

Capreol Waterfront Community Improvement Plan  
Open House Session November 12, 2013  
Old Capreol Fire Hall

**Additional Public Ideas/Comments:**

- Put a lighthouse on the island.
- Build a bridge to cross the river in order to access the ski hill, etc.
- Put up rail lantern lampposts to maintain the rail theme.
- Make sure there is a big dock at the waterfront.
- Build a small amphitheatre on the riverfront with access to power for entertainment.
- Make sure there is a diving board.
- More prominent one-way signs on Lakeshore Drive are required.
- Lighting required for Peace Park
- Shut down Lakeshore Drive to create a walking/park area that covers the whole length – reroute traffic to the laneway. This applies to the whole length but an option may be to shut down traffic on the southern leg of Lakeshore Drive only. Be aggressive.
- Eliminate the nature observing area and expose more of the river to the town.
- Remove the trailer on the beach. It is an eyesore.
- Build a walking arched bridge from the beach to the other side and have two slides on either side for the little ones to slide into the water. People can canoe and/or kayak under the bridge if it is arched.
- Make sure there is a parking area at the end of the street.
- There should be a tubing park at the ski hill.
- Narrow Lakeshore Drive to one-way.
- Ensure supervision and safety with a playground by the river.
- Continue the guard rails up the hill and around the curve for more safety.
- Research means to decrease the Canada Goose population
- Place a fountain/sprinkler down by the river
- Would be nice to have a restaurant or chalet on the point overlooking the land to see the Valley.
- Skating rink on the river in the wintertime.
