

Don't Risk It, Just Kick It!

Our lakes provide **drinking water**, support **wildlife** and offer opportunities for recreation.

Slush on tires can contain salts, antifreeze and other substances that can harm our lakes.

Before driving onto a frozen lake:

- Kick slush out of your wheel wells.
- Ensure the vehicle has no leaks.

When leaving the frozen lake:

- Take all your garbage with you.
- Ensure dog waste is properly collected to dispose of in the garbage.

To report a pollution spill on land or water, please call **1-800-268-6060**
