1 PURPOSE

1.1 The Council of The City of Greater Sudbury is passing this By-law to permit the licensing, regulating, and governing of taxi, limousine and shuttle transportation within the City. The Council finds that there is a public interest in ensuring the accessibility of safe, affordable point-to-point transportation throughout the entire City for those members of the public who lack access to a personal vehicle.

By enacting this By-law, the Council intends to support the purposes of health and safety, nuisance control and consumer protection for members of the public, inherent in the licensing, regulation, and governance of the taxi, limousine and shuttle industries within the City of Greater Sudbury. These purposes are supported, in part, through By-law provisions which provide for:

- a) the licensing of owners, brokers and drivers;
- b) a system of municipal governance for taxi, limousine and shuttle owners, brokers and drivers;
- c) vehicle inspections;
- d) restrictions on tariffs;
- e) penalties for non-compliance within the By-law; and
- f) measures to ensure that taxis remain available throughout the City of Greater Sudbury, not just in the central City.

By passing this By-law Council also intends to support the continued economic development of the taxi, limousine and shuttle industry.

The City is passing this By-law pursuant to the provisions of the *Municipal Act, 2001*, S.O. 2001 c.25 as well as the *Provincial Offences Act*, R.S.O. 1990, c.P.33.

10 TAXICAB ZONES AND LIMITATIONS ON NUMBERS

10.1 Purpose

Prior to the passage of this By-law a report was commissioned from Hara Associates considering the imposition of conditions relegating taxicabs within the City of Greater Sudbury to specific geographic areas. The report was written after input from public meetings and consultations with affected stakeholders across the City.

The report, which was adopted by City Council, concludes that it is appropriate to restrict certain classes of taxicabs to certain geographic areas of the City, as set out in this section, on the basis of consumer protection.

Part of the reason for this restriction is historic. The City of Greater Sudbury was formed through the amalgamation of seven member municipalities each having its own By-law licensing and regulating taxicabs within its own municipal boundaries. The effect of this system was that taxicab licenses within the former City of Sudbury granted a monopoly to operate within the former City and were limited in number; while each of the outlying, rural municipalities had their own taxicabs with similar geographic restrictions on their areas of operation.

As a result of this historic system, consumers of taxicab services, particularly within the outlying, rural municipalities were able to obtain a taxicab operating from within their area municipality within a timely fashion.

The amalgamated City of Greater Sudbury is now comprised of three thousand, six hundred and twenty-seven square kilometres and contains one thousand, six hundred and thirty-seven kilometres of municipal public roads. The vast majority of this area is rural.

One of the purposes outlined in the report and adopted by City Council is to ensure that residents and visitors within the outlying areas of the City of Greater Sudbury continue to have a level of taxicab service available to them which is timely and available from sources outside of the downtown core of the new City. The restrictions which follow on certain classes of taxicab licenses are intended to protect this broader public interest.

10.2 Licenses issued by zone - Schedule 'E'

A taxicab owner's license shall be issued for one zone only being either Zone 1, Zone 2, or Zone 2 "Plus Airport", defined as separate classes of taxicab owner's license within the following areas of the City:

ESTIMATION OF THE TAXICABS NEEDED IN ZONE 1

The number of taxis per 1,000 population shall be calculated using the following steps:

1. **Obtain population estimate for Zone 1:** Obtain the most recent available population estimate for Zone 1 from municipal sources. If the estimate is not more than 12 months old, proceed to step 2. If the estimate is more than 12 months old, proceed to step 3.
2. **Procedure if population estimate is recent:** Divide the population estimate by 1,000 and round to the nearest whole taxicab. *The result should be reported and considered in review of numbers of licenses issued for Zone 1.*
3. **Procedure if population estimate is not recent:** If the population estimate is not recent, it shall be updated by assuming that that growth in population of Zone 1 is proportionate to the growth in the labour force in City of Greater Sudbury.¹ This may be accomplished using Worksheet A of this schedule, with the following steps:
 - a. Enter the Zone 1 population estimate in Row A.
 - b. **Obtain Labour Force Estimate for Base Period.** Obtain the estimated size of the Labour Force for the City of Greater Sudbury for the month corresponding to the most recent Zone 1 population estimate. Enter in Row B.

The Labour Force estimate for steps 3b and 3c is to be obtained from Labour Force Survey, Statistics Canada. (CANSIM reference: v3473123 - Table 282-0052: LFS estimates by census metropolitan area, 3-month moving average; Sudbury, Ontario; Population; Both sexes; 15 years and over (Persons – Thousands)² If this data series has been discontinued by Statistics Canada, the Chief Taxi Inspector may designate a new proxy series for the Labour Force, giving first preference to related monthly series available from Statistics Canada.
 - c. **Obtain Labour Force Estimate for Current Period.** Obtain the estimated size of the Labour Force for the City of Greater Sudbury for the most recent available month of data. Enter in Row C.
 - d. **Calculate recent growth in Labour Force for Greater Sudbury.** Calculate the percentage growth in the Greater Sudbury Labour Force using the formula: $(D=[C÷B - 1]×100)$.
 - e. **Estimate Current Population of Zone 1.** Multiply the past estimate of Zone 1 population by the recent growth in the Labour Force. This may be done using the formula: $[A×(1+D÷100)]$
 - f. **Calculate Taxis Needed in Zone 1.** Divide the updated population estimate by 1,000 and round to the nearest whole taxicab. $[E÷1000]$ *The result should be reported and considered in review of numbers of licenses issued for Zone 1.*

¹ Statistics Canada maintains estimates of the population of Greater Sudbury, and of the Labour Force of Greater Sudbury. Growth in Labour force has been selected as a proxy for growth in population in Zone 1 because Labour Force estimates are produced on a timelier basis.

² As of June 2003 this series is available through the Statistics Canada Internet web site for a nominal fee payable on line by credit card.
