

# The *LAST* STRAW.

Help **REDUCE** single-use waste.

We're asking local eating establishments to only provide straws on request.

**We live in a society with convenient products that are wasteful and the plastic straw fits that profile.**

For most able-bodied consumers, the plastic straw is something they can easily do without. That's why we're requesting that you only make plastic straws available upon request and offer suitable alternatives for your various drink types.
