**Comments/Suggestions:**

WARD 12 COUNCILLOR Joscelyne Landry-Altmann made me aware of hers, and WARD 4 councillor Evelyn Dutrisac's plan to request that LED lights be put in along Kathleen Street. I live on this street and I can say that there have been a number of breakins in my building that would have been averted with more street lighting. For this reason, I support this request.

**Description of project/program:**

**Estimated one-time cost:**

**Estimated on-going costs:**

**Comments/Suggestions:**  
Install LED lighting on lampposts on Kathleen Street and area.

**Description of project/program:**  
Installing LED lighting on lampposts on Kathleen street and area would provide stronger lighting, thereby, hopefully, deterring crime and vandalism. This means savings in police intervention. Also, although that is costly in the short term, it means long-term savings. Finally, it is an environmentally responsible move for the city.

**Estimated one-time cost:**  
Costs could amount to \$20,000 in purchases and \$30,000 in installation.

**Estimated on-going costs:**  
The long-term savings are higher since the lifespan of those bulbs is 40 years.

**Comments/Suggestions:**  
LED lighting installation on Kathleen street from Notre Dame to Frood RD.

**Description of project/program:**  
Installing LED lighting would benefit our community because LED lighting is a lot brighter then the lights we have know which would make it a safer street to use. And also help in crime prevention .

**Estimated one-time cost:**  
Estimated cost \$21k for lighting \$29k for installation for a total of \$50 k There would also be a savings on energy cost.

**Estimated on-going costs:**  
Savings on operating cost
