Ministry of the Ministère de

Drinking-Water Systems Regulation O. Reg. 170/03

Part III Form 2 Section 11. ANNUAL REPORT.

Drinking-Water System Number: Drinking-Water System Name: Drinking-Water System Owner: Drinking-Water System Category: Period being reported:

WW No. 240000075
Vermilion Water Treatment Plant
VALE
Municipal and Private Water Works
January 1st 2021 to December 31st 2021

Complete if your Category is Large Municipal Residential or Small Municipal Residential

Does your Drinking-Water System serve more than 10,000 people? Yes [V] No []

Is your annual report available to the public at no charge on a web site on the Internet?

Yes [**√**] No []

Location where Summary Report required under O. Reg. 170/03 Schedule 22 will be available for inspection.

Hardcopy Address:

VALE

18 Rink Street

c/o Water Plants

Copper Cliff, Ontario, P0M 1N0

Web Address:

www.greatersudbury.ca

Complete for all other Categories.

Number of Designated Facilities served:

0

Did you provide a copy of your annual report to all Designated Facilities you serve?

Yes [] No [**√**]

Number of Interested Authorities you report to: 0

Did you provide a copy of your annual report to all Interested Authorities you report to for each Designated Facility?

Yes [] No $[\checkmark]$

Note: For the following tables below, additional rows or columns may be added or an appendix may be attached to the report

The Vermilion Water Treatment Plant also supplies water to the plumbing works system that is owned and operated by VALE for use by its employees and its process. The Vermilion Water Treatment Plant as owned and operated by Vale has developed a comprehensive Drinking Water Quality Management System as required by legislation. QMS Policy Statement: "Vale is committed to providing safe drinking water to the City of Greater Sudbury municipal drinking water distribution system, in accordance with all applicable legislative and regulatory requirements, as well as to the maintenance and continual improvement of a Quality Management System".

Ministry of the Ministère de

Drinking-Water Systems Regulation O. Reg. 170/03

List all Drinking-Water Systems (if any), which receive all their drinking water from your system:

Drinking Water System Name	Drinking Water System Number		
Vermilion Distribution system	260006789		

Did you provide a copy of your annual report to all Drinking-Water System owners that are connected to you and to whom you provide all its drinking water?

Yes [**√**] No []

Indicate how you notified system users that your annual report is available and is free of charge.

Describe your Drinking-Water System

In 1972, INCO Limited constructed the INCO Vermilion Water Treatment Plant, in order to produce process water for the INCO mining operations as well as potable drinking water for INCO staff and the surrounding communities. In 2007, INCO became CVRD INCO and a name change to Vale Inco was completed late in the year. As of 2010, now named VALE, VALE's Vermilion Water Treatment Plant is designed for a total production capacity of 81,800 m3/day (21.7M USGPD) and is supplied with surface water from the Vermilion River.

All process equipment is installed inside a heated and ventilated building, except for the caustic and alum storage tanks that are installed outside. The water treatment plant consists of the following main elements:

- One rapid mix tank;
- One hydraulic retention time tank;
- One PULSATUBE sludge blanket type clarifier;
- Five AQUAZUR V gravity sand filters;
- One clear-well located below the filters;
- Treated and backwash water vertical turbine pumping station;
- Air scouring blower and air instrument compressor room;
- Chemical storage and dosing system;
- External heat traced caustic and alum storage tanks;
- Liquefied Chlorine (tonners) stored and used in Chlorination room;
- Plant control room and laboratory room.

Ministry of the Ministère de Environment l'Environnemen

Drinking-Water Systems Regulation O. Reg. 170/03

Process Flow Description

- 1. Raw water is pumped from the Vermilion River to the VALE Vermilion WTP.
- 2. Raw water flow control is achieved with a by-pass pipe and control valve. The by-pass control valve automatically adjusts based on the water level in the clarifier. When the level in the clarifier rises, the by-pass flow control valve opens to decrease the flow to the plant. The by-pass is connected to the U-drain of the WTP.

List all water treatment chemicals used over this reporting period

- Aluminum Sulfate
- Sodium Hydroxide
- Liquefied Chlorine
- Hydro-fluosilicic Acid
- Polyfloc CP1160 35%
- Polyphosphate (Flogard POT6102)

Were any significant expenses incurred to?

Vale has also complied with the requirement for DWQMS and has received full scope accreditation from SAI- Global on behalf of the MECP. Vale has completed all internal and external audit cycles with action taken on findings accordingly.

- [] Install required equipment
- [X] Repair required equipment
- [X] Replace required equipment

Please provide a brief description and breakdown of monetary expenses incurred

Replaced #1 Booster Pump at VWTP

Replaced Clay-Val for #3 and #4 Booster Pump

Repaired leak on Caustic Bulk Tank

Repaired Alum tank level sensor

Installed new Chlorine sensors on fence perimeters

Replaced a HFS distribution lines and chemical pump skid

Added a new HVAC system for the HFS room

Purchased new Delta V workstation

Installed a Hexafluorine safety shower in HFS room

Rebuilt 4 chlorinators

Replaced sludge pump

Repaired several valve chamber and boxes on distribution system

Replaced 6" Gate on Raw Water Line, 3 air releases on raw water line.

Replaced wood deck board at Vermilion River Pump House

Repaired 4" Fire Line at Vermilion WTP

Provide details on the notices submitted in accordance with subsection 18(1) of the Safe Drinking-Water Act or section 16-4 of Schedule 16 of O.Reg.170/03 and reported to Spills Action Centre:

Incident Date	Parameter	Result	Unit of Measure	Corrective Action	Corrective Action Date		
No Notices / No Reports in 2021							

Ministry of the Ministère de

Drinking-Water Systems Regulation O. Reg. 170/03

Microbiological testing done under the Schedule 10, 11 or 12 of Regulation 170/03, during this reporting period.

	Number of Samples	Range of E.Coli or Fecal Results (min #)-(max #)	Range of Total Coliform Results (min #)-(max #)	Number of HPC Samples	Range of HPC Results (min #)-(max #)
Raw	52	0– (NDOGT)	1 – (NDOGT)	N/A	N/A
Treated	52	0	0	52	<10 - 30
Plumbing Works	98	0	0	98	<10 – 2020
N/A	=Not Appli	icable		NDOGT= Ove	ergrowth

Operational testing done under Schedule 7, 8 or 9 of Regulation 170/03 during the period covered by this Annual Report.

	FINISHED WATER ANALYSIS						
	OPERATOR BENCH ANALYSIS			CO	NTINUOUS MONITORS		
	Number of Grab Samples	Range of Results (min #)-(max #)		Number of Samples As Per Note Below	Range of Results (min #)-(max #)		
Turbidity	729	(0.039)-(0.800) NTU		8760	$(0.00 \ NTU) - (1.02 \ NTU)$		
Chlorine	2137	(1.27)-(2.60) mg/L Free		8760	(0.00) - (4.99) mg/L Free		
Fluoride (If the DWS provides fluoridation)	688	(0.20)-(0.86) mg/L		8760	(0.00) - (2.00) mg/L		

NOTE: For continuous monitors use 8760 as the number of samples.

NOTE: Record the unit of measure if it is not milligrams per litre

^{**}Ranges min & max due to calibrations and equipment servicing captured on trending**
