Dedicated
Locator

Forecasting

Validity
Standardization

Data In / Data
Out

Compliance /
Enforcement

Dedicated Locator

- Move major infrastructure projects to Dedicated Locator to relieve stress and free up the regular pool of locators
- Members will be responsible for the Dedicated Locator on their own capital projects
- Dedicated Locator staff are not pulled from the regular pool of Locators

Forecasting

- Develop a new forecasting model
- Utilities, Municipalities and LSPs will forecast workloads by collecting and distributing on-going details related to capital projects
- LSPs are to show calculations to the Utilities and Municipalities based on the data
- Pilot Program starting in Ottawa in 2020

Validity Standardization

- Standardize the way locates are managed
- 60 day locate validity periods
- Same locate expiration date, based on the work to begin date
- Develop guidelines to share locates with sub-contractors

Compliance / Enforcement

- Alleviate confusion in the industry
- Clearly outline the rules, compliance process and the roles and responsibilities of each stakeholder
- Proposing a change to Member billing based on a performance-based model
- Consultation coming for By-Law changes

Data In / Data Out

- Reduce over-notification and eliminate other factors affecting LSP productivity
- Create a checklist of LSP needs that an Excavator must fulfill for a locate request
- Included in the curriculum of the Professional Locate Administrator Certification coming in 2020
