SCHEDULE "A"

To the Committee overseeing the "Applications for Minor Variance"

At present there is an existing garage located on the property which just happens to be in an ideal location for a Camp. This location satisfies all the by-law requirements for setbacks and is the ideal location for a Camp. Therefore we would like to re-locate the existing garage to the location indicated on the plot plan. The proposed location is flat ground with no trees and located towards the end of our current driveway. As you can see by the plot plan this would infringe, at least in part, onto the current setback.

There is a gate blocking access to this property, if you would like a site visit please do not hesitate to call Cary [REDACTED].

Thank you for your consideration.

Cary McGlade

Subject: 83 Simon Lake Drive - Above Ground Pool Permission (File 58451)

The sender [REDACTED] is outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello Adam,

With respect to the proposed pool, Conservation Sudbury is generally permissive of above ground pools provided the fill required to level the pool area is kept to the smallest possible footprint. It is our understanding that grading works will include levelling of the existing ground and installation of a 1' deep granular base pad.

Given the above condition and understanding, please consider this email as permission under Section 28 of the Conservation Authorities Act for the installation of the proposed 15' by 30' above ground pool.

Please note that the flood elevation on Simon Lake during the Regulatory Storm is 235.48 m above sea level (CGVD28). During a flood event the pool may be subject to damages caused by flooding.

I am also the agent who has been assigned review of your Section 28 application for the house addition and deck. I aim to reach out before the end of next week once I have completed my initial review.

Regards,
Phillipa

Hi Melanie

Sorry about that. Here is the signed page.

Is the 3-4 week wait for all permits. I am looking to put a pool in starting in a couple of weeks and was just going to get that permit started. The pool is above ground and would require very little ground work to get started. Is this something that I can get going on while the permit works its way through? I talked to Danielle Marcoux last fall about this project and she said that above ground pools are okay. Can you comment on this? The pool would be installed within the high water mark boundary.

Thanks

Hi Adam,

Can you send over a signed last page.

I have construction drawings from when it was distributed through City of Greater Sudbury building services. Are these still the correct ones?

I'll send over an online invoice for the \$150 permit deposit – this will come as a separate email from "Square"

I'll get your permit application into the hands of a regulations officer. Please note that this is our busy season and the initial review may take 3-4 weeks.

Subject: 83 Simon Lake Drive- Building permit circulation, addition and decks

Hi Adam,

Conservation Sudbury was circulated your building permit application for the decks and addition. There is significant floodplain on the property that appears to go as high as the house and as a result a permit from Conservation Sudbury will be required. The application form can be found here:
<https://www.conservationsudbury.ca/wp-content/uploads/2023/01/Permit-Application-Form.pdf>

An elevation/topo survey (completed by a qualified professional) will be required as part of a complete application. The survey must include:

- The floodplain as a contour on the site plan. The flood elevation at this location is 235.48m above sea level (CGVD28)
- The elevation of each of the openings into the structure that is at or below 235.78 metres. This must be shown on a sketch, and openings include windows, doors, vents, etc.
- The ground elevation at the foundation of the existing building, at a minimum of 3 locations on each side of the building and must reflect the lowest ground elevation on each side.
- The ground elevation at 2 metres from the foundation of the existing building, at a minimum of 3 locations on each side of the building and must reflect the lowest ground elevation on each side.
- The ground elevation along the perimeter of the proposed addition, and within 2 metres of the perimeter (similar to that described above, for the existing dwelling).
- The results of the elevation survey must be submitted to Conservation Sudbury as an official stamped letter/report

I've included a list of surveyors and engineers that can complete an elevation survey for you. This list is not exhaustive. I've also included our policy for additions for houses within a floodplain.

Once the survey has been completed we can discuss next steps.

 - e) All disturbed areas must be stabilized as soon as possible after project completion.
 - f) Temporary sediment and erosion control measures must be removed once all disturbed soils in the project area have completely stabilized.
- 6) Materials to be used for the project must not be taken from the shoreline or below the high water level of any water body or wetland.
- 7) Materials that are removed from the site are not to be placed in an area regulated by Conservation Sudbury without prior permission from this office.
