Reg. 170/03 Schedule 22 will be report to: available for inspection. **Hardcopy Address:** Did you provide a copy of your annual VALE report to all Interested Authorities you 18 Rink Street c/o Water Plants report to for each Designated Facility? Copper Cliff, Ontario, P0M 1N0 Yes [ ] No [  $\checkmark$ ] Web Address: www.greatersudbury.ca

Note: For the following tables below, additional rows or columns may be added or an appendix may be attached to the report

The Vermilion Water Treatment Plant also supplies water to the plumbing works system that is owned and operated by VALE for use by its employees and its process. The Vermilion Water Treatment Plant as owned and operated by Vale has developed a comprehensive Drinking Water Quality Management System as required by legislation. QMS Policy Statement: "Vale is committed to providing safe drinking water to the City of Greater Sudbury municipal drinking water distribution system, in accordance with all applicable legislative and regulatory requirements, as well as the maintenance and continual improvement of a Quality Management System".

Ministry of the Ministère de

#### **Drinking-Water Systems Regulation O. Reg. 170/03**

List all Drinking-Water Systems (if any), which receive all their drinking water from your system:

| <b>Drinking Water System Name</b> |                               | <b>Drinking Water System Number</b> |  |  |  |
|-----------------------------------|-------------------------------|-------------------------------------|--|--|--|
|                                   | Vermilion Distribution system | 260006789                           |  |  |  |

Did you provide a copy of your annual report to all Drinking-Water System owners that are connected to you and to whom you provide all its drinking water?

Yes [ **V** ] No [ ]

Indicate how you notified system users that your annual report is available and is free of charge.

#### **Describe your Drinking-Water System**

In 1972, INCO Limited constructed the INCO Vermilion Water Treatment Plant, in order to produce process water for the INCO mining operations as well as potable drinking water for INCO staff and the surrounding communities. In 2007, INCO became CVRD INCO and a name change to Vale Inco was completed late in the year. As of 2010, now named VALE, VALE's Vermilion Water Treatment Plant is designed for a total production capacity of 81,800 m3/day (21.7M USGPD) and is supplied with surface water from the Vermilion River.

All process equipment is installed inside a heated and ventilated building, except for the caustic and alum storage tanks that are installed outside. The water treatment plant consists of the following main elements:

- One rapid mix tank;
- One hydraulic retention time tank;
- One PULSATUBE sludge blanket type clarifier;
- Five AQUAZUR V gravity sand filters;
- One clear-well located below the filters;
- Treated and backwash water vertical turbine pumping station;
- Air scouring blower and air instrument compressor room;
- Chemical storage and dosing system;
- External heat traced caustic and alum storage tanks;
- Liquefied Chlorine (tonners) stored and used in Chlorination room;
- Plant control room and laboratory room.

Ministry of the Ministère de Environment l'Environnemen

#### **Drinking-Water Systems Regulation O. Reg. 170/03**

#### **Process Flow Description**

- 1. Raw water is pumped from the Vermilion River to the VALE Vermilion WTP.
- 2. Raw water flow control is achieved with a by-pass pipe and control valve. The by-pass control valve automatically adjusts based on the water level in the clarifier. When the level in the clarifier rises, the by-pass flow control valve opens to decrease the flow to the plant. The by-pass is connected to the U-drain of the WTP.

| List all | water | treatment | chemicals | used over | r this re | porting | period |
|----------|-------|-----------|-----------|-----------|-----------|---------|--------|
|----------|-------|-----------|-----------|-----------|-----------|---------|--------|

- Aluminum Sulfate
- Sodium Hydroxide
- Liquefied Chlorine
- Hydro-fluosilicic Acid
- Polyfloc CP1160 35%
- Polyphosphate (Flogard POT6102)

#### Were any significant expenses incurred to?

Vale has also complied with the requirement for DWQMS and has received full scope accreditation from SAI- Global on behalf of the MOECP. Vale has completed all internal and external audit cycles with action taken on findings accordingly.

- [ ] Install required equipment
- [X] Repair required equipment
- [X] Replace required equipment

Please provide a brief description and breakdown of monetary expenses incurred

Adding sand to all five filters

Repairing surface wash headers on C, D and E filters

Repaired Water main breaks

Repaired Fluoride tank #1

Replaced one Compressor

Water Line Box repairs

Water Meter Manhole repairs

New Ventilation System for VRPH

5 MG Tank and Booster Station Design

Distribution valve location and replacement plan

Provide details on the notices submitted in accordance with subsection 18(1) of the Safe Drinking-Water Act or section 16-4 of Schedule 16 of O.Reg.170/03 and reported to Spills Action Centre:

| Incident  | Parameter         | Result | Unit of | <b>Corrective Action</b> | Corrective         |
