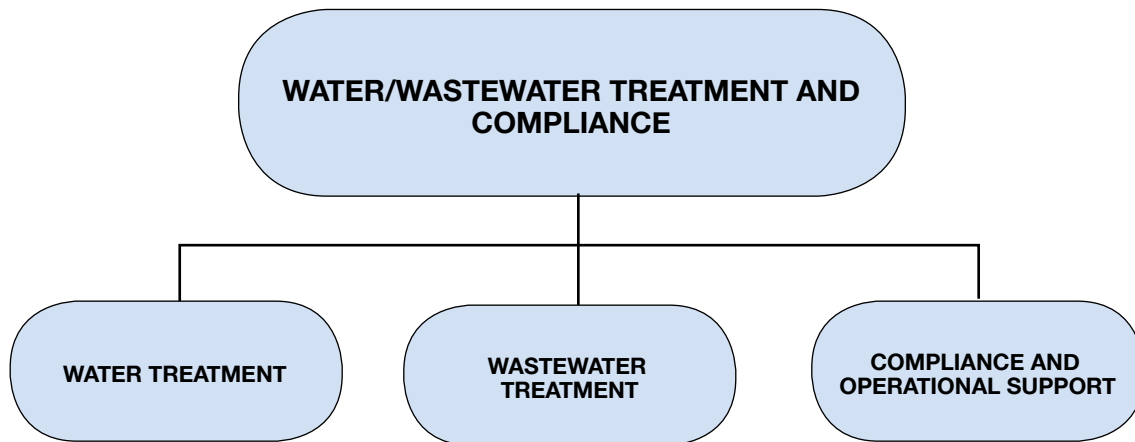

The following chart compares Greater Sudbury's 2018 rates to those of other northern Ontario municipalities. The chart uses rates for 2018, as other cities have not yet determined their rates for 2019.

Sample Residential Customer - 2018 Rates

	Sudbury	North Bay	Timmins	Sault Ste. Marie	Thunder Bay
Water					
Annual Volume Charge	\$320	\$272	\$0	\$150	\$330
Annual Service Charge	\$239	\$329	\$418	\$330	\$276
Total Annual Water	\$559	\$601	\$418	\$481	\$606
Wastewater					
Annual Volume Charge	\$361	\$221	\$0	\$93	\$297
Annual Service Charge	\$269	\$240	\$458	\$205	\$248
Total Annual Wastewater	\$630	\$461	\$458	\$298	\$546
Total Water/Wastewater	\$1,189	\$1,062	\$876	\$779	\$1,152

WATER/WASTEWATER TREATMENT AND COMPLIANCE

OVERVIEW

Water/Wastewater is responsible for the treatment of all water and wastewater in the City of Greater Sudbury. This includes ensuring the quantity and quality of both potable water and treated wastewater effluent meets the stringent requirements of all applicable federal, provincial and municipal regulations, standards and policies while maintaining the highest level of treatment efficiency possible.

Water/Wastewater works collaboratively with Linear Infrastructure Services to distribute potable water and collect wastewater, Infrastructure Capital Planning Services to inform them of any capital requirements in facilities as well as Engineering Services to ensure delivery of capital projects meet the needs of the department.

SERVICES

Water Treatment

- Provides safe, clean drinking water to approximately 130,000 citizens, or 80 %, of the City's population.
- Effectively maintains and operates two surface water treatment plants which supply the Sudbury municipal water system.
- Oversees the maintenance and operation of 23 drinking water supply wells which supply five municipal water systems across the City of Greater Sudbury.
- Maintains and operates related 12 booster stations, eight metering stations, five bulk filling stations and nine water storage facilities.
- Treats and distributes an average of 1,200,000 cubic metres of water annually from the Vale Vermillion

River Treatment Plan to provide water to the communities of Copper Cliff, Walden and Lively.

Wastewater Treatment

- Approximately 57 % of the division's resources are allocated to wastewater treatment services
- Maintains and operates 12 wastewater treatment facilities, including the Kelly Lake Wastewater Treatment Plant which treats 72 % of all wastewater collected in Greater Sudbury.
- Maintains and operates 69 sewage lift stations, a hauled liquid waste station (septage) and a biosolids facility which collectively treat an average of 32,700,000 cubic metres of wastewater annually.

Compliance and Operational Support

- In 2018, section staff completed approximately 1,600 site visits and 2,600 inspections throughout Greater Sudbury to ensure regulatory compliance with all applicable Water and Wastewater regulations.
- Manages 48,000 residential water meters which enables the City to monitor water usage.
- Maintains the computer monitoring and control systems of all treatment facilities across Greater Sudbury.
- Manages the Drinking Water Source Protection Program through the review of building permits and conducting onsite inspections within the designated source protection areas.
- Oversees and controls industrial, commercial and institutional sewer discharges into the wastewater system.

2018 ACCOMPLISHMENTS

- Achieved significant gains in energy savings through partnerships with the Independent Electricity System Operator of Ontario (IESO).
- Established the Business Improvement and Data Integration Section.
- Established real-time metering of water received from Vale.

KEY PERFORMANCE INDICATORS

Measure Name	Measure Category	CGS results		Median 2017
		2016	2017	
Total Cost of Wastewater Collection/Conveyance and Treatment/Disposal per Megalitre Treated	Efficiency	\$1,084	\$1,062	\$851
Number of Water Main Breaks per 100 km (excluding connections) of Water Distribution Pipe	Customer Service	8.3	8.6	8.2

STRATEGIC ISSUES AND OPPORTUNITIES

- Implementation of automated water meter infrastructure which accurately tracks water usage and eliminates the need for manual meter reading to the benefit of residents.
- Implementation of the recommendations of the Water/Wastewater Master Plan which prioritizes operations to the benefit of the customers, improves system performance and efficiencies, and supports community growth.
- Continued utilization of technology and automation which allows for integration of established performance metrics into annual reports and real time access by the public through citizen portals.
- The reduction of Infiltration and Inflow into the sanitary sewer system which will optimize use of existing infrastructure and reduces the need for major new capital investment.
- Improvements to stormwater management facilities which has a direct connection to improved water quality.

KEY DELIVERABLES IN 2019

- Implement a strategy for Automated Meter Infrastructure (AMI).

2019 CAPITAL PROJECT DETAILS

Project Title: Coniston Industrial Park Watermain Upgrades
Asset Class: Water Infrastructure

Project Type: Recommended
Department: Water

Summary: There is a proposed development project in Coniston Industrial area by a private developer. In order for this project to proceed, there is a need to upsize the existing 150 mm diameter watermain from Allen Road to Smelter Road to a 250 mm diameter. This project is cost shared with the developer as there is existing deficiencies within the water system. This project has also obtained external funding.

Project Title: Preliminary Design for Future Projects - Water
Asset Class: Water Infrastructure

Project Type: Recommended
Department: Water

Summary: Consulting fees for preliminary design for future projects, including engineering (preliminary and detailed design), geotechnical investigations, surveys, etc. Geotechnical investigations and surveys are often required prior to the design commencing, so this account allows the designer to obtain critical information well enough in advance to not negatively impact the project schedule. When the capital outlook is developed, it is unknown if the design will be completed by CGS staff or an external consultant. Once the workplan is developed, some of the designs may be more appropriately completed by external consultants. This account allows the flexibility to retain consultants to complete some or all of the design work, as required.

2019 CAPITAL PROJECT DETAILS

Project Title: Contingency - Water
Asset Class: Water Infrastructure

Project Type: Recommended
Department: Water

Summary: This account provides additional funding for a variety of purposes in relation to the watermain and watermain with roads priority projects. During design, this account can be utilized to fund engineering consultants' fees in circumstances when it is determined part way through the year that there is not enough appropriate/specifically qualified city design or contract administration staff to complete the project. During construction, this account typically provides funds for additional costs related to unanticipated field conditions (i.e. soils/rock/groundwater elevations or new condition assessment information) which result in a change of scope of the work. This account also provides funding for watermain work that is determined to be required during the construction of a roads priority project, based on actual field conditions. This work would not have been anticipated during the capital budget planning process, based on the information available at that time.

2019 CAPITAL PROJECT DETAILS

Project Title: Cost Sharing Policy Applications - Water
Asset Class: Water Infrastructure

Project Type: Recommended
Department: Water

Summary: This project is to allocate funds that may be required to fund water related costs for cost sharing applications received by Water/Wastewater Services from developers/land owners in accordance with the Development Cost Sharing Policy (2016) previously approved by Council. Development cost sharing applications will be considered on a case by case basis and subject to Council approval, based on the following principles:

- a) The City recognizes that development represents an opportunity to rehabilitate, upgrade and or replace infrastructure that would otherwise fall under the City's capital programs. Since there are limited resources to apply to infrastructure upgrades in a given year, the City has an interest in cost sharing in situations where there are demonstrated gains in closing the infrastructure renewal requirement, and/or
- b) Cost sharing is an option in situations where there are off site deficiencies or enhanced work is desired by the City.

Project Title: Watermain Priority Replacement and Rehabilitation
Asset Class: Water Infrastructure

Project Type: Recommended
Department: Water

Summary: Detailed design and construction of various watermain replacement or rehabilitation (lining) projects based on recommendations and framework contained in the Water/Wastewater Infrastructure Master Plan and Asset Management Plan, both recently received by Council. The risk assessment incorporated within the Asset Management Plan utilizes condition and age data, service criticality, socioeconomic, environmental and traffic impacts among others, to determine the priority projects.

The following locations are recommended for completion in 2019:

- Dean Avenue - Lorne to Landsend (construction)
- Jane Street - Dean to Easement (construction)
- Tudor Court - Windsor to End (construction)
- St Brendan Street - Homewood to Marion (construction)
- Municipal Road 24 - Trunk Watermain (construction - lining)
- Whissel Avenue - Perrault to Dell (construction with St. Charles Lift Station project)
- Ash Street (Lively) (construction)
- Hyland Drive - Regent to Winchester (design)
- St. Nicholas Street - St. Brendan (construction)
- Henry Street (Garson) - MacDougall to East End (construction)
- O'Neil Drive East - Penman to Margaret South (construction)
- Roy Avenue - Leon to Rinfret (construction)
- Fairburn Street (construction)
- Laberge Lane (construction - lining)
- Allan Street Bridge watermain (construction)
- 10th Avenue Lively (design with Lively Sanitary Sewer Improvements Phase 2)
- Anderson Drive Lively (design with Lively Sanitary Sewer Improvements Phase 2)
- Maple Street (Sudbury - various sections) (design)

2019 CAPITAL PROJECT DETAILS

Project Title: Watermain with Sewer and Roads
Asset Class: Water Infrastructure

Project Type: Recommended
Department: Water

Summary: This project will be used to complete the watermain replacement under the Vermilion River Bridge, in conjunction with the bridge construction in 2019. In addition, this project will be used to complete watermain replacement under bridges and culverts or to accommodate sanitary sewer projects in various priority locations in 2019, which are unknown at this time and may develop as new condition assessment information becomes available.

Project Title: Water Service Replacement
Asset Class: Water Infrastructure

Project Type: Recommended
Department: Water

Summary: The City of Greater Sudbury maintains records of service calls to residences and commercial properties with frozen water lines. If the water service freezes on the City's side of the property line three years in a row, the property owners are advised to run their water to prevent them from freezing over the winter months. However, running the water to prevent freezing also costs money and is wasteful. This project is used to insulate or lower water services that are on the annual list to run water to prevent freezing on City property.

2019 CAPITAL PROJECT DETAILS

Project Title: Watermain Rehabilitation
Asset Class: Water Infrastructure

Project Type: Recommended
Department: Water

Summary: This project is used for the rehabilitation (lining) of existing watermain using trenchless technologies to extend the service life (by approximately 50 years) and reduce the risk of watermain breaks. It is also used to pay for the contract administration and inspection of the work, by external consultants. The locations are prioritized by operational concerns (i.e. high break frequency) and this technique is typically used to minimize traffic disruption on arterial roadways or when the watermain needs to be rehabilitated, but no funding is available to rehabilitate the roadway.

Project Title: Watermain Valve Replacement
Asset Class: Water Infrastructure

Project Type: Recommended
Department: Water

Summary: The City's Municipal Water Systems consist of approximately 900km of watermain and approximately 9,000 system valves. The valves allow for appropriate operations and maintenance of the systems as well as isolation of sections of main during connections or repairs. The Water/Wastewater Asset Management Plan, 2018 and American Water Works Association (AWWA) Standards provide recommendations for valve exercising (turning) programs which are completed by the City's operations staff. This project is used for the repair or replacement of various inoperable large diameter valves throughout the City, which are detected by the valve turning program or by other means.

Project Title: David Street Water Treatment Plant Various Repairs
Asset Class: Water Plants and Facilities

Project Type: Recommended
Department: Water

Summary: The David Street Water Treatment Plant is a membrane filtration plant that uses chlorine for water disinfection and the building needs a proper working heating ventilation and air conditioning (HVAC) system to keep the building at acceptable chlorine concentration level in the air (atmosphere). Higher chlorine concentration level in the air causes major corrosion of equipment and causes premature equipment failure. The project objective is upgrading the existing HVAC system including upgrades to electrical system for better operation control and to remedy the existing situation.

Project Title: Wanapitei Water Treatment Plant Upgrades
Asset Class: Water Plants and Facilities

Project Type: Recommended
Department: Water

Summary: The Wanapitei Water Treatment Plant is the main source supply of potable water for Sudbury, Coniston and partially Garson. It has several valves and controls in the pumping station that are old and in need of replacement with new controls for safer operations. Additionally, upgrading communication and operating controls through the supervisory control and data acquisition system (SCADA) will provide better access to control valves operation for flow/pressure regulation for safer and more flexible operation of the facility.

Project Title: Well Building Repairs and Upgrades
Asset Class: Water Plants and Facilities

Project Type: Recommended
Department: Water

Summary: Garson is primarily supplied by three ground water wells. Recently, the water quality coming from these wells has deteriorated. The City is working with WSP Global to diligently find a solution to remedy the existing situation and find an alternate water supply. Many water supply alternatives are considered at this stage and will require decommissioning existing Wells 1 and 3 as they are the source of water quality issue. Upgrades to Well 2 and some upgrades to the existing water distribution system are also needed. This project is to implement the recommended solution by WSP Global for water infrastructure upgrades for water supply and distribution system.

Project Title: Well Inspection and Rehabilitation
Asset Class: Water Plants and Facilities

Project Type: Recommended
Department: Water

Summary: Many of our communities rely on ground water as a potable water source. A series of wells provide potable water to these populations. The operating wells overtime are subject to performance issues due to a number of factors that limit or restrict their pumping capacity which has a direct impact on safety of water quantities supplied to residents. This project is to implement a continuous assessment and rehabilitation of wells to sustain wells pumping performance in terms of water quantities and quality and sustain the existing underground infrastructures for safety of water supply.

2019 CAPITAL PROJECT DETAILS

Project Title: Automatic Meter Reading Water Meters
Asset Class: Water Infrastructure

Project Type: Recommended
Department: Water

Summary: The City of Greater Sudbury provides drinking water services to over 48,000 customers. Funding to provide these services is primarily generated through user fees based largely on consumption through water meters measuring usage for each account.

The City's current metering technology is outdated when compared to industry norms and relies on touch pad technology requiring manual readings to determine consumption. A recent feasibility study was concluded that a fixed based AMR/AMI (automatic meter reading/advanced metering infrastructure) water meter system should be used to replace the City's existing manual water reading system.

This project will be used to purchase, install and manage the AMR/AMI water meter system.

Project Title: Hydraulic Model Licence - Water
Asset Class: Water Infrastructure

Project Type: Recommended
Department: Water

Summary: The City of Greater Sudbury has over 900 km of watermain and approximately 800 km of sanitary sewers. The hydraulic operations and planning for these linear systems requires in-depth analysis utilizing computer models. Historically the hydraulic modeling data and analysis was maintained by City staff. There were two full-time modellers (one for water and one for wastewater), who moved on to other roles. Over the past two years, as a temporary solution, the models have been maintained and utilized for analysis by WSP Global, the engineering consulting firm that was retained to complete the W/WW Master Plan. Now that the master plan is complete, the City is going to complete the calibration and maintenance of the hydraulic models, as well as complete the hydraulic analyses in-house, as approved by Council in accordance with the 2018 business case for a Hydraulic Modeller position.

This project includes for the annual license fees for the water system hydraulic model.

Project Title: Master Plan and Asset Management Plan
Asset Class: Water Infrastructure

Project Type: Recommended
Department: Water

Summary: Council has recently received/endorsed the first iteration of the City's Water/Wastewater (W/WW) Master Plan (MP) and W/WW Asset Management Plan (AMP). The recommendations of these Plans provide guidance for both operational programs and capital projects that will reduce operating and possibly defer capital costs associated with the City's water and wastewater systems. They will also facilitate the City's alignment with the proposed Asset Management Planning Regulation, by the Ministry of Infrastructure. The recommendations include reducing leakage (non-revenue water) from the water distribution systems and reducing inflow and infiltration from the wastewater systems. The specific programs related to these recommendations require funding (approximately \$8.5 million over 5 years for the MP and \$5.5 million for the AMP) as well as resources to accommodate the work.

This project provides funds for the development and implementation of the various programs and studies related to water system leakage identified by the plans.

2019 CAPITAL PROJECT DETAILS

Project Title: Source Protection Plan
Asset Class: Water Infrastructure

Project Type: Recommended
Department: Water

Summary: The Greater Sudbury Source Water Protection Plan was developed to protect our current and future sources of municipal drinking water. It identifies potential risks to our drinking water supply and contains policies to ensure that our drinking water remains safe. Policies within this plan are enforced by the City. The Source Water Protection Plan also includes provisions for site specific Risk Management Plans (RMP).

This project includes funds for monitoring/modelling/studies for the required annual update of the Source Protection Plan. In addition, if a land developer/proponent objects to their specific Risk Management Plan, the City is required to provide a third party review of RMP. Those review costs are covered by this project.

Project Title: Strategic Planning
Asset Class: Water Infrastructure

Project Type: Recommended
Department: Water

Summary: Customers within the community served by the City of Greater Sudbury's Water/Wastewater Services Division expect access to safe, reliable and environmentally responsible municipal W/WW services. In providing these services, the City is expected to do so through a sustainable, cost effective approach. Embedding these expectations within our mission guides our decisions and each member of our team, in continuing to provide excellent services.

Delivering services in a dynamic municipal environment requires a core management tool that defines the key elements from which work plans can be successfully carried out.

This project provides funds for consultants to assist with workshops to develop the tactical and strategic plans for the W/WW related divisions within Growth and Infrastructure Services.

2019 CAPITAL PROJECT DETAILS

Project Title: Various Contributions to Operating - Water
Asset Class: Water Infrastructure

Project Type: Recommended
Department: Water

Summary: This project provides funds to support the operational costs associated with the Capital Program and Water/Wastewater Education Initiatives in the Community including:

- Capital Project Delivery Resources (staffing) within Engineering Services
- Locates Program Administration (staffing)
- Benchmarking
- Annual Children's Water Festival
- Public Awareness/Education Initiatives

	2019	2020	2021	2022	2023	Total
Expenses	\$ 187,100	\$ -	\$ -	\$ -	\$ -	\$ 187,100
Funding						
User Fees	\$ 187,100	\$ -	\$ -	\$ -	\$ -	\$ 187,100

Operating Impact of Capital	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -

Project Title: Booster Station Condition Assessment
Asset Class: Water Plants and Facilities

Project Type: Recommended
Department: Water

Summary: The City has a number of Booster Stations within the water distribution system that pump water to residents to keep the required pressure and flow. The areas without them will suffer from lack of water pressure and quantities (flows). These facilities are an integral part of safety for water supply and distribution system and must continuously operate with minimum downtime. The project is to implement a condition assessment as part of the asset management strategy and implement recommended solutions on a phased approach without impact on water supply and distribution.

	2019	2020	2021	2022	2023	Total
Expenses	\$ 300,000	\$ -	\$ -	\$ -	\$ -	\$ 300,000

Operating Impact of Capital	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -

Project Title: Operating Manuals and As-BUILTs
Asset Class: Water Plants and Facilities

Project Type: Recommended
Department: Water

Summary: Water facilities should have operating and maintenance manuals from a health and safety and process perspectives. The operating and maintenance manuals form the basis of facility operation as operators rely on them and use them as a reference to carry out their duties. Manuals should be available at each facility and be updated on regular basis. Over time, changes are introduced either by installing new equipment or modifying or improving an existing operating process. These changes need to be documented in operating and maintenance manuals. The project objective is to keep up to date the operating and maintenance manuals and update the as-built drawings for facilities.

2019 CAPITAL PROJECT DETAILS

Project Title: Water Facilities Repairs and Equipment Upgrades
Asset Class: Water Plants and Facilities

Project Type: Recommended
Department: Water

Summary: The City has many water facilities which are required to operate on a continuous basis to provide safe and reliable water to the community. These facilities are old and many parts or equipment installed within these facilities are at the end or beyond their life cycle. The project objective is required to replace or repair existing assets/equipment to avoid any catastrophic shutdown or major equipment failure so to keep the existing infrastructure running to support facility operations and handle emergency situations.

	2019	2020	2021	2022	2023	Total
Expenses	\$ 100,000	\$ -	\$ -	\$ -	\$ -	\$ 100,000

Project Title: Water Facilities Condition Assessments
Asset Class: Water Plants and Facilities

Project Type: Recommended
Department: Water

Summary: The City has many water facilities that are in need of many upgrades. There is a need to implement asset management best practices and methodologies in order to efficiently manage the life cycle of the facilities. As a first step, a detailed knowledge of the asset condition is vital to proactively manage the asset life cycle. The project is to implement condition assessment for facilities as part of the Asset Management Plan implementation.

2019 CAPITAL PROJECT DETAILS

Project Title: Sewer Priority Replacement and Rehabilitation
Asset Class: Sewer Infrastructure

Project Type: Recommended
Department: Wastewater

Summary: Detailed design and construction of various sanitary sewer replacement projects based on recommendations and framework contained in the Water/Wastewater Infrastructure Master Plan and Asset Management Plan, both recently received by Council. The risk assessment incorporated within the Asset Management Plan utilizes condition and age data, service criticality, socioeconomic, environmental and traffic impacts among others, to determine the priority projects.

The following locations will be completed in 2019:

- Cobalt Street (construction)
- Dean Avenue - Lorne to Landsend (construction)
- Jane Street - Dean to Easement (construction)
- Douglas Street Bridge (construction)
- Tudor Court - Windsor to End (construction)
- Hyland Drive - Regent to Winchester (design)
- St. Brendan Street - Homewood to Marion (construction)
- Henry Street (Garson) - MacDougall to East End (construction - lining)
- Ash Street (Lively) (construction - lining)
- Notre Dame Avenue (Hanmer) - Dominion to Oscar (design)

	2019	2020	2021	2022	2023	Total
Expenses	\$ 2,045,000	\$ -	\$ -	\$ -	\$ -	\$ 2,045,000
Funding						
User Fees	\$ 2,045,000	\$ -	\$ -	\$ -	\$ -	\$ 2,045,000

Operating Impact of Capital	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -

Project Title: Sewer with Watermain and Roads
Asset Class: Sewer Infrastructure

Project Type: Recommended
Department: Wastewater

Summary: This project will be used to complete watermain replacement under bridges and culverts or to accommodate sanitary sewer projects in various priority locations in 2019, which are unknown at this time and may develop as new condition assessment information becomes available. It will also be used for the design of watermain replacement under future priority bridge and culvert locations.

	2019	2020	2021	2022	2023	Total
Expenses	\$ 50,000	\$ -	\$ -	\$ -	\$ -	\$ 50,000

Operating Impact of Capital	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -

2019 CAPITAL PROJECT DETAILS

Project Title: Preliminary Design for Future Projects - Wastewater
Asset Class: Sewer Infrastructure

Project Type: Recommended
Department: Wastewater

Summary: Consulting fees for preliminary design for future projects, including engineering (preliminary and detailed design), CCTV inspections, geotechnical investigations, surveys, etc. Geotechnical investigations, CCTV inspections and surveys are often required prior to the design commencing, so this project allows the designer to obtain critical information well enough in advance to not negatively impact the project schedule. When the capital outlook is developed, it is unknown if the design will be completed by City staff or an external consultant. Once the workplan is developed, some of the designs may be more appropriately completed by external consultants. This project allows the flexibility to retain consultants to complete some or all of the design work, as required.

	2019	2020	2021	2022	2023	Total
Expenses	\$ 175,000	\$ -	\$ -	\$ -	\$ -	\$ 175,000
Funding						
User Fees	\$ 175,000	\$ -	\$ -	\$ -	\$ -	\$ 175,000
Total	\$ 175,000	\$ -	\$ -	\$ -	\$ -	\$ 175,000
Operating Impact of Capital	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -

Project Title: Contingency - Wastewater
Asset Class: Sewer Infrastructure

Project Type: Recommended
Department: Wastewater

Summary: This project provides additional funding for a variety of purposes in relation to the sanitary sewer and sewers with watermain/roads priority projects. During design, this project can be utilized to fund engineering consultants' fees in circumstances when it is determined part way through the year that there is not enough appropriate/specifically qualified CGS design or contract administration staff to complete the project. During construction, this project typically provides funds for additional costs related to unanticipated field conditions (i.e. soils/rock/groundwater elevations or new condition assessment information) which result in a change of scope of the work. This project also provides funding for sanitary sewer work that is determined to be required during the construction of a roads priority project, based on actual field conditions. This work would not have been anticipated during the capital budget planning process, based on the information available at that time.

	2019	2020	2021	2022	2023	Total
Expenses	\$ 71,233	\$ -	\$ -	\$ -	\$ -	\$ 71,233

Total	\$ 71,233	\$ -	\$ -	\$ -	\$ -	\$ 71,233
Operating Impact of Capital	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -

2019 CAPITAL PROJECT DETAILS

Project Title: Cost Sharing Policy Applications - Wastewater
Asset Class: Sewer Infrastructure

Project Type: Recommended
Department: Wastewater

Summary: This project is to allocate required funds to wastewater related costs for cost sharing applications received by Water/Wastewater Services from developers/land owners in accordance with the Development Cost Sharing Policy (2016) previously approved by Council. Development cost sharing applications will be considered on a case by case basis and subject to Council approval, based on the following principles:

- a) The City recognizes that development represents an opportunity to rehabilitate, upgrade and or replace infrastructure that would otherwise fall under the City's capital programs. Since there are limited resources to apply to infrastructure upgrades in a given year, the City has an interest in cost sharing in situations where there are demonstrated gains in closing the infrastructure, and/or
- b) Cost sharing is an option in situations where there are off site deficiencies or enhanced work is desired by the City.

	2019	2020	2021	2022	2023	Total

Project Title: Gatchell Outfall Sewer
Asset Class: Sewer Infrastructure

Project Type: Previously Approved
Department: Wastewater

Summary: Represents funds previously approved by Council toward the Gatchell Outfall Sewer project which is in progress. The environmental assessment study is complete, and detailed design is underway (2018/2019) with construction anticipated in 2020/2021. The term of this funding commitment is 2020 to 2021. The funding commitment has changed from 2019 and 2020 as shown in the prior capital budgets match to expected cash flow as existing budgeted funds will be spent in 2019.

Project Title: Rock Tunnel Maintenance and Repair
Asset Class: Wastewater Plants and Facilities

Project Type: Recommended
Department: Wastewater

Summary: Blasted from solid bedrock, the Sanitary Sewer Rock Tunnel is approximately 1.5 metres (5 feet) wide x 2.1 metres (7 feet) high. Its average depth below ground is approximately 23 metres (75 feet), running 21 kilometres beneath the City of Greater Sudbury. This sanitary sewer rock tunnel conveys wastewater from Garson, New Sudbury, Minnow Lake, the West End, Flour Mill, Gatchell, Downtown, and the South End to the Sudbury Wastewater Treatment Plant on Kelly Lake Road. It is a critical part of the City's Infrastructure.

Sanitary Sewer Rock Tunnel surveys are being completed on short sections of the Rock Tunnel. This project is an annual contribution to the reserve fund to accommodate the costs for maintenance and repair on the Sanitary Sewer Rock Tunnel, as identified by the Sanitary Sewer Rock Tunnel surveys.

	2019	2020	2021	2022	2023	Total

2019 CAPITAL PROJECT DETAILS

Project Title: Sanitary Sewer Laterals Rehabilitation
Asset Class: Sewer Infrastructure

Project Type: Recommended
Department: Wastewater

Summary: Council has recently received/endorsed the first iteration of the City's Water/Wastewater (W/WW) Master Plan and W/WW Asset Management Plan. The recommendations included in these plans provide guidance for both operational programs and capital projects that will reduce operating and possibly defer capital costs associated with the City's water and wastewater systems. They will also facilitate the City's alignment with the proposed Asset Management Planning Regulation, by the Ministry of Infrastructure. The recommendations include reducing leakage (non-revenue water) from the water distribution systems and reducing inflow and infiltration from the wastewater systems.

This project provides funds for sanitary sewer lateral repair and/or lining to align with operational priorities or in conjunction with inflow and infiltration reduction efforts.

	2019	2020	2021	2022	2023	Total
Expenses	\$ 100,000	\$ -	\$ -	\$ -	\$ -	\$ 100,000
Funding

Operating Impact of Capital	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -

Project Title: Sanitary Sewer System Rehabilitation and Repair
Asset Class: Sewer Infrastructure

Project Type: Recommended
Department: Wastewater

Summary: This project is used for the repair and/or rehabilitation (lining) of existing sanitary sewers using trenchless technologies (where appropriate) to extend the service life, repair deficiencies, and reduce inflow and infiltration. It is also used to pay for the contract administration and inspection of the work, by external consultants. The locations are prioritized based on the City's sanitary sewer condition assessment program and operational concerns. Sanitary sewer lining is a cost effective way to rehabilitate sanitary sewer mains with little impact to traffic when the watermain has previously been lined on the street and/or no other infrastructure work is planned in the area.

Project Title: Collection Health and Safety Equipment
Asset Class: Sewer Infrastructure

Project Type: Recommended
Department: Wastewater

Summary: The operations of the municipal water distribution and sanitary collection systems are regulated by the Ontario Health and Safety Act, and require that high risk/potentially dangerous work is undertaken. The regulations are constantly being improved/updated, and City staff are required to update their equipment accordingly. This project is for the purchase of various health and safety equipment required by operations.

2019 CAPITAL PROJECT DETAILS

Project Title: Lift Station Upgrades
Asset Class: Wastewater Plants and Facilities

Project Type: Recommended
Department: Wastewater

Summary: The project objectives are to complete the required upgrades at St. Charles Lift Station, Levesque Lift Station, Walford Lift Station and various lift stations.

As identified in the detail design, the upgrades for the St. Charles Lift Station include the new lift station, forcemain, tunnel connection and the museum relocation. The detail design is underway and costs are more refined, therefore additional funds are required to complete the project.

Levesque Lift Station is in major need for upgrades to the existing infrastructures and equipment and allow for capacity to receive additional sanitary sewer flows. This will require new mechanical, structural, electrical and controls upgrades.

Walford Lift Station is in the same need for upgrades. A detailed design was done and a tender was issued and did not proceed due to lack of funding.

The project objectives are to upgrade these three lift stations and sustain the safety level at other lift stations as required by upgrading equipment and improve the sustainability of their asset condition to keep them running safely with no impact on the environment or public safety.

Project Title: Lagoon Upgrades
Asset Class: Wastewater Plants and Facilities

Project Type: Recommended
Department: Wastewater

Summary: The Ministry of the Environment, Conservation and Parks has raised concerns about effluent phosphorous concentration limits at the Capreol lagoon, as it failed to comply with existing Environmental Compliance Act effluent limits. In order to comply with regulations, the City has engaged an outside consultant and completed effluent assessment with various options for treatment and/or remediation. This project is to do a detail design and contract administration to implement the preferred solution as identified in the study. Once completed, the construction will be implemented in next phase. The project objectives are to comply with existing regulations.

Project Title: Wastewater Facilities Condition Assessment
Asset Class: Wastewater Plants and Facilities

Project Type: Recommended
Department: Wastewater

Summary: The City has many wastewater facilities that are old and in need of various upgrades. The project objectives are to do condition assessment for facilities as part of the Asset Management Plan. Coniston Wastewater Treatment Plant was identified as a priority project because of its age and most of its equipment are beyond its life cycle. Once the condition assessment is complete, the next phase is to implement the recommendations as part of asset management.

Project Title: Wastewater Facilities Health and Safety Upgrades
Asset Class: Wastewater Plants and Facilities

Project Type: Recommended
Department: Wastewater

Summary: As per health and safety regulations, the City has completed various designated substance survey at many of the wastewater facilities and still have many remaining to complete. The project objectives are to implement remedial solutions as identified in the assessment reports, continue assessment of remaining facilities to protect workers health and safety and comply with regulations.

Project Title: Wastewater Facilities Security Improvements
Asset Class: Wastewater Plants and Facilities

Project Type: Recommended
Department: Wastewater

Summary: WSP Global has completed a security/safety assessment of wastewater facilities and provided recommendations to improve and enhance safety at these facilities to protect staff, infrastructure and public. This project is to implement the security and safety study recommendations at wastewater facilities as recommended by the safety and security study.

2019 CAPITAL PROJECT DETAILS

Project Title: Wastewater Treatment Plant Equipment Upgrades
Asset Class: Wastewater Plants and Facilities

Project Type: Recommended
Department: Wastewater

Summary: The City has a number of wastewater facilities that need to be kept in good working order and will require equipment repair and replacement at any given moment to protect public health and safety and the environment from spills and pollution. It was also identified that there is a need to protect from cold weather our mobile equipment and generators that are needed and used to respond to crisis and major equipment failures at our facilities. A storage unit is identified where these mobile gen-sets can be stored safely and be ready to use at any given notice without fear of malfunctioning because of cold weather. The project objectives is to design/construct storage unit, upgrade equipment at wastewater facilities and sustain the existing assets to extend their life cycle and respond to emergency equipment failure so there is no impact on facility operations.

Project Title: Community Spills Management Fund
Asset Class: Sewer Infrastructure

Project Type: Recommended
Department: Wastewater

Summary: The City's Water/Wastewater Environmental Compliance Officers are often first responders to environmental spill emergencies. In situations where the proponent of the spill is not available or unable to cleanup the spill, these funds are used to support the Environmental Compliance Officers in their efforts to assist the first response to environmental spills, by providing oversight of mitigation and proper cleanup efforts in emergency situations when the spiller is unavailable.

2019 CAPITAL PROJECT DETAILS

Project Title: Depot and Public Work Upgrades - Wastewater
Asset Class: Wastewater Plants and Facilities

Project Type: Recommended
Department: Wastewater

Summary: In 2015, the City of Greater Sudbury conducted a Facility Rationalization Study. The study recommended closing several public works depots and renovating or modifying numerous other existing facilities. This report carries forward the Facility Rationalization Study and related building condition reviews and identify opportunities to develop efficient and long-term site planning and building infrastructure solutions to support Linear Infrastructure Services, Environmental Services, Water/Wastewater Services, Infrastructure Capital Planning Services and Engineering Services.

The Frobisher site has been determined to be a viable location for a centralized facility to meet the requirements of Linear Infrastructure Services, Water/Wastewater Services, Infrastructure Capital Planning Services and Engineering Services. The St. Clair, Suez, Walden, and Whitefish depots will be utilized for road maintenance crews and salt/sand storage only.

The upgrades to the depot facilities will provide best practices in order to meet the requirements of our Source Water Protection Plan, improve worker health and safety, and make deployment and management of the operations more efficient.

The detailed design for the project is the next step. This project represents Water/Wastewater commitments for any funds required at shared facilities that emanate from the facility rationalization process.

Operating Impact of Capital	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -

Project Title: Hydraulic Model Licence - Wastewater
Asset Class: Sewer Infrastructure

Project Type: Recommended
Department: Wastewater

Summary: The City of Greater Sudbury has over 900 km of watermain and approximately 800 km of sanitary sewers. The hydraulic operations and planning for these linear systems requires in-depth analysis utilizing computer models. Historically the hydraulic modeling data and analysis was maintained by City staff. There were two full-time modellers (one for water and one for wastewater), who moved on to other roles. During the past two years, as a temporary solution, the models have been maintained and utilized for analysis by WSP Global, the engineering consulting firm that was retained to complete the W/WW Master Plan. Now that the master plan is complete, the City is going to complete the calibration and maintenance of the hydraulic models, as well as complete the hydraulic analyses in-house, as approved by Council in accordance with the 2018 business case for a Hydraulic Modeller position.

This project includes the annual licence fees for the sanitary sewer system hydraulic model.

2019 CAPITAL PROJECT DETAILS

Project Title: Sewer Inspection and Maintenance Program
Asset Class: Sewer Infrastructure

Project Type: Recommended
Department: Wastewater

Summary: Council has recently received/endorsed the first iteration of the City's W/WW Master Plan and W/WW Asset Management Plan (AMP). The recommendations of these plans provide guidance for both operational programs and capital projects that will reduce operating and possibly defer capital costs associated with the City's water and wastewater systems. They will also facilitate the City's alignment with the proposed Asset Management Planning Regulation, by the Ministry of Infrastructure. The recommendations include reducing leakage (non-revenue water) from the water distribution systems and reducing inflow and infiltration from the wastewater systems. The specific programs related to these recommendations require funding (approximately \$8.5 million over 5 years for the MP and \$5.5 million for the AMP) as well as resources to accommodate the work.

This project provides funding for the City's on going sanitary sewer condition assessment program which includes flushing and CCTV of mains and camera inspections of manholes throughout the city to align with the City's W/WW Asset Management Plan.

SUDBURY AIRPORT COMMUNITY DEVELOPMENT CORPORATION (SACDC)

OVERVIEW

The SACDC is a community development corporation. Their mandate is to promote community economic development in the City of Greater Sudbury with the cooperation and participation of the community by encouraging, facilitating, and supporting community strategic planning, and increasing self-reliance, investment, and job creation, through the development and enhancement of the Greater Sudbury Airport. The City recovers 100 % of associated costs and there is no impact to the tax levy. Their focus is to position the Greater Sudbury Airport as the preeminent aviation hub and the key engine for the economic growth of Greater Sudbury and the surrounding region.

SERVICES

- Provides commercial scheduled and charter airline operations.
- Has two Fixed Based Operators (Fuel and Ground Services).
- Has Private Charter Operators and Cargo Operations.
- Has a flight school, aircraft maintenance and fire services.
- Houses the Ministry of Natural Resources and Forestry (MNRF) Base.
- Houses Ornge, Ontario Provincial Police and Transport Canada.
- Has private aircraft hangars.
- Has land available for development.

STRATEGIC ISSUES AND OPPORTUNITIES

- Gaining a better understanding of market dominance and where Greater Sudbury fits within the airport network.
- Positioning the Greater Sudbury Airport to utilize innovation and deliver on commitments.
- Developing a growth strategy and joint investment in time and effort required, with commitment from the Economic Development group.
- Developing a marketing strategy to set a foundation and roadmap that when implemented lead to success.

CONSERVATION SUDBURY (NICKEL DISTRICT CONSERVATION AUTHORITY)

OVERVIEW

Conservation Sudbury uses an integrated approach in carrying out its mandate in the Vermilion, Wahnapipei and Whitefish watersheds, an area of approximately 9,150 square kilometres. Established under the Conservation Authorities Act of Ontario, Conservation Sudbury's objective is to ensure the conservation, restoration and responsible management of waters, land and natural habitats through programs that balance human, environmental and economic needs.

Ontario's 36 conservation authorities are unique to our province and are funded by municipal and provincial sources that are supplemented considerably by revenue from grants, delivery of programs and cost-recovery review fees. In 2018, Conservation Sudbury's budgeted revenues of \$1.7 million came from the municipal tax levy (51 %), provincial grants (24 %) and a variety of self-generated sources (25 %). Major undertakings by the authority are often funded through a combination of capital reserves/levy, special municipal allocations and partial matching from upper levels of government.

2018 ACCOMPLISHMENTS

- Completed first milestones of a long-term Asset Management Plan.
- Published the first Source Protection Annual Progress Report on May 1.
- Completed fees review and adopted changes for staffing cost-recovery starting in late 2018.
- Adopted Administrative By-laws as mandated by the revised Conservation Authorities Act.
- Commenced a Floodplain Mapping and Modeling Project of the Junction Creek Watershed.

- Commenced planning for concrete rehabilitation of the Maley Dam.
- Completed a directional signage system at Lake Laurentian Conservation Area.

OPPORTUNITIES TO 2026

- \$8.6 million joint proposal with the City of Greater Sudbury (\$13.5 million) storm water infrastructure rehabilitation; submitted under the federal Disaster Mitigation and Adaptation Fund (over 10 years).
- Grow the activities and profile of charitable arm, Nickel District Conservation Foundation.

- Build on partnerships for increased tourism at the Lake Laurentian Conservation Area.
- Increase water quality and quantity monitoring and reporting technologies.

KEY DELIVERABLES FOR 2019

- Complete Asset Management Strategy.
- Implement a new fee structure for planning reviews and addition of a Planning lead.
- Complete majority of Junction Creek floodplain project – to March 2020.
- Initiate work on Maley Dam rehabilitation and return to box culvert remediation schedule.
- Commence updates/revisions/additions of operational policy.

PUBLIC HEALTH SUDBURY & DISTRICTS

OVERVIEW

Public Health Sudbury & Districts is a progressive public health agency that is part of a provincial network of 35 non-profit public health agencies. It is committed to improving health and reducing social inequities in health through evidence-informed practice.

As part of the province's health system, Public Health Sudbury & Districts works "upstream" to promote and protect health and prevent disease. The agency works with many partners, such as municipalities, schools, health-care providers, social services, and community agencies, to keep people healthy and reduce their needs for health-care services. Its culture of enriched public health practice fosters research, ongoing education, and the development of innovative programs and services.

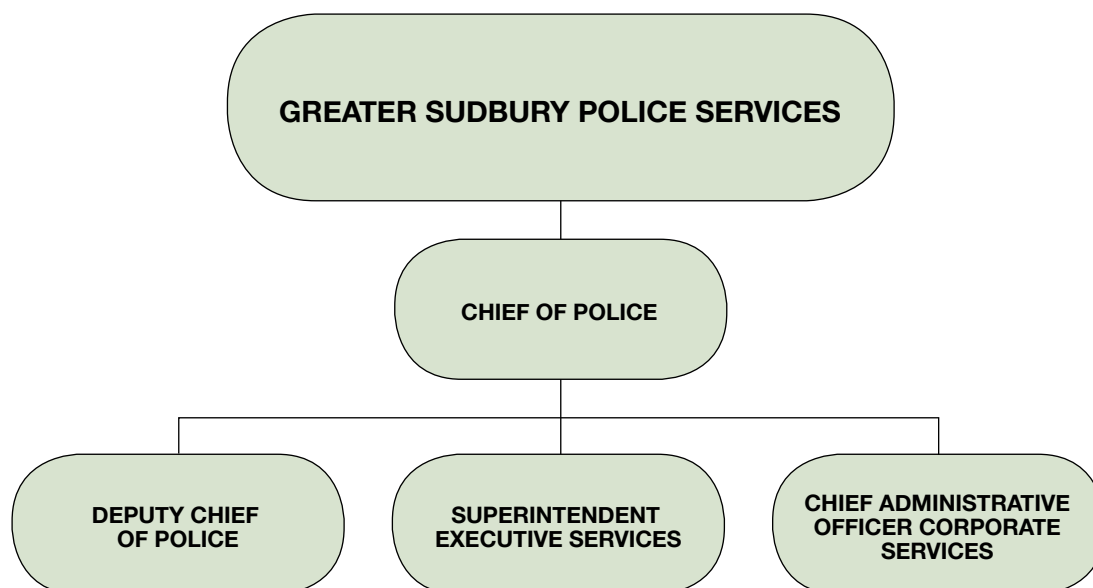

Public Health Sudbury & Districts' head office is in Greater Sudbury. Five office sites are located throughout its service area of Greater Sudbury and the districts of Sudbury and Manitoulin. Over 250 staff deliver provincially legislated public health programs and services. The agency is committed to establishing relationships based on respect, trust, and humility with area First Nation and Métis Peoples.

Public Health Sudbury & Districts is governed by an autonomous Board of Health and is led by the Medical Officer of Health who is responsible to the Board for the management of the organization's public health programs and services as required by law.

GREATER SUDBURY POLICE SERVICE (GSPS)

OVERVIEW

A special purpose body reporting directly to the Police Services Board, the Greater Sudbury Police Service works collaboratively with our community and in accordance with the Police Services Act of Ontario. GSPS provides a range of services to ensure the safety and well-being of our community including, but not limited to, crime prevention, law enforcement, assistance to victims of crime, public order maintenance, and emergency response, including 911 call answering. Working with citizens and business partners, GSPS embraces a community policing approach, which means the police work with residents and their communities to prevent crime and to address safety issues to protect the lives and property of citizens.

SERVICES

The Service is divided into six business operating units providing the following services:

Patrol Operations

- Provides patrol response to calls for service in the city proper as well as in outlying communities.
- Provides alternative response options to calls for service through the Police Community Response Centre.

Criminal Investigation Division

- Provides specialized investigative services and support including intelligence analytics, fraud, missing persons, cybercrime, forensics, drugs, intelligence, human trafficking, major crimes, and break enter and robbery, biker enforcement

unit, gang and vice, sex offence registry/high risk offenders and technical support.

Operational Support

- Provides emergency management, tactical, canine hostage rescue team, major incident commanders, crisis negotiators, police explosive forced entry technicians, explosive disposal technicians, police community response centre, alternate response, traffic management, collision reporting centre, special event planning, and security and auxiliary officers.

Administrative Support

- Provides communication dispatch services, 911 emergency response call line, court services,

prisoner transportation and property and evidence management control.

Executive Services

- Provides business planning support, corporate communications, audit, risk management, service delivery research, development and analytics, diversity, inclusion, Aboriginal liaison, special projects, professional standards bureau, paid duty, community support including community mobilization unit, integrated community response unit, crime prevention, youth coordinator, senior liaison, crime stoppers, victim services and youth referrals, volunteers Lions' Eye in the Sky monitoring program, and community safety and well-being.

Corporate Services

- Provides core business services including records, customer service, release of information, professional development and training, payroll, benefits, health and safety, wellness, labour relations and contract administration, fleet, facilities, human resources, financial services, and information and communications technology management.
- In addition to the full range of police services provided in accordance with the Adequacy and Effectiveness Standards, the Service provides 911 services for Police, Fire and Paramedic Services and direct dispatch services for police and fire through the P25 radio system, which is also shared by transit. Police work closely with a number of City divisions including Finance, Human Resources, Purchasing, Legal Services and more recently, Information Technology with an aim to pursue additional partnerships in the area of Fleet Services specifically.

- Implemented of LEAN Management.
- Converted Lions' Eye in the Sky to wireless system.
- Distributed Narcan to all officers and members at risk of exposure to opioids and established a specialized drug processing room.
- Re-located Customer Service.
- Launched Project LifeSaver.
- Project Homestead in responding to and missing youth.
- Targeted outreach recruitment initiatives.
- Responded to approximately 60,000 calls for service.
- PCRC diverted 11,000 calls for service from the front line.

STRATEGIC ISSUES AND OPPORTUNITIES

- Digital Evidence Management pilot project.
- Continued facilities improvements in the form of furnishings/painting/flooring.
- New Mobile for Public Safety Application.
- Monitoring of Community Safety personnel staffing model and redeployment of six frontline officers for improved frontline capacity.
- Continued enhancement and expansion of community partner relationships.
- Succession planning at the leadership level.
- Improved 911 services through NG911.
- Member wellness training and supports.
- Improved data storage through Cloud technology.

2018 ACCOMPLISHMENTS

- Finalized Counter Sexual Exploitation Strategy.
- Renewed and extended grant funding for the Looking Ahead to Build the Spirit of Our Women: Learning to Live Free from Violence strategy.
- Amended Memorandum of Understanding with the Ministry of Labour for the Sharing of Information.
- Held extensive consultation for business planning with members, residents, local businesses and key stakeholders.
- Deployed mobile hand-held technology to all frontline personnel.
- Created of Electronic Crown Brief.

KEY DELIVERABLES FOR 2019

- Implement online record/background security checks.
- Continue the evolution of Victim Prevention Strategy.
- Expand Police Community Response Centre in response to calls for service.
- Community Sexual Assault Case Review Committee in full operation.
- Conduct a comprehensive facilities needs assessment.
- Enhance traffic management through education, engineering and enforcement.

- Expand use of social media.
- Year 1 of Strategic Deployment Plan with four sworn members and four part-time communicators.
- Develop a downtown safety and crime prevention strategy.
- Expand Coplogic to increase types of calls reported online.
- Continue Looking Ahead to Build the Spirit of Our Women: Learning to Live Free From Violence project.
- Augment performance analytics and metrix for tracking business activities
- Phase 1 NG911 project
- Tri-age call-takers to assist in processing incoming requests for service
- Increase visibility through downtown patrols.
- Implement business analytics solutions and dashboard reporting.
- Implement paperless court brief disclosure.

KEY PERFORMANCE INDICATORS

Measure Name	Measure Category	CGS results		Median 2017
		2016	2017	
Reported Number of Violent-Criminal Code Incidents per 100,000 Population	Community Impact	972	1,048	1,038
Reported Number of Total (Non-Traffic) Criminal Code Incidents per 100,000 Population	Community Impact	4,635	5,693	5,810
Number of Police Staff (Officers and Civilians) per 100,000 Population	Service Level	244	245	249
Total Cost of Police Services per Capita	Service Level	\$371	\$382	\$384
Number of Criminal Code Incidents (Non-Traffic) per Police Officer	Efficiency	28	35	34

USER FEES

Kin Park Blezard Valley

USER FEES

User fees are fees charged by municipalities to recover direct costs for services provided to a specific user or group of users, including tourists and non-residents. They reflect unit prices for a service that is deemed to be unique to a given user group and are not appropriate for recovery solely from the municipal tax levy. User fees are about ensuring tax fairness and equity based on an understanding of who benefits from services being delivered: an individual user (i.e. a public skating enthusiast) or a group (i.e. motorists who park in the downtown) versus a large portion (or all) of the population (i.e. residents that rely on emergency services).

The user fees illustrated in the following schedules are the fees for services that provide either a direct benefit to the user, or provide a direct benefit to both the user and the community as a whole. Therefore the cost to provide these services is partially recovered from the user. To fully fund the services through the tax levy would result in a significant increase to property taxes for individuals who may never enjoy certain services.

User fees also ensure that the City of Greater Sudbury maintains adequate service levels comparable to other municipalities and meets users' expectations.

LONG-TERM FINANCIAL PLAN

The City's Long-Term Financial Plan mentions user fees in three out of four financial principles.

- Long-term sustainability: Balancing affordability with resource demands when establishing taxation levies and user fees.
- Respect for the taxpayer: Considering the affordability of City charges (taxes and user fees) as part of the financial decision-making process.
- Appropriate funding for services: The City's annual budget process will consider the appropriate allocation of funding between taxation and user fees and the use of area rating, recognizing that residents who use multiple services the most often can afford them the least.

USER FEE FRAMEWORK

The City's user fee framework states that many factors contribute to determining the appropriate rate to be charged for each user fee. Some examples of factors to consider include:

1. Determine the full cost to provide the service

The full cost of providing the good or service should be the starting point in developing an appropriate fee and should include direct costs (operating and maintenance) and indirect costs (overhead). All capital costs including depreciation and debt repayment should also be considered.

2. Determine the demand for the service, and if pricing will significantly affect the demand.

User fees can act as a mechanism for allocating scarce resources or managing the timing of demand for a good or service. Implementing price differentials can help to balance the demand for goods or services between peak and off-peak periods.

3. Determine appropriate level of cost recovery from user fees:

- Fully Tax Supported:** These are services that are 100 % recovered through property taxation with no direct charge to the user. These services support the community as a whole and cannot easily determine a rate for an individual user. This includes emergency services, such as Police Services.
- Partially Tax Supported:** These are services that provide a direct benefit to the individual user as well as the community as a whole, therefore the cost is partially recovered through a user fee, and the balance from the municipal tax levy. An example of this is transit, as the use of public transit not only provides a benefit to the user, but the community as a whole in terms of reduced air pollution, traffic and road deterioration.
- Non-Tax Supported:** These are services that provide a direct benefit to the user only, and therefore should be 100 % recovered through user fees. Examples of this are the issuance of building permits and parking costs.

4. Review market rates charged by other service providers for the same or similar service, if applicable.

2019 INFLATIONARY INCREASES

In accordance with the current Miscellaneous User Fee By-law, the 2019 user fee rates were to be increased by the greater of 3 % or the September 2018 Stats Canada Consumer Price Index (CPI) for all items, which was 2.2 %. Any exceptions to the 3 % increase are described on the appropriate fee schedule.

Most fee increases are scheduled to come into effect on January 1, 2019. However, there are fees in the by-law that follow the playing season, such as ice rentals and playing fields, and reflect increases at the start of their respective seasons as opposed to the beginning of the calendar year.

In most cases, the 2019 user fees have been rounded to the closest \$.25, \$.50, \$1.00, \$5.00 or \$10.00, depending on the value of the service provided.

Each department may request changes to the previous year's by-law, including administrative changes, for clarity and ease of application.

Community Development

Community Development has approximately 800 user fees and variations, which are primarily made up of leisure, fitness, playing fields, ski hills, arenas, parking and transit. These fees represent approximately \$28 million of the total user fee revenue collected, with the major contributor being transit fares.

Corporate Services

Corporate Services has approximately 160 user fees which account for approximately \$4.7 million of the total user fee revenue collected. These fees are made up of administrative services, marriage act, legal, parking, financial services, and by-law and enforcement fees, with the majority of the revenue generated from legal services.

Community Safety

Community Safety has more than 90 user fees, which account for approximately \$466,000 of the total user fee revenue collected. The majority of this revenue comes from the Lionel E. Lalonde Centre for meeting room rentals and gym costs.

Growth and Infrastructure

Infrastructure Services has approximately 300 user fees, which account for approximately \$11.6 million of the total user fee revenue collected. These fees are made up of public works, environmental services, and planning and development fees, with the majority of the revenue derived from landfill tipping fees.

SCHEDULE "CD-1"

PROPOSED 2019 BY-LAW

Anderson Farm Museum**Category****Stable Building Rental Fees****Hours Available**

Monday to Saturday - 8:00 A.M. To 10:00 P.M.

Sunday - 8:00 A.M. To 8:00 P.M.

SCHEDULE "CD-3"

PROPOSED 2019 BY-LAW

Ice Use Charges

1. In this Schedule "CD-3"
- "commercial" means a corporation, sole proprietorship, partnership or unincorporated association which is intended to be a for-profit corporation or association including but not limited to a hockey school;
- "non-prime time" means the hours between 7:00 in the morning and 5:00 in the afternoon on each day from Monday to Friday inclusive in each week, and 7:00 to 8:00 in the morning on Saturday and Sunday;
- "prime time" means the hours between 5:00 in the afternoon and 1:00 in the morning on each day from Monday to Friday inclusive in each week and between the hours of 8:00 in the morning and 1:00 in the morning on each Saturday and Sunday in each week;
- "shoulder time" means a 15% discount of prime ice rate (same as '5 days or less' rates). Shoulder rate means the hours between 10:00 in the evening and 1:00 in the morning on each of the day. The rate only applies to ice booked following the annual ice allocation process (October 1st).
- "regular season" means the period from September 1st in any year to and including March 31st in the next following year; and
- "summer season" means the period from April 1st to August 31st, inclusive, in any year.
2. Any person who is granted a facility use permit for ice time in a City Arena shall pay a fee per hour in accordance with the following, unless such person qualifies for the special rates set out in Schedule "CD-4" Special Ice Rates, in which case the person shall pay the special rates set out in Schedule "CD-4".

Notes:

1. Not-for-profit organizations (NPOs)* and registered charity groups have permission to book periodic meetings at no cost and are responsible for the cleaning of the facility immediately after the meeting, to an acceptable level as outlined in the facility rental agreement. Leisure staff has the responsibility to manage the schedule for free meetings in order to meet the needs of all not-for-profit/charity groups equitably. Leisure staff has the responsibility to manage the schedule for free meetings in order to meet the needs of all nonprofit groups equitably.

*Not-for-profit organization (NPO) is defined as a "recognized non-profit organization". NPOs are associations, and/or societies that are not charities and are organized and operated exclusively for social welfare, civic improvement, pleasure, recreation, or any other purpose except profit.

Below are a few types of NPOs and an example of each:

- Social, recreational, or hobby groups (i.e. CANs, bridge clubs, curling clubs, and golf clubs, knitting clubs, etc...)
- Amateur sports organizations (i.e. hockey associations, baseball leagues, soccer leagues)
- Registered charitable organizations (i.e. food banks, soup kitchens, missionary organizations).

Meeting is defined as "a gathering for the purpose of the organizations business" i.e. Annual General Meetings, monthly executive meetings, with the intention of a lecture style set up to include light refreshments only. Meetings are not intended for fundraising events, elaborate gatherings, or large scale leisure activities.

2. Non-profit groups are entitled one free rental per year for a maximum of 2 days for an event that is outside of the definition of a meeting, as explained above. For example, fundraisers, fairs, dinners, dances, holiday events. The free rental does not include ancillary costs such as insurance or any additional amenities other than what is available on site at the facility. Subsequent to the annual "free rental usage", the not-for-profit group would be subject to fees as outlined in the user fee by-law.

4. As per resolution CC2018-147, the City of Greater Sudbury will waive all facility rental costs at its large facilities/arenas, including arena floors, for a period of up to 3 days for major milestone anniversary celebrations of the host communities (every 25 years). This includes the former towns and cities of Sudbury, Capreol, Nickel Centre, Rayside-Balfour, Valley East and Walden.

SCHEDULE "CD-17"

PROPOSED 2019 BY-LAW

Transit

"Adult" means a person 18 years of age or older other than a Student, a Senior or a Disability Pensioner

"Concession" means passes consist of reduced fares. Proper proof of eligibility must be presented.

"Infant" means a person who is under the age of 5 years;

"Youth" means a person who is 5 years of age or older

"Disability Pensioner" means a person who is a recipient of a Disability Pension from the Province of Ontario, a Canada Disability Pension, a War Veteran's Pension or who is registered with the Canadian Institute for the Blind, as confirmed by the appropriate authority;

"Senior" means a person who is 65 years of age or older;

"Student" means a person who presents a current and valid student identification card from a high school or a post secondary educational institution

"Affordable Pass" means a person that qualifies for the Affordable Transit Pass program, administered through the Social Services department. Passes are limited and sold on a first come, first serve basis.

"Day Pass" is a bus pass that can be used for an unlimited number of trips by a single rider for one full service day only. The pass cannot be shared or re-distributed.

"Family Pass" is a bus pass that can be used for an unlimited number of trips for up to five riders (no more than two of which are Adults) for one full service day only. The pass cannot be shared or re-distributed.

<u>Type of Application</u>	<u>2018 TOTAL</u>	<u>2019 TOTAL</u>

Large Off-Road And Mining Tires (50" - 57.5" Diameter) 100 Kg Or Less (Per Tire)	72.00	Nil
Extra Large Off-Road & Mining Tires (Over 57.5" Diameter) 100 Kg Or Less (Per Tire)	107.00	Nil
Any Load Of Tires More Than 100 Kg (Per Tonne)	225.00	Nil
Tire With Rim, excluding passenger/light truck tires (Extra Fee Per Rim)	6.00	Nil
Contaminated Soil Suitable For Cover	53.00	55.00
Contaminated Soil Not Suitable For Cover	85.00	88.00

Exceptions

The waste collection fee for high density and multi-type residential buildings has been updated to include administration costs since the program is designed to be full cost recovery. The Biz Bag Commercial fee and the Bag Tag fee will remain the same until the inventory is depleted as the fee is printed on the package and tag.

Some fees were frozen if the 3 % increase did not bring the rates up to the next nearest dollar as the City's solid waste facilities do not keep change less than a dollar.

The fees for tire disposal were removed this year as section 68(3) of the Resource Recovery and Circular Economy Act, 2016, S.O. 2016, c. 12, Sched. 1 states that a person responsible for establishing and operating a collection system shall ensure that no charge is imposed at the time of the collection.

Plans and Documents

Exceptions

The following rates have been removed as most of them are either available online, or in digital formats at no cost:

- Geocode Map Book
- Dylar (Price Per Sq. Ft.)
- A-1 Dylar Size
- Long Sheets Dylar
- Topographic Dylar (Price Per Sq. Ft.)
- Plan and Profile Sheets (Reg. Or City)
- City Of Sudbury Ward Maps Per Sheet
- All duplication services
- All printing services except for map printing
- Zoning By-law
- Zoning By-law Maps

The following rates have been increased greater than 3 % to reflect the actual cost of labour and materials to provide this service and to ensure full cost recovery as required by the by-law:

- Street Plans (As-Built)
- Topographic Maps
- C-Plan Drawings
- Traffic Volume Maps
- Key Plan Of Services 1 Copy

The Autocad Drawings fees have been added to the schedule. These fees were omitted from prior by-laws.

The fees for per square inch map printing were introduced to allow for custom sized map/document printing sizes that are not listed in this section. The fee represents the average cost per square inch of the listed print sizes.

The fees for 1:2,500 per kilometre were added for digital mapping and digital ortho-photographs in order to offer more flexibility in digital map printing.

Deferral of variance, or permission - 50% of the above fees if reactivated within one year from the date of receipt or modified from original proposal		

Exceptions

These fees were approved by the General Board of the Nickel District Conservation Authority on May 10, 2018. The increase partially closes the gap by 75 %, between the Authority's current fees and the average fees of conservation authorities providing comparable services and located in contextually-similar municipalities in the province. These fees will provide partial cost recovery for authority staff undertaking planning reviews and are limited to undertakings located in those areas regulated by the Conservation Authority.

APPENDICES

Bell Park

GLOSSARY

APPENDIX 1

Accruals:

Revenues or expenditures that have been recognized for that fiscal year, but not received or disbursed until a subsequent fiscal year. Annually, accruals are included in the revenue and expenditure amounts reported in a department's budget documents and year-end financial reports. For budgetary purposes, the department's expenditure accruals also include payables and outstanding encumbrances at the end of the fiscal year for obligations attributable to that fiscal year.

Actual vs. Budgeted:

Difference between the amount forecasted (budgeted) in revenues or expenditures at the beginning of the fiscal year and the actual receipts or expenses incurred by the end of the fiscal year.

Assessment:

This is the property value determined by Municipal Property Assessment Corporation (MPAC).

Assessment Growth:

The total assessed value of all new properties built, less the value of properties demolished in a given year. An increase in assessment growth allows the municipality to collect the total property tax amount over more properties.

Assets:

Resources owned or held by the City which have monetary value.

Base Budget:

Cost of continuing the existing levels of service in the current budget year.

Benchmarking:

An exercise whereby one organization's results are compared to those of another comparable organization providing the same or similar services based on similar methods or accounting for costs.

Budget Document:

The compilation of the spending plans for the various funds, along with supporting schedules, tables and charts which, in total, comprises the annual revenue and expenditure plan.

Capital Budget:

The annual Council approved plan of the City for expenditures and revenues to acquire, construct or rehabilitate capital assets.

Capital (Debt) Financing:

Portion of the operating budget required to service the debt assumed by the City from capital expenditures of the current and previous years.

Capital Improvement Project:

Non-routine capital expenditures that generally cost more than \$50,000 resulting in the purchase of equipment, construction, renovation or acquisition of land, infrastructure and/ or buildings with an expected useful life of at least five years. Capital improvement projects are designed to prevent the deterioration of the city's existing infrastructure, and respond to and anticipate the future growth of the city.

Commitments:

Projected cash flow expenditures beyond the Council approved budget year that require future year cash flow to complete the approved project. In essence, it allows a project tender to be executed in the current budget year that requires future year cash flows to complete.

Current Value Assessment:

A valuation placed upon real estate or other property by the Municipal Property Assessment Corporation as a basis for levying taxes.

Debt:

The amount of all obligations for the payment of interest and principal due by certain agreements and by-laws as incurred such as debentures, promissory notes, leases, letters of credit and other financial commitments and guarantees.

Debt Ratio:

Total debt divided by total assets. Used by finance and budget staff to assess fiscal health of the organization.

Encumbrance:

The formal accounting recognition of commitments to expend resources in the future.

External Financing:

Financing from sources external to the City such as provincial or federal funding and grant subsidies.

Fiscal Year:

The period designated by the City for the beginning and ending of financial transactions. The fiscal year for the City of Greater Sudbury begins January 1 and ends December 31.

Infrastructure:

Facilities that support the continuance and growth of a community. Examples include roads, water lines, sewers, public buildings, parks.

Infrastructure Renewal requirement:

The need for capital investment/infusion to sustain, replace and/or renew aging infrastructure.

Internal Financing:

Financing from sources internal to the division or program submitting a capital project including reserve funds, development charges, and other program generated revenues.

Operating Budget:

The annual Council approved plan of the City for expenditures, revenues, staffing levels and service levels for operations of the City taking place from January 1 to December 31 of each year.

Performance Measures:

Measurement of service performance indicators that reflect the amount of money spent on services and the resulting outcomes at a specific level of services provided.

Program Support:

The allocation of indirect costs such as financial services, human resources and information technology, etc. to departments.

Projected Actuals:

Refers to the expected or anticipated outcome of the year's expenditure and revenue activities. A recommended approach for departments is to combine year to date actuals, in addition to the anticipated revenues and expenditures for the remainder of the fiscal year. The Projected Actuals are often compared with the current year budget to determine variances.

Property Tax:

An individual property assessment multiplied by the property tax rate in a given year.

Reserves and Reserve Funds:

Funds generally set aside for significant future purchases, to replace major capital infrastructure, are accumulated to meet growing liability, or to provide a buffer for significant unanticipated expenditures beyond the control of Council.

Revenue:

Financial resources received from taxes, user fees and other levels of government.

Special Capital Levy:

An amount collected from property taxation that is above the amount currently allocated to fund capital expenditures.

Taxation Levy:

The total property tax levied by a municipality.

Tax Rate:

A rate used to determine the amount of property tax payable. Taxes on individual properties are calculated by multiplying a property's current value assessment (CVA) by the applicable tax rate.

Financial Indicators**Net Financial Position:**

Difference between liabilities and assets.

Own Source Revenue:

Revenues generated directly by the City of Greater Sudbury.

Sustainability**Financial Position per Capita:**

Net Financial Position divided by the population.

Net Financial Liability:

Net Financial Position divided by the City's own source revenues.

Asset Consumption Ratio:

Accumulated amortization expenses over the total gross cost of capital assets. A higher ratio indicates a higher need for replacement.

Ratio of Financial Assets to Liabilities:

Total amount of financial assets divided by the total amount of liabilities

Ratio of Debt to Revenue:

Total amount of debt divided by the total amount of revenue

Debt per Household:

Total amount of debt divided by the total number of households

GLOSSARY

APPENDIX 1

Flexibility**Tax Discretionary Reserves as a % of Taxation:**

Total amount of tax reserves divided by the total amount of tax revenue collected.

Discretionary Reserves as a % of Own Source Revenues:

Total value of reserves divided by the amount of own source revenue.

Total Reserves per Capita:

Total reserves in relation to population.

Vulnerability**Taxes Receivable as a per cent of Tax Levied:**

Total amount of taxes receivable divided by the amount of taxes levied.

Tax Debt Interest as a % of Own Source Revenues:

Total amount of tax debt interest divided by the City's own source revenue.

Debt to Reserve Ratio:

Total amount of outstanding debt over the total reserve and reserve fund balances (excluding obligatory reserve funds).

Total Debt Charges as a per cent of Own Source Revenues:

Total amount of debt principal and interest payments divided by the City's own source revenue.

Total Debt Outstanding per Capita:

Total amount of debt divided by population.

Debt Outstanding as a per cent of Own Source Revenues:

Total amount of outstanding debt divided by the City's own source revenues.

Ratio of Debt Charges to Total Revenue:

Total amount of debt charges divided by the total amount of revenue

Municipal Taxes as a % of Household Income:

Average residential taxes divided by the average household income

Rates Covered Ratio:

Measure of the City's own source revenue divided by the total expenditures.

Ratio of Government Transfers to Total Revenue:

Total amount of Federal and Provincial transfers divided by the total amount of revenue.

The City of Greater Sudbury maintains appropriate systems of internal controls to ensure effective financial management, reliable and relevant financial information, and the safeguarding of assets.

Management systems, policies and by-laws are in place for financial management, accounting and budgeting to ensure transactions are appropriately authorized and recorded, and the integrity and completeness of financial records are assured. Key policies and by-laws include the Purchasing By-law, and the Operating Budget, Capital Budget, and Investment Policies.

Budget Preparation Policy

To ensure that effective policies and procedures governing budget preparation are developed and maintained; to encourage initiative, responsibility, and planning, while ensuring effective budget preparation control. The City prepares the budget in accordance with the Municipal Act 2001, Section 290, which states that the sums of all expenses must be at least equal to that of the sums of all revenues, resulting a balanced budget.

Capital Budget Policy

To provide fiscal control and accountability related to the preparation and monitoring of the capital budget.

Charity Rebate Policy

To establish responsibilities and guidelines for ensuring that charity rebate applications and recalculations are valid, equitable and completed within the appropriate guidelines.

Debt Management Policy

To set out the parameters for securing debt, managing outstanding debt and provides guidance regarding the timing of debt, type of debt instrument and the purpose for which the debt will be used.

Development Charges By-law

For the imposition of development charges against land within the municipality for growth-related capital costs required because of the need for municipal services arising from development.

Donation Policy

To provide general guidelines for receiving and accounting for donations that are gifts and for which an official income tax receipt will be issued.

To provide an investment framework that allows the City to invest excess cash resources within statutory limitations; to protect and preserve capital; to maintain solvency and liquidity to meet ongoing financial requirements; and to earn the highest rate of return possible.

Operating Budget Policy

To provide fiscal control and accountability related to the approved operating budget.

Purchasing By-law

To encourage competition among suppliers; to maximize savings for taxpayers; to ensure service and product deliver, quality, efficiency and effectiveness; to ensure fairness among bidders; to ensure openness, accountability and transparency while protecting the financial best interests of the City; to have regard to the accessibility for persons with disabilities to the Goods, Services and Construction purchased by the City; and to have regard to the preservation of the natural environment and to encourage the use of environmentally friendly Goods, Services and Construction.

Tax Adjustments under Section 357 and 358 Policy

To establish responsibilities and guidelines for ensuring that tax adjustments under Sections 357 and 358 are valid, necessary and completed within the guidelines of the Municipal Act, 2001, and municipal by-laws.

Tax Adjustments under Section 39.1 and 40 Policy

To establish responsibilities and guidelines for ensuring that tax adjustments under Sections 39.1 and 40 are valid, necessary and completed within the guidelines of the Assessment Act and municipal by-laws.

Travel and Business Expense Policy

To establish responsibilities and guidelines for ensuring that travel, Council and employee expenses are valid, necessary and economical.

Vacancy Rebate Policy

To establish responsibilities and guidelines for ensuring that vacancy rebate applications and recalculations are valid, necessary and completed within the guidelines of the Municipal Act, 2001, and municipal by-laws.

Elderly Property Tax Rebate Policy

To provide guidelines for property tax rebates to eligible low-income seniors owning and occupying residential property.

REVENUE AND EXPENSE CATEGORIES

APPENDIX 3

The following refer to the revenue and expense categories used in the presentation of the operating budget.

Revenues

Levies:

This category consists of supplementary taxation and payments-in-lieu of taxation received from government agencies.

Provincial Grants and Subsidies:

This category consists of grants received from the Province of Ontario for specific functions such as Ontario Works, Housing Services, Children Services, Emergency Medical Services, and the Ontario Municipal Partnership Fund.

Federal Grants and Subsidies:

This category consists of grants received from the Federal government for specific functions funded through agencies such as FedNor and Human Resources Development Canada.

User Fees:

This category consists of fees for use of services including, but not limited to, ice and hall rentals, leisure activities, cemetery fees, library fees, applications for building permits, water/wastewater, and transit.

Licensing and Lease Revenues:

This category consists of licensing fees such as business licences, lottery licences, taxi licensing, and lease revenues.

Investment Earnings:

This category accounts for all investment income, interest on Greater Sudbury Utility note, interest on tax arrears, and interest earned on internal capital financing.

Contributions from Reserves and Capital:

This category reflects the contributions from reserves, reserve funds, and capital for various projects identified in the operating budget.

Other Revenues:

This category includes revenues such as the Ontario Lottery and Gaming Corporation and Provincial Offences Act fines collected.

Expenses

Salaries and Benefits:

This category consists of compensation for all employees such as salaries, benefits, service pay, overtime, car allowance, and boot and tool allowance.

Materials – Operating Expenses:

This category includes items such as office supplies, salt and sand, asphalt, gravel and shop supplies, tax writeoffs, insurance costs, telephone costs, property taxes, and other general expenses.

Energy Costs:

This category consists of water, hydro, natural gas, propane, diesel and unleaded fuel.

Rent and Financial Expenses:

This category includes bank charges, debit and credit charges, tax interest on penalty writeoffs, cost of rental equipment and rent expense.

Purchased/Contract Services:

This category consists of items that are outsourced, such as, but not limited to, Housing Services providers, Children Services providers, Ontario Works, roads maintenance contracts, vehicle repairs, hired or rental equipment, and professional services.

Debt Repayment:

This category consists of internal and external debt repayments.

Grants – Transfer Payments:

This category consists of any grants given to community groups and outside boards such as Conservation Sudbury (Nickel District Conservation Authority), Sudbury and District Health Unit, Arts and Culture grants, grants to playgrounds, and transfer payments to Ontario Works recipients.

Contributions to Reserves and Capital:

This category reflects the contributions to reserves and reserve funds and transfer to capital fund for capital envelopes.

REVENUE AND EXPENSE CATEGORIES

APPENDIX 3

Internal Recoveries:

This line consists of allocations to each department for indirect overhead costs and program support.

As well there are indirect overhead charges for areas such as engineering services, which are allocated to water/wastewater, roads and solid waste.

This line also includes the equipment charges and credits predominately in infrastructure, parks and emergency services areas. These equipment charges represent the cost of the maintenance, repairs and a depreciation component which allows for future replacement of equipment and vehicles.
